FOREWORD

This Volume of the Department of Defense Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures." It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Unified and Specified Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components")

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Comptroller of the Department of Defense.

The reporting requirements contained in this regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 7750.5-M, "Procedures for Management of Information Require merits."

Forward recommended changes to this Volume of Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Comptroller of the Department of Defense
Room 3E822
The Pentagon
Washington, DC 20301-1100

DoD Components will be provided copies of this Volume of the Regulation through normal publication channels. Other Federal Agencies and the public may obtain copies of this Volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161, (703) 487-4650.

A handwritten signature in black ink, reading "Donald B. Shycoff".

Donald B. Shycoff
Acting Comptroller

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD components with the policy, regulation, and procedures within the area of responsibility of the Comptroller, Department of Defense. The Regulation consists of the following 15 volumes:

- | | |
|---|--|
| <ol style="list-style-type: none"> 1. General Financial Management Information, Systems, and Requirements 2. Budget Formulation and Presentation 3. Budget Execution - Availability and use of Budgetary Resources 4. Accounting Policy and Procedures 5. Disbursing Policy and Procedures 6. Reporting Policy and Procedures | <ol style="list-style-type: none"> 7. Military Pay Policy and Procedures 8. Civilian Pay Policy and Procedures 9. Travel Policy and Procedures 10. Contract Payment Policy and Procedures 11. Reimbursable Operations, Policy and Procedures 12. Special Accounts, Funds and Programs 13. Nonappropriated Funds Policy and Procedures 14. Financial Management Education and Training 15. Security Assistance Policy and Procedures |
|---|--|

AUTHORIZATION

This Regulation is issued by the Comptroller, Department of Defense under authority of Department of Defense Instruction

7000.14 "DoD Financial Management Policy and Procedures."

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The 6 digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A. 1. a. (1) (a)
SUBPARAGRAPHS

PUBLICATIONS SUPERSEDED

This Volume of the Regulation (Volume 1) will supersede the following:

DoD 7220.9-M "DoD Finance and Accounting Manual" (Chapters: 11, 12, 13, 14 17, Appendix A, Appendix B, Appendix C, and Appendix D).

DoD Directive 7045.16 "Financial Management Systems"

DoD Instruction 7045.19 "DoD Financial Management Systems Awards Program"

DEFINITIONS

1. Purpose

The purpose of this listing is to provide definitions for terms used in the Regulation, which are unique to the Federal Government or the Department of Defense. This list does not define terms when the normal dictionary definitions are applicable.

2. Basic Concepts

This is by no means an exhaustive list of all accounting terms. Unique terms that are of significance or importance in accounting processes discussed in various Volumes of this Regulation have been included. Suggestions for the definition of additional terms may be submitted directly to the Director, Defense Finance and Accounting Service, Washington, D.C. 20376-5-001.

3. List of Definitions:

Acceptance (Contract) - A formal certification that the goods or services have been received and that they conform to the terms of the contract.

Accessorial Charges - Costs incurred for packing, crating, and handling related to sales or shipments of property.

Accounting Classification Code - A series of alpha and numeric characters appearing on accounting source documents. The characters provide the information necessary to enter transactions into DoD accounting systems.

Accounting Entity - In the Department of Defense the accounting entity is the DoD Component; that is, the Department of the Army, the Department of the Navy, the Department of the Air Force, and the OSD and/or the Defense Agencies, regardless of appropriation of fund.

Accounting Objectives - Goals toward which accounting efforts are directed. The goals are derived directly from legal and regulatory requirements and the needs of intended users.

Accounting System Design Documentation - Documentation supporting the design of an accounting system that assures all relevant accounting principles, standards, and related requirements have been addressed. It consists of three distinct documentation packages: (1) the functional accounting system concept design, (2) the functional detailed design, and (3) various automated data processing documentation packages which track functional user requirements to specific computer programs. See Chapter 3 of this Volume for specific documentation requirements.

Accounts Payable - Amounts owed by the accounting entity for goods and services received. (Also see "Accrued Expenditures - Unpaid.")

Accounts Receivable from the Government - Amounts due from U.S. Government organizations or funds. It also includes amounts due from U.S. Government sources that are deposited into U.S. Treasury general fund receipt accounts when collected.

Accounts Receivable from the Public - All accounts receivable arising from the sale of goods and services and from operations involving other than Federal Government organizations. It includes amounts from public sources that are deposited into U.S. Treasury general fund receipt accounts when collected. Examples are debts owed by military personnel, civilian employees, contractors, and nonappropriated fund instrumentalities.

Accrued Expenditures - The term used for the credits entered into the budgetary accounts to recognize liabilities incurred for (1) services performed by employees, contractors, other Government accounting entities, vendors, carriers, grantees, lessors, etc.; (2) goods and other tangible property received; and (3) items such as annuities or insurance claims for which no current service is required. Accrued expenditures are categorized as either paid or unpaid.

Accrued Expenditure-Paid - The budgetary account which matches the proprietary account "funds disbursed." It represents the dollar value

of goods and services received for which payment has been made.

Accrued Expenditure-Unpaid - The budgetary account which matches the proprietary account "accounts payable." It represents the dollar value of goods and services received for which payment has not been made. (Also see "Accounts Payable.")

Accrued Variance (Foreign Currency Fluctuations) - The difference between unliquidated obligations at the budget rate (approved execution rate) and the foreign exchange rate current at the time of payment.

Acquisition Cost - Consists of the amount, net of both trade and cash discounts, paid for the property, plus the transportation costs. (See "Discount (Cash)" and "Discount (Trade).")

Administrative Subdivision of Funds - Any subdivision or legal restriction of an appropriation or fund that makes funds available in a specified amount for incurring obligations. Frequently used subdivisions include apportionments, OSD release documents, allocations, suballocations, allotments and suballotments.

Advance of Pay - A prepayment made available to an employee in a pay status.

Advances - Disbursements of funds from Department of Treasury accounts before performance has been certified by an authorized DoD receiving official. It differs from a financing payment in that no performance has occurred.

Agency Financial Management System. The total of agency financial systems, both manual and automated, for planning, budget formulation and execution, program and administrative accounting; as well as all other systems for recording and classifying financial data and reporting financial management information, including purchasing, property, and inventory.

1. Financial Management Information. All information that is expressed in dollar terms on federal spending, collections, assets, liabilities, equity, and related budgetary and accounting transactions and balances.

2. Accounting System. The structure of methods and procedures used to record, classify, accumulate, analyze, summarize, and report information on the financial condition and operating position. It is comprised of the various functional operations involved in authorizing, recording, classifying, analyzing, and reporting financial information related to financing sources, gains, expenses, losses, transfers, assets, liabilities, equity, and internal controls. It encompasses the procedures and processes from the point a transaction is authorized through processing the data, either manually or automatically, to issuance of financial and management information statements and reports.

a. Primary Accounting Systems. The aggregation and consummation of like financial management information aligned by the major operational areas and summarized to support financial and management information needs. There are five Primary accounting systems made up of the single, standard integrated Departmental accounting systems which controls all financial management information. The Primary accounting systems are General, Business Operations Fund (Stock Fund and Industrial Fund), Trust Fund, Civilian Pay, and Military Pay.

b. Administrative Accounting Systems:

1. Accounting Support Systems. The manual or automated programs, procedures and processes which authorize, record, classify, analyze, and report on financial management information for one of the Primary accounting systems. Accounting Support systems provide general ledger control and financial information on operations for consolidation to the Primary accounting systems.

2. Subsidiary Accounting Systems. The manual or automated programs, procedures and processes for one of the various functional operations involved with revenues, expenses, assets, liabilities, and equity. The Subsidiary accounting systems form the foundation and audit trail for the Primary accounting systems and the Accounting Support systems.

c. Accounting System Modules.

Modules are distinguished by the fact that their functions and systems of internal controls are embodied in the accounting system. As such, modules are fully integrated subsystems of an accounting system, and they are inventoried and evaluated in conjunction with the accounting system.

d. Feeder Systems.

The manual or automated programs, procedures and processes which develop data required to initiate an accounting or financial transaction but do not perform an accounting operation (e.g., personnel, property, or logistics systems).

Allocation and Suballocation - An authorization by a designated official of a DoD Component making funds available within a prescribed amount to an operating Agency for the purpose of making allotments and incurring obligations.

Allocations - Departmental-level accounting entity distributions of apportionments, or funds that do not require apportionment, to an operating Agency or other intermediate level accounting entity.

Allotment and Suballotment - An authorization by the Head of an operating Agency, or designee, to the Head of any organizational unit to incur obligations within a specified amount; a formal distribution of an allocation or suballocation and must contain at least the same legal and other limitations applicable to the allocation or suballocation. A distribution of budget authority to an installation-level accounting entity.

Annual (1-Year) Authority - Budget authority that is available for obligation only during a specified fiscal year and expires at the end of that time.

Anticipated Reimbursements - The dollar value of orders expected to be received during the forthcoming fiscal year. Anticipated reimbursements do not create obligational authority until an actual order is received and accepted. There is an exception to this rule for business operation funds.

Antideficiency Act - Legislation enacted by Congress to prevent the incurring of obligations or the making of expenditures (outlays) in excess of amounts available in appropriations or funds; to fix responsibility within an agency for the creation of any obligation or the making of any expenditure in excess of apportionment or reapportionment or in excess of other subdivisions established pursuant to sections 1341 and 1517 of 31 U.S.C.; and to assist in bringing about the most effective and economical use of appropriations and funds.

Apportionment and Reapportionment - A distribution made by Office of Management and Budget (OMB) of amounts available for obligation in an appropriation or fund account into amounts available for specified time periods, activities, projects, objects, or combinations thereof. The amounts so apportioned limit the obligations that may be incurred.

Appropriation Limitations - Statutory and other special restrictions which impose a restriction on the availability of funds or the authority to obligate or expend appropriations for certain objects or purposes; such as, family housing.

Appropriation Warrant - An official U.S. Treasury document that provides the dollar amounts established in the general and detailed appropriation accounts of the U.S. Treasury pursuant to Appropriation Acts authorized by law. It serves as a convenient source document for entries into accounts that establish the amount of money authorized to be withdrawn from the U.S. Treasury.

Appropriations - Statutory authority to incur obligations and to make payments out of the U.S. Treasury for specified purposes. For purposes of the Antideficiency Act Sections 1341 and 1517 of 31 U.S.C.), "appropriations" is defined as appropriations, funds, and authority to create obligations in advance of appropriations or any other authority making funds available for obligation or expenditure. (See "Contract Authority" and "Continuing Resolution.")

Asset Use Charge - A charge for the use of DoD assets (facilities and/or equipment) to recoup depreciation and interest on investment.

Bench Stock (Also Shop Stock) - Inventory held by a cost center for use as indirect material and used in support of numerous small projects or activities carried out by the cost center. Small items such as screws, washers, and lubricants characterize this type of stock.

Book Value - The original acquisition cost of a capital asset less the total recorded accumulated depreciation.

Borrowing Authority - Statutory authority to incur obligations and to make payments for specified purposes out of borrowed money. Within the Department of Defense, borrowing authority is used for mortgage assumptions under the Homeowners Assistance Program and for loans from the Federal Financing Bank.

Budget Authority - Authority provided by law to enter into obligations that will result in immediate or future outlays involving Federal Government funds. The basic forms of budget authority are appropriations, authority to borrow, and contract authority. Budget authority relates to direct programs. (Also see "Obligational Authority.")

Budget Rate - A foreign currency exchange rate provided to DoD Components for use in preparing budget submissions during budget formulation and for recording obligations during budget execution. Budget rates are provided by the DoD Comptroller and may be modified by the Congress. During execution, foreign currency obligations are recorded using the budget rate (rates approved for execution). Also see Foreign Currency Fluctuations.

Budgetary Resources - For purposes of budget execution, budgetary resources include new budget authority, available unobligated balances at the beginning of the year, reimbursements and other income (also known as offsetting collections credited to an appropriation or fund account), recoveries of prior year obligations from unexpired accounts, and restorations. In the case of reimbursable work, budgetary resources available for obligation are comprised of earned reimbursements and unfilled customer orders (limited by the amounts collected in advance for orders from the public). In the case of loan

programs, budgetary resources available for obligation from loan repayments and interest on loans are comprised of actual collections when authorized to be used.

Business Concern - Any person or organization engaged in a profession, trade, or business, and nonprofit entities (including State and local governments, but excluding Federal entities) operating as contractors.

Cash-Flow Process - Each process of collecting or disbursing moneys for Agency programs or operations, and for balances held outside of the U.S. Treasury.

Cash-Flow Report - A document summarizing each unique cash-flow process and corresponding opportunities for new cash management improvements.

Cash Held at Personal Risk - Cash held by authorized disbursing officers, their cashiers, and their agent officers, including alternates, for making miscellaneous cash payments, meeting cash payrolls or making change; funds established for making small purchases; imprest funds; cash held pending delivery to other disbursing officers; and for other purposes specifically authorized by law.

Cashier - An officer or employee of a Federal Department, Agency or Corporation who, having been recommended by the head of the activity, has been designated as a cashier by the officer responsible for making disbursements and is authorized to perform limited cash disbursing functions or other cash operations.

Cash Management - Practices and techniques designed to accelerate and control collections, ensure prompt deposit of receipts, improve control over disbursement methods, and minimize idle cash balances.

Cash Management Review - An ongoing study of an Agency's cash-flows and corresponding cash management processes or mechanisms conducted to identify implementable improvement opportunities in an Agency's cash management practices.

Centrally Managed Allotment - Authority issued by the holder of an allocation for incurring obligations for a specific purpose and in a specific amount. It is administered by publishing a centrally-managed allotment account number that permits authorized officials to charge the account for authorized purposes without further determination or certification of fund availability for individual transactions.

Clearing Accounts - Accounts established solely to temporarily hold general, special, or trust fund collections or disbursements pending clearance to the applicable receipt or expenditure budgetary account. Except for clearance to the applicable receipt or expenditure budgetary account, clearing accounts are not available for obligation or expenditure.

Collections - Amounts received during the fiscal year. Collections are classified into two major categories: budget receipts and offsetting collections. Offsetting collections are classified into two major categories: offsetting receipts and collections credited to appropriation or fund accounts.

Commitment - An administrative reservation of funds based on firm procurement requests, unaccepted customer orders, Directives, and equivalent instruments.

Compensated Absence - An employee absence for vacation, illness, jury duty, or military leave for which the employee is paid.

Component Debt - Debt incurred by DoD Components and generally associated with housing programs determined to be necessary to carry out the DoD mission.

Component Liaison Office - When DFAS was established, each Military Department and the Defense Logistics Agency (DLA) formed financial management liaison offices in their Headquarters. The primary purpose of these staffs was to provide adequate communication among DFAS, and its larger customers; ensure the adequate dissemination of information; and help coordinate DoD finance and accounting policy and other issues.

Some of the liaison functions at the Departmental level are still required to ensure adequate communications and coordination of finance and accounting issues among DFAS and DoD Components. DoD Agencies may establish a liaison focal point to interface with DFAS on an as required basis.

Conceptual Design of Accounting System - Documentation of the process that leads to a decision to develop a new accounting system or system segment, or to initiate a major upgrade effort. Documentation reveals the deficiencies in the current system, the accounting entities involved, the parameters of the accounting system, the accounting structure, security considerations, the alternatives considered, and the economic analysis developed to support a decision.

Consolidated Working Fund Accounts - Accounts established to hold funds transferred from other Agencies, DoD Components, or accounts until transferred to an appropriate account authorized by provisions of law. Applicable funds are not available for obligation or expenditure.

Contingent Liability - The term has two meanings. As a budgetary term, it represents variables that cannot be recorded as valid obligations. Such variables include (1) outstanding fixed price contracts containing escalation, price redetermination, or incentive clauses, or (2) contracts authorizing variations on quantities to be delivered, or (3) contracts where allowable interest may become payable by the U.S. Government on contractor claims supported by written appeals pursuant to the "DISPUTES" clause contained in the contract. As a proprietary accounting term, it represents an obligation, relating to a past transaction or other event or condition that may arise in consequence, as a future event now deemed possible but not probable. When the liability is determined to be possible, but not probable, the potential liability is disclosed as a footnote to the financial statements. When the potential liability become probable, it is recorded in the accounts as a current liability or a reduction of an asset. The budget definition is the preferred usage.

Continuing Resolution - The Congressional resolution, in the absence of an appropriation act, providing authority for Agencies to continue current operations. Such continuing resolutions are subject to OMB apportionment in the same manner as appropriations.

Contract. Any enforceable agreement, including rental and lease agreements and purchase orders, between an Agency and a business concern for the acquisition of property or services.

Contract Authority - Statutory authority to incur obligations but with liquidation of obligations dependent upon future actions of the Congress.

Contract Financing Payment - A Government disbursement of monies to a contractor under a contract clause or other authorization before physical delivery and the acceptance of supplies or services by the Government.

Contract Liquidating Authority - An appropriation, or reappropriation, enacted to pay the obligations incurred under the contract authority.

Contractor-Acquired Property - Property procured or otherwise provided by a contractor for the performance of a contract. It does not include government furnished material or equipment.

Cost - A monetary measure of the amount of resources applied to a cost objective. Within the Department of Defense, "costs" are identified following General Accounting Office accounting principles and standards as implemented in this Regulation. The fact that collections for some cost elements are deposited into Miscellaneous Receipts of the Treasury does not make those costs "extraneous." It simply means the Congress has not authorized such amounts to be retained by appropriation accounts. After costs have been identified, following Comptroller General cost accounting rules, a DoD Component may proceed to eliminate cost elements, or process waivers, in accordance with legal authorities.

Cost Center - A logical or physical grouping of one or more similar services for the purpose of identifying obligations or developing the cost

identification for the services. Services are grouped into cost centers in order to (1) normalize between services that use similar resources with different capabilities, (2) apply surcharges and discounts to services, (3) identify costs for different classes of the same service, or (4) identify obligations. This is the lowest level (that is, unit) or activity that is used to identify obligations or expend resources to produce a unit of work, and the lowest level of activity to segregate costs for management in order to assess efficiency, usage, examine trends, etc.

Cost Clearing Account - An account used when standard rates are employed. The actual expenses are debited to the cost clearing account and the amounts billed to customers are credited to the account. At the end of the fiscal year, the account is closed with analysis performed to determine if rates require adjustment.

Cost Finding - Procedures designed to accomplish an end result that would approximate the results that would have been obtained if a formal cost accounting system was in operation.

Cost Objective - An activity, operation, or completion of a unit of work to complete a specific job for which management decides to identify, measure, and accumulate costs. The cost objective must be discrete enough and described in writing to such a level of detail to form a basis to establish cost centers and output products.

Current Receivable - All receivables that will be due within the 12 months following the reporting period.

Current Value of Funds Rate - The average investment rate for the U.S. Treasury Tax and Loan accounts expressed as an annual rate and published by the U.S. Treasury in the "Federal Register" each year.

Customer Order - An order received and accepted by the performing activity from a customer. It is written evidence that a meeting of the minds has taken place and that certain goods and services will be provided to the tenderer of the order for payment of a dollar amount. The order must contain an original signature or equivalent of both the ordering activity and the

receiving activity and must specify a dollar amount. The specified dollar amount cannot be exceeded.

Cutoff Time - A time prescribed by a financial institution beyond which transactions presented or actions requested will be deferred to the next banking day's business.

Day - A calendar day, unless otherwise noted. If the day on which an action is required falls on a nonworking day, then day means the next working day.

Default - Failure to meet any obligation or term of a credit, grant, or other agreement.

Defense Business Operations Fund - The Defense Business Operations Fund, or the Fund, operates with financial principles that provide improved cost visibility and accountability to ensure business management and improve the decision making process. The Fund builds on revolving fund principles previously used for industrial and commercial-type activities. Successful implementation of the Fund is essential to achieve the following Defense Management Report initiatives: 1) consolidating like functions, 2) increasing cost visibility, and 3) realizing significant monetary savings through better business practices.

Deferrals - Budgetary resources which have been deferred as reserves to provide for contingencies to achieve savings made possible by or through changes in requirements or greater efficiency of operations or as specifically provided by law.

Definite Authority - Authority that is stated as a specific sum at the time it is granted. This includes authority stated as not to exceed a specified amount. Most DoD appropriations are for definite amounts of authority.

Delinquent - Billed amounts which are not paid within 30 days of the date of the initial demand or as of the due date specified in the contract or agreement.

Demand Cash Withdrawal - Commercial checks made payable to cash for withdrawal by the cashier.

Deposit - When used as a noun, means money that is being or has been presented for credit to the U.S. Treasury. Such transfers may be made by Agencies or directly by the remitter. All such transfers are effected through a Federal Reserve bank or other financial institution. When used as a verb, means the act of presenting moneys for credit to the U.S. Treasury by an official of an Agency.

Deposit Funds - Receipts held in suspense temporarily and later refunded or paid into some other Treasury fund or other entity held by the Department of Defense as banker or agent for others and paid out at the direction of the owner.

Deposit Fund Accounts - Expenditure accounts established to account for receipts (1) held in suspense temporarily and later refunded or paid into some other fund of the Government, or other entity, or (2) held by the Government as banker or agent for others and paid out at the direction of the owner. Such funds are not available for paying salaries, grants, or other expenses of the Government. Expenditures are often offset by receipts within this type of fund.

Depository Account - Interest or non-interest bearing checking account.

Deposit (Next Day) - A deposit made before the cutoff time on the day following the day on which the funds were received by the Agency. For example, if an Agency receives funds for deposit at 3 p.m. on Monday, and transmits the deposits to the bank by 2 p.m. on Tuesday (the depository's cutoff time) then next day deposit requirements are met.

Deposit (Same Day) - A deposit made before the cutoff time on the day on which the funds were received by the Agency. For example, if an Agency receives funds for deposit at 10 a.m. on Monday and transmits the deposits by 2 p.m. on Monday (the depository's cutoff time) then same day deposit has been achieved.

Depreciation - Depreciation recognizes the allocation of cost of depreciable physical plant, property, or equipment as an operating expense over the periods in which the assets are expected to provide benefits.

Direct Cite - Citation of customer funds as the financing source on documents leaving the DoD system, that is, contracts with commercial firms, General Services Administration, or Department of Transportation. The term direct cite is not valid if any DoD organization establishes a reimbursable order to a DoD appropriation account, or business operation fund. When direct cite is used, all accounting is accomplished by the ordering activity. The source documents are returned to the allotment holder who accomplishes all required accounting. In the case of the Foreign Military Sales program, it specifically refers to documents that result in a disbursement to other than a DoD organization (a contractor, other Federal Agency, or employee).

Direct Delivery - Items shipped directly from a contractor to a customer, whether from a consolidated military services procurement or a contract solely for that customer.

Direct Loan - An obligation created when the Government disburses the funds and contracts with the debtor for repayment, with or without interest, or when the Government acquires a guaranteed private loan in satisfaction of default or other claim.

Direct Program - The budget authority in an appropriation act. (See "Budget Authority".)

Disbursements (Net of Refunds) - The amount of checks issued, cash payments made, and "no-check-issued" disbursement transactions (charges to an appropriation or fund account that were initially charged to another appropriation or fund account with reimbursement effected without a check issuance) processed that were reported to the Treasury during the reporting period, including amounts reported on DD Forms 1400, "Statement of Interfund Transactions" and Statements of Intra-Governmental Transactions. It includes amounts of mortgages assumed, but does not include amounts of principal payments. Amount reported is net of

refunds collected and reported to the Treasury and does not include nonexpenditure transactions such as appropriation transfers or investments in U.S. government securities.

Disbursing Officer - An officer or employee of a Federal Department, Agency or Corporation designated to disburse moneys and render accounts according to laws and regulations governing the disbursement of public moneys.

Discount (Cash) - A reduction in the amount due on an account payable if paid within a stated period.

Discount (Trade) - A reduction in price, usually varying in percentage with volume of transactions, made by vendors to those engaged in certain businesses and allowable irrespective of the time when the account is paid.

DoD Component - For purposes of this Regulation, "DoD Component" refers to the following organizations: the Office of the Secretary of (OSD), the Military Departments, the Joint Staff, the Defense Agencies, Washington Headquarters Services (WHS), and the Uniformed Services University of the Health Sciences (USUHS).

DoD Education Benefits Trust Fund - A fund established for education assistance purposes for active and reserve force personnel. It derives its resources through transfers from military personnel accounts and from interest earned from investments in Federal Government securities.

Earned Reimbursement - The amount recognized when a performing organization renders actual or constructive performance on a reimbursable order.

"Economy Act" Order - An order for goods or services placed by a Federal Agency or Department to another governmental agency under the provisions of Section 1535, Title 31, United States Code.

Electronic Funds Transfer (EFT) - The act of debiting or crediting accounts in financial institutions by wire rather than source documents, such as, paper checks. Processing typically occurs through the Federal Reserve Bank clearing houses.

Entitlements - Legally established benefits available to any person or unit of Government meeting eligibility requirements established by law.

Executory Costs - Those costs associated with ownership of an asset such as insurance, taxes, and normal maintenance. In the case of a capital lease, the portion of the lease payment that represents executory costs is not capitalized, but is expensed.

Expense - As a budget term, expense is generally any charge to an operation and maintenance appropriation account. Some appropriation accounts, such as the Military Construction and the Research, Development, Test and Evaluation appropriations accounts, provide authority to charge both expense and capital investments to the account. As an accounting term, expense is the value of resources consumed during current period operations.

Expired Account - An account in which budget authority to incur original obligations has ceased to be available. However, the account is available to fund upward within scope adjustments of original obligations.

Facilities - Industrial property (other than material, special tooling, special test equipment, and military property) for production, maintenance, research, development, or test including real property (other than land) and rights therein, buildings, structures, improvements, and plant equipment, (including capital leases.)

Fast Pay - Disbursement to a contractor based on the contractor's certification that delivery has been made at the time an invoice is presented for payment.

Federal Agency. This has the same meaning as the term "Agency" in Section 551(1) of Title 5, U.S.C., and also includes any entity that is operated exclusively as an instrumentality of such an Agency for administering one or more programs of that Agency. DoD nonappropriated fund activities are included under this definition.

Financial Institution - Bank, Savings Association, or Credit Union eligible under 31 CFR 202 to serve as a Government depository.

Financial Management System - The DoD Financial Management System consists of a triad architecture. The three segments of the triad are as follows: Planning, Programing, and Budgeting System (PPBS); Army, Navy, Air Force and Defense Agency accounting systems; and all other systems that provide financial information to management.

Financing Interest - Interest charged as a cost of extending credit as distinguished from interest charged because of delinquency.

Financing Payment - Disbursement of funds from Department of Treasury accounts after performance has occurred but before physical delivery. The most common type of financing payment is the progress payment made to DoD contractors in reimbursement for incurred cost before ordered items or material are delivered.

Foreign Currency Fluctuations - The difference between budget rates approved for execution and actual foreign currency exchange rates in effect at time of payment that cause changes in obligations or contractual liabilities. Obligations are recorded using the budget rate, and payments are made using the current foreign currency exchange rate.

Foreign Currency Unliquidated or Liquidated Obligations - Foreign currency unliquidated obligations are derived by taking obligations at the budget rate less the disbursements at the budget rate. Foreign currency liquidated obligations is the actual disbursement at the budget rate.

Funded Carryover - The incomplete portion of a job order for goods or services to be provided by a business operation fund activity. Usually, funded carryover is measured at the end of a fiscal period, that is, a fiscal year.

Fund Groups - The range of numeric or alpha and/or numeric account symbols assigned by the Treasury to identify groups of accounts; such as, 0000 to 3799 = General Funds.

General Fund Accounts - These consist of (1) receipt accounts used to account for collections not dedicated to specific purposes and (2) expen-

diture accounts used to record financial transactions arising under congressional appropriations or other authorizations to spend general revenues.

General Fund Receipt Accounts - Accounts established for receipts of the Federal Government that are not earmarked by law for specific purpose and that are not available for obligation and expenditure.

General Management Computer - A computer that is used for any purpose other than as a part of a process control system, space system, mobile system, or equipment that is an integral part of a weapon or weapons system. It also excludes equipment involved with intelligence activities and cryptologic national security activities.

Government-Furnished Equipment (GFE) - Property provided to a contractor by DoD. It is used in producing an end product. It is not consumed, but is returned in the same form at the end of the contract.

Government-Furnished Material (GFM) - Property provided to a contractor by the Department of Defense. It may be incorporated into an end item (a change in form) or may be consumed in the performance of a contract.

Grants - Assistance awards for which no substantial involvement is anticipated between the Department of Defense and the recipient during performance of the contemplated activity.

Guaranteed Loan - A contingent liability created when the Government insures the private lender who disbursed the funds that the lender will be repaid to the extent of the amount or percentage guaranteed in the event of default by the debtor; a DoD Component pledge to pay part or all of the loan principal and interest to a lender, or holder, of a security in the event of default by a third party borrower.

Holdback - The amount withheld from progress payments to contractors to assure compliance with contract terms. Usually the amount to be withheld is expressed as a percentage in the contract provisions.

Imprest Fund - A fixed-cash or petty-cash fund in the form of currency or coin for cash payments specifically authorized. The fund may be a revolving type, replenished to the fixed amount as spent or used, or of a stationary nature, such as a changemaking fund.

Indefinite Appropriations - Appropriations of a current or permanent nature in which a definite amount is not stated.

Indefinite Authority - Authority for which a specific sum is not stated, but is determined by other factors such as the receipts from a certain source or obligations incurred.

Information Technology Facility (ITF) - An organizationally defined set of personnel, hardware, software, and physical facilities, operated within or on behalf of the Department of Defense, a primary function of which is the operation of information technology. An ITF includes:

- (1) The personnel who operate computers or telecommunications systems; develop or maintain software; provide user liaison and training; schedule computers; prepare and control input data; control, reproduce, and distribute output data; maintain tape and disk libraries; provide security; and provide direct administrative support to personnel engaged in these activities.

- (2) The owned or leased computer and telecommunications hardware, including central processing units; associated peripheral equipment such as disk drives, tape drives, printers, and consoles; data entry equipment; telecommunications equipment including control units, terminals, modems, and dedicated telephone and satellite links provided by the facility to enable data transfer and access to users. Hardware acquired and maintained by users of the facility is excluded.

- (3) The software, including operating system software, utilities, sorts, language processors, access methods, data base processors, and similar multi-user software required by the facility for support of the facility and/or general use by users of the facility. All software ac-

quired or maintained by users of the facility is excluded.

(4) The physical facilities, including computer rooms, tape and disk libraries, stockrooms and warehouse space, office space, and physical fixtures.

Initiation - An administrative reservation of funds based on procurement directives, requests, or equivalent instruments that authorize preliminary negotiations, but require that funds be certified by the official responsible for the administrative control of funds before incurrence of the obligation. Initiations are entered into memorandum accounts to help keep precommitment actions, such as approved procurement programs and procurement directives, within the available subdivision of funds.

Intangible Assets - Amortizable investment that costs \$15,000 or more; have projected pay-back periods; have economic value but lack physical substance which is to be used over some period (useful life), the length of which is estimated to be 2 years or greater; and have no residual value at the end of the estimated useful life. Examples of intangible assets are management initiatives, organization of new functions, or reorganization of old functions, strategic planning, future system requirement development, and dedicated training initiatives.

Interagency Allocations - Distributions of an Agency's budgetary resources to another Agency, separately identified in the accounts to ensure that the recipient Agency is responsive to the allocating Agency. Such allocations may be non-expenditure transfers, which establish transfer appropriation accounts, or subdivisions of a DoD Component's funds to another DoD Component to cite directly.

Internal Control Documentation - Written policies, organization charts, procedural write-ups, Manuals, memoranda, flow charts, decision tables, completed questionnaires, software, and related written materials used to describe the internal control methods and measures, to communicate responsibilities and authorities for operating such methods and measures, and to

serve as a reference for persons reviewing the internal controls.

Internal Controls - The manner in which financial, manpower, and property resources are to be controlled and safeguarded by the regular authorization, approval, documentation, recording, reconciling, reporting, and related accounting processes.

Internal Control Standards - The standards issued by the Comptroller General for use in establishing and maintaining systems of internal control. Those standards are applicable to all operations and administrative functions, but are not intended to limit or interfere with duly granted authority for the development of legislation, rulemaking, or other discretionary policymaking in an Agency.

Internal Control Techniques - The application of prescribed processes and documents to efficiently and effectively accomplish an internal control objective and to help safeguard an activity from waste, loss, unauthorized use, or misappropriation.

Inventory Price - For non-stock fund items the inventory price is the acquisition cost. For stock fund items the inventory price is acquisition cost plus prescribed surcharges. (See "Acquisition Cost".)

Investment - As a budget term, investment refers to equipment financed with procurement appropriation accounts. As an accounting term, investment is an asset that meets prescribed capitalization criteria established by the Comptroller General.

Invoice Payment - A Government disbursement of monies to a contractor under a contract or other authorization for supplies or services accepted by the Government.

Leave and Earnings Statement - A document provided to each employee or service member showing gross pay, deductions, and net pay for a pay period and cumulative totals for the calendar year to date, along with leave balances at the end of the pay period.

Leave Record - A record showing the amounts of leave earned and used, and the balance available.

Letter Contract - An offer and acceptance that is specific and definitive enough to show the purpose and scope of the final contract to be executed. When accepted in writing by the contractor, documentary evidence exists to support the recording of an obligation.

Loan Guarantees - Agreements by which a DoD Component pledges to pay part or all of the loan principal and interest to lenders or holders of securities in the event of default by third-party borrowers.

"M" Account - A successor account into which obligated balances under an appropriation are transferred (merged) at the end of the second full fiscal year following expiration. The "M" account remains available for the payment of obligations and liabilities incurred by the accounts that have been merged. Due to Public Law 101-510, the "M" Account will be canceled in its entirety as of September 30, 1993.

Management Fund Accounts - Working fund accounts authorized by law to facilitate accounting for collections from two or more appropriations or funds to finance an activity not involving a continuing cycle of business-type operations and that are available for obligation and expenditure. Those are combined receipt and expenditure accounts established by law, with receipts derived from such operations usually available in their entirety for use by the fund without further action by the Congress.

Meat, Poultry Meat, Meat Food Products Poultry Meat Food Products, Eggs, or Egg Food Products. Perishable (fresh, chilled, or frozen) meat and poultry meat, including processed meat and poultry meat food products, such as luncheon slices, frankfurters, bacon and ham, fresh eggs, and perishable egg products. It excludes non-perishable meats and poultry meats, all perishable and nonperishable mixed products (meat and/or poultry meat combined with other food ingredients), seafood, and game.

A. Eggs. Fresh whole shell eggs of the domesticated chicken, turkey, duck, goose, or guinea.

B. Egg food products. Only frozen whole eggs, egg whites, and/or egg yolks.

Military Interdepartmental Purchase Request (MIPR) - An order issued by one military service to another to procure services, supplies, or equipment for the requiring service. The MIPR (DD Form 448) may be accepted on a direct citation or reimbursable basis. It is an "Economy Act" (31 U.S.C. 1535) order subject to downward adjustment when the obligated appropriation is no longer valid for obligation.

Military Property - All property owned by the Department of Defense. In regard to Government-provided property, this is Government-owned personal property designed for military operations.

Military Retired Pay - (A reduced pay entitlement for reduced services.) The gross monthly entitlement for a retired member of the Uniformed Services based on terms and conditions of law, pay grade, years of service, percentage of disability (if applicable), and date of retirement.

Military Retirement Trust Fund - A trust fund established for the purpose of financing the retirement cost of active and reserve military personnel. An accrual amount is transferred monthly from the military personnel accounts to the Fund based on a fixed percentage of basic pay for full-time and part-time personnel. The accrual amounts are determined by the DoD Board of Actuaries who are appointed by the President for 15 year terms. In addition, amounts are deposited into the Fund to liquidate the unfunded liability of retired pay earned prior to establishment of the Fund. Interest on investments of the Fund assets in Federal Government securities are also transferred into the Fund.

Minimum Lease Payments - The payments that the lessee is obligated to make or may be required to make in connection with leased property. (Contingent rentals are excluded from the minimum lease payments.)

Moneys - All currency and negotiable instruments which are as follows: (1) held by an Agency (imprest funds), (2) paid out by an Agency, (3) owed to an Agency, or (4) collected by an Agency.

Multiple-Year Authority - Budget authority that is available for original obligation for a specified period of time in excess of 1 fiscal year.

Noncurrent Receivable - A receivable that will not be due within 12 months following the reporting period.

Nonexpenditure Transfers - A redistribution of either unobligated balances of budget authority provided in a previous year, or budget authority provided in the current year between appropriations or funds for the benefit of the gaining appropriation or fund. Transfers of obligated balances and sometimes reappropriations also require nonexpenditure transfers.

No-Year Authority - Budget authority that remains available for obligation for an indefinite period of time.

Obligational Authority - The sum of (1) budget authority provided for a given fiscal year, (2) balances of amounts brought forward from prior years that remain available for obligation, and (3) amounts authorized to be credited to a specific fund or account during that year, including transfers between funds or accounts. (See "Budget Authority.")

Obligations - Amounts of orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require payment during the same, or a future, period. Such amounts include payments for which obligations previously have not been recorded, and adjustments for differences between obligations previously recorded and actual payments to liquidate those obligations. The amount of obligations incurred is segregated into undelivered orders and accrued expenditures - paid or unpaid.

Offsetting Collections - Collections from Government accounts or from transactions with the public. The two major categories of offsetting

collections are offsetting receipts (amounts deposited to receipt accounts) and offsetting collections credited to appropriation or fund accounts.

Offsetting Receipts - Collections that are deposited into proprietary Miscellaneous Receipt Accounts of the Department of the Treasury. Applicable deposits offset the collecting Agency's budget authority and outlays.

Operating Agency - A major organizational unit within a Military Department or Defense Agency that is responsible for (1) the active planning, direction, and control of a program or segment, thereof; and (2) the control of the funds allocated to it.

Outlays - The amount of checks issued or other payments made (including advances to others), net of refunds and reimbursements. Outlays are net of amounts that are adjustments to obligational authority. The terms "expenditure" and "net disbursement" are frequently used interchangeably with the term "outlay". Gross outlays are disbursements and net outlays are disbursements (net of refunds) minus reimbursements collected.

Overhead Rate - The rate determined by performing organizations to allocate operating costs not directly identifiable to the work order. Includes supervisory and general and administrative expenses as well as miscellaneous material and supplies.

Packing, Crating, and Handling (PCH) Costs - A subset of accessorial costs that are incurred for sales, or shipments, of property. (See "accessorial charges.")

Participation Loan - A loan that consists of both direct and guaranteed portions.

Passthroughs (Current Year) - Revolving fund revenues received during the current fiscal year which: (1) are in addition to amounts provided for in the customer stabilized rate structure and (2) represent reimbursement for current year costs or amounts in excess of amounts budgeted, or otherwise provided for, in the President's

budget on which approved customer stabilized rates for the [current] year were based.

Passthroughs (Prior Year) - Revolving fund revenues which provide for the recoupment of amounts associated with prior year efforts or sales. These amounts represent the recoupment of amounts beyond those contained in the DoD stabilized rate structure for the applicable prior fiscal year for which the efforts were performed. These amounts are generally intended to offset prior year losses and/or amounts in excess of amounts previously budgeted.

Pay Account - The part of each individual civilian and Military Service member's master pay record that contains all transaction information on payments and deductions with an audit trail to the authorizing documents. The pay account includes information such as pay grade, record of payments, all earnings separately identified by type (basic pay, bonuses, danger pay, etc.); allowances; allotments; year-to-date gross earnings; taxable earnings, taxes withheld, and leave data (amount earned, taken, lost, forfeited, advanced, or used).

Pay and Allowances - Payment to active duty, Reserve, National Guard, and retired members and their surviving annuitants, other than travel and transportation reimbursements, and to all civilian employees and direct hire employees in foreign locations, other than travel and transportation expenses.

Paying Office - A disbursing office. In the case of contracts, the place named in the contract for forwarding invoices for payment.

Payment Due Date - The date by which payment must be made as specified in Volume 4, table 2-3.

Period of Availability - The period of time in which budget authority is available for original obligation.

Political Subdivision of Local Government - A local unit of government, including specifically a county, municipality, city, town, township, school district, or other special district created by State law, or combination of these units.

Port Loading and Unloading Costs - A subset of accessorial costs. The costs incurred for loading, unloading, and handling at the ports of embarkation and debarkation.

Pre-positioning Costs - The accessorial costs incurred to store items at locations outside the United States in anticipation of support to other authorized customers.

PPBES - The Planning, Programing, Budgeting, and Execution System (PPBES) is a cyclic process containing three distinct, but interrelated phases: planning, programing, and budgeting. In addition to establishing the framework and process for decision making on future programs, the process permits prior decisions to be examined and analyzed from the viewpoint of the current environment (threat, political, economic, technological, and resources) and for the time period being addressed. The ultimate objective of PPBS is to provide operational commanders the best mix of forces, equipment, and support attainable within fiscal constraints.

Predetermined Rate - The rate established by appropriate authority for use in computing recoverable amounts.

Private Parties - Consists of non-U.S. Government activities; foreign governments, firms, and organizations; and international organizations, other than Foreign Military Sales (FMS) customers and FMS/International Military Education and Training Program (IMET) recipients.

Progress Payments - See "Financing Payment."

Project Order - An order for goods or services issued under the authority in 41 U.S.C. 23 to a separately managed and financed Government-owned and operated establishment.

Proper Invoice - A bill or written request for payment provided by a business concern for property or services rendered. It must include all of the information required by the terms of the procurement document, be accompanied by such substantiating documentation as required by regulation or the contract, and be received in the designated paying office. Supplemental billings shall include all information required for

original billings. A proper invoice must include the following:

- (1) Name and address of the business concern and the invoice date.
- (2) Contract number or other authorization for delivery of property and/or services (including order number and contract line item number).
- (3) Description, price, and quantity of property and services actually delivered or rendered.
- (4) Shipping and payment terms.
- (5) Other substantiating documentation or information as required by the contract.
- (6) Name (where practicable) title, telephone number, and complete mailing address of the responsible official to whom payment is to be sent.
- (7) Name (where practicable) title, telephone number, and mailing address of person to be notified in event of a defective invoice.

Property Book - A documentary record of every item on a "Table of Organization and Equipment List", or other type of allowance list, showing that a unit is prepared to accomplish its assigned mission. The property book lists both capitalized and expensed assets, shows quantities on hand, items due in, open requisitions, unit prices, hand receipts, etc.

Realized Variance (Foreign Currency Fluctuations) - The difference between actual obligations at the budget rate (approved execution rate) and the foreign exchange rate in effect at the time of payment (liquidation of the obligation). The variance is equal to the amount disbursed from the applicable centrally managed allotments.

Real Property - Fixed assets that are comprised of land and the rights to land; buildings to include capitalized additions, alterations, improvements, and rehabilitations; and other structures and facilities. Real property does not

include personal property (weapons systems and other military equipment).

Reappropriation - Statutory authority to restore or extend the obligational availability, whether for the same or different purpose, of all or part of the unobligated balance of budget authority that has expired or otherwise would expire in an annual or multiple-year appropriation. Reappropriation transactions require non-expenditure transfer of the funds involved from the expired or otherwise expiring account to the designated current account when the unobligated balance has not been withdrawn to the surplus fund of the U.S. Treasury. If the unobligated balance has been withdrawn, then the transaction requires a warrant. Reappropriations that provide funds to a fiscal year for which they were not previously available constitute new budget authority in the receiving account.

Refunds - Recoveries of overpayments that result from errors in paying invoices or from items returned to vendors. (Also see "Refunds and/or Transfers (Current Year)" and "Refunds and/or Transfers (Prior Year).")

Refunds and/or Transfers (Current Year) - Industrial fund amounts transferred on a non-expenditure basis which represent the transfer of revenue collected through stabilized rates which: (1) is in excess of current year costs or (2) otherwise exceeds the purpose for which initially intended in the current year. (The latter case, for example, may include the collection of Asset Capitalization Program surcharges in excess of amounts ultimately approved by the Congress for the Asset Capitalization Program.) These transfers are generally made to appropriated funds and provided for in a general provision contained in the applicable annual appropriation act.

Refunds and/or Transfers (Prior Year) - Industrial fund amounts transferred on a nonexpenditure basis which represent the transfer of amounts associated with prior year efforts or sales. These amounts usually represent the transfer of revenue collected through stabilized rates which: (1) were in excess of [then] current year costs or (2) otherwise exceeded the purpose for which initially intended. These transfers are generally

made to appropriated funds and provided for in a general provision contained in the applicable annual appropriation act.

Reimbursable Order - An order accepted into a DoD appropriation or fund.

Reimbursements - Amounts earned and collected for property sold or services furnished either to the public or another Federal accounting entity. To be an appropriation reimbursement, the collection must be authorized by law for credit to the specific appropriation or fund account.

Replacement Cost - Obligations to be incurred at a future time to procure equipment or material in place of items which have been sold or transferred. There are two methods used to determine replacement cost: (1) Replacement cost may be determined by applying the OSD prescribed inflation factor to the most recent contract price of the item to be replaced. The inflation factor is applied to each fiscal year between the year the item sold or transferred was acquired and the fiscal year in which the replacement item will be delivered. (2) Replacement cost may also be determined by obtaining a current contractor quote for the replacement item. Normally the second method is the most accurate method.

Reportable Accounting System or Segments - A system or segment that satisfies the definition of an accounting system.

Reprogramming - Realignment of budget authority from the purpose for which appropriated to finance another (usually emergent, unfunded) requirement. A necessary, desirable, and timely device during execution of Defense programs for achieving flexibility in the use of DoD funds provided in appropriation acts.

Reschedule - (Restructure, refinance, forbear, reamortize, or defer) To establish new terms or conditions in order to facilitate the repayment of debt. For example, stretching out or extending into the future such payments.

Rescission - Legislation that cancels budget authority previously provided by Congress before the time when the authority would other-

wise lapse, that is, cease to be available for obligation.

Reserves - Portions of budgetary resources set aside by OMB to (1) provide for contingencies, or (2) effect savings made possible by or through changes in requirements or greater efficiency of operations.

Residual Value - Residual value is the estimated value remaining at the end of a capital asset's useful life to the Department of Defense or the Amount that can be expected to be recovered from the asset's disposal when it is removed from service.

Restoration - An unobligated amount previously withdrawn by administrative action to the merged surplus balances that is again made available to fund within scope increases to original obligations or to fund other Congressionally approved programs pursuant to law.

Revolving Fund Accounts - Accounts authorized by specific provisions of law to finance a continuing cycle of business-type operations, and which are authorized to incur obligations and expenditures that generate receipts.

Special Defense Acquisition Fund (SDAF) - A fund established to provide the Foreign Military Assistance and Sales Programs the inventory determined necessary to meet anticipated future sales requirements for those military items being phased out of DoD inventory.

Special Fund Accounts - Separate receipt and expenditure accounts established to account for receipts of the Government that are earmarked by law for a specific purpose but are not generated by a cycle of operations for which there is continuing authority to reuse such receipts.

Special Fund - Expenditure Accounts - Accounts established to record amounts appropriated, or otherwise made available by transfers from a special fund receipt account to be obligated and expended for special programs in accordance with specific provisions of law.

Special Funds - Receipt Accounts - Accounts credited with receipts from specific sources that

are earmarked by law for a specific purpose, but which are not generated from a continuing cycle of operations.

Specialized or Technical Services - Statistical and other studies and compilations, developmental projects, technical tests and evaluations, technical information, training activities, surveys, reports, documents, and any other similar service functions that any Federal Agency is especially equipped and authorized by law to perform.

Specific Due Date - A payment due date included in a contract or determinable from contractual language. If a contract has payment and financing terms such as "promptly," "payable upon receipt," or "net;" payment shall be made as specified in Volume 4 table 2-3.

State - Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a state. Does not include the governments of the political subdivisions of a State.

Suspense Accounts - (See Deposit Funds.)

Tangible Assets - Tangible capital assets are depreciable property, plant, equipment, and software developed, manufactured, transferred or acquired at a specific point in time for a determinable cost of \$15,000 or more; are used over some period (useful life), the length of which is estimated to be 2 years or greater; and generally, become economically worthless, (except for residual value) at the end of their estimated useful lives.

Transfer of Funds - When specifically authorized by law, all or part of the budget authority or prior year unobligated balances in one account may be transferred to another account.

Transportation Costs - The costs incurred for shipment of material.

Treasury Financial Communications System (TFCS) - The computer-to-computer link between the U.S. Treasury and the Federal Reserve Bank of New York.

Trust Fund Accounts - Accounts established to account for receipts that are held in trust for use in carrying out specific purposes and programs in accordance with an agreement or statute.

Trust Fund Expenditure Accounts - Accounts that are established to record amounts appropriated, or otherwise made available by transfer from a trust fund receipt account to be obligated and expended in carrying out the specific purposes, or programs, in accordance with the terms of the trust agreement or statute.

Trust Fund Receipt Accounts - Accounts that are credited with receipts generated by the terms of a trust agreement or statute.

Trust Revolving Fund - The name given to a fund entity when a trust fund corpus is established to perform a continuing cycle of business-type operations in accordance with the trust agreement or statute, in which case a combined receipt and expenditure account is used.

Undelivered Orders - Contracts or orders issued by the ordering accounting entity for goods and services for which the liability has not yet been accrued.

Unearned Revenue - Revenue from DoD customers collected in advance of earnings and prior to delivery of goods or services.

Unfilled Customer Orders - The amount of orders accepted from ordering accounting entities within the U. S. Government for goods and services to be furnished on a reimbursable basis; or, in the case of transactions with the public, amounts collected in advance for which the accounting entity has not yet performed as requested.

Unfunded Cost - Costs not financed by the performing activity's current appropriations or fund accounts. Applicable types of cost include depreciation, interest on investment, and civilian retirement amounts funded by Office of Personnel Management.

Unified Combatant Command - A unified combatant command is a military command which has broad, continuing missions and which is

composed of forces from two or more Military Departments. Unified combatant commands are established by the President, through the Secretary of Defense, with the advice and assistance of the Chairman, Joint Chiefs of Staff.

User - An individual, organization, or accounting entity that receives services. A user may be internal or external to the DoD Component.

Warehousing - Costs normally incurred for labor, materiel, or services in packing item(s) that are removed from DoD storage, preparing item(s) for shipment, and processing related materiel release documents.

Withdrawal - The transfer of the unobligated balance from an expired annual or multiple-year appropriation to the surplus account of the U.S. Treasury's general fund, or, if appropriate, to the special fund or trust fund from which derived.

Writeoff - As a budgetary term, writeoff means the withdrawal from availability for obligation of an unobligated balance from a no-year appropriation. It excludes amounts withdrawn from

expired accounts and amounts rescinded by the Congress. As an accounting term, writeoff refers to the removal of a delinquent accounts receivable that is considered not collectible or not cost effective to pursue further collection efforts. A writeoff is not a correction to the accounting records resulting from an accounting error.

Work in Process - Costs of the materials, labor, and indirect costs used in producing an end item (real or personal property) or service, whether fabricated by a DoD business operation fund, or by a non-DoD organization under contract.

Year-end Adjustments for Reimbursements - Accounting entries made to eliminate anticipated reimbursements for orders not accepted, eliminate those unobligated accepted orders that are no longer valid obligations of the ordering activity, and transfer valid unobligated reimbursable balances from expiring and non-expiring accounts to the most current ensuing fiscal year accounts. The exception is for unobligated balances resulting from earned reimbursements (that is, sales from inventory or performance of in-house services), which must be retained in nonexpiring accounts until account expiration.

CHAPTER 1

CHIEF FINANCIAL OFFICER OF THE DEPARTMENT OF DEFENSE0101 GENERAL

The Chief Financial Officer of the Department of Defense (CFO, DoD) is the chief financial management policy officer of DoD and chief financial management advisor to the Secretary of Defense. The CFO, DoD, shall manage all functions and responsibilities as assigned in chapter 9 and Section 3515 of Title 31 of the United States Code.

0102 AUTHORITIES AND FUNCTIONS

The CFO, DoD, is charged with the responsibility of developing and implementing DoD-wide financial management systems and overseeing financial management activities relating to the CFO programs and operations of the DoD. In that capacity, and consistent with the Chief Financial Officers Act of 1990, the following authorities and functions are assigned to the CFO, DoD:

010201 Reporting. Report directly to the Secretary of Defense regarding financial management matters.

010202 Oversight. Oversee all financial management activities relating to the programs and operations of the DoD. To carry out this responsibility, the CFO, DoD, has the authority to:

A. Establish financial management policies for the DoD including its component parts.

B. Ensure compliance throughout the DoD with applicable accounting policy, standards and principles, as well as financial information and systems functional standards.

C. Establish, review and enforce internal control policies, standards and compliance guidelines involving financial management.

D. Provide oversight of financial management personnel, activities and operations, including (a) preparation and annual revision of 5-year financial management plans, and (b) development of financial management budgets.

E. Ensure adequate controls over real property, equipment and inventories.

F. Ensure timely and accurate information on contract disbursements and projected costs.

010203 Financial Management Systems. Develop and maintain an integrated agency accounting and financial management system, including financial reporting and internal controls, which:

A. Complies with applicable accounting principles, standards and requirements, and internal control standards;

B. Complies with such policies and requirements as may be prescribed by the Director of OMB;

C. Complies with any other requirements applicable to such systems; and

D. Provides for:

1. Complete, reliable, consistent and timely information which is prepared on a uniform basis and which is responsive to the financial information needs of DoD management;

2. The development and reporting of cost information;

3. The integration of accounting and budgeting information; and

4. The systematic measurement or performance.

010204 Recommendations. Make recommendations to the Secretary of Defense regarding the selection of the Deputy CFO, DoD;

010205 Management. Direct, manage and provide policy guidance and oversight of DoD financial management personnel, activities, and operations, including:

A. The preparation and annual revision of a DoD plan to implement the 5-year financial management plan prepared by the Director of OMB, and to comply with the audited financial statements provisions of the CFO Act of 1990.

B. The development of DoD financial management budgets.

C. The recruitment, selection and training of personnel to carry out DoD financial management functions.

D. The approval and management of DoD financial management systems design or enhancement projects.

E. The implementation of DoD asset management systems, including systems for cash management, credit management, debt collection and property inventory management and control.

F. To direct, manage and provide policy guidance and oversight, the CFO, DoD, has authority:

1. To manage directly, and/or monitor, evaluate and approve, the design, budget, development, implementation, operation and enhancement of DoD-wide accounting, financial and asset management systems.

2. To coordinate on the design for other information systems that provide, at least in part, financial and/or program performance data used in financial statements, to ensure that CFO needs are met.

3. To ensure that program information systems provide financial and programmatic data (including program performance

measures) on a reliable, consistent and timely basis to DoD financial management systems.

4. To evaluate, where appropriate, the installation and operation of such systems.

010206 Annual Report. Prepare and transmit an annual report to the Secretary of Defense and the Director of the Office of Management and Budget, which shall include: (a) a description and analysis of the status of financial management within the Department, (b) annual financial statements, (c) audit reports submitted to the Secretary of Defense addressing financial statements, (d) a summary of reports on the internal accounting and administrative control systems submitted under the Federal Managers' Financial Integrity Act, and (e) other information the Secretary of Defense considers appropriate to fully inform the President and the Congress concerning the financial management of the DoD.

010207 Budget Execution. Monitor the financial execution of the DoD budget in relation to actual expenditures, and prepare and submit to the Secretary of Defense timely performance reports. To enable the CFO, DoD, to prepare and submit timely performance reports, the CFO, DoD, has authority:

A. To mandate DoD-wide data and reporting format requirements.

B. To review and approve financial reports and statements prepared by DoD components for transmittal to the Secretary of Defense, OMB, the President, the Congress or external groups.

C. To prepare consolidated and/or combined financial statements and work with the Inspector General, DoD and other auditors to improve the statements' independent review and auditability.

D. To develop, in coordination with program managers, financial and programmatic performance indicators for inclusion in financial systems and financial reports and statements.

E. To ensure that data included in financial reporting (including program performance measures) becomes auditable.

F. To advise and provide direction to program managers on financial management matters.

010208 Biennial Review. Review, on a biennial basis, the fees, royalties, rents and other charges imposed by the Department for services and things of value it provides, and make recommendations on revising those charges to reflect costs incurred in providing those services and things of value.

0103 CHIEF FINANCIAL OFFICERS COUNCIL

The CFO, DoD, is a member of the Chief Financial Officers Council consisting of the Deputy Director for Management of OMB, the Controller of the Office of Federal Financial Management of OMB, the Fiscal Assistant Secretary of the Treasury and Agency CFOs. The CFO Council meets periodically to advise and coordinate the activities of the agencies of its members on such matters as consolidation and modernization of financial systems, improved quality of financial information, financial data and information standards, internal controls, legislation affecting financial operations and organizations, and other financial management matter.

0104 DEPUTY CHIEF FINANCIAL OFFICER OF THE DEPARTMENT OF DEFENSE

The CFO Act requires that each of the specified agencies shall have a Deputy CFO who shall report directly to the Agency CFO on financial management matters. The position of Deputy CFO shall be a career reserved position in the Senior Executive Service. Consistent with qualifications standards developed by, and in con-

sultation with, the Agency CFO and the Director of OMB, each Agency head shall appoint as Deputy CFO an individual with demonstrated ability and experience in accounting, budget execution, financial and management analysis, and systems development, and not less than 6 years practical experience in financial management at large governmental entities.

0105 DOD STAFF ORGANIZATIONS RESPONSIBLE FOR IMPLEMENTING CFO FUNCTIONAL REQUIREMENTS

010501 The Deputy Comptroller (Program/Budget) is responsible for overseeing and implementing budgetary functions within the DoD on a day-to-day basis.

010502 The Deputy Chief Financial Officer is responsible for overseeing and implementing accounting policy, improvements in financial management, as well as other financial management functions for the DoD on a day-to-day basis.

010503 The Director, Defense Finance and Accounting Service (DFAS) is responsible for overseeing and implementing finance and accounting operations within the DoD on a day-to-day basis.

0106 RESPONSIBILITIES OF THE HEADS OF DoD COMPONENTS FOR IMPLEMENTING CFO FUNCTIONAL REQUIREMENTS

The Heads of the DoD Components, in accordance with Pub. Law No. 101-576, "Chief Financial Officers Act of 1990," shall direct and manage financial management activities within their Components, consistent with financial management policies prescribed by the CFO, DoD, and other policies prescribed by the Heads of the DoD Components.

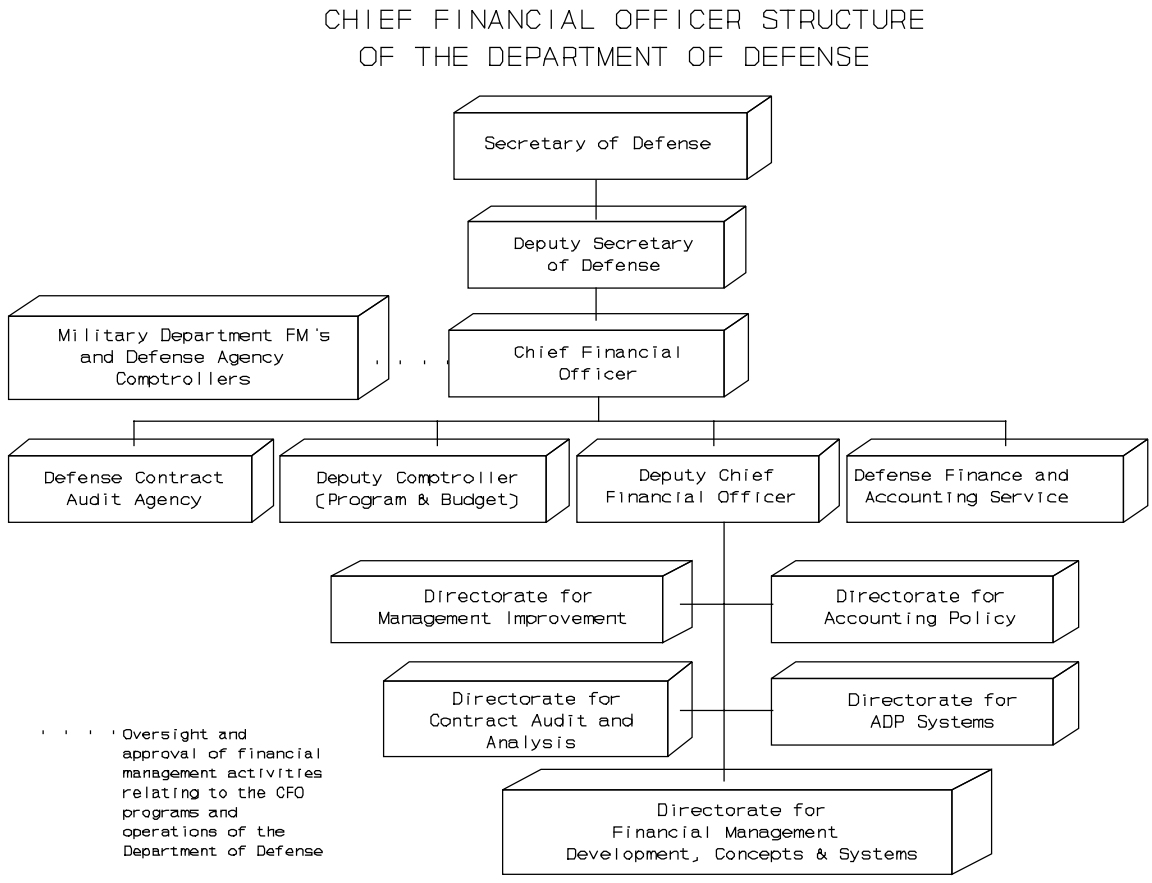

FIGURE 1-1

CHAPTER 2

CONCEPTUAL FRAMEWORK0201 INTRODUCTION

020101 System Architecture. The DoD Financial Management System consists of a triad architecture. The 3 segments of the triad are as follows:

A. Planning, Programing, Budgeting, and Execution System (PPBES). The PPBES is a cyclic process containing 3 distinct but interrelated phases: planning, programing, and budgeting. In addition to establishing the framework and process for decision making on future programs, the process permits prior decisions to be examined and analyzed from the viewpoint of the current environment (threat, political, economic, technological, and resources) and for the time period being addressed. The decisions are based on and consistent with a set of objectives, policies, priorities, and strategies derived from National Security Decision Directives. The ultimate objective of the PPBES is to provide the operational commanders-in-chief the best mix of forces, equipment, and support attainable within fiscal constraints. Throughout the PPBES, the Secretary of Defense provides centralized policy direction while placing program execution authority and responsibilities with the DoD Components. The DoD Components provide advice and information as requested by the Secretary of Defense and his staff so that execution and accountability may be assessed properly. The purpose of the PPBES is to produce a plan, a program, and finally, a budget for the Department of Defense. The budget is forwarded in summary to the President for his approval. The President's budget then is submitted to the Congress for authorization and appropriation.

B. Army, Navy, Air Force and Defense Agency Accounting Systems. An accounting system is the total structure of methods and procedures used to record, classify, and report information on the financial position and operations of a governmental unit or any of its funds and organizational components. It comprises the

various operations involved in authorizing, recording, classifying, and reporting financial data related to financing sources and gains, expenses, losses and transfers out, assets, liabilities, and equity. It encompasses the procedures and processes from the point a transaction is authorized, through processing the data, to issuance of financial and management information statements, and reports containing the data in detail or summary form. It also includes payroll, disbursement, and cost accounting functions.

C. Other Financial Systems. All other systems exclusive of PPBES and accounting systems that provide financial information expressed in dollar terms to management fall into this category.

020102 System Integration. The PPBES, accounting systems, and other financial systems shall be fully integrated. Furthermore, other financial systems shall be established only after a determination has been made that an existing accounting system or budget system cannot produce the desired data display. Dollar information used by an other financial system shall be obtained from the accounting or budget system to ensure the integrity of management reports or analysis. This Regulation addresses the accounting policies, procedures, and reporting requirements for the 4 DoD accounting systems identified in paragraph 020101.B, above.

0202 CONCEPTS020201 Accounting System.

A. Statements of DoD accounting principles, objectives, standards, and procedures may be categorized as follows:

1. Principles - The body of doctrine commonly associated with the theory and procedures of accounting, serving as an explanation of current practices and as a guide

for the selection of conventions or procedures where alternatives exist.

2. Objectives - Goals toward which accounting efforts are directed. The goals are derived directly from legal and regulatory requirements and the needs of intended users.

3. Standards - The specific rules governing accounting and financial reporting that are developed from the objectives.

4. Procedures - The methods followed to facilitate consistent application of the standards.

B. DoD accounting systems shall comply with the accounting principles, standards, and related requirements promulgated within this Regulation. Specific accounting system developmental criteria and guidelines are contained in chapter 3 of this Volume. Any major investment in an accounting system shall be preceded by a comprehensive and rational planning process that includes a thorough requirements analysis, an assessment of alternatives, and a cost-benefit analysis. The amount of funds required for systems development should be determined during the system planning and pre-investment budget review analysis. Generally, funds will be made available only for systems that are integrated into the overall financial management structure.

C. The accounting principles upon which this Regulation is based are stated in the addendum to this chapter.

020202 Accounting System Objectives.

A. The primary objective of DoD accounting systems is to provide needed actual accounting data for use in:

1. Budget formulation.
2. Fund control for enacted budgets.
3. Accounting support for budget execution.

4. Supporting management with the financial information needed to help manage the cost of the U.S. Government.

5. Meeting legal accounting and reporting requirements of the Congress, Office of Management and Budget, and the Department of the Treasury.

B. DoD accounting systems shall maintain financial control over all resources during their life cycle and render accurate and timely accounting reports. This objective is met by following the principles, standards, and other requirements discussed in the remaining chapters of this Regulation.

C. Source data needed in an accounting system shall be entered only once and transferred to appropriate accounts or other segments of the system or its subsystems. Once data are entered into a system in a controlled environment, it is desirable that paper source documents not be transferred into other systems. If data is needed by both an accounting system and another administrative system, a determination shall be made as to which system shall retain the basic source document. If the accounting system does not retain the basic source document, an audit trail shall be established and maintained to allow for verification of the authenticity of the document by the accountant responsible for operating the accounting system.

020203 Accounting Entity.

A. The Defense Finance and Accounting Service is the accounting entity for the Department of Defense. The Defense Finance and Accounting Service shall maintain a central general ledger to account for the resources assigned to each DoD Component, to determine the costs of their operations, and to report on their financial position and cost of operations. The Defense Finance and Accounting Service shall perform accounting to the lowest level of management control within the DoD Components.

B. The DoD Components have been assigned agency index numbers by the U.S. Treasury to identify, separate, and report on

authorized congressional appropriations and to meet DoD reporting requirements. The index numbers assigned are as follows:

<u>Department/Agency</u>	<u>Index Number</u>
Department of the Army	21
Department of the Navy	17
Department of the Air Force	57
Office of the Secretary of Defense	97

C. This Regulation establishes uniform, self-balancing budget execution control accounts (the 4000 series of accounts). The Defense Finance and Accounting Service shall establish mandatory subsidiary budgetary accounts for all of the appropriations or funds, including "M" accounts. The sequential processing of source documents to the budgetary accounts is critical because accountants must be able to identify possible violations of the Antideficiency Act as individual transactions are recorded. It must be remembered that a violation of the Antideficiency Act occurs on a real-time basis, not just at month-end. Monthly reports on budget execution may not reveal violations that have occurred during the month. For example, if a contract is signed and released 1 day prior to receipt of necessary budget authority, a violation has occurred. The month-end report may mask the fact that a violation has occurred, but the accounting system shall provide an audit trail to identify the responsible person or persons.

D. This Regulation also establishes uniform proprietary control accounts. These accounts provide continuous accounting control over financial resources provided to the Department of Defense from the time an appropriation is received until the applicable resource is consumed (expensed), sold, or transferred to a non-DoD organization. The Defense Finance and Accounting Service shall maintain mandatory subsidiary proprietary accounts for each fund type that requires preparation of a TFS Form 220, "Report on Financial Position." Applicable fund types are set forth in chapter 5 of Volume 6 of this Regulation. The annual expense (cost) of operating the Department of Defense is contained within the 6000 series of proprietary accounts.

E. Standards for costing specific products, services, or programs are set forth in Volume 4 of this Regulation. Products, services or programs are to be costed only when management has identified a need for such information. The proprietary control account 1541, "Inventory - Work in Process - In-House," captures all financial data entered into formal cost accounting systems and is the primary control account for such systems. Cost-finding techniques, such as analytical reviews or sampling, should be employed in lieu of maintaining a cost accounting system if satisfactory results can be achieved in a timely and more economical manner. When a formal cost accounting system is established, various additional subsidiary accounts of account 1541 shall be maintained. Cost is a monetary measure of the amount of resources applied to a cost objective. Cost applied to specific cost objectives includes depreciation, unfunded liabilities, for example, annual leave accruals, net decreases in inventories, amortization of investment premiums, and the total amount of severance pay for employees eligible for such pay. Cost data may be required by management for certain pricing decisions, make or buy decisions, productivity improvement decisions, and efficiency comparisons of like activities.

020204 General Ledger.

A. The Defense Finance and Accounting Service shall operate and maintain a central double-entry general ledger. The central general ledger and its subsidiary ledgers, registers, or supplemental reports shall serve as the source data base for financial reporting requirements levied on the Military Departments and Defense Agencies. Accounting systems and subsystems or modules shall be fully integrated with the central general ledger.

B. Chapter 7 of this Volume contains the DoD Uniform Chart of Accounts that is required for use in the accounting systems of the Department.

C. General ledger accounts with adjustments for prior period balances shall be the source of required budget execution reports and annual financial statements submitted to the Treasury Department.

020205 Accrual Accounting. The standards contained in this Regulation implement accrual accounting as prescribed by 31 U.S.C. 3512(d). That law and the General Accounting Office Policy and Procedures Manual for the Guidance of Federal Agencies require that the head of each executive agency shall cause the accounts of that agency to be maintained on an accrual basis while providing for suitable integration of the agency accounting with the central accounting and reporting responsibility of the Secretary of the Treasury. The accrual basis of accounting emphasizes the significance and accountable aspects of financial transactions and events as they occur. Accrual accounting can contribute materially to the effective financial control over resources and costs of operations, and is essential in order to develop adequate financial management information.

020206 Accuracy.

A. Each accounting system shall include adequate controls to promote the accuracy of the accounts and the data produced from the accounts. Procedures shall be established for periodic verification of general ledger balances with related balances in subsidiary records, and for periodic verification of the latter with related document files or the assigned value of related assets on hand. The term "document files" includes either hard-copy documents or document records internally maintained by computer systems. Accepted statistical sampling techniques may be used for these verifications.

B. To support certifications of obligations (see Chapter 4, Volume 6), the foregoing verifications for obligated fund balances shall be made in a manner that shall ensure all of the files and balances are reconciled and validated at least once each fiscal year (not necessarily as of September 30). The work papers and records on which the determinations are based shall be retained in a form to facilitate audit and reconciliation for such periods as may be necessary. As a minimum, the following documentation shall be required to support the periodic verifications of unliquidated obligations:

1. An overall summary of the methodology, criteria, and rationale used to

select unliquidated obligations for review, such as statistical sampling techniques, aging, and months past delivery date.

2. Mechanized or manual listings identifying the unliquidated obligations selected for review and the results of their review.

3. Annotated supply status reports and letters, memoranda, or records of telephone calls requesting delivery status from contracting or procurement activities.

4. Records identifying the unliquidated obligations deobligated as a result of the review, the amount deobligated for each document, and the rationale for deobligation.

5. Deobligation documents or references to dated deobligation documents indicating the value and identity of documents deobligated.

C. Balances in appropriate subsidiary records and document files (such as records of receivables and unpaid obligations) shall be aged periodically. Items that are unduly outstanding or inactive shall be investigated and appropriate corrective action taken when necessary.

020207 System Processing Characteristics.

A. DoD Components shall use the most effective and efficient methods of processing accounting data.

B. Data shall be edited, validated, and in some instances, computed before it is integrated into an accounting system.

C. Data needed in an accounting system shall be entered only once and be transferred to appropriate accounts and other parts of the system.

D. The double-entry method of recording an event shall be employed whereby every debit entry has a corresponding credit entry. This is often accomplished through the use of transaction codes that automatically generate both entries.

E. Electronic methods of processing, communicating, and displaying data shall be relied upon instead of using paper.

F. Subject to internal control requirements, due consideration shall be given to providing on-line processing that allows the providers and users of financial information to input, edit, process, and request their own data at their own decentralized work stations. However, individual transactions shall be batched processed if batch processing is more economical and on-line processing is unnecessary.

G. A data base management system shall be used to reduce redundancy, allow a variety of users to concurrently update and retrieve data, and permit a variety of application modules to run independently. This means that certain accounting data is likely to be input into the system by nonaccountants external to the accounting office. For example, data concerning the issuance of a contract for, and the receipt of, property may be entered by logisticians. In such cases, the accounting office shall not obtain and maintain the source documentation but rely instead on the source documentation used and maintained by the logisticians. However, the accounting office shall ensure the existence of an adequate audit trail between its accounting records and the logisticians' source documents in order to verify the accounting records.

H. The use of a more efficient programming language for prototyping and applications development shall be considered for any major new system development effort.

I. Audit trails to the original documents and transactions shall be established and maintained.

J. Cost effective mass storage media such as optical disks, magnetic tape, microfilm, or microfiche shall be used to archive data so as to facilitate the retrieval of accounting system source documents and minimize the need for machine storage and paper copies.

K. Addendum A to this chapter, provides the DoD Financial Management System Principles, and Addendum B provides the Accounting System Data Processing Requirements.

020208 Security Requirements. All Automated Information Systems (AIS) that handle Classified or Sensitive Unclassified Information shall be safeguarded at all times while in AISs as directed in DoD Directive 5200.28. When classified information is involved, the information security requirements in DoD 5200.1-R shall be met. The information that is covered under the DoD Financial Management Regulation is generally considered either Privacy Act or Sensitive, Unclassified Information. The definition of Sensitive, Unclassified Information is described in DFAS Regulation 005, Enclosure 19. The definition of Privacy Information is provided in the Privacy Act of 1974. The minimum mandatory level of protection that is required for all this type of information contained on AISs is described in DoD Directive 5200.28 and it must be protected accordingly. The level of control and protection shall be commensurate with the maximum sensitivity of the information and shall provide the most restrictive control measures required by the data to be handled.

ADDENDUM 1
DoD FINANCIAL MANAGEMENT SYSTEM PRINCIPLES

The standards contained in this Regulation were designed to meet the following principles:

A. **USEFULNESS**

Financial management data shall be gathered and processed only when necessary to meet specific internal management needs or external requirements. Reports shall be tailored to specific user needs and if report usage does not justify cost, reports shall be terminated. Usefulness shall be determined in part through consultation with users as part of the reviews required by Chapter 3 of this Volume.

B. **TIMELINESS**

Financial management data shall be recorded as soon as practicable after the occurrence of the event, and shall be made available to managers by the fifth working day following the end of the reporting period. Other standards of timeliness may be established when the DoD Component has inventoried reports and set specific standards, with user participation. Final, corrected data shall be available in time to meet external reporting requirements.

C. **RELIABILITY AND COMPLETENESS**

Financial management information shall be reasonably complete and accurate, shall be verifiable and ordinarily be drawn from the official records and systems, and shall be no more detailed than necessary to meet the needs of management and external requirements.

D. **COMPARABILITY AND CONSISTENCY**

Financial management data shall be recorded and reported in the same manner throughout the DoD Component, using uniform definitions. Accounting shall be synchronized with budgeting. Consistency over time shall be maintained. New and revised systems shall adopt common, existing definitions and classifications.

E. **EFFICIENCY AND ECONOMY**

DoD Component financial management systems shall be designed and operated with reasonable total costs and transaction costs, in accordance with OMB guidelines. Financial systems that are excessively costly shall be identified and phased out. This shall be accomplished through installation of effective systems of planning and evaluation, sharing of data, elimination of overlap and duplication, and use of the best contemporary technology, including commercially available packages with proven success in other DoD Components, non-DoD Federal agencies, or the private sector.

F. **COST BENEFIT**

Unless required to meet a legal or other specified purpose, information shall not be provided if the costs of providing it exceed the benefits to be derived.

G. FLEXIBILITY AND ADAPTABILITY

Accounting systems shall be capable of being adapted quickly to changing needs. Accounts shall be established and maintained at a level that enable data to be aggregated readily. Accounts also shall permit summarization by responsibility center, object of expenditure, and by program, as well as permit ready reclassification to reflect organizational and other changes. The coding structure shall be broad enough to handle expanded or revised classifications. Software shall be capable of being changed to accommodate organizational, system, and user changes without requiring extensive rewrites.

H. MATERIALITY

Information shall be reported in the financial statements when it is significant enough in magnitude or nature to make a difference to a reasonable person relying on it.

I. RELEVANCY

Accounting information shall have the capacity to make a difference by helping users form predictions about the outcomes of past, present, and future events or to confirm or correct prior expectations.

ADDENDUM 2
ACCOUNTING SYSTEM DATA PROCESSING REQUIREMENTS

The following software requirements are additive to the functional accounting principles and standards established in this Regulation and shall be followed to the extent they are consistent with the DoD Financial Management System Principles established in Addendum 1 to this Chapter.

A. REPORTING

The computer system software must have the following minimum reporting capabilities:

1. Produce information at specific time intervals or upon request, including reports that span fiscal year for multiyear projects.
2. Produce information in various media, including:
 - a. Record formats or files available for computer-to-computer transfer.
 - b. Output available for subsequent processing or production of microfiche.
 - c. Computer generated standard forms or predefined hard copy formats.
 - d. Ad hoc formats designed by management.
 - e. Terminal screen display for visual inspection and/or hard copy printout.
3. Accommodate additions, deletions, or changes to report content or format without mayor interruption to normal processing, including the ability to reclassify and reformat historical data for reporting purposes only.
4. Include a report writer with capability to:
 - a. Allow user-defined reports without intervention of a programmer.
 - b. Support multiple sort key sequences.
 - c. Produce output files as well as hard copy reports.
 - d. Save report requests in files for future use, unless changed or deleted.
 - e. Produce hierarchical levels of summarization data.
 - f. Permit modeling to include budget forecasting and costing.
 - g. Permit table look-up and expansion codes.
 - h. Permit logic for selection criteria in order to support flexible record selection.

B. GENERAL LEDGER

The general ledger accounts are the primary internal control feature in an accounting system. Computer programs must provide for the perpetuation of closing balances at the end of a period as the next period's opening balances; i.e., asset, liability, and capital balances must be perpetuated, not reconstructed at the beginning of each fiscal year. The minimum general ledger requirements that the computer system software must support are:

1. Provide for the automatic generation of recurring month-end and year-end closing entries and automated rollover of the general ledger account balances.
2. Provide the capability to post to two months concurrently. At year-end, provide for the capability to post to the current year by month, as well as to the prior year, regardless of when year-end closing occurs.
3. Provide for preliminary year-end closings before final year-end closing, while maintaining the capability to post current period data.
4. Identify those transactions which would be eliminated for both intra-agency and interagency consolidations.
5. Provide for automatic generation of recurring accrual entries and reversals in the next fiscal period.

C. BUDGET EXECUTION/FUNDS CONTROL

The minimum budget execution/funds control requirements that the computer system software must support are:

1. Maintain the original funding amounts separate from the reprogramming amounts, yet combine the two at the appropriate levels for funds control checking.
2. Change, retroactively, the accounting classification code structure and the funding limitations to reflect the approved appropriation after a continuing resolution.
3. Provide an interface for entry of commitment or obligating documents from existing agency systems.
4. Provide the capability to enter commitment or obligating documents into the funds control system on-line and from multiple locations.
5. Partially liquidate commitments in the case of partially obligated requisitions.
6. Provide control features which ensure that amounts reflected in the funds control structure agree with the general ledger account balances at the end of each update cycle.

D. ACCOUNTS PAYABLE

The minimum accounts payable requirements that the computer system software must support, either internally or through interface with other systems, are:

1. Commitments

- a. Capture the desired delivery date.
- b. Allow for commitment documents to be future-dated, archived, and posted at the appropriate level.

2. Obligations

- a. Maintain an audit trail to original obligation document. This documentation must contain the following items, as applicable:

- (1) Link item.
 - (a) Stock number.
 - (b) Description.
 - (c) Quantity.
 - (d) Unit price.
 - (e) Total price.
 - (f) Estimated freight charges.
- (2) Expiration date.
- (3) Expected receipt date.
- (4) Vendor identification.

- b. Verify extensions and computations.
- c. Maintain an on-line history file of closed out documents for a user-defined period of time.
- d. Record distribution of individual obligation line items to multiple classification structures.
- e. Retain for audit trail purposes the original machine readable records along with all amendments.
- f. Record and maintain contracts and grants so that fiscal year-to-date and inception-to-date information can be presented.
- g. Generate status and procurement history for documents such as multi-task contracts, grants, and blanket purchase agreements.

3. Receiving, Inspection, and Acceptance Process

- a. Define tolerances used for quantity variances between receiving reports and the obligating documents. The system should identify goods or services rejected if this tolerance is exceeded and provide for overrides by authorized personnel.

b. Track quantity variances between the receiving report and the obligation document. Provide inquiry and reporting of this information.

c. Communicate through the system those instances where a receiving report or acceptance is missing for an invoice, or where goods or services have been received and accepted, but an invoice has not been entered.

d. Process purchase returns, including rejection of part of a shipment. The appropriate resulting transaction should be generated.

4. Matching Process

a. Provide for the tracking and warehousing of vendor invoice from receipt of the invoice through disbursement, including those invoices returned to the vendor.

b. Provide a matching capability by document including matching criteria for noncommodity orders such as subscriptions, memberships, and training.

c. Allow orders to be reopened by authorized staff after final payment has been made.

5. Other Disbursements

a. Allow transactions to be entered directly for those events that will result in payment but are not part of the normal commitment, obligation, and matching process. (For example, travel advances.) Such transactions shall not be made without adequate internal controls, such as specific prior approval or preexisting conditions (approved travel orders, for example).

b. Establish the information so that the transactions can be included in the scheduling for disbursements.

6. Other Systems

a. Accept transactions from external systems in standard format for entry into the financial system.

b. Update the financial system based on the same accounting rules used for transactions entered directly in the financial system.

7. Schedule for Disbursements

a. Generate the appropriate transactions to reflect discounts or withholdings and adding interest or penalties when appropriate.

b. Provide for automated approval of payment schedules.

c. Include for each payment all relevant identification information, such as:

(1) Order number.

(2) Invoice number.

- (3) Disallowance (reason for and amount of).
 - (4) Interest penalty amount.
- d. Automatically calculate totals by appropriation symbol for inclusion on the payment schedule.
- e. Allow the system, through user-defined criteria, to establish the date to be used for warehousing payments or have the system default to the system date.
- f. Allow changes to payment schedules by authorized personnel.
- g. Consolidate multiple payments to a single vendor, up to the prescribed limitation, in order for the disbursing agent to produce one check and itemize all payments covered by the one check.
- h. Collect information on discounts taken and lost and on interest penalties.
- i. Exclude certain transactions from the payment process (e.g., payrolls, letters of credit).
- j. Allow a payment to be removed from the automated scheduling stream and to be manually scheduled. The system must then perform all the other necessary functions related to that payment, such as updating the payment history, the general ledger function, and funds control function.
- k. Provide techniques to handle voided checks by reversing the accounting transactions leading to the disbursement and reestablishing the obligation, if applicable.
- l. Provide information about each payment to reflect the stage of the scheduling process that the payment has reached and the data each step was reached:
 - (1) Payment warehoused.
 - (2) Schedule sent to disbursing agent.
 - (3) Payment issued by disbursing agent.
- m. Provide for the automated comparison of the agency's payment schedule and the disbursing agent's accomplished payment schedule.

8. Vendor File

- a. Maintain a vendor file that includes data to support the accounts payable process.
- b. Maintain data related to employee payments which have been made through the financial system.
- c. Provide the capability to support payments made to financial institutions acting as agent for the vendor. Provide the capability to report IRS 1099 data to the vendor instead of to the financial institution.
- d. Accommodate more than one vendor address.
- e. Allow new vendors to be added to the vendor file if there is proper authorization.

- f. Permit users to define criteria for deleting vendors from the vendor file.
- g. Reject ancillary system transactions which do not have a valid vendor identified, except when overrides are properly authorized.

9. Inquiry

- a. Provide on-line access to vendor activity by vendor name, vendor short name, and vendor number.
- b. Provide on-line access to all document by selection criteria, e.g., document number.

10. Reporting

- a. Generate aged requisitions.
- b. Generate aged receiving reports without acceptance.
- c. Generate aged outstanding obligating documents by entry date and expected receipt date.
- d. Generate aged, unmatched vendor invoice report.
- e. Produce detailed listing by level of funds control for the commitment documents, obligation documents, and expenditure of funds.
- f. Generate vendor listing by vendor name and number.
- g. Generate a cash requirement projection report indicating the dollar amount of disbursements due to be made on a particular day.
- h. Generate a report listing the payments to be scheduled on a particular day.
- i. Produce audit trail reports to support data transferred from external systems to the financial system, including an error listing.

11. Other Capabilities

- a. Identify and store information related to reimbursements made to employees or others when the payment is considered miscellaneous income which is subject to federal tax and which must be reported to the IRS.
- b. Provide for reestablishing obligations for checks that have not been negotiated but that have been returned.
- c. Provide the ability to select items for audit, based on used-defined criteria, by type of transaction.

- d. Report, in accordance with OMB Circular A-125, "Prompt Payments," the:
 - (1) Number of interest penalties paid.
 - (2) Amount of interest penalties paid.
 - (3) Relative frequency, on a percentage basis, of interest penalty payment to the total number of payments.
 - (4) Number, total amount, and relative frequency, on a percentage basis, of payments made 5 days or more before the due date, except where cash discounts were taken.

E. ACCOUNTS RECEIVABLE

The minimum accounts receivable requirements that the computer system software must support, either internally or through interface with other systems, are:

- 1. Account File
 - a. Maintain detailed information by account, such as, individual, employee, private sector organization, state or local government, or other federal agency.
 - b. Maintain data for each account, such as, identification and address, balances, billing cycles, and account history data.
 - c. Update each account when billing documents are generated and collections are received.
 - d. Provide the ability to add, change, or modify nonfinancial account data by authorized personnel, according to used-defined criteria.
 - e. Maintain individual accounts receivable and access existing agency files required to support accounts receivable processing.
- 2. Processing
 - a. Process data from various sources, such as, manually prepared billings or other billing and disbursing systems.
 - b. Accept transactions from external agency systems in a standard format for entry into the financial system.
 - c. Provide the ability to produce billings for receivables from other government agencies.
 - d. Match receipt to account number and apply to appropriate billing document.
 - e. Provide the ability to apply receipts to more than one outstanding bill.
 - f. Update accounts receivable balances on a document-by-document basis.
 - g. Provide for automatic reversal for nonsufficient funds checks.

h. Provide for the automated reporting of delinquent accounts to commercial credit bureaus and collection agencies or other appropriate governmental organization.

i. Provide for administrative offset of funds due to delinquent indebtedness.

j. Provide for the generation of repayment schedules for delinquent indebtedness.

3. Bill Generation

a. Accept billing data from other internal systems. Ensure that the financial system does not produce bills for these transactions.

b. Allow transactions related to manually prepared bills to be entered directly.

c. Record adjustments to bills and post to customer accounts.

d. Print statements as well as bills.

4. Reporting

a. Provide on-line inquiry capability into the accounts receivable account file by selection criteria.

b. Produce audit trail reports to support data transferred from external systems to the financial system, including error listings.

F. COST ACCUMULATION

If management determines the need for a formal cost accounting system, the minimum cost accumulation functions that the computer system software must have are:

1. Include the ability to input cost-based budgets directly into the financial system.

2. Provide cost information through (reports), on-line inquiries, and downloaded data.

CHAPTER 3

ACCOUNTING SYSTEMS CONFORMANCE, EVALUATION, AND REPORTING

0301 PURPOSE. This chapter prescribes the procedures for determining whether DoD accounting systems are designed, documented, and operated in accordance with the provisions of this Regulation. It also establishes the procedures to be followed in evaluating operating accounting systems, reporting the status of actions to upgrade accounting systems to meet prescribed accounting principles, standards, and related requirements, and for preparing the annual report on accounting systems required by Section 4 of the Federal Managers' Financial Integrity Act (FMFIA), 31 U.S. Code 3512.

030101 Overview. The FMFIA places the responsibility for developing and maintaining adequate accounting systems on Federal agency managers. The Act requires that agency heads annually report to the President and the Congress whether agency accounting systems comply with the Comptroller General's standards, and holds managers responsible for correcting identified deficiencies. This statutory requirement for an annual report, as per OMB guidelines, is to be based on reviews conducted annually by system managers and users and on detailed evaluations conducted on a cyclical basis. This statutory requirement is implemented in DoD by this chapter. To satisfy this statutory requirement, DoD established the Accounting Systems Review and Evaluation Program. This program consists of the System Manager/User Review (SM/UR) process which supports and provides guidance to DoD managers in conducting annual reviews and the Consolidated Systems Evaluation (CSE) process which is the detailed, cyclical, independent evaluation as required by the Act. The results of these reviews and evaluations are used to prepare Section 4 of the annual FMFIA report and for reporting accounting system status in the DoD Five Year Financial Management Plan.

0302 POLICY

030201 Financial Management and Accounting System Structure. DoD is responsible for developing and maintaining an integrated financial management system structure. The financial management structure is the total of DoD's systems, both manual and automated, for planning, budget formulation and execution, and accounting. The accounting system structure is comprised of Primary (Core) accounting systems which provide full general ledger control over financial transactions and resource balances, and administrative accounting systems (i.e., subsidiary and accounting support systems) which provide data to the Primary accounting systems. Subsidiary accounting systems produce functional transactional data needed for the general ledger such as budget execution, payroll, travel, procurement, and real property. Accounting support systems must have full general ledger control and provide financial information on operations to the Primary accounting systems such as the Defense Business Operations and Foreign Military Sales. The accounting system structure falls within the scope of Section 4 of the FMFIA.

This accounting system structure shall:

A. Be in reasonable compliance with the Comptroller General, OMB, Department of Treasury and DoD accounting principles, standards and policies.

B. Provide maximum accounting and general ledger control through the use of the DoD Standard General Ledger.

C. Maximize the use of standardization in data administration, data processing and data elements and minimize the number of individual accounting and financial applications.

D. Maximize the most effective and economical use of data processing and telecommunications technology and accounting methodology and techniques.

E. Maximize the use of information systems architectures.

F. Produce auditable financial statements.

The accounting system structure is supplemented by feeder systems. Feeder systems provide purely nonfinancial information, or they are the initial record of financial data for processing by accounting systems. Feeder systems are recordation only and do not generate or compile financial information, and are not within the scope of Section 4 of the FMFIA. Examples of feeder systems are: logistics and inventory systems that provide acquisition cost, location, and quantity information; personnel systems providing grade and entitlements information; and timekeeping systems providing attendance and leave information. Feeder systems fall under the scope of Section 2 of the FMFIA.

0303 RESPONSIBILITIES

030301 The Comptroller of the Department of Defense (C, DoD):

A. Serve as the DoD senior official under OMB Circular No. A-127 for policy guidance, direction, and coordination with DoD Components and other Federal agencies on accounting system requirements.

B. Prescribe the principles, standards, and related requirements applicable to DoD accounting systems.

C. Approve, for signature by the Secretary of Defense, an annual consolidated accounting report and an inventory of operating accounting systems in accordance with Section 4 of the FMFIA.

D. Approve proposed development of or substantial revisions to accounting systems for adherence to the requirements of this chapter prior to providing DoD approval to proceed and to expend funds.

E. Approve and issue annually a Chief Financial Officers Five Year Financial Manage-

ment Plan for an integrated financial management system structure.

030302 The Defense Finance and Accounting Service shall:

A. Prescribe the procedures for conducting the annual evaluation of accounting systems required by Section 4 of the FMFIA, and prepare an accounting report for signature by Secretary of Defense.

B. Develop and maintain a Chief Financial Officers Five Year Financial Management Plan for an integrated financial management system structure which:

1. Describes the existing financial management structure and any changes needed to establish an integrated accounting system;

2. Is consistent with applicable accounting principles, standards, and requirements;

3. Provides a strategy for developing and integrating accounting and financial information to ensure adequacy, consistency, and timeliness of financial information;

4. Identifies and makes proposals to eliminate duplicative and unnecessary accounting systems, including sharing systems;

5. Identifies projects to bring existing accounting systems into compliance with the applicable standards and requirements;

6. Contains milestones for equipment acquisition and other actions necessary to implement the Five Year Financial Management Plan;

7. Identifies personnel needs and actions to ensure those needs are met;

8. Includes a plan for ensuring the annual audit of financial statements pursuant to the Chief Financial Officers Act; and

9. Estimates the cost of implementing the Five Year Financial Management Plan.

C. Develop and maintain an accounting systems planning process which monitors, coordinates and reports the compliance of the accounting systems with the requirements of the FMFIA and the status of developmental, enhancement and improvement initiatives and projects to improve accounting systems.

D. Develop and maintain a comprehensive accounting system inventory for accounting systems in operation and under development.

E. Assess the state of compliance of accounting systems with the Comptroller General, OMB, Department of the Treasury, and DoD accounting principles, standards and policies and report annually the results to the Secretary of Defense.

F. Develop, maintain, and issue the Key Accounting Requirements (KARs). KARs are a composite of GAO, OMB, and DoD regulations and are requirements with which all DoD accounting systems must comply.

G. Maintain and issue SM/UR guidance for annual compliance reviews of the Primary and Administrative accounting systems conducted by managers of the accounting systems.

H. Perform CSEs on developmental and operational Primary and Administrative accounting systems in the DoD Accounting System inventory on a cyclical basis.

I. Ensure that the accounting systems provide complete, reliable, consistent, and timely information which is prepared on a uniform basis and is responsive to the financial information needs of management.

030303 The Managers of Accounting Systems shall:

A. Ensure that accounting systems are developed, maintained, reviewed, improved and reported on per the requirements of this chapter.

B. Conduct annual reviews of assigned accounting systems per the DoD SM/UR guide.

C. Monitor the progress of development, enhancement or improvement initiatives to accounting systems under their control.

030304 The Users of DoD Accounting Systems shall: Work with the system managers in conducting the annual reviews of these systems and in producing the documented management assessment of system compliance.

030305 The Inspector General, Department of Defense shall:

A. Provide technical assistance and advice on DoD efforts to review and improve accounting systems.

B. Perform accounting system audits to determine whether accounting system reviews and evaluations were conducted in accordance with prescribed guidelines and advise the DFAS. Performing such IG audits should not be interpreted as preventing the IG from providing technical assistance and advice.

C. Advise the Secretary of Defense annually as to the effectiveness of DoD compliance with this Regulation and the requirements of the FMFIA.

0304 LEGAL REQUIREMENTS

030401 Budgeting and Accounting Act. The Budget and Accounting Procedures Act of 1950 requires that the head of each executive agency establish and maintain systems of accounting and internal controls that provide:

A. Disclosure of the agency's financial results;

B. Integration of the agency accounting with the central accounting and reporting requirements of the Department of the Treasury;

C. Financial management information;

D. Control and accountability for agency assets; and

E. Accounting results that will be the basis for:

1. Preparing and supporting the agency budget;

2. Controlling the execution of the agency budget; and

3. Providing financial information the President requires under the budget and appropriations authority.

030402 Federal Managers Financial Integrity Act. The Federal Managers' Financial Integrity (FMFIA) Act, P.L. 97-255, was passed by Congress in September 1982 to enhance the Budget and Accounting Procedures Act, and provide management accountability by requiring ongoing evaluations and reports. For the first time, agency heads were required under this Act to report annually to the President and the Congress as to whether accounting systems (Section 4 of the Act) conform to the principles, standards, and related requirements prescribed by the Comptroller General.

030403 Chief Financial Officer's Act. The Chief Financial Officer's Act, as implemented by OMB, requires that the annual audit of an agency's financial statements contains a report on the Agency's implementation of the Federal Manager's Financial Integrity Act. Auditors are required to review and report on management's process for evaluating and reporting on accounting systems and internal controls, and compare the most recent Federal Manager's Financial Integrity Act reports with the results of their audit.

0305 REGULATORY REQUIREMENTS

030501 OMB Circular No. A-34. Provides instructions on budget execution, financial plans, apportionments, reappportionments, deferrals, proposed and enacted rescissions, systems for administrative control of funds, allotments,

operating budgets, reports on budget execution, and reports on violations of the Antideficiency Act.

030502 OMB Circular No. A-127. Prescribes policies and procedures to be followed in developing, operating, evaluating, and reporting on financial management systems.

030503 The Treasury Fiscal Manual. Provides instructions for the guidance of departments and agencies of the Federal Government in the areas of central accounting and reporting, payrolls, deductions and withholdings, disbursing, deposit regulations and other fiscal matters. DoD accounting systems must be capable of producing the reports required by the applicable sections of the Treasury Fiscal Manual. This includes the general purpose financial statements prescribed in I TFM 2-4100, the Report on Obligations (SF 225) prescribed in I TFM 2-4400, and the Year-End Closing Statement (TFS Form 2108) prescribed in I TFM 2-4200.

0306 GUIDELINES

030601 Review and Evaluation of Accounting Systems. Section 4 of the FMFIA as implemented by OMB Circular A-127 requires an annual self-appraisal of operating accounting systems by systems managers and users, and an independent detailed evaluation performed on a cyclical basis. These self-appraisals and independent detailed evaluations form the basis for determining the compliancy of accounting systems. The DoD FMFIA Section 4 program's two processes to satisfy these requirements are the SM/UR program and the CSE program.

A. SM/URs are self-evaluations performed annually by the owners and operators of the accounting systems using the DoD SM/UR guide. The guide consolidates all accounting policies and requirements reported in Section 4 of the FMFIA, and provides direction for completing the annual review and determining accounting systems compliancy. The guide is prepared, issued, and the results evaluated and consolidated by DFAS.

B. CSEs are independent detailed reviews performed by DFAS Headquarter's

evaluation teams on a cyclical bases using the DoD Accounting Systems Review and Evaluation Policies and Procedures Handbook. Reviews and evaluations determine whether accounting systems operate in compliance with prescribed accounting principles, standards, and related requirements.

030602 Methodology for Determining Compliance of Accounting Systems

A. Key Accounting Requirement (KAR). Accounting requirements made up of a composite of all GAO, OMB, Treasury, DoD requirements, with which an accounting system must reasonably comply. Addendum A provides a list of the current 13 KARs. KARs are used both by System Managers annually and by DFAS Headquarters cyclically to review the accounting systems. This process identifies system departures and determines whether the departures are of such materiality to prevent the system from being in reasonable compliance with accounting principles, standards, and related requirements. All departures from a KAR which are determined to be material are material deficiencies and require corrective action with a reasonable implementation date.

B. Material Deficiency. DoD uses the concept of materiality to determine the compliance of its accounting systems and to identify, where appropriate, needed corrective actions. A departure from a KAR is considered a material deficiency if it could result in:

1. Loss of control of over 5% or more of the measurable resources for which the accounting system is responsible. Examples include: (1) if more than 5% of the disbursements were undistributed, KAR 7; (2) if more than 5% of Class 3 and 4 plant property could not be located using the official accounting records, KAR 2; or (3) if more that 5% of materials and supplies were not in the custody of the accountable supply officer, KAR 2.

2. Impairment of the DoD mission. Examples include: (1) maintaining memorandum records because official records cannot be relied upon, KAR 12; (2) excessive overrides and work arounds to make the system work,

KAR 11; or (3) inefficient and unnecessary procedures that result in the reduction of operating forces readiness or effectiveness, KAR 12.

3. Fraud or other criminal activities go undetected. Examples include: (1) allowing controls to be bypassed without the knowledge of an authorizing official, KAR 7; (2) inadequate supervision, KAR 11; (3) lack of separation of duties, KAR 7; or (4) inadequate audit trails to trace transactions, KAR 8.

4. An event that would result in significant adverse publicity or embarrassment to the Department and diminish the credibility or reputation of DoD. Examples include: (1) procurements without valid requirements, KAR 2; (2) excessive or unauthorized charges, KAR 7; or (3) erroneous or duplicate payments, KAR 9.

5. Violations of statutory requirements, KAR 7. Examples include: (1) use of funds for purposes other than appropriated (31 U.S.C. 1301); (2) obligations or expenditures in excess of funds available (31 U.S.C. 1517); (3) obligations not supported by documentary evidence (31 U.S.C. 1501); (4) expenditure of funds beyond the period authorized by law (31 U.S.C. 1502).

C. System Manager/User Review

1. A SM/UR is a structured and objective method for system managers to review their accounting systems for compliance. The DoD SM/UR Guide provides direction to the system managers of DoD accounting systems for conducting annual reviews of these systems for compliance to accounting statutory and regulatory requirements. It represents management's self-evaluation of its accounting systems. As such, it is based on all available knowledge of the system from the day to day operations plus the results of prior reviews and evaluations. The Guide provides the accounting criteria or requirements with which all DoD accounting systems must comply; it provides review techniques and guidance to assist system managers in determining if their systems are in compliance with the KARs, and it provides them the opportunity to identify needed corrective actions. The Guide incorporates the accounting principle of

materiality; therefore, only material deficiencies, departures from KARs which are determined to be material, are used by the system managers in assessing the compliance of their systems.

2. System managers are responsible for conducting these reviews in accordance with the DoD SM/UR Guide and by the schedule provided by DFAS Headquarters. Each accounting system is to be reviewed annually unless it is scheduled to be replaced or has undergone a detailed CSE in the current fiscal year.

3. System managers, based upon the results of the SM/UR, are to certify the compliance or noncompliance of accounting system(s) and forward the SM/URs to DFAS for review, analysis, and coordination.

D. Consolidated Systems Evaluation

1. A CSE is an independent, comprehensive, systematic, and objective evaluation conducted by DFAS Headquarter's evaluation teams. It is used to provide reasonable assurance that accounting systems comply with statutory and regulatory requirements. It is a detailed evaluation to determine whether the accounting system's design, procedures, and control techniques satisfy accounting principles and standards. A CSE determines whether the accounting system captures, records, processes, and reports financial transactions in conformance with these same standards. This evaluation covers the full life cycle of the transaction from initiation of the accounting transaction, through system processing, and ultimate posting to the accounts for inclusion in output reports. This life cycle/transaction flow approach will often involve both manual and automated procedures and controls.

2. CSEs are performed on both operational and developmental accounting systems. An operational accounting system is to be covered by a CSE every three years unless it is scheduled for replacement in the near term. Developmental accounting systems are selected for CSEs based on their importance as a corrective action to the compliance determination of the applicable accounting system. CSEs of

operational accounting systems identify departures and material deficiencies with the KARs and provide a compliancy determination. CSEs of developmental accounting systems identify departures and provide recommendations to ensure that the accounting system will be compliant when implemented.

0307 ANNUAL REPORT ON OPERATING ACCOUNTING SYSTEMS

030701 General. DFAS will annually validate the inventory and status of DoD operating accounting systems as of September 30. The status will be based on SM/URs, CSEs, audits, and Inspections. DFAS will submit to the Secretary of Defense, after approval by the C,DoD, by November 15 of each year the Annual Statement of Assurance required by Section 4 of the FMFIA, and as illustrated at figure 3-1. Documentation supporting the compliancy call and the SM/UR will be the support for the Annual Statement of Assurance for Section 4. The SM/UR and supporting documentation should be maintained for audit purposes by the office responsible for performing the review. Under OMB guidelines for the Chief Financial Officers Act, auditors are required to review and report on the agency's FMFIA program when performing financial statement audits.

030702 Inventory Reporting.

A. Accounting systems shall be consolidated and reported at the highest level consistent with adequate system interfaces. Consolidated systems contain interfaces and have a virtual uninterrupted data flow. Adequately interfaced systems contain edit checks and internal controls on the initial transaction that ensure the proper processing throughout the entire accounting cycle. Any system that performs an accounting function and that does not adequately interface with another accounting system will be reported separately. Systems that do not adequately interface may require reentry of source data or partially processed data, significant controls and edit checks on the data exchanged, reprocessing of data, or data conversion because of incompatibility.

B. An entity that uses an unmodified accounting system of another activity designated as the System Manager, or submits its accounting source documents to another DoD organization for processing and receives outputs from the processing organization's system, does not have an operating accounting system subject to reporting.

030703 Enclosure to the Annual Accounting Systems Report. The report shall be accompanied by an inventory listing of each Primary and Administrative accounting system. DFAS will conduct an annual validation of the inventory of accounting systems by March 31 of each year through canvassing of the System Managers. The prior year annual inventory listing shall be the beginning point for preparing the current year's inventory. New systems will be added

and Primary and Administrative accounting systems no longer in operation will be eliminated. All changes shall be explained by footnotes to the listing. See figure 3-2 for an illustration of this inventory listing.

030704 Categorization of the Inventory. The status of accounting systems in the inventory will be reported in the following classifications:

A. Primary or Administrative accounting systems substantially in compliance with prescribed accounting principles, standards, and related requirements.

B. Primary or Administrative accounting systems not in compliance with prescribed accounting principles, standards, and related requirements.

**ANNUAL REPORT ON OPERATING ACCOUNTING
SYSTEMS FOR FISCAL YEAR 19XX**

Pursuant to Section 4 of the Federal Managers' Financial Integrity Act of 1982, we have reviewed the Primary and Administrative accounting systems, as defined by the General Accounting Office (GAO), during the fiscal year ending September 30, 19xx. The review of each system was performed by operating personnel and encompassed the accounting principles, standards and related requirements prescribed by the this Regulation. Various methods were used in performing the reviews. They included the use of system questionnaires, transaction testing of sensitive areas in (number) systems, and review of operations. An inventory of operating accounting systems is included as an appendix.

DoD/DFAS has (number) Primary and Administrative accounting systems that meet the GAO definition of accounting systems requiring approval or conditional approval. The results of the evaluations described in the first paragraph, the approval of accounting system design documentation already provided by the GAO for certain accounting systems, assurances given by system managers, and other information, show that (number) systems are substantially in compliance with DoD Financial Management Regulation requirements.

The remaining (number) accounting system, while containing many good internal and fund control features, do not meet all necessary requirements and cannot be certified as in substantial compliance. (Describe any material deficiencies in the remaining noncompliant systems).

FIGURE 3-2

ADDENDUM
KEY ACCOUNTING REQUIREMENTS

KEY ACCOUNTING REQUIREMENT NUMBER 1**GENERAL LEDGER CONTROL AND FINANCIAL REPORTING****Description of Key Accounting Requirement**

The system must have general ledger control and maintain an appropriate account structure approved by DoD. The general ledger account structure must follow the general ledger accounts for assets, liabilities, equity, expenses, losses, gains, transfers in and out, and financing sources. A double entry set of accounts must be maintained within the system to reflect budget authority, undelivered orders, obligations, expenditures and other necessary accounts. The system must list both control and subsidiary general ledger accounts by title and numbers with definition of each account. Subsidiary accounts shall be reconciled to the control accounts at least monthly.

Full financial disclosure, accountability, adequate financial information, and reports must be provided for management purposes, and for necessary external reporting to OMB and Treasury. General ledger control and financial reports apply to all DoD systems except pay delivery systems, including stock, industrial, and trust funds.

This key accounting requirement addresses the mandatory fiduciary general ledger and reporting for the departmental, claimant, and field level accounting. It does not address the requirements for management information. KAR 12 on user information needs addresses management information aspects of an accounting system.

KEY ACCOUNTING REQUIREMENT NUMBER 2**PROPERTY AND INVENTORY ACCOUNTING****Description of Key Accounting Requirement**

The system must account in quantitative and monetary terms for the procurement, receipt, issue, and control of plant property, equipment, inventory, and material. Most acquisitions are recorded upon receipt of goods.

All property and equipment including ADP software with an initial acquisition cost of \$15,000 and an estimated useful life of more than two years must be capitalized and reported at cost including amounts paid to install the assets in the proper form and place. If cost is unknown, the fair value of the fixed asset at the date of acquisition is estimated. Costs of additions, alterations, or replacements that extend the asset's useful life or service capacity are capitalized as fixed assets. Proper accounting controls exist for Government-owned property held and used by contractors.

Inventory accounting must entail accounting and control over the acquisition and issuance of materials, the comparison of physical inventories and records, the planning for procurement and utilization, and effective custody of the materials.

The property management system must include accounting controls over inventory ledgers that identify the item, its location, quantity, acquisition date, cost, and other information. Subsidiary

ADDENDUM
KEY ACCOUNTING REQUIREMENTS
(CONTINUED)

property records are reconciled periodically to general ledger accounts. Physical controls include assigning specific individuals to inventory, placing physical safeguards on inventory, and periodically reconciling physical inventories to the accounting records.

KEY ACCOUNTING REQUIREMENT NUMBER 3

ACCOUNTING FOR RECEIVABLES INCLUDING ADVANCES

Description of Key Accounting Requirement

The system must account for all accounts receivables (any public indebtedness to the U.S. Government). Accounts receivable shall be recorded accurately and promptly to provide timely and reliable financial status. Accounts receivable shall be reduced upon collection of funds or when offset by previously established collateral. Uncollectible amounts should be promptly written off according to DoD instructions and the accounts receivable reduced accordingly. An allowance for uncollectible accounts and corresponding expenses must be established to provide full financial disclosure. The process should document the efforts made to collect delinquent debts (this includes compliance to the Debt Collection Act).

All collections shall be under general ledger accounting control. Cash shall be deposited as expeditiously as possible and immediately recorded in the accounting records.

Advances shall be recorded as assets until receipt of the goods or services or until contract terms are met. Accounting control must be maintained over advances made to employees, contractors, and all others. Advances must be promptly recorded and reconciled to general ledger control accounts.

KEY ACCOUNTING REQUIREMENT NUMBER 4

COST ACCOUNTING

Description of Key Accounting Requirement

Cost accounting must involve accounting analysis and reporting on costs of production of goods or services, or operation of programs, activities, functions, or organizational units. Cost accounting shall be provided in the accounting system if it is required in such instances as pricing decisions, productivity improvement decisions or measurement of performance, efficiency comparisons of like activities, and in industrial fund activities. For industrial fund activities, there is a DoD requirement for working capital funds to provide capital for industrial type and commercial type activities. Industrial fund accounting shall provide an effective means for controlling the cost of goods and services produced or furnished by industrial and commercial type activities. Cost accounting should be used in job order and process cost and in determining operating results. The primary components of DoD costs are labor and materials. However, other costs such as depreciation, amortization, unfunded liabilities such as severance pay, labor, manufacturing overhead, unallocated costs, etc., should be accumulated in the accounting system when needed.

ADDENDUM
KEY ACCOUNTING REQUIREMENTS
(CONTINUED)

KEY ACCOUNTING REQUIREMENT NUMBER 5**ACCRUAL ACCOUNTING****Description of Key Accounting Requirement**

Accrual accounting must recognize the accountable aspects of financial transactions or events as they occur. Transactions may be recorded in accounting records as they occur or be adjusted to the accrual basis at each month end. Accrual accounting should be used to meet the specific needs of management and the Congress.

Amounts of accrued expenditures and revenues must be recorded only when supported by prescribed documentary evidence on the basis of initial documentation received. They are adjusted subsequently, if necessary, upon receipt of more accurate documentation. Examples of acceptable initial documentation received include receiving reports, bills of lading, job sheets, certified unpaid invoices and journal vouchers showing administrative estimates by responsible officials. This documentation shall represent a reflection of transactions and performance which actually occur.

When liabilities are incurred as work is performed rather than when deliveries are made, accruals must be recorded from performance reports for the affected accounting period. Unpaid personnel compensation and benefits which have been earned as of the end of the pay year must be accrued in full or in part, e.g., the accrual of annual leave is material and should be recognized annually in the financial statements. Accrued payroll for civilian and military for salaries and wages, employer's share of fringe benefits, allowances, foreign nationals, severance pay, unfunded annual leave, annual leave, and retirement must be recorded and reconciled with the actual payroll.

KEY ACCOUNTING REQUIREMENT NUMBER 6**MILITARY AND CIVILIAN PAYROLL PROCEDURES****Description of Key Accounting Requirement**

Wherever feasible, DoD will use modern technology in its computer systems to process payroll transactions. The payroll system will interface with the accounting system providing obligation and accrual data. The military and civilian payroll processes and procedures must be available to management, users, auditors, evaluators, etc.

Payroll systems must incorporate controls of both gross and net payroll amounts and payroll deductions to ensure smooth payroll processing action and to minimize incorrect payments. Procedures will be available to ensure that only authorized deductions are made from pay and all deductions are supported by proper documentation. Accounting entries for authorized deductions from pay must be verified. Timely, accurate, and complete individual and subsidiary records are maintained for leave accounts, employee benefits, compensated personnel absences, general benefits such as bonuses and cash allowances for quarters and subsistence, allotments by type and amount, and other balances. Reconciliations of the general ledger and personnel records to payroll records will be performed.

ADDENDUM
KEY ACCOUNTING REQUIREMENTS
(CONTINUED)

Unpaid personnel compensation and benefits, including annual leave, which have been earned by employees as of the end of the pay year must be accrued in full. Accrued payroll will be reconciled with actual payroll. Personal compensation and all employee benefit expenses (including federal contributions) shall be reported and disclosed separately in financial statements.

Automated controls will include predetermined limits on the computation of pay; accumulation and tests of zero balances; checks on sequence of records; counts of records; crossfoot balances; and other tests of the validity of the data or accuracy of the processing. Separation of duties is promoted by requiring vouchers authorizing payment to be certified before payment by a duly authorized certifying officer who does not compute amounts payable, maintain the payroll records, or distribute the paychecks.

KEY ACCOUNTING REQUIREMENT NUMBER 7

SYSTEM CONTROLS (FUND AND INTERNAL)

Description of Key Accounting Requirement

A. **Fund Control.** The system must ensure obligations and expenditures do not exceed the amount appropriated, apportioned, reapportioned, allocated and allotted (Anti-Deficiency Act 31 U.S.C.). The system must provide a process and procedures for control over errors to ensure that once errors are detected: (1) corrections are made in a timely manner and reentered into the appropriate processing cycle; (2) corrections are made only once; and, (3) the correction itself is validated. The system must show the appropriations and funds to be accounted for and a description of the accounting entity's proposed fund distribution and control process. The system must have good fund control procedures to prevent untimely liquidation of obligations, unmatched expenditures, and undistributed disbursements. Obligations must be recorded immediately. Fund control procedures must include fiscal year end Section 1311 Statement of Certification by a senior accounting official to ensure the validity of all obligations and unobligated balances. Administrative funds control must ensure that funds are used economically, efficiently, and only for properly authorized purposes.

B. **Internal Controls.** The system must have adequate internal controls to prevent, detect, and correct errors and irregularities that may occur throughout the system. Separation of duties and responsibilities must be maintained for initiating, authorizing, processing, recording, and reviewing transactions. Automated systems must have system security and integrity for authorized processing to include procedures and controls which protect hardware, software, and documentation from physical damage by accident, fire, flood, environmental hazards, and unauthorized access. Also, the system must have controls to prevent unauthorized use of confidential information.

KEY ACCOUNTING REQUIREMENT NUMBER 8

AUDIT TRAILS

Description of Key Accounting Requirement

Audit trails permit tracing transactions through a system. Audit trails allow auditors or evaluators to ensure transactions are properly accumulated and correctly classified, coded and recorded in all affected

ADDENDUM
KEY ACCOUNTING REQUIREMENTS
(CONTINUED)

accounts. Audit trails should allow a transaction to be traced from initiation through processing to final reports. In addition, good audit trails allow for the detection and tracing of rejected or suspended transactions, such as unmatched disbursements, for ultimate systematic correction in a reasonable timeframe.

A fundamental requirement for any compliant accounting system is that the financial transactions for which the system must account be adequately supported with pertinent documents and source records. All transactions, including those which are computer-generated and computer-processed, must be traceable to individual source records. Audit trails enable the tracing or replicating of a transaction from its source to the resulting record or report, and from the resulting record or report to the source. Items in source records necessary for audit-trail purposes include transaction type, record or account involved, amount, processing references, and identification of the preparer and approver of the transaction. A key test of the adequacy of an audit trail is whether tracing the transaction forward from the source or back from the result will permit verification of the amount recorded or reported.

KEY ACCOUNTING REQUIREMENT NUMBER 9

CASH PROCEDURES AND ACCOUNTS PAYABLE

Description of Key Accounting Requirement

The system shall be designed to ensure timely payments based on properly approved disbursement documents. Payment process and procedures must comply with the Prompt Payment Act. Cash discounts should be taken when determined to be financially advantageous to the DoD.

Accounts payable are liabilities which should be recorded when goods or services are received. The liability reported in the annual financial statements shall reflect amounts due for goods and services received. For items manufactured by a contractor to specifications, the accounting system shall reflect the appropriate payable, including contract retentions, for each accounting period based on requests for progress payments or on reasonable estimates of unbilled contractor performance. This shall be recorded in the proper accounting period.

Accounts payable for services performed by employees, contractors, and others shall be determined based on performance as evidenced by payroll records, progress billings, or other available data. Reasonable estimates of the cost of services performed before the end of a reporting period shall be made for annual financial reporting purposes in the absence of invoices or other available data. The system shall record the liability for goods and services purchased under a long-term contract in the period in which the goods or services are received or accepted.

KEY ACCOUNTING REQUIREMENT NUMBER 10

SYSTEM DOCUMENTATION

Description of Key Accounting Requirement

The accounting system must have adequate system documentation which must include interfaces between accounting system segments. The detailed accounting system design package shall adequately document

ADDENDUM
KEY ACCOUNTING REQUIREMENTS
(CONTINUED)

the functional user's accounting requirements. Such documentation must be available in users manuals, subsystem specifications, etc. The detailed documentation must be comprehensive and shall include a combination of descriptions of processes, flowcharts and narrative description, diagrams, basic accounting entries including adjusting and closing entries, illustrations or samples of source documents for input, and sample outputs and reports. It shall also include internal controls incorporated within the accounting system. The documentation must demonstrate conformance with the DoD Financial Management Regulation and other DoD requirements for adequate and reasonable documentation. The system documentation shall be in enough detail to be understood by computer personnel and system accountants assigned to develop applicable software. It shall demonstrate readily to users, auditors, and evaluators the system's conceptual processes and procedures. The documentation should be in good order to facilitate maintenance operations and transaction testing. Good documentation would permit transaction testing which is designed to disclose whether valid transactions are processed properly, and whether the system rejects invalid transactions. The documentation shall have enough detail that a testing of the system could cover an entire transaction, from initial authorization through processing, posting to the accounts, and reporting. The documentation should indicate the mission, organization, description, objectives, financial management requirements, and boundaries of the system.

KEY ACCOUNTING REQUIREMENT NUMBER 11

SYSTEM OPERATIONS

Description of Key Accounting Requirement

Adequate organization and planning shall exist regarding systems operations to assure that financial management and accounting objectives are met in an economical and efficient manner. It must satisfy legal requirements, laws, regulations, accounting principles and standards, and related requirements as prescribed in the DoD Financial Management Regulation and other related instructions. Financial systems shall contain all data required to achieve the purposes for which they were created and maintained. They shall also be as simple as possible, consistent with regulatory requirements and users' needs. The existing and planned hardware should be adequate to process efficiently current and projected future transaction volumes. There should be compatibility of existing and planned hardware to interface effectively with other systems. The system should conform to required DoD systems documentation requirements. The best of acceptably priced contemporary technology should be used. There should be detailed system operating and maintenance procedures. Also, there should be periodic system reviews to assure that the system is functioning as intended, required procedures are being followed, any operating problems are promptly identified and corrected, and possible state-of-the-art enhancements are incorporated as appropriate.

KEY ACCOUNTING REQUIREMENT NUMBER 12

USER INFORMATION NEEDS

Description of Key Accounting Requirement

User information needs and requirements as to quality, accuracy, timeliness, reliability, responsiveness of the system shall be adequate in response to program, financial managers, and other users. The system

ADDENDUM
KEY ACCOUNTING REQUIREMENTS
(CONTINUED)

shall satisfy users as to their reporting requirements particularly as it relates to month end reports. The system must also satisfy user needs to facilitate their management decision making process. In addition, if there are departures in other key accounting requirements that adversely impact the users of the system, the materiality of these departures will be determined under this key accounting requirement.

KEY ACCOUNTING REQUIREMENT NUMBER 13

BUDGETARY ACCOUNTING

Description of Key Accounting Requirement

The system shall support formulation of the budget, support budget requests, and control budget execution. Programming, budgeting, accounting, reporting classification, and coding structure should be uniform and consistent with each other and synchronized with the organizational structure so that actual activity reported within the accounting system can be compared with enacted budgets and support future budget formulation for each activity. Presidential, Congressional, and OMB decisions shall be recorded in the system, and financial management data and results shall be appropriately classified to track such decisions. The system shall record budget resources at the appropriate level and account for appropriations, reappropriations realized, apportionments, allocations, transfers, allotments of budget authority, customer orders accepted, reimbursables, and other appropriate accounts prescribed by DoD.

CHAPTER 4

FINANCIAL MANAGEMENT CODING STRUCTURE0401 ACCOUNTING CLASSIFICATION CODE

The standard accounting classification coding structure that will be used by all DoD Components is currently being developed by the Defense Finance and Accounting Service and will be issued as soon as it is finalized. DoD Components will continue to use their current accounting classification coding structure unless otherwise notified.

0402 ACCOUNTABLE STATION CODE

This 6-character field contains the DoD Component-assigned identification number of the accountable station responsible for entering the transaction into the applicable accounting system. The accountable station code is the

Fiscal Station Number (FSN) of both OSD and the Army, the Authorization Accounting Activity (AAA) of the Navy, or the Accounting and Disbursing Station Number (ADSN) used by the Air Force. The accountable station code will be a field of the accounting classification code when it is issued.

Addendum 1 through addendum 4 to this chapter lists the current accountable stations within the Department of Defense with their current mailing addresses. DoD Components shall provide updated listings of their accountable stations with valid hard-copy and electronic mailing addresses as changes occur. This information shall be provided to the Director, Defense Finance and Accounting Service (DFAS). Addenda 1 through 4 shall be updated at least annually.

CHAPTER 5

JOINT FINANCIAL MANAGEMENT IMPROVEMENT PROGRAM0501 GENERAL050101 Purpose

This chapter sets forth the objectives of the Joint Financial Management Improvement Program (JFMIP). It provides the guidelines for DoD participation in the JFMIP and for reporting annually initiatives undertaken by DoD Components to improve financial management in the Department of Defense.

050102 Overview

A. The JFMIP is a joint and cooperative undertaking of the Office of Management and Budget, the General Accounting Office, the Department of the Treasury, and the Office of Personnel Management. The program is administered by a steering committee, which is composed of representatives of the four offices, and the Executive Director of the JFMIP. Under the guidance of the steering committee, the Executive Director and staff develop, direct, and undertake programs and projects for JFMIP on a day-to-day basis.

B. The overall objectives of the JFMIP are to:

1. Encourage and promote the sharing and exchanging of information concerning good financial policies, practices, and techniques throughout the Government, and

2. Improve financial management throughout the Government, and thereby contribute significantly to the effective and efficient planning and operation of Government programs.

0502 DoD SUPPORT OF JFMIP EFFORTS

To achieve fully the necessary coordination and cooperation, the head of each DoD Component shall designate a liaison official to serve as a point of contact on matters relating to JFMIP.

DoD liaison representatives are identified in the Federal Financial Management Directory. Their names are listed with the names of representatives of other Government Departments and Agencies. The program is implemented in the Department of Defense in two major ways:

050201 Special projects may be undertaken to study significant problem areas and recommend solutions. DoD Components benefit by cooperating with and participating in these studies as requested by the Comptroller, DoD.

050202 An annual report on the progress within the Department of Defense on its own financial management improvements helps ensure continued management attention to and interest in improving financial management. The report describes financial management activities accomplished and in progress, and becomes part of the JFMIP Annual Report highlighting some of the major financial management improvements throughout the Federal Government.

0503 INFORMATION REQUIREMENT

050301 An annual report shall be prepared on major projects. The report shall describe the project, highlight potential or actual savings, and identify the responsible action officer who may be contacted for further details. A "major" project for the JFMIP annual report is one of the following:

- A. Has estimated savings of at least \$10 million over the life cycle of the project.

- B. Eliminates weaknesses that could lead to fraud, waste, abuse, and mismanagement of Government resources.

- C. Implements actions that are in response to the Congress.

- D. Improves the accuracy, reliability, and timeliness of financial reports.

050302 The report and two copies are due to the Defense Finance and Accounting Service within 30 workdays after September 30. A Status Report of Financial Management Improvements is optional and is to be submitted only if a DoD Component has something of value, which qualifies as a "major" project.

050303 The reporting requirement of this chapter is exempt from licensing in accordance with paragraph E.4.f. of DoD 7750.5-M, "DoD Procedures for Management of Information Requirements."

050304 Instructions for completing the annual report on major financial management improvements are as follows:

A. The reporting format to be used is provided as an addendum to this chapter. The annual report should consist of a series of narrative summaries prepared in this format (one page for each major financial improvement).

B. For each item being reported, enter in the space provided one of the following report categories:

- | | |
|----------------|--------------------------------|
| Reporting. | 1. Improved Financial |
| Consolidation. | 2. Systems Modernization and |
| | 3. Accounting Procedures. |
| | 4. Auditing Improvements. |
| | 5. Budgeting. |
| Management. | 6. Cash, Credit, and Debt |
| | 7. Microcomputer Applications. |
| Systems. | 8. Payroll and Personnel |
| | 9. Productivity. |
| | 10. Other. |

C. The status of each reported item should be checked either as:

1. "Accomplishment;" that is, completed during the reporting period, or
2. "In process."

D. For each reported item, there should be included in narrative form in the summary section of the report (addendum):

1. A concise and succinct description of the improvement.
2. The actual or estimated implementation and/or completion date.
3. Any actual or anticipated cost savings.
4. Other major benefits.
5. The name and telephone number of an individual to whom requests for more specific information on the improvement can be directed.

E. The narrative should describe the improvement fully, yet be concise enough that it can be reported with minimum or no modification in the annual report. Do not use acronyms or abbreviations, unless they are fully explained or identified. Examples of management improvement projects are provided on pages 79 through 83 of this chapter. The summary narrative on each reported item should be limited to the space provided on the addendum. Refer to previous JFMIP annual reports for a guide concerning length and description of the summary report on each improvement. More detailed information is optional, but, if prepared, it should be attached to the summary report.

F. When special emphasis is placed on efforts that may be considered part of the financial management improvement program, such as accounting systems, approvals, and initiatives to improve integrity and efficiency, care must be taken to avoid placing duplicate or conflicting requirements upon a DoD Component's accounting entities.

050305 Instructions for updating the JFMIP Federal Financial Management Directory are as follows:

A. A current updated directory listing the top policy officials in the financial management field, and key financial management officials in headquarters and field offices for all major DoD Components shall be submitted with the annual report. The listing will include the title of the position, address, and telephone

number for each individual. The list of officials should cover, as a minimum, those functions identified in paragraph 050304.B, above.

B. The JFMIP liaison representative designated by each DoD Component should be a high official at the policy-making level designated, or redesignated, by placing an asterisk in front of his or her name.

Description of the Initiative - attach no more than one page:

- Include concise description that conveys the essence of the initiative and its potential value to other agencies for application and use
- State the date of completion and/or implementation (actual or estimated)
- Describe actual or estimated benefits, such as cost savings
- Indicate future plans relating to this initiative

Financial Management Improvement Initiative

Department or Agency: Defense Finance and Accounting Service

Contact Person: Edward Grysavage

Telephone Number: (703) 607-1067

Category of the Financial Initiative: Payroll Systems

Year-end Status (calendar year 1991): In Process

In September 1991, the Navy Standard Civilian Payroll System was chosen as the standard civilian pay system DoD-wide and was renamed the Defense Civilian Pay System (DCPS). DCPS will provide DoD with a fully automated standardized civilian payroll system supported by standard payroll procedures and practices. The system will be consolidated at two locations and will eliminate the duplication and inefficiencies which occur in present payroll and central design agent operations. Other benefits include:

- (1) Uniform interpretations of regulations and payroll calculations;
- (2) Standard operating procedures, forms, and training;
- (3) Reductions of overall documentation including regulations, manuals, user manuals, etc.; and
- (4) Standardization of civilian payroll systems supports the standardization and integration in other areas such as personnel, accounting, and labor accounting.

The first payroll office is scheduled to become operational in mid-1992 with consolidation being completed in 1995. DCPS will save approximately \$700 million in a ten year period.

Financial Management Improvement Initiative

Department or Agency: Defense Finance and Accounting Service

Contact Person: Captain William Wilund

Telephone Number: (703) 602-4882

Category of the Financial Initiative: Payroll System

Year-end Status (Calendar year 1991): In Process

Currently, there are six separate pay systems paying the active, Reserve, and National Guard members of the four Services. A study was conducted to determine the feasibility of standardizing/consolidating these systems into one system and to determine if inefficiencies and duplication could be eliminated. On October 1991, the recommendations of the study were approved to implement the Defense Joint Military Pay System (DJMS). DJMS will encompass two separate subsystems, one operating at the Indianapolis, Cleveland, and Denver Centers for paying Army, Navy, and Air Force personnel and the other operating in the Kansas City Center for paying Marine Corps personnel. The high level of integration of the Marine Corps personnel and pay systems made the implementation of a single software system impractical.

Prior to starting the study, the Army and the Air Force were in the process of standardizing their active, Reserve, and National Guard pay systems to Joint Service Software (JSS). JSS will be the nucleus for DJMS and will be modified to accommodate the Navy's requirements. Consolidation of the Marine Corps active and Reserve pay systems will begin in January 1992 and be completed in August 1993. DJMS is scheduled to be completed by December 1994.

DJMS will eliminate duplicate software development efforts, standardize operations, pay computations, and interpretations; and reduce operational costs. Estimated savings are \$37.4 million over an 8 year life cycle.

Financial Management Improvement Initiative

Department of Agency: Defense Finance and Accounting Service

Contact Person: Ms. Gloria Harris

Telephone Number: (703) 607-1370

Category of the Financial Initiative: Payroll Systems

Year-end Status (calendar year 1991): In Process

Currently, eight different systems are used to process pay for military retirees and annuitants. We conducted a feasibility study which determined that the inefficiencies and duplicate operations inherent in the present processing environment could be substantially reduced upon incorporation of a standardized and consolidated pay process. As a result, on August 8, 1991, the Defense Finance and Accounting Service received approval to implement the Defense Retiree and Annuitant Pay System (DRAS) as the standard pay system for supporting military retirees and their annuitants in the future. This system will allow for enhanced customer service by providing a standard system with base level support for all military retirees and annuitants.

The DRAS implementation effort will convert the Army, Navy, Air Force, and Marine Corps retiree and annuitant systems into one consolidated system to operate at two Defense Finance and Accounting Service Centers. Payments for all military retirees will be processed at our Cleveland Center and all annuitant payments at the Denver Center. The implementation effort commenced in October 1991 and is scheduled to be completed by January 1995.

The system will provide for uniform interpretations of regulations and pay calculations; standard operating procedures, forms, and training; a reduction in the overall documentation requirement; and a significant reduction of 242 personnel billets. Additionally, it will support standardization and integration in other areas such as personnel and accounting.

The net projected life cycle savings for this standard system implementation equate to approximately \$12.2 million.

Financial Management Improvement Initiative

Department or Agency: Defense Finance and Accounting Service

Contact Person: Michael Bryant

Telephone Number: (703) 607-1587

Category of the Financial Initiative: Travel

Year-end Status (calendar year 1991): In Process

DoD has approved the implementation of a standard travel system designated the Defense Travel Pay System. The system will replace manual and automated systems in use by DoD agencies and the Military Services. All travel orders and claims will be prepared using the system at the local activity level and all claims will be paid from a central site. Local activities will use telecommunications to interface with the central site. The system will make extensive use of electronic signature and certification.

The system will be comprised of several modules, some of which will be purchased and usage limited to DoD by contractual agreement. Major modules will include a travel order writer, claim preparation modules for both permanent change of station (PCS) and temporary duty travel (TDY), and claim computation modules for both PCS and TDY.

The system will use electronic signatures to eliminate paper flow between activities and the central site. The system will feature single entry of data and automated interfaces with accounting, personnel, disbursing, and debt collection systems. These features will eliminate manual reentry of data and many accounting reconciliation problems. The system will also provide automated standard tracking of travel claims to ensure timely filing and collection of excess advances. The system will make use of EFT for advances and settlements. The system will also make use of the government travel card and travelers checks for advances. Government checks and cash will still be used for advances, but their use will be minimized.

The development of the system has already started. The first prototype is planned for January 1993. Full scale implementation is scheduled to begin in July 1993 and scheduled for completion in June 1994. Once fully implemented, the system will save \$364 million over 10 years.

Telephone Number: (703) 607-0810

Category of the Financial Initiative: Other Improvements

Year-end Status (calendar year 1991): In Process

Defense Management Report Decision (DMRD) 941 directed the implementation of Electronic Commerce/Electronic Data Interchange (EC/EDI) throughout the Department of Defense (DoD) to accomplish specific cost reductions over a six year period with the goal of achieving \$98M per year savings. As a result, the Defense Finance and Accounting Service (DFAS) has undertaken a pilot project to test and implement the capabilities needed to establish an EDI system which allows paperless interoperability using standard: (1) computer system components; (2) commercial and DoD EDI transaction formats; (3) electronic mail and messaging formats; (4) DoD networks; (5) commercial networks and third-party services; and (6) electronic funds transfers. This initiative will streamline finance and accounting procedures. In addition, it impacts functional areas across the DoD; i.e., procurement/contract administration, transportation, and supply/maintenance as well as impacting on business interactions with the private sector.

The overall volume of transactions shall be the primary determiner for prioritization of pilot and migration site selection. There will be maximal use of existing automated systems and no additional networks added to implement the EDI system. This project will begin in the second quarter of FY 92. Eighty percent of full operating capabilities is anticipated in the fourth quarter of FY 95.

Currently, there is very limited EC/EDI use among the DFAS, the DoD, and the private sector, resulting in inefficient and less than timely execution of business transactions. The benefits of this DFAS initiative include, but are not limited to, lower data entry cost, more accurate and timely business data, reduced inventory, decreased paper handling, improved productivity, better business relationships, and greater customer satisfaction.

Through DMRD 941 guidance and executive direction, over 39% (\$38.9M) of the annual direct cost savings referenced above, will be realized by implementing DFAS EDI initiatives.

★ CHAPTER 6 ★

**UNDER SECRETARY OF DEFENSE (COMPTROLLER)
FINANCIAL MANAGEMENT AWARDS PROGRAM****0601 PURPOSE AND SCOPE**

The purpose of the Under Secretary of Defense (Comptroller) Financial Management Awards Program is to recognize significant contributions of individuals or groups to the improvement of financial management. The Program applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities, (hereafter referred to collectively as “the Department of Defense (DoD) Components”).

0602 POLICY

060201. It is DoD policy that:

A. Military and civilian members who make outstanding contributions to the improvement of DoD financial management should be recognized.

B. Recognition, in the form of an engraved plaque and certificate, shall be presented to, and retained by, the individual or group deemed to have achieved the most outstanding contribution(s) to the improvement of a financial management system, financial management initiative not directly related to system improvements, or innovative use of technology, during the preceding fiscal year.

060202. The following are the three award categories in the Under Secretary of Defense (Comptroller) Financial Management Awards Program:

A. Financial Management System Improvement. This category recognizes achievements resulting in the improvement, consolidation or standardization of the information technology aspects of a financial management system, or manual processes in support of information technology efforts. Examples of appropriate efforts are as follows:

1. Designing and/or implementing new financial systems where current processes are manual or partially automated.

2. Improving systems, including processes or paper flow.

3. Developing new or substantially revising and improving existing financial management systems, or the financial management aspects of information in feeder systems.

4. Developing new or substantially revising and improving existing financial management systems, or the financial management aspects of information in feeder systems.

5. Improving testing approaches to better ensure integrity prior to bringing a system on-line.

6. Reducing time required to process transactions. This may include the reduction of manual processing, elimination of unneeded processing steps, or consolidation of procedures.

B. Financial Management Initiative. This category recognizes improvement in aspects of financial management programs not directly related to system improvements. Efforts may be undertaken in budgeting, accounting, financial analysis, auditing, and other fields related to financial management. Examples of appropriate efforts include:

1. Reducing problem disbursements
2. Reducing aged accounts receivable and payable
3. Improving the quality and timeliness of report content
4. Prompt recording of commitments and obligations
5. Reducing paperwork
6. Improving funds control
7. Consolidating organizations under tight deadlines
8. Training to enhance performance
9. Interfacing with other areas to ensure more efficient processes
10. Improving accounting policies and procedures
11. Improving budget formulation and execution

C. Innovative Use of Technology to Improve Financial Management. This category recognizes achievements associated with the introduction or application of new technologies, as well as the introduction or application of existing technologies in new ways. Examples of appropriate efforts are as follows:

1. Enhancing processes by using imaging to decrease the amount of paper required in financial management processes.

2. Scanning paper transactions to reduce storage retention requirements.
3. Using emerging concepts, such as the Internet, to enhance the transference of information, order materials, obtain updates, meet reporting requirements, etc.
4. Introducing or expanding the use of charge cards, smart cards, etc.
5. Using electronic commerce/electronic data interchange to expedite transaction flows, processing, payments or remittance information.
6. Bar-coding to speed entry of data and enhance timeliness of information.
7. Applying satellite telecommunications.
8. Using teleservices to integrate telephone service with data files.
9. Expanding electronic interfaces.

060203. Award Levels. No more than six separate awards--two for each of the three categories listed above--will be awarded. Within each category, no more than one awardee will be selected from among the nominees from the headquarters and major command level, and no more than one awardee will be selected from among the nominees from organizations below major commands. While individuals or teams may be nominated for each of the categories and levels, only one winner (whether individual or team) will be awarded in each category for each level.

060204. Eligibility. Any military member or civilian employee of the DoD (to include Reserve Components) is eligible for nomination.

060205. Team Criteria. For purposes of these awards, a team is considered as a grouping of individuals, made up of three to twenty individuals, brought together temporarily to perform a specific task within a specific time frame. When two individuals work together on an applicable project or effort, they may be submitted jointly for an individual award. Teams of greater than 20 individuals are not eligible for these awards.

0603 RESPONSIBILITIES

060301. The Under Secretary of Defense (Comptroller) shall:

- A. Select awards recipients for each award category.
- B. Present awards to each recipient in an annual ceremony.

060302. The Deputy Chief Financial Officer annually shall convene a Financial Management Awards Program Board to receive nominations from the DoD Components and to make award recommendations to the Under Secretary of Defense (Comptroller).

060303. The Financial Management Awards Program Board shall:

A. Be composed of the Deputy Chief Financial Officer, or designee, (Chair) with a representative from each of the Military Departments, the Defense Finance and Accounting Service, and one from the Defense-wide (DW) community--which encompasses all other Defense Agencies and DoD Field Activities. Board nominees should be members of the Senior Executive Service, or general/flag officers, and should not have been nominators for any of the award nominations to be considered.

B. Convene annually to evaluate nominations and make recommendations for winners in each award category.

C. Recommend award winners for each award category based on the criteria in paragraph 060401.

060304. Heads of the Military Departments, the Defense Finance and Accounting Service, and the Director, Administration and Management shall each select a representative to the Financial Management Awards Program Board and notify the Deputy Chief Financial Officer by March 1, each year, of the representative selected from their DoD Component. The Director for Administration and Management shall appoint a representative of the Defense Agencies and DoD Field Activities (other than the Defense Finance and Accounting Service) from among nominees submitted to the Director, Administration and Management, by the Directors of the applicable Defense Agencies and DoD Field Activities.

060305. Heads of DoD Components each year shall nominate individuals for the Financial Management Award in accordance with the procedures and criteria in subsection 0604.

0604 DOD FINANCIAL MANAGEMENT AWARD CRITERIA AND PROCEDURES

The procedures and criteria for the DoD Financial Management Award are as follows:

060401. Award Criteria

A. Nominations for DoD Financial Management Awards shall be based on individual or team achievements during the preceding fiscal year and evaluated on the following criteria:

1. Cost reductions (in dollars and/or human resources).
2. Improvements in the timeliness and accuracy of information.

3. Enhanced customer service.
4. Streamlined policies and procedures.
5. Standardized policies, procedures and systems.

060402. Nomination Format

A. The attached nomination form (Parts A and B) shall be submitted for each nomination.

1. Part A includes the fiscal year of the accomplishment, award category, nominee data, nominating official data, nominating official signature, and citation.

2. Part B includes the nominee or team name, a brief description of the project or effort, and a narrative of the outstanding achievement. This part is limited to one page.

060403. Submission of Nominations

Heads of DoD Components shall submit nominations to the Office of the Deputy Chief Financial Officer, Room 3E831, the Pentagon, Washington, DC 20301-1100. Nominations must be received no later than the last working day of the second week in March in each year.

0605 AWARD DESCRIPTION (PLAQUES AND CERTIFICATES)

060501. For an individual award, the award recipient will receive an engraved plaque and a certificate signed by the Under Secretary of Defense (Comptroller).

060502. For a team award, the team will receive a single engraved plaque and each team member will receive a certificate signed by the Under Secretary of Defense (Comptroller).

★ This entire chapter is revised.

A. Nominee/Team Name:_____

B. Name of Project/Effort:_____

C. Brief Description of Project/Effort:

D. Narrative Statement of Achievement: (The narrative should be specific and factual, giving concrete examples of the accomplishment, how it was accomplished, what benefits or results were realized, and why or how such benefits significantly improved financial management.)

CHAPTER 7

UNITED STATES GOVERNMENT STANDARD GENERAL LEDGER

0701 PURPOSE. This chapter prescribes the United States Government Standard General Ledger (USGSGL) that is required for use in the accounting systems of the Department. Additional information on this subject may be obtained on the Internet at: <http://fms.treas.gov/ussgl/index.html>

0702 GENERAL

070201. The USGSGL integrates budgetary and proprietary accounting for each transaction, as would be required in an efficient, effective accounting system. Both the proprietary and budgetary accounts are self-balancing within themselves. The budgetary accounts are further divided into accounts applicable to three organizational levels within the Department of Defense (DoD). The three levels are (1) Departmental level, (2) Intermediate Command level and (3) Installation level. Budgetary accounts applicable to each of the three levels must be self-balancing within that level. Since installation level budgetary accounts are used to record budget execution transactions, they are not limited for use at an installation and may be used at any, or all, DoD organizational levels.

070202. Summary and posting accounts have been provided and are so designated in the USGSGL and associated account descriptions. A summary account is an account that has been subdivided into subsidiary posting accounts. Accounts that are not further subdivided are posting accounts. Postings should not be made to summary accounts.

0703 INTERNAL CONTROL STANDARDS. The objectives of internal controls are to reasonably assure that (1) obligations and costs comply with applicable law; (2) assets are safeguarded against waste, loss, unauthorized use, and misappropriation; (3) revenues and expenditures are recorded and accounted for properly so that accounts and reliable financial reports may be prepared and accountability of assets may be maintained. Specific internal control standards to achieve these objectives are outlined below:

070301. Documentation. Internal control systems and all transactions and significant events are to be documented clearly and the documentation is to be available for examination.

070302. Recording of Transactions and Events. Transactions and significant events are to be recorded promptly and classified properly.

070303. Execution of Transactions and Events. Transactions and significant events are to be authorized and executed only by persons acting within the scope of their authority.

070304. Separation of Duties. Key duties and responsibilities in authorizing, processing, recording, and reviewing transactions should be separated among individuals.

070305. Supervision. Qualified and continuous supervision is to be provided to ensure that internal control objectives are achieved.

070306. Access to and Accountability for Resources. Access to resources and records is to be limited to authorized individuals. Accountability for the custody and use of resources is to be assigned and maintained. Periodic comparison shall be made of the resources with the recorded accountability to determine whether the two agree. The frequency of the comparison shall be a function of the vulnerability of the asset.

0704 APPLICABILITY AND SCOPE

★ 070401. The USGSGL is applicable to all DoD accounting systems for all appropriations and funds. The Office of Management and Budget (OMB) Circular A-127, “Financial Management Systems,” and the “Federal Financial Management Improvement Act of 1996” require implementation of the standard general ledger (SGL) at the transaction level throughout an agency’s financial management systems, meaning both financial and mixed system applications. This means that applications are required to process transactions following the definitions and defined uses of the general ledger accounts as described in the SGL. Compliance with this standard requires data in financial reports to be consistent with the SGL, transactions to be recorded consistently with SGL rules, and supporting transaction detail for SGL accounts to be readily available. SGL applicability does not depend on an application containing a general ledger itself. For example, a payroll system which processes transactions in accordance with SGL transaction rules, sends summarized data to the core financial system for appropriate posting, and provides for sufficient traceability from the general ledger balances to the source documentation, would be considered in compliance with the SGL at the transaction level.

★ 070402. The USGSGL uses a four-digit account numbering system. Within the DoD, the USGSGL shall be implemented using attributes and subaccounts to accomplish the internal and external reporting needs.

★ 070403. The basic structure of the USGSGL consists of:

Proprietary/Budgetary Accounts

1000	Assets
2000	Liabilities
3000	Equity
4000	Budgetary
5000	Revenues and Financing Sources
6000	Expense
7000	Gains/Losses/Extraordinary Items, etc.
8000	Memorandum

0705 BASIC CONCEPT

070501. All resources acquired and used, and claims against those resources, are to be recorded on the basis of financial transactions (i.e., recordation of amounts in general ledger accounts shall be transaction driven).

★ 070502. The USGSGL shall be used regardless of the sources of funds. However, fund identification of financial resources shall be maintained in order to (1) disclose compliance with financial authorizations and (2) prepare reports on the status of appropriations and funds for the Congress, the OMB, and the Treasury Department.

★ 070503. The USGSGL account structure is intended to be the minimum structure required to assure consistent treatment of similar transactions. Subsidiary accounts may be established as needed to meet specific management requirements. However, the prescribed accounts shall be used as general ledger control accounts. Structures that are “similar,” whether more or less detailed, are not authorized for use. Not all accounts are needed by all accounting entities.

★ 070504. The USGSGL account structure shall be used to record all of the series of events that occur from the time an appropriation is received until the resources acquired are used or disposed. A self-balancing set of budgetary accounts covers the appropriation, apportionment, allocation, commitment, obligation and expenditure process. Proprietary asset and liability accounts cover the receipt of funds in the Treasury, the proper classification of assets (such as receivables, prepayment, inventory and fixed assets), and the recognition and proper classification of liabilities. Revenue and expense accounts measure the realization of revenues from the sale of goods and services, and the recognition of costs through the use and consumption of assets. The financial control provided through accounting records for property provides managers with a tool that will help to discharge effectively their stewardship function for those resources.

★ 070505. The USGSGL account structure also facilitates the accumulation and recording of expenses by major areas of responsibility or activity. By having a single general ledger, expenses incurred by a DoD entity for any given activity for which it is responsible, and the associated revenues, if any, can be ascertained by managers with confidence that the accounting is complete and controlled. This will be possible regardless of the appropriation or fund that originally financed the cost and without the need for memorandum accounting records. Consistency in the accounting treatment of similar transactions, through the use of a uniform structure, creates reliable cost data for planning, budgeting and other management purposes.

★0706 OBJECTIVES. The objectives of the USGSGL are outlined in the following paragraphs.

070601. Establish an account structure for the integration of appropriation or fund accounting, property accounting, revenue accounting and expense accounting.

070602. Provide managers with the visibility over accurate and complete financial data, including total operating expenses and total acquisition cost of real and personal property.

070603. Achieve a uniform treatment of similar transactions by all DoD Components at all levels.

070604. Establish accounting control over all resources from receipt to consumption or disposal.

070605. Provide the capability of producing significant expense and cost information concerning programs, projects and other activities in accordance with internal management needs.

070606. Provide appropriation and fund data needed to meet reporting requirements of the central fiscal agencies and the Chief Financial Officers Act, as well as to provide such other financial data as may be needed for internal and external reporting requirements.

070607. Facilitate the development of future accounting improvements.

070608. Assure compliance with the OMB pronouncements, including those developed by the Federal Accounting Standards Advisory Board (FASAB); DoD accounting policies and standards set forth in this Regulation; and other applicable regulations promulgated by the central fiscal agencies.

0707 BUDGETARY AND PROPRIETARY ACCOUNTING RELATIONSHIPS. Figure 7-1 illustrates the following budgetary and proprietary accounting relationships.

070701. An entry to record budget authority (vice budgetary resources) in budgetary accounts requires a corresponding entry to record funds with Treasury in proprietary accounts.

070702. An entry to record expended authority unpaid in budgetary accounts requires a corresponding entry to record accounts payable in proprietary accounts.

070703. An entry to record expended authority paid in budgetary accounts requires a corresponding entry to record funds disbursed in proprietary accounts.

070704. An entry to record reimbursements earned but unpaid in budgetary accounts requires a corresponding entry to record accounts receivable in proprietary accounts.

070705. An entry to record reimbursements earned and paid in budgetary accounts requires a corresponding entry to record funds collected in proprietary accounts.

★0708 U.S. GOVERNMENT STANDARD GENERAL ACCOUNTS. A listing of the approved USGSGL accounts for use within the Department is at Addendum 1. A description of the accounts is at Addendum 2.

ADDENDUM 2
UNITED STATES GOVERNMENT STANDARD GENERAL LEDGER
ACCOUNT DESCRIPTIONS

Account Title: Assets
Account Number: 1000
Normal Balance: Debit
Type of Account: Summary

Definition: These accounts represent amounts of physical (tangible) items or rights to ownership (intangible) owned by the U.S. Government.

Account Title: Fund Balance With Treasury
Account Number: 1010
Normal Balance: Debit
Type of Account: Posting

Definition: All funds on deposit with Treasury reported on the SF224 Statement of Transactions, SF1219 Statement of Accountability and/or FMS2108 Year-end Closing Statement. (See Account 1530 Seized Property - Monetary Instruments.)

Account Title: Cash
Account Number: 1100
Normal Balance: Debit
Type of Account: Summary

Definition: All monetary resources on hand or on deposit with banks and other financial institutions. Included are coins, currency, readily negotiable instruments (such as checks and money orders), but excluded are certificates of deposit which are accounted for as investments.

Account Title: Undeposited Collections
Account Number: 1110
Normal Balance: Debit
Type of Account: Summary

Definition: Collections on hand, not yet deposited within the same accounting period.

Account Title: Imprest Funds
Account Number: 1120
Normal Balance: Debit
Type of Account: Posting

Definition: The authorized amount of cash held by agency cashiers at personal risk.

Account Title: Funds Held by the Public
Account Number: 1130
Normal Balance: Debit
Type of Account: Posting

Definition: Funds held by the public which OMB has determined will be included in the budget.

Account Title: Other Cash
Account Number: 1190
Normal Balance: Debit
Type of Account: Posting

Definition: Cash holdings that are not otherwise classified above.

Account Title: Other Monetary Assets
Account Number: 1195
Normal Balance: Debit
Type of Account: Posting

Definition: The balance of monetary assets, including gold (valued at market), special drawing rights, and U.S. Reserves in the International Monetary Fund.

Account Title: Foreign Currency
Account Number: 1200
Normal Balance: Debit
Type of Account: Posting

Definition: The U.S. dollar equivalent of foreign government currency.

Account Title: Receivables, Net
Account Number: 1300
Normal Balance: Debit
Type of Account: Summary

Definition: Summary account representing amounts due from others resulting from the performance of services, sale of goods, levy of taxes, or loan of monetary resources, less estimates for uncollectible items.

Account Title: Accounts Receivable
Account Number: 1310
Normal Balance: Debit
Type of Account: Posting

Definition: Amounts due from others when the right to receive funds accrues, which may result from the performance of services or the delivery of goods.

Account Title: Allowance for Loss on Accounts Receivable
Account Number: 1319
Normal Balance: Credit
Type of Account: Posting

Definition: Estimated amounts of uncollectible accounts receivable. The account will be increased by the amount estimated to be uncollectible each accounting period, and decreased by the actual accounts subsequently written off. Amount should consider outstanding advances.

Account Title: Receivable for Allocation Transfers
Account Number: 1330
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of allocations receivable to transfer appropriations from a parent appropriation via nonexpenditure transfers (i.e., funds may be transferred based on disbursement needs).

Account Title: Interest, Penalty, and Administrative Fees Receivable
Account Number: 1340
Normal Balance: Debit
Type of Account: Posting

Definition: Accrued interest, penalty, and administrative charges on accounts and loans receivable. Also includes interest accrued on investment securities.

Account Title: Allowance for Loss on Interest Receivable
Account Number: 1349
Normal Balance: Credit
Type of Account: Posting

Definition: The estimated amount of loss due to uncollectible interest receivable from: (1) credit programs prior to fiscal year 1992 and (2) other interest receivable for all years. Amounts

related to credit programs beginning with fiscal year 1992 will be accounted for in account 1399, Allowance for Subsidy.

Account Title: Loans Receivable
Account Number: 1350
Normal Balance: Debit
Type of Account: Posting

Definition: Amounts which have been loaned to another federal account or fund, individuals, private sector organizations, state and local governments, or foreign governments.

Account Title: Allowance for Loss on Loans Receivable
Account Number: 1359
Normal Balance: Credit
Type of Account: Posting

Definition: Estimated amounts of uncollectible loans receivable. The account will be increased by the amount estimated to be uncollectible each accounting period and decreased by the actual accounts subsequently written off.

Account Title: Allowance for Subsidy
Account Number: 1399
Normal Balance: Credit
Type of Account: Posting

Definition: This amount reflects the unamortized credit reform subsidy for direct loans and for defaulted guaranteed loans assumed for collection by the government. It appears in the financing fund of the direct loan or loan guarantee program involved and is subtracted from loans receivable (account 1350) on the statement of financial position. All transactions that affect the subsidy will be recorded in this account. The first transaction would normally be the transfer of subsidy monies from the program fund to the financing fund. Additional transactions record upward and downward adjustments to the account.

Account Title: Advances and Prepayments
Account Number: 1400
Normal Balance: Debit
Type of Account: Summary

Definition: The outstanding balance of amounts advanced to federal and nonfederal entities by the agency and prepayments made by the agency for the later receipt of goods, services, or other assets.

Account Title: Advances to Others
Account Number: 1410
Normal Balance: Debit
Type of Account: Posting

Definition: Payments made in contemplation of the future performance of services, receipt of goods, incurrence of expenditures, or other assets. Common examples are travel advances which are made in contemplation of future travel expenses or advances to contractors which are made in contemplation of future receipt of inventory or fixed assets.

Account Title: Prepayments
Account Number: 1450
Normal Balance: Debit
Type of Account: Posting

Definition: Expenditures which provide future benefits. Prepayments are often recurrent in nature, and cover items such as rent, taxes, royalties, commissions, insurance, and supplies.

Account Title: Inventory and Related Property, Net
Account Number: 1500
Normal Balance: Debit
Type of Account: Summary

Definition: The summation of the posting account balances in the 1500 series.

Account Title: Operating Materials and Supplies
Account Number: 1510
Normal Balance: Debit
Type of Account: Summary

Definition: The summation of the posting account balances in the 1510 series.

Account Title: Operating Materials and Supplies Held for Use
Account Number: 1511
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of tangible personal property to be consumed as operating materials and supplies in normal operations.

Account Title: Operating Materials and Supplies Held in Reserve for Future Use
Account Number: 1512
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of tangible personal property held in reserve as operating materials and supplies because they are not readily available in the market or because there is more than a remote chance that they will eventually be needed.

Account Title: Operating Materials and Supplies - Excess, Unserviceable and Obsolete
Account Number: 1513
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of tangible personal property held as operating materials and supplies that exceed the amount expected to be used, are no longer needed due to changes in technology, laws, customs or operations, or are physically damaged and cannot be consumed in operations.

Account Title: Inventory, Net
Account Number: 1520
Normal Balance: Debit
Type of Account: Summary

Definition: The summation of the posting account balances in the 1520 series.

Account Title: Inventory Purchased for Resale
Account Number: 1521
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of tangible personal property (1) held for sale, (2) in the process of production or sale, or (3) to be consumed in the production of goods for sale or in the provision of services for a fee transfer.

Account Title: Inventory Held in Reserve for Future Sale
Account Number: 1522
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of tangible personal property held in reserve as inventory for future sale, because it is not readily available in the market or because there is more than a remote chance that it will eventually be needed.

Account Title: Inventory Held for Repair
Account Number: 1523
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of damaged tangible personal property held as inventory, which is more economical to repair than to dispose.

Account Title: Inventory - Excess, Obsolete and Unserviceable
Account Number: 1524
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of tangible personal property held as inventory that exceeds the demand for sale, is no longer useful due to obsolescence, or is damaged beyond economical repair.

Account Title: Inventory - Raw Materials
Account Number: 1525
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of raw materials purchased or donated for use as a component part of inventory.

Account Title: Inventory - Work in Process
Account Number: 1526
Normal Balance: Debit
Type of Account: Posting

Definition: Inventory accumulated cost/value of inventory in the production process. Work in process includes cost of raw materials, direct labor, and overhead.

Account Title: Inventory - Finished Goods
Account Number: 1527
Normal Balance: Debit
Type of Account: Posting

Definition: The accumulated cost/value of completed products.

Account Title: Inventory - Allowance
Account Number: 1529
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of estimated repairs needed for damaged inventory and the estimated gain or loss on the value of inventory due to unrealized holding gains or losses.

Account Title: Seized Monetary Assets
Account Number: 1530
Normal Balance: Debit
Type of Account: Summary

Definition: The value of all seized monetary instruments, including deposited and undeposited cash, that are in the process of forfeiture proceedings or being held as evidence. Upon obtaining judgement, the amount held in this account will be reclassified to the appropriate forfeited property account or to the fund balance with Treasury. (See accounts 1541 Forfeited Property Held for Sale and 1542 Forfeited Property Held for Donation or Use.)

Account Title: Seized Property - Monetary Instruments
Account Number: 1531
Normal Balance: Debit
Type of Account: Posting

Definition: The value of all seized monetary instruments, including undeposited cash, that are in the process of forfeiture proceedings or being held as evidence. Upon obtaining judgement, the amount held in this account will be reclassified to the appropriate forfeited property account or to the fund balance with Treasury. (See accounts 1541 Forfeited Property Held for Sale and 1542 Forfeited Property Held for Donation or Use.)

Account Title: Seized Cash Deposited
Account Number: 1532
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of cash seized by law enforcement activity that is deposited to Treasury in banks or other financial institutions pending forfeiture judgement.

Account Title: Forfeited Property, Net
Account Number: 1540
Normal Balance: Debit
Type of Account: Summary

Definition: The summation of the posting account balances in the 1540 series.

Account Title: Forfeited Property Held for Sale
Account Number: 1541
Normal Balance: Debit
Type of Account: Posting

Definition: The value of monetary instruments and property intended to be sold that were acquired as a result of forfeiture proceedings, to satisfy a tax liability; or unclaimed or abandoned merchandise.

Account Title: Forfeited Property Held for Donation or Use
Account Number: 1542
Normal Balance: Debit
Type of Account: Posting

Definition: The value of monetary instruments and property intended to be donated or to be used by the agency that were acquired as a result of: forfeiture proceedings, to satisfy a tax liability; or unclaimed or abandoned merchandise.

Account Title: Forfeited Property - Allowance
Account Number: 1549
Normal Balance: Credit
Type of Account: Posting

Definition: The estimated amount of third party liens and claims against forfeited property.

Account Title: Foreclosed Property, Net
Account Number: 1550
Normal Balance: Debit
Type of Account: Summary

Definition: The summation of the posting account balances in the 1550 series.

Account Title: Foreclosed Property
Account Number: 1551

Normal Balance: Debit
Type of Account: Posting

Definition: The value of assets received in satisfaction of a direct loan receivable or as a result of a claim under a defaulted guaranteed loan.

Account Title: Foreclosed Property - Allowance
Account Number: 1559
Normal Balance: Credit
Type of Account: Posting

Definition: The estimated amount of third party liens and claims against foreclosed property, and for pre credit reform property, the additional amount necessary to reduce the value of the property to net realized value.

Account Title: Commodities, Net
Account Number: 1560
Normal Balance: Debit
Type of Account: Summary

Definition: The summation of the posting account balances to the 1560 series.

Account Title: Commodities Held Under Price Support and Stabilization Support Programs
Account Number: 1561
Normal Balance: Debit
Type of Account: Posting

Definition: The cost/value of commercial items held to stabilize or support market prices.

Account Title: Commodities - Allowance
Account Number: 1569
Normal Balance: Credit
Type of Account: Posting

Definition: The amount needed to reduce the gross value of commodities to their expected net realizable value.

Account Title: Stockpile Materials
Account Number: 1570
Normal Balance: Debit

Type of Account: Summary

Definition: The summation of the posting account balances in the 1570 series.

Account Title: Stockpile Materials Held in Reserve

Account Number: 1571

Normal Balance: Debit

Type of Account: Posting

Definition: The value of strategic and critical materials held due to statutory requirements or for use in national defense, conservation, or national emergencies.

Account Title: Stockpile Materials Held for Sale

Account Number: 1572

Normal Balance: Debit

Type of Account: Posting

Definition: The value of strategic and critical materials held due to statutory requirements or for use in national defense, conservation, or national emergencies that are authorized to be sold.

Account Title: Other Related Property, Net

Account Number: 1590

Normal Balance: Debit

Type of Account: Summary

Definition: The summation of the posting account balances in the 1590 series.

Account Title: Other Related Property

Account Number: 1591

Normal Balance: Debit

Type of Account: Posting

Definition: The value of other related property not otherwise classified above, including real property acquired through military base closings.

Account Title: Other Related Property - Allowance

Account Number: 1599

Normal Balance: Credit

Type of Account: Posting

Definition: The estimated loss for third party liens and claims or for other changes in the value of other related property.

Account Title: Investments, Net
Account Number: 1600
Normal Balance: Debit
Type of Account: Summary

Definition: Securities and other assets held for the production of revenues in the form of interest, dividends, rentals, or lease payments, net of premiums and discounts.

Account Title: Investments In U.S. Treasury Securities Issued by Public Debt
Account Number: 1610
Normal Balance: Debit
Type of Account: Posting

Definition: The par value of U.S. Treasury securities issued by Public Debt. This includes marketable Treasury securities, non marketable Treasury securities, and market based Treasury securities.

Account Title: Discount on U.S. Treasury Securities Issued by Public Debt
Account Number: 1611
Normal Balance: Credit
Type of Account: Posting

Definition: The full discount on U.S. securities issued by Public Debt held by an agency.

Account Title: Premium on U.S. Treasury Securities Issued by Public Debt
Account Number: 1612
Normal Balance: Debit
Type of Account: Posting

Definition: The full premium on securities issued by Public Debt and held by an agency.

Account Title: Amortization of Discount and Premium on U.S. Treasury Securities Issued by Public Debt
Account Number: 1613
Normal Balance: Either
Type of Account: Posting

Definition: The amortization amount of premiums and discounts on securities issued by Public Debt held by an agency.

Account Title: Investments In Securities Other than Public Debt Securities
Account Number: 1620
Normal Balance: Debit
Type of Account: Posting

Definition: The par value of U.S. Treasury securities issued by federal agencies and the par value of securities issued by nonfederal entities.

Account Title: Discount on Securities Other Than Public Debt Securities
Account Number: 1621
Normal Balance: Credit
Type of Account: Posting

Definition: The full discount on securities other than Public Debt securities held by an agency.

Account Title: Premium on Securities Other Than Public Debt Securities
Account Number: 1622
Normal Balance: Debit
Type of Account: Posting

Definition: The full premium on securities other than Public Debt securities held by an agency.

Account Title: Amortization of Discount and Premium on Securities Other Than Public Debt Securities
Account Number: 1623
Normal Balance: Either
Type of Account: Posting

Definition: The amortization amount of premiums and discounts on securities other than Public Debt held by an agency.

Account Title: Other Investments
Account Number: 1690
Normal Balance: Debit
Type of Account: Posting

Definition: The value of other investments owned by the agency.

Account Title: General Property, Plant, and Equipment, Net
Account Number: 1700
Normal Balance: Debit
Type of Account: Summary

Definition: The current book value of real and personal property meeting the definition of general PP&E and in accordance with capitalization criteria established by the federal entity.

Account Title: Land, Net
Account Number: 1710
Normal Balance: Debit
Type of Account: Summary

Definition: The current book value of land, land rights, and improvements made to land that were acquired for agency general operations.

Account Title: Land and Land Rights
Account Number: 1711
Normal Balance: Debit
Type of Account: Posting

Definition: The identifiable cost of land and land rights of unlimited duration acquired for or in connection with plant, property, and equipment used in general operations, including permanent improvements. Stewardship land (national park or forest and land in public domain) is excluded. Also, excluded are materials beneath or above the surface and outer-continental shelf resources.

Account Title: Improvements to Land
Account Number: 1712
Normal Balance: Debit
Type of Account: Posting

Definition: The cost of nonpermanent, depreciable improvements to land used in general operations. Also includes similar costs to land subject to stewardship reporting, as well as land rights of limited duration that are associated with general operations.

Account Title: Accumulated Depreciation on Improvements to Land
Account Number: 1719
Normal Balance: Credit

Type of Account: Posting

Definition: Accumulates depreciation charged to expense for improvements to land.

Account Title: Construction in Progress

Account Number: 1720

Normal Balance: Debit

Type of Account: Posting

Definition: Includes costs of direct labor, direct material, and overhead incurred in the construction of property, plant, and equipment for which the agency will be accountable. Upon completion, these costs will be transferred to the proper capital asset account as the acquisition cost of the item.

Account Title: Buildings, Improvements, and Renovations

Account Number: 1730

Normal Balance: Debit

Type of Account: Posting

Definition: The cost of government-owned buildings acquired for and used in providing general government services or goods. Includes the cost of renovation, improvement, restoration, or reconstruction of multi-use heritage assets when those costs are directly tied to the conduct of government operations.

Account Title: Accumulated Depreciation on Buildings, Improvements, and Renovations

Account Number: 1739

Normal Balance: Credit

Type of Account: Posting

Definition: Accumulates depreciation charged to expense for buildings, improvements, and renovations.

Account Title: Other Structures and Facilities

Account Number: 1740

Normal Balance: Debit

Type of Account: Posting

Definition: The cost or appraised value of government-owned structures and facilities other than buildings that are purchased by general and trust fund appropriations and are under the control of the agency.

Account Title: Accumulated Depreciation on Other Structures and Facilities
Account Number: 1749
Normal Balance: Credit
Type of Account: Posting

Definition: Accumulates depreciation charged to expense for structures and facilities.

Account Title: Equipment
Account Number: 1750
Normal Balance: Debit
Type of Account: Posting

Definition: The capitalized cost of tangible equipment items of a durable nature used by the agency in providing goods and services (excluding computer software).

Account Title: Accumulated Depreciation on Equipment
Account Number: 1759
Normal Balance: Credit
Type of Account: Posting

Definition: Accumulates depreciation charged to expense for equipment.

Account Title: Assets Under Capital Lease
Account Number: 1810
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of assets being leased under terms which are essentially equivalent to an installment purchase.

Account Title: Accumulated Depreciation on Assets Under Capital Lease
Account Number: 1819
Normal Balance: Credit
Type of Account: Posting

Definition: Accumulates depreciation charged to expense for assets under capital lease.

Account Title: Leasehold Improvements
Account Number: 1820
Normal Balance: Debit
Type of Account: Posting

Definition: The cost of improvements to leased land, buildings, structures, and facilities occupied by the government as a lessee, as well as easements and right-of-way.

Account Title: Accumulated Amortization on Leasehold Improvements
Account Number: 1829
Normal Balance: Credit
Type of Account: Posting

Definition: Accumulates amortization charged to expense for leasehold improvements.

Account Title: Information Technology Software
Account Number: 1830
Normal Balance: Debit
Type of Account: Posting

Definition: The capitalized cost of purchased off-the-shelf software, contractor developed software, and cost elements of internally developed software when the cost of the software is to be recovered through charges to users.

Account Title: Accumulated Amortization on Information Technology Software
Account Number: 1839
Normal Balance: Credit
Type of Account: Posting

Definition: Accumulates amortization charged to expense for information technology software. Internally developed software will be amortized over a period not to exceed five years. Software acquired for research and development with no alternative future use will be amortized over the period of the project as opposed to the normal life cycle amortization.

Account Title: Other Natural Resources
Account Number: 1840
Normal Balance: Debit
Type of Account: Posting

Definition: The cost or appraised value of natural resources other than land.

Account Title: Allowance for Depletion
Account Number: 1849
Normal Balance: Credit
Type of Account: Posting

Definition: The reduction of an estimated available quantity of other natural resources.

Account Title: Other General Property, Plant, and Equipment
Account Number: 1890
Normal Balance: Debit
Type of Account: Posting

Definition: The value of general PP&E not otherwise classified above.

Account Title: Other Assets, Net
Account Number: 1900
Normal Balance: Debit
Type of Account: Summary

Definition: These accounts are to reflect the value of assets other than those specified above, less allowance for loss.

Account Title: Unrequisitioned Authorized Appropriations
Account Number: 1920
Normal Balance: Debit
Type of Account: Posting

Definition: Represents unrequisitioned disbursing authority as provided for in liquidating cash authority granted by Congress.

Account Title: Receivable from Appropriations
Account Number: 1921
Normal Balance: Debit
Type of Account: Posting

Definition: The amount to be received from appropriations to fund current or future expenses for which the appropriations are already authorized by law.

Account Title: Borrowings Receivable from Treasury
Account Number: 1922
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of cash to be received for loan programs through borrowing from the Treasury.

Account Title: Other Assets
Account Number: 1990
Normal Balance: Debit
Type of Account: Posting

Definition: Other assets not otherwise classified above.

Account Title: Liabilities
Account Number: 2000
Normal Balance: Credit
Type of Account: Summary

Definition: These accounts represent amounts owed by the U.S. Government for items received, services rendered, expenses incurred, assets acquired, construction performed, and amounts received but as yet unearned.

Account Title: Accrued Liabilities - Other
Account Number: 2100
Normal Balance: Credit
Type of Account: Summary

Definition: Amounts owed for goods and other property ordered and received, and for services rendered by other than employees.

Account Title: Accounts Payable
Account Number: 2110
Normal Balance: Credit
Type of Account: Posting

Definition: Amounts owed to another federal or nonfederal entity for goods and other property ordered and received, and for services rendered by other than employees.

Account Title: Disbursements in Transit
Account Number: 2120
Normal Balance: Credit
Type of Account: Posting

Definition: The amounts of voucher schedule payments transmitted to the regional disbursing office for payment but not processed by the regional disbursing office.

Account Title: Contract Holdbacks
Account Number: 2130
Normal Balance: Credit
Type of Account: Posting

Definition: The amounts withheld from grantees or contractors pending completion of related contracts.

Account Title: Accrued Interest Payable
Account Number: 2140
Normal Balance: Credit
Type of Account: Posting

Definition: Interest which accrues on borrowings and overdue accounts with the passage of time and is not due until a later period.

Account Title: Liability for Allocation Transfers
Account Number: 2150
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of allocations payable from a parent appropriation to a transfer appropriation via nonexpenditure transfers (i.e., funds may be transferred based on disbursement needs).

Account Title: Loan Guarantee Liability
Account Number: 2180
Normal Balance: Credit
Type of Account: Posting

Definition: This account is the financing fund for loan guarantee programs. All transactions that affect the subsidy for loan guarantees will be recorded in this account. It represents the expected present value of cash flows to and from the government from loan guarantees. The initial transaction transfers the subsidy monies from the program fund to the financing fund.

Account Title: Other Accrued Liabilities
Account Number: 2190
Normal Balance: Credit
Type of Account: Posting

Definition: Amounts of accounts payable not otherwise classified above.

Account Title: Accrued Liabilities - Payroll and Benefits
Account Number: 2200
Normal Balance: Credit
Type of Account: Summary

Definition: These accounts reflect accrued funded payroll and benefits and accrued unfunded annual leave.

Account Title: Accrued Funded Payroll and Benefits
Account Number: 2210
Normal Balance: Credit
Type of Account: Posting

Definition: The estimated liability for salaries and wages of civilians and commissioned officers that have been earned but are unpaid and amounts of funded annual leave, sick leave, and other employee benefits which have been earned but are unpaid. This accrual is to be reversed at the beginning of the subsequent accounting period, and is supported by the agency's payroll system files.

Account Title: Accrued Unfunded Liabilities
Account Number: 2220
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of unfunded liabilities expected to be paid from future years' appropriations.

Account Title: Unearned Revenue (Advances)
Account Number: 2300
Normal Balance: Credit
Type of Account: Summary

Definition: Payments received for goods or services not as yet delivered.

Account Title: Advances from Others
Account Number: 2310
Normal Balance: Credit
Type of Account: Posting

Definition: The balance of amounts advanced by other federal and nonfederal entities for goods and services to be furnished.

Account Title: Deferred Credits
Account Number: 2320
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue (or income) received but not yet earned.

Account Title: Liability for Deposit Funds and Suspense Accounts
Account Number: 2400
Normal Balance: Credit
Type of Account: Posting

Definition: Amounts in deposit funds, suspense accounts, and undeposited collections, including budget clearing accounts awaiting disposition or reclassification.

Account Title: Debt
Account Number: 2500
Normal Balance: Credit
Type of Account: Summary

Definition: Agency liability in the form of notes payable and other borrowing agreements.

Account Title: Principal Payable to Treasury
Account Number: 2510
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of loan principal payable to Treasury.

Account Title: Principal Payable to the Federal Financing Bank
Account Number: 2520
Normal Balance: Credit
Type of Account: Posting

Definition: Amounts borrowed from the Federal Financing Bank.

Account Title: Securities Issued by Federal Agencies under General and Special Financing Authority, Net
Account Number: 2530
Normal Balance: Credit
Type of Account: Posting

Definition: Borrowings issued to the public under general and special financing authority, net of premiums and discounts.

Account Title: Participation Certificates
Account Number: 2540
Normal Balance: Credit
Type of Account: Posting

Definition: The liability for the agency's share of participation certificates.

Account Title: Other Debt
Account Number: 2590
Normal Balance: Credit
Type of Account: Posting

Definition: All other forms of government obligations, secured and unsecured, not otherwise classified above.

Account Title: Actuarial Liabilities
Account Number: 2600
Normal Balance: Credit
Type of Account: Summary

Definition: Used by agencies that administer retirement, insurance, or other annuity programs to accrue estimates of the present value of program benefits and expenses that will be made in the future that relate to services performed or entitlements due as of the balance sheet date. These accounts are not used to accrue agency liabilities for contributions to these programs.

Account Title: Retirement Plans
Account Number: 2610
Normal Balance: Credit
Type of Account: Posting

Definition: Actuarial present value of accumulated plan benefits for pension plans administered by agencies (e.g., U.S. Civil Service Retirement System administered by OPM). In computing the liability, agencies shall comply with requirements established by 31 U.S.C. 9501, et seq., and the accounting guidance issued pursuant to the law.

Account Title: Insurance Plans
Account Number: 2620
Normal Balance: Credit

Type of Account: Posting

Definition: Actuarial liability for future policy benefits for insurance plans, not covered by available budgetary resources as of the reporting date, administered by agencies (e.g., Federal employees group life insurance program administered by OPM). In computing the liability, agencies shall comply with requirements established by Standard L20 of GAO's policy and procedures manual for guidance of federal agencies, Title 2.

Account Title: Other Actuarial Liabilities

Account Number: 2690

Normal Balance: Credit

Type of Account: Posting

Definition: The actuarial present value of accumulated plan benefits for other actuarial liability plans not classified above.

Account Title: Other Liabilities

Account Number: 2900

Normal Balance: Credit

Type of Account: Summary

Definition: These accounts reflect the amounts of liabilities not otherwise classified above.

Account Title: Prior Liens Outstanding on Acquired Collateral

Account Number: 2910

Normal Balance: Credit

Type of Account: Posting

Definition: The value of liens approved and accepted as being claims against assets acquired through loan defaults.

Account Title: Contingent Liabilities

Account Number: 2920

Normal Balance: Credit

Type of Account: Posting

Definition: The estimated value of a probable loss. Information must indicate it is probable that an asset has been impaired or a liability incurred; and the dollar amount of the loss can be reasonably estimated.

Account Title: Liability for Borrowings to be Received
Account Number: 2930
Normal Balance: Credit
Type of Account: Posting

Definition: The estimated amount of funds that an agency can borrow from Treasury to cover the cost of loans to be disbursed.

Account Title: Capital Lease Liability
Account Number: 2940
Normal Balance: Credit
Type of Account: Posting

Definition: The present value of liabilities for assets acquired under a lease agreement which meets the test for capitalizing the assets.

Account Title: Liability for Subsidy Related to Undisbursed Loans
Account Number: 2950
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of subsidy owed by the financing fund for direct and guaranteed loans which have not been disbursed. This liability will be liquidated when the loan is disbursed. If the loan is not disbursed, the accrued subsidy must be removed from the financing fund.

Account Title: Accounts Payable Canceled
Account Number: 2960
Normal Balance: Credit
Type of Account: Posting

Definition: This account is used to reclassify accounts payable which have been canceled under requirements of Public Law 101-510 from regular accounts payable to canceled accounts payable.

Account Title: Resources Payable to Treasury
Account Number: 2970
Normal Balance: Credit
Type of Account: Posting

Definition: Liquidating fund assets in excess of liabilities that are being held as working capital. After liquidating all liabilities, these funds will be returned to Treasury.

Account Title: Custodial Liability
Account Number: 2980
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of custodial revenue yet to be transferred to another federal entity.

Account Title: Other Liabilities
Account Number: 2990
Normal Balance: Credit
Type of Account: Posting

Definition: Other liabilities not otherwise classified.

Account Title: Accrued Cleanup Cost
Account Number: 2995
Normal Balance: Credit
Type of Account: Posting

Definition: The estimated liability for projected future clean-up costs associated with the removing, containing, and/or disposing of hazardous materials associated with the current portion of general and stewardship property, plant, and equipment operations.

Account Title: Equity
Account Number: 3000
Normal Balance: Either
Type of Account: Summary

Definition: These accounts represent the difference between the assets and liabilities of the U.S. Government.

Account Title: Unexpended Appropriations
Account Number: 3100
Normal Balance: Credit
Type of Account: Posting

Definition: Amounts appropriated by Congress which have not been expended.

Account Title: Appropriated Capital Funding Canceled Payables
Account Number: 3105
Normal Balance: Debit

Type of Account: Posting

Definition: This account is used to record appropriated capital funding payment of accounts payable which had been canceled under requirements of Public Law 101-510.

Account Title: Cumulative Results of Operations

Account Number: 3310

Normal Balance: Either

Type of Account: Posting

Definition: The net difference since the inception of the activity between (1) expenses and losses and (2) financing sources including appropriations, revenues, and gains.

Account Title: Reserved for FACTS Rounding Differences

Account Number: 3320

Normal Balance: N/A

Type of Account: Posting

Definition: Reserved for use by the Department of the Treasury. DoD Components are not to use or post to this account.

Account Title: Budgetary

Account Number: 4000

Normal Balance: Debit

Type of Account: Summary

Definition: These accounts reflect budgetary operations and conditions from the time appropriations are realized until they are expended.

Account Title: Anticipated Total Resources

Account Number: 4001

Normal Balance: Debit

Type of Account: Posting

Definition: This account is used (for year-end closing) to consolidate the total amount of resources expected to be received by the financing fund from all sources (Program Fund Receipts, Borrowing from Treasury, Collections of Principal, and Collections of Loan Interest).

Account Title: Anticipated Contract Authority

Account Number: 4032

Normal Balance: Debit

Type of Account: Posting

Definition: The estimated amount of Indefinite Contract Authority during the fiscal year that permits a federal agency to incur obligations in advance of liquidating authority.

Account Title: Anticipated Adjustments to Contract Authority

Account Number: 4034

Normal Balance: Credit

Type of Account: Posting

Definition: The estimated amounts of reductions or increases during the fiscal year to Contract Authority.

Account Title: Estimated Borrowing Authority

Account Number: 4042

Normal Balance: Debit

Type of Account: Posting

Definition: The amount of indefinite borrowing authority estimated to be needed to finance estimated obligations during the current year. The balance in this account will be adjusted to zero at year-end.

Account Title: Anticipated Reductions to Borrowing Authority

Account Number: 4044

Normal Balance: Credit

Type of Account: Posting

Definition: The estimated amounts of reductions during the fiscal year to Borrowing Authority.

Account Title: Anticipated Payments to Treasury

Account Number: 4047

Normal Balance: Credit

Type of Account: Posting

Definition: The anticipated amounts to be paid to Treasury during the fiscal year.

Account Title: Anticipated Collections from Non-Federal Sources

Account Number: 4060

Normal Balance: Debit

Type of Account: Posting

Definition: The amount anticipated to be collected from nonfederal sources in the current fiscal year for loan programs (fees, loan principal, loan interest, rent, and proceeds from the sale of collateral).

Account Title: Anticipated Collections from Federal Sources
Account Number: 4070
Normal Balance: Debit
Type of Account: Posting

Definition: The amount anticipated to be collected from federal sources in the current fiscal year for loan programs (actual program loan subsidy - current, actual program fund subsidy - permanent, and interest from Treasury).

Account Title: Appropriations Realized
Account Number: 4110
Normal Balance: Debit
Type of Account: Summary

Definition: These accounts represent the amount of appropriations specified in an appropriations act and becoming available on or after October 1 of the fiscal year.

Account Title: Debt Liquidation Appropriations
Account Number: 4111
Normal Balance: Debit
Type of Account: Posting

Definition: Amount appropriated to liquidate debt as specified in the appropriation language.

Account Title: Deficiency Appropriations
Account Number: 4112
Normal Balance: Debit
Type of Account: Posting

Definition: Amount appropriated to eliminate a prior year deficiency.

Account Title: Loan Subsidy Appropriation - Definite - Current
Account Number: 4115
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of definite current budget authority appropriated by law for loan subsidies in direct loan and guarantee programs.

Account Title: Entitlement Loan Subsidy Appropriation - Indefinite
Account Number: 4116
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of indefinite budget authority appropriated for subsidies in loan entitlement programs.

Definition: The amount of indefinite budget authority appropriated for subsidies in loan entitlement programs as specified in the appropriation language which provides additional budget authority beyond original estimates for programs and activities.

Account Title: Loan Administrative Expense Appropriation - Definite - Current
Account Number: 4117
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of definite current budget authority appropriated by law for administrative expenses in direct loan and loan guarantee programs.

Account Title: Re-estimated Discretionary Loan Subsidy Appropriation - Indefinite - Permanent
Account Number: 4118
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of indefinite permanent budget authority appropriated for direct loan and loan guarantee subsidies based upon re-estimates.

Account Title: Other Appropriations Realized
Account Number: 4119
Normal Balance: Debit
Type of Account: Posting

Definition: All other appropriations not classified above.

Account Title: Appropriations Anticipated - Indefinite
Account Number: 4120

Normal Balance: Debit
Type of Account: Posting

Definition: The current estimate of amounts anticipated to become available under existing law.

Account Title: Loan Subsidy Appropriation - Indefinite - Current
Account Number: 4121
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of current indefinite budget authority appropriated to the program fund for loan subsidies in direct loan and loan guarantee programs.

Account Title: Contract Authority
Account Number: 4130
Normal Balance: Debit
Type of Account: Summary

Definition: Amounts of authority under which contracts or other obligations may be executed in advance of the receipt of an appropriation, or in excess of amounts otherwise available in a revolving fund.

Account Title: Current-Year Contract Authority Realized - Definite
Account Number: 4131
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of statutory authority during the fiscal year that permits federal agencies to incur obligations in advance of appropriations or collections where a specific sum or specific aggregate amount “not to exceed” is stated at the time the authority is granted.

Account Title: Current-Year Contract Authority Realized-Indefinite
Account Number: 4132
Normal Balance: Debit
Type of Account: Posting

Definition: Specific new statutory authority during the fiscal year that permits a federal agency to incur obligations in advance of appropriations or collections.

Account Title: Actual Reductions to Contract Authority
Account Number: 4133
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of contract authority that is reduced by legislation that cancels budget authority during the fiscal year; or the amount of contract authority that is reduced by administrative action; or the amount of contract authority previously reduced by administrative action that is administratively restored.

Account Title: Contract Authority Converted to Cash
Account Number: 4135
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of funds received during the fiscal year that liquidate Contract Authority.

Account Title: Resources Realized from Contract Authority
Account Number: 4138
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of funds received during the fiscal year to fund Contract Authority at the time of disbursement. These will be contra to budgetary resources received to liquidate Contract Authority.

Account Title: Contract Authority Carried Forward
Account Number: 4139
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of Contract Authority carried forward into the next fiscal year.

Account Title: Borrowing Authority
Account Number: 4140
Normal Balance: Debit
Type of Account: Summary

Definition: Statutory authority that permits a federal agency to incur obligations and to make payments for specified purposes from the proceeds of borrowed funds.

Account Title: Current-Year Borrowing Authority Realized - Definite
Account Number: 4141
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of statutory authority during the fiscal year that permits federal agencies to incur obligations and make payments to liquidate the obligations out of borrowed monies where a specific sum or specific aggregate amount “not to exceed” is stated at the time the authority is granted.

Account Title: Current-Year Borrowing Authority Realized - Indefinite
Account Number: 4142
Normal Balance: Debit
Type of Account: Posting

Definition: New statutory authority during the fiscal year that permits a federal agency to incur obligations and make payments for specified purposes out of borrowed monies where a specific sum is not stated when the authority is granted but is determinable only at some future date.

Account Title: Actual Reductions to Borrowing Authority
Account Number: 4143
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of Borrowing Authority reduced by legislation that cancels budget authority during the fiscal year.

Account Title: Borrowing Authority Converted to Cash
Account Number: 4145
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of nonexpenditure transfers during the fiscal year that reduce Borrowing Authority.

Account Title: Actual Payments to Treasury
Account Number: 4147
Normal Balance: Credit
Type of Account: Posting

Definition: Amounts paid to Treasury during the fiscal year.

Account Title: Resources Realized from Borrowing Authority
Account Number: 4148
Normal Balance: Debit
Type of Account: Posting

Definition: The amount drawn during the fiscal year to fund Borrowing Authority at the time of disbursement.

Account Title: Borrowing Authority Carried Forward
Account Number: 4149
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of Borrowing Authority carried forward into the next fiscal year for Definite Borrowing Authority. For Indefinite Borrowing Authority, this will be the amount that is supported by Unpaid Obligations (Undelivered Orders and Expended Authority).

Account Title: Reappropriations
Account Number: 4150
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of new budget authority derived from a law that extends the availability of unobligated budget authority that has expired or would otherwise expire.

Account Title: Anticipated Transfers - Current-Year Authority
Account Number: 4160
Normal Balance: Either
Type of Account: Posting

Definition: The net amount of anticipated nonexpenditure transfers of current-year authority to or from appropriations and funds.

Account Title: Anticipated Allocation Transfers
Account Number: 4165
Normal Balance: Either
Type of Account: Posting

Definition: The amount of budget authority anticipated to be transferred between a parent appropriation and a transfer appropriation via nonexpenditure transfer during the fiscal year.

Account Title: Transfers - Current-Year Authority
Account Number: 4170
Normal Balance: Either
Type of Account: Posting

Definition: The net amount of realized nonexpenditure transfers of current-year authority to or from appropriations and funds.

Account Title: Allocation Transfers
Account Number: 4175
Normal Balance: Either
Type of Account: Posting

Definition: The amount of budget authority transferred between a parent appropriation and a transfer appropriation via nonexpenditure transfer during the fiscal year. This includes amounts that are receivable or payable in which the nonexpenditure transfer has not yet been accomplished, and amounts that are paid or collected in which the nonexpenditure transfer has been accomplished.

Account Title: Anticipated Transfers - Prior-Year Authority
Account Number: 4180
Normal Balance: Either
Type of Account: Posting

Definition: The net amount of anticipated nonexpenditure transfers of prior-year unobligated balances to or from appropriations and funds.

Account Title: Transfers - Prior-Year Authority
Account Number: 4190
Normal Balance: Either
Type of Account: Posting

Definition: The net amount of realized nonexpenditure transfers to or from prior-year appropriations and funds.

Account Title: Transfers of Resources with Obligations
Account Number: 4195
Normal Balance: Either
Type of Account: Posting

Definition: The amount of resources with obligations transferred to or from appropriations and funds.

Account Title: Total Actual Resources - Collected
Account Number: 4201
Normal Balance: Debit
Type of Account: Posting

Definition: This account is used to consolidate the total amount of actual resources collected from all sources.

Account Title: Anticipated Reimbursements and Other Income
Account Number: 4210
Normal Balance: Debit
Type of Account: Posting

Definition: The estimate of reimbursements expected to be earned during the current fiscal year which are subject to OMB apportionment, and other authorized reimbursements and/or other income for which current fiscal year obligational authority is automatically established on the basis of customer orders received.

Account Title: Anticipated Appropriation Trust Fund Expenditure Transfers
Account Number: 4215
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of anticipated appropriation expenditure transfers from a trust fund to a general fund during the fiscal year.

Account Title: Unfilled Customer Orders
Account Number: 4220
Normal Balance: Debit
Type of Account: Summary

Definition: The total amount of unearned reimbursable orders accepted with or without an advance. This account represents the amount of goods and/or services to be furnished for other government agencies or the public. At the time goods and/or services are furnished, the amount becomes reimbursements earned.

Account Title: Unfilled Customer Orders Without Advance
Account Number: 4221
Normal Balance: Debit
Type of Account: Posting

Definition: The total amount of unearned reimbursable orders accepted without an advance. This account represents the amount of goods and/or services to be furnished for other government agencies or the public if permitted by law or by longstanding, generally accepted practice. At the time goods and/or services are furnished, the amount becomes reimbursements earned.

Account Title: Unfilled Customer Orders With Advance
Account Number: 4222
Normal Balance: Debit
Type of Account: Posting

Definition: The total amount of unearned reimbursable orders accepted with an advance. This account represents the amount of goods and/or services to be furnished for other government agencies or the public if permitted by law or by longstanding, generally accepted practice. At the time goods and/or services are furnished, the amount becomes reimbursements earned.

Account Title: Appropriation Trust Fund Expenditure Transfers - Receivable
Account Number: 4225
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of uncollected expenditure transfers from a trust fund to a general fund.

Account Title: Reimbursements and Other Income Earned
Account Number: 4250
Normal Balance: Debit
Type of Account: Summary

Definition: The amount of reimbursements and other income earned to date, through the delivery of goods and performance of services, whether or not bills have been rendered or collections made.

Account Title: Reimbursements and Other Income Earned - Receivable
Account Number: 4251
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of reimbursements and other income earned but not received, to date, through the delivery of goods and performance of services. This account represents the amount of reimbursements earned from other government agencies or the public during the current fiscal

year for which current fiscal year obligational authority is automatically established on the basis of customer orders.

Account Title: Reimbursements and Other Income Earned - Collected
Account Number: 4252
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of reimbursements and other income earned and collected, to date, through the provision of goods and performance of services.

Account Title: Appropriation Trust Fund Expenditure Transfers - Collected
Account Number: 4255
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of expenditure transfers executed between a trust fund and a general fund during the fiscal year.

Account Title: Actual Collection of Fees
Account Number: 4261
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of fees collected during the fiscal year from nonfederal sources.

Account Title: Actual Collection of Loan Principal
Account Number: 4262
Normal Balance: Debit
Type of Account: Posting

Definition: The total amount of loan principal collected during the fiscal year from nonfederal sources.

Account Title: Actual Collection of Loan Interest
Account Number: 4263
Normal Balance: Debit
Type of Account: Posting

Definition: The total amount of loan interest collected during the fiscal year from nonfederal sources for loan programs.

Account Title: Actual Collection of Rent
Account Number: 4264
Normal Balance: Debit
Type of Account: Posting

Definition: The total amount of rent collected during the fiscal year from nonfederal sources.

Account Title: Actual Collections from Sale of Foreclosed Property
Account Number: 4265
Normal Balance: Debit
Type of Account: Posting

Definition: The amount collected during the fiscal year from the sale of foreclosed property.

Account Title: Other Actual Collections - Non-Federal
Account Number: 4266
Normal Balance: Debit
Type of Account: Posting

Definition: The amount collected during the fiscal year from non-federal sources for which a specific SGL account has not been established.

Account Title: Actual Program Fund Subsidy Collected - Definite - Current
Account Number: 4271
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of current definite subsidy collected during the fiscal year by the financing fund from the program fund for loan programs.

Account Title: Actual Program Fund Subsidy Collected - Indefinite - Permanent
Account Number: 4272
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of permanent indefinite subsidy collected during the fiscal year by the financing fund from the program fund for loan programs.

Account Title: Interest Collected from Treasury
Account Number: 4273
Normal Balance: Debit

Type of Account: Posting

Definition: The amount of interest collected during the fiscal year by the financing fund from Treasury for loan programs.

Account Title: Actual Program Fund Subsidy Collected - Indefinite - Current

Account Number: 4274

Normal Balance: Debit

Type of Account: Posting

Definition: The amount of current indefinite subsidy collected during the fiscal year by the financing fund from the program fund for direct loan and loan guarantee programs.

Account Title: Actual Collections from Liquidating Fund

Account Number: 4275

Normal Balance: Debit

Type of Account: Posting

Definition: The amount the financing fund collects during the fiscal year from the liquidating fund for assuming pre credit reform loan programs for which the terms have been modified.

Account Title: Actual Collections from Financing Fund

Account Number: 4276

Normal Balance: Debit

Type of Account: Posting

Definition: The amount collected from the financing fund during the year. This will include liquidating fund collections for modified direct loans transferred to the financing fund, program fund collections for negative subsidies, downward re-estimates in mandatory loan programs, or other interfund collections paid from the financing fund.

Account Title: Other Actual Collections - Federal

Account Number: 4277

Normal Balance: Debit

Type of Account: Posting

Definition: The amount collected during the fiscal year from federal sources for which a specific SGL account has not been established.

Account Title: Actual Program Fund Subsidy Receivable - Definite - Current
Account Number: 4281
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of current definite subsidy due, but not collected by the financing fund from the program fund for loan programs.

Account Title: Actual Program Fund Subsidy Receivable - Indefinite - Permanent
Account Number: 4282
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of permanent indefinite subsidy due, but not collected by the financing fund from the program fund for loan programs.

Account Title: Interest Receivable from Treasury
Account Number: 4283
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of interest due, but not collected by the financing fund from Treasury for loan programs.

Account Title: Actual Program Fund Subsidy Receivable - Indefinite - Current
Account Number: 4284
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of current indefinite subsidy due, but not collected by the financing fund from the program fund for direct loan and loan guarantee programs.

Account Title: Receivable from the Liquidating Fund
Account Number: 4285
Normal Balance: Debit
Type of Account: Posting

Definition: The amount due the financing fund, but not collected from the liquidating fund for assuming pre credit reform loan programs for which the terms have been modified.

Account Title: Receivable from the Financing Fund
Account Number: 4286
Normal Balance: Debit
Type of Account: Posting

Definition: The amount due but not yet collected from the financing fund during the year. This will include liquidating fund collections for modified direct loans transferred to the financing fund, program fund collections for negative subsidies, downward re-estimates in mandatory loan programs, or other interfund collections paid from the financing fund.

Account Title: Other Federal Receivables
Account Number: 4287
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of uncollected amounts due from federal sources for which a specific SGL account has not been established.

Account Title: Anticipated Recoveries of Prior-Year Obligations
Account Number: 4310
Normal Balance: Debit
Type of Account: Posting

Definition: Estimated cancellations or downward adjustments of prior year obligations anticipated for recovery in the current fiscal year.

Account Title: Canceled Authority
Account Number: 4350
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of appropriation authority which is canceled five years after the expiration of an annual or a multi-year appropriation; **or**, the amount of annual, multi-year or no-year appropriation authority which is canceled early by administrative action.

Account Title: Balance Available for Restoration, Writeoff and Withdrawal
Account Number: 4390
Normal Balance: Either
Type of Account: Summary

Definition: The net difference between amounts previously written off which have been restored to the account during the current fiscal year and amounts actually written off to date as transactions of the current fiscal year.

Account Title: Adjustments to Indefinite No-Year Authority
Account Number: 4391
Normal Balance: Either
Type of Account: Posting

Definition: The amount necessary to reconcile obligations with resources for indefinite no-year appropriations and that is reportable on the 2108.

Account Title: Rescissions - Current-Year
Account Number: 4392
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of current-year budgetary resources rescinded by enacted legislation.

Account Title: Rescissions - Prior-Year
Account Number: 4393
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of prior-year budgetary resources rescinded by enacted legislation.

Account Title: Authority Unavailable Pursuant to Public Law - Temporary
Account Number: 4395
Normal Balance: Credit
Type of Account: Posting

Definition: Authority which has been temporarily withheld by reason of specific statutory restrictions and may not be used until the specific legal requirements are met.

Account Title: Authority Permanently not Available Pursuant to Public Law
Account Number: 4396
Normal Balance: Credit
Type of Account: Posting

Definition: General permanent statutory reductions to budget authority other than rescissions that rescind the authority of more than one account; e.g., Gramm-Rudman-Hollings, and cancellation due to reappropriation.

Account Title: Unapportioned Authority - Pending Rescission
Account Number: 4420
Normal Balance: Credit
Type of Account: Posting

Definition: The total amount of budgetary resources withheld pending rescission action by the Congress.

Account Title: Unapportioned Authority - OMB Deferral
Account Number: 4430
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of budgetary authority specifically withheld from apportionment by the Office of Management and Budget (OMB).

Account Title: Unapportioned Authority - Available
Account Number: 4450
Normal Balance: Credit
Type of Account: Posting

Definition: Appropriated funds not yet apportioned by the OMB on a quarterly or other approved basis. The account is reduced as apportionments and apportionment reserves are established.

Account Title: Apportionments
Account Number: 4510
Normal Balance: Credit
Type of Account: Posting

Definition: The amounts apportioned by OMB as Category A and B apportionments that are available for allotment. Used to account for categories and availability in current or subsequent quarters.

Account Title: Reserved for Agency Use
Account Number: 4520
Normal Balance:

Type of Account:**Definition:**

Account Title: Reserved for Agency Use
Account Number: 4530
Normal Balance: Credit
Type of Account:

Definition:

Account Title: Internal Fund Distributions Issued
Account Number: 4540
Normal Balance: Credit
Type of Account: Posting

Definition: Represents the amount of obligational authority allocated from departmental levels to intermediate levels.

Account Title: Internal Fund Distributions Received
Account Number: 4550
Normal Balance: Debit
Type of Account: Posting

Definition: Represents the amount of direct and reimbursable program authority received from departmental level by an intermediate level activity. It can also represent the amount of suballocations received from another intermediate level activity.

Account Title: Funds Available for Allotment
Account Number: 4560
Normal Balance: Credit
Type of Account: Posting

Definition: Represents the amount of direct and reimbursable authority available at an intermediate level activity for allotment to installation level activities. or suballocation to other intermediate level activities.

Account Title: Allotments Issued
Account Number: 4570
Normal Balance: Credit
Type of Account: Posting

Definition: Represents the amount of direct and reimbursable authority allotted by intermediate level activities to installation level activities, or suballocated to other intermediate level activities.

Account Title: Allotments Received
Account Number: 4580
Normal Balance: Debit
Type of Account: Posting

Definition: Represents the amount of direct program allotments received for the fiscal year.

Account Title: Apportionments - Unavailable
Account Number: 4590
Normal Balance: Credit
Type of Account: Posting

Definition: Represents amounts anticipated and apportioned that will become available upon completion of a subsequent event such as accepting a reimbursable order.

Account Title: Allotments - Realized Resources
Account Number: 4610
Normal Balance: Credit
Type of Account: Posting

Definition: The current period amount of Category A and B funds available for obligation/commitment. Subaccounts or data elements may be used to account for availability in current or subsequent quarters. Allowances may be established at an agency level.

Account Title: Other Funds Available for Commitment/Obligation
Account Number: 4620
Normal Balance: Credit
Type of Account: Posting

Definition: Appropriated funds, not subject to apportionment, that are available for commitment/obligation.

Account Title: Funds Not Available for Commitment/Obligation
Account Number: 4630
Normal Balance: Credit
Type of Account: Posting

Definition: Appropriated funds, that are not available for commitment/obligation.

Account Title: Allotments - Expired Authority
Account Number: 4650
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of appropriation authority which expires at the end of the current-year or a multi-year appropriation with a set life.

Account Title: Commitments
Account Number: 4700
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of allotments or lower level authority committed in anticipation of obligation.

Account Title: Undelivered Orders
Account Number: 4800
Normal Balance: Credit
Type of Account: Summary

Definition: The amount of goods and services ordered and obligated, but which have not been actually or constructively received. Represents contracts or orders issued for goods and services to be furnished by other government agencies or the public that are required to meet a bona fide need of the issuing entity.

Account Title: Undelivered Orders - Unpaid
Account Number: 4801
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of goods and services ordered and obligated for the direct and reimbursable program which have not been actually or constructively received and for which amounts have not been prepaid or advanced. Represents contracts or orders issued for goods and services to be furnished by other government agencies or the public that are required to meet a bona fide need of the issuing entity.

Account Title: Undelivered Orders - Paid
Account Number: 4802

Normal Balance: Credit
Type of Account: Posting

Definition: The amount of goods and services ordered and obligated for the direct and reimbursable program which have not been actually or constructively received but have been prepaid or advanced. Represents contracts or orders issued for goods and services to be furnished by other government agencies or the public that are required to meet a bona fide need of the issuing entity.

Account Title: Undelivered Orders, Transferred - Unpaid
Account Number: 4831
Normal Balance: Either
Type of Account: Posting

Definition: The amount of goods and services ordered and obligated in one appropriation and transferred to or from another appropriation, which have not been actively or constructively received and for which amounts have not been prepaid or advanced at the time of transfer. Represents contracts or orders issued for goods and services to be furnished by other government agencies or the public that are required to meet a bona fide need of the receiving entity.

Account Title: Undelivered Orders, Transferred - Paid
Account Number: 4832
Normal Balance: Either
Type of Account: Posting

Definition: The amount of goods and services ordered and obligated in one appropriation and transferred to or from another appropriation, which have not been actively or constructively received but have been prepaid or advanced at the time of transfer. Represents contracts or orders issued for goods and services to be furnished by other government agencies or the public that are required to meet a bona fide need of the receiving entity.

Account Title: Downward Adjustments of Prior-Year Undelivered Orders
Account Number: 4870
Normal Balance: Debit
Type of Account: Summary

Definition: The amount of paid and unpaid prior-year obligations in excess of the related expended authority necessary to liquidate the obligations. This account is used after the year of the original obligation but before cancellation of the budgetary authority involved. This account accumulates authority from liquidation of obligations at amounts less than they were placed on the books.

Account Title: Downward Adjustments of Prior-Year Unpaid Undelivered Orders
Account Number: 4871
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of downward adjustments to unpaid undelivered orders which were recorded in a prior year.

Account Title: Downward Adjustments of Prior-Year Paid Undelivered Orders - Refunds Collected
Account Number: 4872
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of cash refunds collected for downward adjustments of undelivered orders for which a prepayment or an advance was made in a prior year.

Account Title: Upward Adjustments of Prior-Year Undelivered Orders
Account Number: 4880
Normal Balance: Credit
Type of Account: Summary

Definition: The amount of expended authority in excess of related prior-year obligations necessary to liquidate the paid and unpaid obligations. This account is used after the year of the original obligation but before cancellation of the budgetary authority involved.

Account Title: Upward Adjustments of Prior-Year Unpaid Undelivered Orders
Account Number: 4881
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of upward adjustments to expended authority in excess of related prior-year obligations necessary to liquidate the unpaid obligations. This account is used after the year of the original obligation but before cancellation of the budgetary authority involved.

Account Title: Upward Adjustments of Prior-Year Paid Undelivered Orders
Account Number: 4882
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of upward adjustments to expended authority in excess of related prior-year obligations necessary to liquidate the paid obligations. This account is used after the year of the original obligation but before cancellation of the budgetary authority involved.

Account Title: Expended Authority
Account Number: 4900
Normal Balance: Credit
Type of Account: Summary

Definition: Paid and unpaid expenditures for: (a) services performed by employees, contractors, vendors, carriers, grantees, lessor, other government funds; (b) goods and tangible property received; and (c) amounts becoming owed under programs for which no current service or performance is required (i.e., annuities, insurance claims, other benefit payments).

Account Title: Expended Authority - Unpaid
Account Number: 4901
Normal Balance: Credit
Type of Account: Posting

Definition: The unpaid expenditures for: (a) services performed by employees, contractors, vendors, carriers, grantees, lessors, other government funds; (b) goods and tangible property received; and (c) amounts becoming owed under programs for which no current service or performance is required (i.e., annuities, insurance claims, other benefit payments).

Account Title: Expended Authority - Paid
Account Number: 4902
Normal Balance: Credit
Type of Account: Posting

Definition: Represents paid expenditures for: (a) services performed by employees, contractors, vendors, carriers, grantees, lessors, other government funds; (b) goods and tangible property received; and (c) amounts becoming owed under programs for which no current service or performance is required (i.e., annuities, insurance claims, other benefit payments).

Account Title: Downward Adjustments of Prior-Year Expended Authority
Account Number: 4970
Normal Balance: Debit
Type of Account: Summary

Definition: The amount paid and unpaid adjustments to amend overstated expended authority recorded in a prior-year.

Account Title: Downward Adjustments of Prior-Year Unpaid Expended Authority
Account Number: 4971
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of downward adjustments to unpaid expended authority which was recorded in a prior year.

Account Title: Downward Adjustments of Prior-Year Paid Expended Authority - Refunds Collected
Account Number: 4972
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of cash refunds collected for downward adjustments of prior year expended authority for which payment was made in a prior year.

Account Title: Upward Adjustments of Prior-Year Expended Authority
Account Number: 4980
Normal Balance: Credit
Type of Account: Summary

Definition: The amount of the adjustment to amend understated paid and unpaid expended authority recorded in a prior year.

Account Title: Upward Adjustments of Prior-Year Unpaid Expended Authority
Account Number: 4981
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of upward adjustments to unpaid expended authority which was recorded in a prior year.

Account Title: Upward Adjustments of Prior-Year Paid Expended Authority
Account Number: 4982
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of upward adjustments to paid expended authority which was recorded in a prior year.

Account Title: Revenues and Financing Sources
Account Number: 5000
Normal Balance: Credit
Type of Account: Summary

Definition: These accounts reflect the amount of (1) income earned from sales of goods and services, including interest income, (2) appropriated capital used to finance expenses, (3) donations to the U.S. Government, and (4) receipts collected pursuant to the U.S. Government's sovereign power to levy taxes and fines. Exclude (1) gain from disposition of assets, (2) gain from liquidation of liabilities at an amount less than face value, and (3) other nonoperating gains covered in the 7000 series of accounts.

Account Title: Revenue from Goods Sold
Account Number: 5100
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue earned from the sale of any goods that were purchased or finished goods processed for sale or use under a program of trading, manufacturing, etc.

Account Title: Contra Revenue for Goods Sold
Account Number: 5109
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for goods sold when collection of amounts of revenue accrued is not expected. Amounts recorded are based on adjustments, returns, allowances, price redetermination, and refunds other than taxes where revenue is earned, but does not include credit losses.

Account Title: Revenue from Services Provided
Account Number: 5200
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue earned from the sale of services provided including sale of power, transportation, etc.

Account Title: Contra Revenue for Services Provided
Account Number: 5209
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for services provided when collection of amounts of revenue accrued is not expected. Amounts recorded are based on adjustments, returns, allowances, price redetermination, and refunds other than taxes where revenue is earned, but does not include credit losses.

Account Title: Interest Revenue
Account Number: 5310
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue earned from interest. The amount is exchange revenue by definition with one exception - interest on Treasury securities held by Trust Funds and Special Funds (except Trust Revolving Funds).

Account Title: Contra Revenue for Interest
Account Number: 5319
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for interest accrued when realization is not expected. Amounts recorded are based on abatements, adjustments, returns, allowances, or price redeterminations.

Account Title: Penalties and Fines Revenue
Account Number: 5320
Normal Balance: Credit
Type of Account: Posting

Definition: Nonexchange revenue earned from penalties and fines.

Account Title: Contra Revenue for Penalties and Fines
Account Number: 5329
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for penalties and fines when realization is not expected. Amounts recorded are based on abatements, adjustments, returns, allowances, or price redeterminations. Credit losses on penalties and fines revenue are also recorded in this account.

Account Title: Benefit Program Revenue
Account Number: 5400
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue received by agencies which administer retirement plans, insurance plans, and other annuity programs.

Account Title: Contra Revenue for Benefit Program Revenue
Account Number: 5409
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for a benefit program based on adjustments as stipulated by law and does not include credit losses.

Account Title: Insurance and Guarantee Premium Revenue
Account Number: 5500
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue earned from insurance and guarantee premiums.

Account Title: Contra Revenue for Insurance and Guarantee Premium Revenue
Account Number: 5509
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for an insurance and guarantee premium based on adjustments stipulated by law and does not include credit losses.

Account Title: Donated Revenue - Financial Resources
Account Number: 5600
Normal Balance: Credit
Type of Account: Posting

Definition: To record the donation of financial resources (e.g., cash or securities) to a government entity from a nongovernment entity. Includes authorized acceptance from nonfederal sources of payments in cash or kind to cover travel and/or subsistence expenses of employees and other authorized donations.

Account Title: Contra Revenue for Donations - Financial Resources
Account Number: 5609
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for donated financial resources (e.g., cash or securities) that are returned.

Account Title: Donated Revenue - Nonfinancial Resources
Account Number: 5610
Normal Balance: Credit
Type of Account: Posting

Definition: To record the donation of nonfinancial resources (e.g., land or buildings) to a government entity from a nongovernment entity.

Account Title: Contra Donated Revenue - Nonfinancial Resources
Account Number: 5619
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for donated nonfinancial resources (e.g., land or buildings) that are returned.

Account Title: Appropriations Used
Account Number: 5700
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of current period expenses and purchases of capital assets funded by appropriations. The balance in this account should equal the Budgetary expended authority for appropriated funds.

Account Title: Financing Sources Transferred In Without Reimbursement
Account Number: 5720
Normal Balance: Credit
Type of Account: Posting

Definition: The amount determined to increase the financing source of a reporting entity which occurs as a result of an asset being transferred in. The amount of the asset is recorded at book value of the transferring entity.

Account Title: Financing Sources Transferred Out Without Reimbursement
Account Number: 5730
Normal Balance: Debit
Type of Account: Posting

Definition: The amount determined to decrease the financing source of a reporting entity which occurs as a result of an asset being transferred out. The amount of the asset is recorded at book value as of the transfer date.

Account Title: Imputed Financing Sources
Account Number: 5780
Normal Balance: Credit
Type of Account: Posting

Definition: The account is used by the receiving entity to record the portion of cost incurred by the providing entity for goods and services received at less than full cost. This account is used to record financing sources (as opposed to revenues earned for provision of goods and services) not provided for in other accounts.

Account Title: Other Financing Sources
Account Number: 5790
Normal Balance: Either
Type of Account: Posting

Definition: This account is used to record financing sources (as opposed to revenues earned for provision of goods and services) not provided for in other accounts.

Account Title: Adjustment of Appropriations Used
Account Number: 5799
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of adjustment to financing sources in the program fund to reflect the amount of excess subsidy funds returned to Treasury by the financing fund.

Account Title: Tax Revenues
Account Number: 5800
Normal Balance: Credit
Type of Account: Posting

Definition: Taxes and fees received from the public that result from the exercise of the federal government's sovereign powers to tax. This includes individual and corporate taxes (Internal

Revenue Service collections), Social Security/Medicare contributions (reported by Social Security Administration), excise, estate and gift taxes, customs duties, and any other miscellaneous taxes.

Account Title: Contra Revenue for Taxes
Account Number: 5809
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue for taxes when realization is not expected. Amounts recorded are based on abatements, adjustments, returns, allowances, and credit losses.

Account Title: Tax Revenue Refunds
Account Number: 5890
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of tax revenue refunds that are payable or have been paid.

Account Title: Other Revenue
Account Number: 5900
Normal Balance: Credit
Type of Account: Posting

Definition: Revenue received but not otherwise classified above.

Account Title: Contra Revenue for Other Revenue
Account Number: 5909
Normal Balance: Debit
Type of Account: Posting

Definition: The amount reflecting a reduction in revenue received (but not otherwise classified above) when realization is not expected. Amounts recorded are based on adjustments, returns, allowances, price redetermination, and refunds other than taxes where revenue is earned. Credit losses on other nonexchange revenue are also recorded in this account.

Account Title: Collections for Others
Account Number: 5990
Normal Balance: Debit
Type of Account: Posting

Definition: Amounts collected by a reporting entity on behalf of another federal entity.

Account Title: Expense
Account Number: 6000
Normal Balance: Debit
Type of Account: Summary

Definition: The outflows of assets or incurrence of liabilities during a period resulting from rendering services, delivering or producing goods, or carrying out other normal operating activities.

Account Title: Operating Expenses/Program Costs
Account Number: 6100
Normal Balance: Debit
Type of Account: Posting

Definition: Operating expenses and program costs not otherwise classified below.

Account Title: Contra Bad Debts Expense - Incurred for Others
Account Number: 6190
Normal Balance: Credit
Type of Account: Posting

Definition: This account is used in conjunction with recording bad debts expense related to accounts receivable held for others, collections on which must be deposited to Treasury. It is used as an offset to reduce the related liability and payable to Treasury and is netted against bad debts expense before reporting that expense on the agency's operating statement.

Account Title: Adjustment to Subsidy Expense
Account Number: 6199
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of adjustment to subsidy expense in the program fund to reflect the amount of subsidy funds transferred to a special receipt account by the financing fund as a result of a downward re-estimate. This account will also be used for recording the effect of negative subsidy on the program fund.

Account Title: Interest Expenses
Account Number: 6300
Normal Balance: Debit

Type of Account: Summary

Definition: The expense incurred by the agency from late payment of accounts and loans payable, and the current interest accruing on amounts owed to others.

Account Title: Interest Expenses on Borrowing from Treasury

Account Number: 6310

Normal Balance: Debit

Type of Account: Posting

Definition: The amount of interest expense incurred by the agency during the current fiscal year on amounts borrowed from Treasury.

Account Title: Interest Expenses on Securities

Account Number: 6320

Normal Balance: Debit

Type of Account: Posting

Definition: The amount of interest expense incurred by the agency during the current fiscal year on federal securities.

Account Title: Other Interest Expenses

Account Number: 6330

Normal Balance: Debit

Type of Account: Posting

Definition: The amount of interest expense incurred by the agency from late payment of accounts and loans, and current interest accruing on amounts owed others not otherwise classified above.

Account Title: Cost of Goods or Services Sold

Account Number: 6500

Normal Balance: Debit

Type of Account: Posting

Definition: The cost of goods sold at point of sale including the inventory value of commodities sold from stock and all labor, material, and other expenses applied to manufactured items sold.

Account Title: Applied Overhead

Account Number: 6600

Normal Balance: Credit
Type of Account: Posting

Definition: The amount of overhead cost distributed to work in process or construction in process.

Account Title: Expenses Not Requiring Budgetary Resources
Account Number: 6700
Normal Balance: Debit
Type of Account: Summary

Definition: Expenses that do not require budgetary resources, which are most commonly the result of allocating asset costs to expenses over more than one reporting period (e.g., depreciation).

Account Title: Depreciation, Amortization, and Depletion
Account Number: 6710
Normal Balance: Debit
Type of Account: Posting

Definition: Expenses recognized by the process of allocating cost of assets (tangible and intangible) over their useful lives/periods benefitted.

Account Title: Bad Debt Expense
Account Number: 6720
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of bad debt expense related to uncollectible noncredit reform receivables from the public.

Account Title: Imputed Costs
Account Number: 6730
Normal Balance: Debit
Type of Account: Posting

Definition: Costs incurred which are paid in total or in part by other entities. Examples include, but are not limited to, military personnel costs, pension costs not reimbursed, other retirement benefits, other postemployment benefits, and environmental cleanup costs not reimbursed to the entity administering the fund when the administering fund is outside the DoD reporting entity.

Account Title: Other Expenses Not Requiring Budgetary Resources
Account Number: 6790
Normal Balance: Debit
Type of Account: Posting

Definition: Other costs which do not require budgetary resources.

Account Title: Future Funded Expenses
Account Number: 6800
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of accrued expenses which are required to be funded from future year appropriations. Examples include, but are not limited to, accrued annual leave expense, accrued worker's compensation, upward re-estimates for Credit Reform loan programs.

Account Title: Non Production Costs
Account Number: 6900
Normal Balance: Debit
Type of Account: Posting

Definition: Costs incurred and recognized that are linked to events other than the production of goods and services. Examples include, but are not limited to, Other Post Employment Benefits (OPEB) (refer to SFFAS #5, ¶94-96), acquisition of Federal Mission Property, Plant and Equipment, Heritage PP&E, Stewardship Land, reorganization costs, and nonrecurring cleanup costs resulting from facility adandonments that are not accrued. This is in accordance with FASAB #4 - Managerial Cost Accounting Concepts and Standards for the federal government.

Account Title: Gains
Account Number: 7100
Normal Balance: Credit
Type of Account: Summary

Definition: Gain on assets.

Account Title: Gains on Disposition of Assets
Account Number: 7110
Normal Balance: Credit
Type of Account: Posting

Definition: The gain on the disposition (such as sale, exchange, casualty, disposal, or retirement) of assets and personal property.

Account Title: Other Gains

Account Number: 7190

Normal Balance: Credit

Type of Account: Posting

Definition: The gain on assets resulting from events other than disposition.

Account Title: Losses

Account Number: 7200

Normal Balance: Debit

Type of Account: Summary

Definition: Losses on assets.

Account Title: Losses on Disposition of Assets

Account Number: 7210

Normal Balance: Debit

Type of Account: Posting

Definition: The loss on the disposition (such as sale, exchange, casualty, disposal, or retirement) of assets and personal property.

Account Title: Other Losses

Account Number: 7290

Normal Balance: Debit

Type of Account: Posting

Definition: The loss on assets resulting from events other than disposition.

Account Title: Extraordinary Items

Account Number: 7300

Normal Balance: Either

Type of Account: Posting

Definition: Costs or income so unusual in type or amount as to be accorded special treatment in the accounts or separate disclosure in financial statements.

Account Title: Prior Period Adjustments

Account Number: 7400

Normal Balance: Either

Type of Account: Posting

Definition: Adjustments relating to activity involving gains or losses in prior periods. Insufficient appropriations on participation certificate activities should be included in this account.

Account Title: Distribution of Income - Dividend

Account Number: 7500

Normal Balance: Debit

Type of Account: Posting

Definition: Distribution of income, such as certain types of income transferred to the general fund of the Treasury, interest on capital, franchise taxes, etc.

Account Title: Changes in Actuarial Liability

Account Number: 7600

Normal Balance: Either

Type of Account: Posting

Definition: The amount of increase or decrease in actuarial liability.

Account Title: Memorandum

Account Number: 8000

Normal Balance: Either

Type of Account: Summary

Definition: This account records events related to guaranteed loan processing.

Account Title: Guaranteed Loan Level (GLL)

Account Number: 8010

Normal Balance: Debit

Type of Account: Posting

Definition: The amount of guaranteed loan commitments; supportable by the subsidy budget authority of new commitments, or in the case of negative subsidies, the amount authorized by appropriation acts.

Account Title: Guaranteed Loan Level - Unapportioned

Account Number: 8015

Normal Balance: Credit

Type of Account: Posting

Definition: The amount of guaranteed loan level not yet apportioned by OMB.

Account Title: Guaranteed Loan Level - Apportioned
Account Number: 8020
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of category A and B guaranteed loan level that is available for allotment.

Account Title: Guaranteed Loan Level - Allotted and Available to Lenders
Account Number: 8025
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of category A and B guaranteed loan level allotted to program managers for which commitments may be made this period to lenders.

Account Title: Guaranteed Loan Level - Administrative Commitments Prior to Signing Contracts
Account Number: 8030
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of category A and B guaranteed loan level committed in anticipation of signing a contract.

Account Title: Guaranteed Loan Level - Contract Signed - Undisbursed by Lenders
Account Number: 8035
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of category A and B contracts for guaranteed loans that will be disbursed by a lender.

Account Title: Guaranteed Loan Level - Disbursed by Lenders
Account Number: 8040
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of category A and B guaranteed loan principal disbursed by lenders.

Account Title: Guaranteed Loan Level - Unused Authority
Account Number: 8045
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of category A and B guaranteed loan level for which contracts have not been signed.

Account Title: Guaranteed Loan (GL) Principal Outstanding
Account Number: 8050
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of guaranteed loan principal outstanding with the lender. At the end of the year, accounts 8053 through 8068 are closed to this account.

Account Title: Guaranteed Loan New Disbursements by Lender
Account Number: 8053
Normal Balance: Credit
Type of Account: Posting

Definition: The amount of guaranteed loan principal disbursed during the current year by lenders.

Account Title: Guaranteed Loan Repayments and Prepayments
Account Number: 8056
Normal Balance: Debit
Type of Account: Posting

Definition: The amount paid during the current year by the borrower to the lender as principal repayment and prepayment of guaranteed loans.

Account Title: Guaranteed Loan Default - Loan Acquired
Account Number: 8059
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of guaranteed loan principal reduced by termination for default this current year that leads to the acquisition of a loan receivable by the agency.

Account Title: Guaranteed Loan Default - Property Acquired
Account Number: 8062
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of guaranteed loan principal reduced by terminations for default this current year that leads to the acquisition of property by the agency.

Account Title: Guaranteed Loan Default - Claim Payment Only
Account Number: 8065
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of guaranteed loan principal reduced by termination for default this current year that leads to claim payments by the agency that does not result in the acquisition of a loan receivable or property.

Account Title: Guaranteed Loan Adjustments
Account Number: 8068
Normal Balance: Either
Type of Account: Posting

Definition: The amount of guaranteed loan principal reduced or increased this current year by reasons other than repayment or default, i.e., outstanding principal balances of guaranteed loans transferred to or received from other accounts.

Account Title: Guaranteed Loan Principal to be Collected
Account Number: 8070
Normal Balance: Debit
Type of Account: Posting

Definition: The amount of guaranteed loan principal outstanding with the lender.

★ CHAPTER 8 ★

HIERARCHY OF ACCOUNTING STANDARDS0801 OVERVIEW

080101. To comply with the “Chief Financial Officers (CFO) Act” of 1990, as amended, federal financial managers, accountants and auditors need to apply new accounting concepts and standards. These concepts and standards have evolved from recommendations of the Federal Accounting Standards Advisory Board (FASAB). The FASAB was established in October 1990 by the Director of the Office of Management and Budget (OMB); the Secretary of the Treasury; and the Comptroller General, General Accounting Office to consider and recommend accounting principles for the federal government. The nine member Board is composed of representatives from the three principals (OMB, Treasury and GAO), one representative from the Congressional Budget Office, one representative from the Department of Defense (DoD)/international agencies, one representative from civilian agencies and three nonfederal representatives. When the Board’s principals (OMB, Treasury and GAO) adopt the Board’s recommendations, they are published as Statements of Federal Financial Accounting Standards. These Statements of Federal Financial Accounting Standards are the body of standards that are considered, in effect, federal generally accepted accounting principles, or Federal GAAP.

080102. The FASAB recommends accounting standards after considering the financial and budgetary information needs of the Congress, executive agencies, other users of federal financial information and comments from the public. The OMB, the Department of Treasury, and the General Accounting Office (GAO) then decide whether to adopt the recommended standards; if they do, the standards are published by the OMB and the GAO and become effective as Statements of Federal Financial Accounting Standards.

080103. A listing of approved Statements of Federal Financial Accounting Standards (SFFASs) is at Appendix A of this chapter. The SFFASs also can be found, electronically, at the following Internet address:
<http://www.financenet.gov/financenet/fed/fasab/codifica.htm>.

0802 PURPOSE

This chapter sets forth the hierarchy of accounting principles and standards that shall be followed by federal agencies, including the DoD. The purpose of these principles and standards is to improve the usefulness of the federal financial reports. These principles and standards provide a frame of reference for resolving accounting issues and cover most transactions.

0803 GENERAL

080301. Statements of Federal Financial Accounting Standards. Approved Statements of Federal Financial Accounting Standards comprise federal generally accepted accounting principles and shall be followed by all federal agencies, including each DoD Component, in reporting under the “Government Management Reform Act” (GMRA) of 1994. Accordingly, the DoD Components shall adhere to the hierarchy of federal generally accepted accounting principles in the order of precedence listed below in paragraphs A through G. A listing of the hierarchy also is at Appendix B of this chapter.

A. The individual standards agreed to by the Director of the OMB, the Secretary of the Treasury, and the Comptroller General, published by the OMB and the General Accounting Office (GAO). The standards may be found, electronically, at the following Internet address: <http://www.financenet.gov/financenet/fed/fasab/codifica.htm>. Each specific standard also is discussed in applicable sections throughout the “DoD Financial Management Regulation.”

B. Interpretations related to the Statements of Federal Financial Accounting Standards (SFFASs) issued by the OMB in accordance with the procedures outlined in the OMB Circular A-134, “Financial Accounting Principles and Standards.” The OMB Circulars can be found, electronically, at the following Internet address: <http://www.whitehouse.gov/WH/EOP/OMB/html/ombhome.html>.

1. To ensure the consistent application of SFFASs throughout the Department, the Directorate for Accounting Policy, Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), shall be contacted when clarification, technical guidance, implementation guidance or other information regarding SFFASs is needed.

2. Any requests--whether informal or formal--addressed to the FASAB or the Accounting and Auditing Policy Committee for an interpretation, clarification, technical guidance, implementation guidance or other information regarding the SFFASs shall be submitted through the Directorate for Accounting Policy, OUSD(C).

C. Requirements contained in the OMB’s Form and Content Bulletin in effect for the period covered by the financial statements.

D. Accounting principles published by other authoritative standard-setting bodies and authoritative sources if the use of such accounting principles improves the meaningfulness of the financial statements.

E. United States Government Standard General Ledger (USGSGL) published by the Department of the Treasury, Financial Management Service, through its Treasury Financial Manual.

F. Policies and guidance published in the “DoD Financial Management Regulation.” At Internet address <http://www.dtic.mil/comptroller/fmr/> this Regulation can be found electronically.

G. Interim policies and guidance issued by Office of the Under Secretary of Defense (Comptroller) through various memoranda. These interim policies may be found, electronically, at the following Internet address: <http://www.dtic.mil/comptroller/fmr/>. Such interim guidance subsequently will be incorporated into the “DoD Financial Management Regulation once it is finalized.”

**Statements of Federal Financial Accounting Standards
(SFFAS)
As of December 31, 1997**

<u>Number</u>	<u>Title</u>	<u>Effective Date</u>
No. 1	Accounting for Selected Assets and Liabilities	After September 30, 1993
No. 2	Accounting for Direct Loans and Loan Guarantees	After September 30, 1993
No. 3	Accounting for Inventory and Related Property	After September 30, 1993
No. 4	Managerial Cost Accounting Concepts and Standards	After September 30, 1997
No. 5	Accounting for Liabilities of the Federal Government	After September 30, 1996
No. 6	Accounting for Property, Plant and Equipment	After September 30, 1997
No. 7	Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting	After September 30, 1997
No. 8	Supplementary Stewardship Reporting	After September 30, 1997

Hierarchy of Accounting Standards

1. Statements of Federal Financial Accounting Standards (SFFASs)

(These are the individual standards agreed published by the OMB and the GAO.)
2. Interpretations related to the SFFASs

(Issued by the OMB in accordance with the procedures outlined in the OMB Circular A-134, “Financial Accounting Principles and Standards.”)
3. OMB’s Form and Content Bulletin
4. Accounting principles published by other authoritative standard-setting bodies and authoritative sources if the use of such accounting principles improves the meaningfulness of the financial statements.
5. United States Government Standard General Ledger (USGSL)

(Published by the Department of the Treasury, Financial Management Service, through its Treasury Financial Manual.)
6. Policies and guidance published in the “DoD Financial Management Regulation.”
7. Interim policies and guidance issued by Office of the Under Secretary of Defense (Comptroller) through various memoranda.

CHAPTER 9**FINANCIAL RECORDS RETENTION****0901 OVERVIEW**

This Chapter provides guidance on the retention policy for financial records created or received and maintained by all elements of the Department of Defense (DoD).

090101. Purpose. To establish policy for the maintenance and retention of DoD financial records.

090102. Scope. This policy applies to all DoD Components as defined in the “Foreword” to this Volume of the “DoD Financial Management Regulation.”

0902 POLICY AND PROCEDURES

090201. All financial records, both paper and electronic, supporting the acquisition of DoD Property, Plant and Equipment (PP&E), materials and supplies, including cash, fixed and other assets, real and personal property, operating materials and supplies, stockpile materials, and National Defense PP&E shall be maintained for a minimum period of 6 years and 3 months. These records do not include documentation supporting settlement vouchers for official travel, which are administrative in nature and are described in Volume 9 of this Regulation. The use of electronic files, whenever possible, is encouraged.

090202. The National Archives and Records Administration (NARA) records management program provides guidance and assistance for the management and disposition of federal records. General Records Schedules (GRS) are issued by the NARA to provide disposal authorization guidance for administrative records, including fiscal accounting records. The GRS guidance is extensive and legally mandatory per the Federal Records Act and implementing records management regulations can be found in 36 Code of Federal Regulations, 1220-1238. The foregoing are implemented in the Department of Defense by DoD Directive 5015.2, “DoD Records Management Program,” dated April 11, 1997. The Assistant Secretary of Defense for Command, Control, Communications, and Intelligence has cognizance for this directive. The GRS, available on the Internet at: <http://ardor.nara.gov/grs/index.html>, provides, in extensive detail, guidance for specific documents and their retention requirements.

0903 RESPONSIBILITIES

090301. The Office of the Under Secretary of Defense (Comptroller), Office of the Deputy Chief Financial Officer, is responsible for the establishment and maintenance of this financial records retention policy.

090302. The DoD Components are responsible for adherence to and implementation of this financial records retention policy.

0904 SPECIFIC PROCEDURES

The following guidance applies:

090401. Financial Records. All financial records for the property categories included in paragraph 090201, above, shall be maintained in the original format or in a suitable records retention medium. This format includes paper copies, electronic copies, applicable DD, SD, SF or Component forms, or any other suitable medium that documents the integrity of the financial record.

090402. Retention Duration.

A. All DoD financial records, without regard to medium, shall be retained for a minimum period of 6 years and 3 months. Financial records will be retained for a longer period of time if a compelling reason exists or supplemental guidance so directs. Specific attention should be given to guidance provided by the references noted in paragraph 090202.

B. Foreign Military Sales documents and financial records must be retained for 10 years from the date of case closure.

C. Financial records pertaining to capitalized assets, such as those PP&E assets identified in Volume 4, Chapter 6 of this Regulation, shall be retained so long as the cost of the asset is included in the amounts reported in DoD financial statements or comparative financial statements.

D. Records for appropriations shall be retained for 6 months following the cancellation of the funding appropriation.

E. Property records produced in connection with litigation shall be retained until the litigation is concluded, with a starting date that is no earlier than the date the claim was submitted.

APPENDIX A
OBJECT CLASSIFICATION

1. Purpose

The purpose of this appendix is to provide necessary information on the object classes that are used as a uniform classification for identifying the transactions of the Federal Government by the nature of the goods or services purchased. Every obligation recorded by the Department of Defense must be coded with an object class. These obligations by object class must be accumulated and reported to the Treasury on a quarterly basis.

2. Basic Concepts

a. Obligations incurred are the amounts of orders placed, contracts awarded, services received, and similar transactions during an accounting period that will require payment during the same or a future period. Such amounts include payments for which obligations have not been previously recorded, along with adjustments for differences between obligations previously recorded and actual payments to liquidate those obligations. The installation-level budgetary account structure requires that the amount of obligations incurred be segregated into undelivered orders and accrued expenditures - unpaid or paid.

b. Obligations are classified by the initial purpose for which they are incurred, rather than for the end product or service provided. For example, if payments are made directly for personal services or supplies used in the construction of a building, the amounts should be classified as obligations for personnel compensation or supplies rather than for land and structures. Conversely, if contracts are awarded for the construction of a building, the amounts should be classified in the object class for lands and structures rather than in the object class used to report individual types of materials and services required to construct the building.

c. Object class information must be incorporated into DoD accounting systems to provide for preparation of the Report on Obligations, SF-225. This may be done either by subclassifying undelivered order and accrued expenditure transactions by object class, or deriving the information from applicable expense and asset accounts.

d. Specifications for the Report on Obligations, SF-225, are contained in chapter 4 of Volume 6 of this Regulation. Obligations incurred must be reported by object classes 11 through 44, 91 and 92. The codes, titles and definitions for these object classes are contained below.

OBJECT CLASS CODES AND TITLES**10 PERSONNEL SERVICES AND BENEFITS**

- 11.0 Personnel compensation
 - 11.1 Full-time permanent
 - 11.3 Other than full-time permanent
 - 11.5 Other personnel compensation
 - 11.7 Military personnel
 - 11.8 Special personal services payments
 - 11.9 Total personnel compensation
- 12.0 Personnel benefits
 - 12.1 Civilian personnel benefits
 - 12.2 Military personnel benefits
- 13.0 Benefits for former personnel

20 CONTRACTUAL SERVICES AND SUPPLIES

- 21.0 Travel and transportation of persons
- 22.0 Transportation of things
- 23.0 Rent, communications, and utilities
 - 23.1 Rental payments to GSA
 - 23.2 Rental payments to others
 - 23.3 Communications, utilities, and miscellaneous charges
- 24.0 Printing and reproduction
- 25.0 Other services
- 26.0 Supplies and materials

30 ACQUISITION OF CAPITAL ASSETS

- 31.0 Equipment
- 32.0 Land and structures
- 33.0 Investments and loans

40 GRANTS AND FIXED CHARGES

41.0 Grants, subsidies, and contributions

42.0 Insurance claims and indemnities

43.0 Interest and dividends

44.0 Refunds

90 OTHER

91.0 Unvouchered

92.0 Undistributed

93.0 Limitation on expenses

99.0 Subtotal, obligations

99.9 Total obligations

OBJECT CLASS DEFINITIONS**10 PERSONNEL SERVICES AND BENEFITS****11.0 Personnel Compensation**

Gross compensation for personal services rendered to the Government by Federal civilian employees, military personnel, and non-Federal personnel. (See object classes 11.1 - 11.9).

11.1 Full-Time Permanent

Regular salaries and wages paid directly to civilian full-time permanent employees, as defined in section 13.2, and other payments that become a part of the employee's basic pay rate (e.g., merit pay increases for GM 13-15 employees, geographic adjustments, and critical position pay). Includes regular salaries and wages paid to employees while on annual, sick, compensatory or other paid leave, and terminal leave payments; excludes compensation above the basic rate, e.g., for overtime or other premium pay, which should be recorded in object class 11.5. Where employees are paid from more than one appropriation, the applicable portion will be included under each appropriation. Include compensation for all workdays in the fiscal year.

11.3 Other Than Full-Time Permanent

Regular salaries and wages, including obligations for terminal leave payments and merit pay increases for GM 13-15 employees, paid directly to Federal civilian employees for part-time, temporary, or intermittent employment. Includes pay for employees in the Competitive and Excepted Services with appointments that are not designated as full-time permanent under object class 11.1. Includes pay for employees in the Senior Executive Service who are serving under limited term appointments, as defined in 5 U.S.C. 3132(a)(5) and under limited emergency appointments, as defined in 5 U.S.C. 3132(a)(6).

Note: When the Government contracts with an individual for personal services and that individual is reportable under Office of Personnel Management regulations as a Federal employee, the compensation for services normally shall be classified under object class 11.3 or 11.5, as appropriate. On the other hand, payments to a contractor principally for the personal services of a group of the contractor's employees shall be classified under object class 25.0. Similarly, contracts with individuals for personal services that provide for substantial additional considerations, such as a contract with a physician who provides his or her own office, X-ray and other equipment, shall be classified under object class 25.0.

11.5 Other Personnel Compensation

All personnel compensation above basic rates paid directly to civilian employees. Excludes cash allowances for higher cost of living locations, which are classified under object class 12.1. Includes overtime, holiday pay, Sunday pay, night work differential, and hazardous duty pay. Also includes:

Post differentials - Payments authorized under 5 U.S.C. 5925 above the basic rate for service at hardship posts abroad that are based upon conditions of environment differing substantially from those in the contiguous 48 States and the District of Columbia.

Other payments above basic rates - Payments above the basic rate for any other premium pay, such as stand-by pay and premium pay in lieu of overtime and special pay that is paid periodically during the year in the same manner and at the same time as regular salaries and wages are paid. Excludes special pay which is classified under object class 12.1.

Cash incentive awards - Payments for cash awards that do not become part of the Federal employee's basic rate of pay, such as those authorized under 5 U.S.C. 4503, 4504, 4505a, 4507, 5384, and 5407.

11.7 Military Personnel

Pay of military personnel including amounts above basic rates; for example, overtime, holiday pay, night work differential, hazardous duty pay, flight pay, and extra pay based upon conditions of environment (except cost of living allowances for locations outside the contiguous 48 States and the District of Columbia, which are classified under object class 12.2). Also includes basic allowances for subsistence (BAS) and for quarters (BAQ). Excludes payments made to other agencies for services of military personnel on reimbursable detail, which are classified under object class 11.8.

11.8 Special Personal Services Payments

Regular salaries and wages paid directly to persons whose work-years are not reportable to the Office of Personnel Management as Federal civilian employees and payments for personal services that do not represent salaries or wages paid directly to Federal employees. Includes:

Compensation of persons not reportable as Federal employees - Payments for compensation to persons not included in regular employment reports to the Office of Personnel Management, such as witnesses, casual workers, and patient and inmate help. Includes compensation in the nature of allowances to trainees and volunteers. Also includes payments for salary equalization authorized under 5 U.S.C. 3373 and 3584 for individuals on leave of absence for employment with international organizations or State and local governments. (During the period of leave of absence, such persons are not included in reports on Federal employment to the Office of Personnel Management if the Federal agency pays 50 percent or less of the person's salary.)

Payments for reimbursable details - Payments made to other agencies for services of civilian employees and military personnel on reimbursable detail (both compensation and personnel benefits).

Agency reimbursement to the Civil Service retirement and disability fund for reemployed annuitants - Payments by an agency employing an annuitant to reimburse the Civil Service retirement and disability fund for the annuity paid to that employee, as required by Public Law 94-397 (5 U.S.C. 8339, 8344).

11.9 Total Personnel Compensation

Total of the amounts shown for object classes 11.1 through 11.8.

12.0 Personnel Benefits

Benefits for currently employed civilian, military, and certain non-Federal personnel. (Payments of benefits to certain former Federal civilian and military personnel are classified under object classes 13.0 and 42.0.) (See object classes 12.1 and 12.2)

12.1 Civilian Personnel Benefits

Cash allowances paid directly to Federal civilian employees and payments to other funds for the benefit of these employees, and benefits authorized by statute to be paid, including those to certain non-Federal employees.

This object class consists of all such payments whether or not the personnel compensation of these employees is classified under object classes 11.1 through 11.8. Benefit payments for non-Federal civilian employees under this object class include persons not reportable to the Office of Personnel Management as Federal employees.

Excludes cash incentive awards classified under object class 11.5 and perquisites provided in kind (which are classified under the object class representing the nature of the item purchased), and payments to former employees from their employment. Includes:

Recruitment and retention incentives - Payments above the basic rate for recruitment bonuses, relocation bonuses, and retention allowances authorized by 5 U.S.C. 5753 and 5754.

Allowances - Includes quarters allowances, uniform allowances (when paid in cash), reimbursements for notary public expenses, and allowances above basic rates of pay for service outside the contiguous 48 States and the District of Columbia to compensate for a substantially higher cost of living at the post of assignment than the cost of living in the District of Columbia (as authorized under 5 U.S.C. 5924 and 5941). Also includes allowances for separate maintenance, education for dependents, transfers for employees stationed abroad, and personal allowances based upon assignment or position.

Relocation and other expenses related to permanent change of station (PCS) - Includes authorized allowances for expenses incurred in connection with the sale of a residence, or settlement of an unexpired lease, subsistence while occupying temporary quarters, and miscellaneous moving expenses, as authorized under 5 U.S.C. 5724a. Also includes reimbursement of amounts equal to income taxes incurred by transferred employees for moving or storage expenses under 5 U.S.C. 5724b and contractual charges for relocation services under 5 U.S.C. 5724c. Charges for other PCS expenses are classified under object class 21.0, 22.0, or 25.0, as appropriate.

Payments to other funds - Includes employers share of employee retirement, life insurance, health insurance and benefits, accident compensation (such as payments to the Office of Worker's Compensation), Federal Insurance Contribution Act taxes, and other such payments. Also includes agency payments to finance fiduciary insurance costs of the Federal Retirement Thrift Investment Board.

12.2 Military Personnel Benefits

Cash allowances and payments to other funds for military personnel. Includes:

Allowances - Includes uniform allowances (when paid in cash) and reenlistment bonuses. Also includes cost of living allowances paid to personnel on duty outside the contiguous 48 States and the District of Columbia, dislocation and family separation allowances, and personal allowances based upon assignment or rank. (Excludes hazardous duty pay, flight pay, extra pay based upon conditions of environment, and other such pay, which are classified under object class 11.7, and benefit payments to veterans resulting from their past service.)

Payments to other funds - Includes the employer share of military retirement, Federal Insurance Contribution Act taxes, Servicemen's Group Life Insurance premiums, and education benefits.

13.0 Benefits for Former Personnel

Benefits due to former employees or their survivors on the basis of (at least in part) the length of service to the Government. Excludes benefits provided in kind, such as hospital and medical care, which are classified under the object class representing the nature of the items purchased. Includes:

Retirement benefits - Compensation in the form of pensions, annuities, or other retirement benefits paid to former military and certain civilian Government personnel or to their survivors, exclusive of payments from retirement trust funds, which are classified under object class 42.0.

Severance pay - Payments made to former employees involuntarily separated.

Other benefits - Unemployment compensation for Federal employees and ex-servicemen and other benefits paid directly to the beneficiary. Also includes Government payment to the Employees Health Benefits Fund for annuitants.

20 CONTRACTUAL SERVICES AND SUPPLIES

21.0 Travel and Transportation of Persons

Obligations for transportation of Government employees or others, their per diem allowances while in an authorized travel status, and other expenses incident to travel that are to be paid by the Government either directly or by reimbursing the traveler.

This object class consists of both travel away from official stations, subject to regulations governing civilian and military travel, and local travel and transportation of persons in and around the official station of an employee. In determining subclasses for administrative use, agencies may maintain such distinctions as they deem appropriate, including a separate subclass for rental of vehicles from interagency motor vehicle pools. Includes:

Transportation of persons - Contractual obligations for services in connection with carrying persons from place to place, by land, air, or water and the furnishing of accommodations incident to actual travel. Includes commercial transportation charges; rental or lease of passenger cars; charter of trains, buses, vessels, or airplanes; ambulance service or hearse service; and expenses incident to the operation of rented or chartered conveyances. (Rental or lease of all passenger-carrying vehicles is

to be charged to this object class, even though such vehicles may be used incidentally for transportation of things.) Includes mileage allowances for use of privately owned vehicles and related charges that are specifically authorized (such as highway and ferry tolls). It includes rental or lease of passenger motor vehicles from Government motor pools. Also includes bus, subway, streetcar, and taxi fares (including tips) whether used for local transportation or for travel away from a designated post of duty.

Subsistence for travelers - Payments to travelers of per diem allowances or reimbursement of actual expenses for subsistence.

Transportation expenses incident to permanent change of station (PCS) - Payments to employees for transportation expenses and per diem allowances or reimbursement of actual travel expenses associated with a permanent change of station (including travel expenses and per diem for the employee's immediate family), as authorized under 5 U.S.C. 5724a. Charges for other PCS expenses are classified under object class 12.1, 12.2, 22.0, or 25.0, as appropriate.

Incidental travel expenses - Other expenses directly related to official travel, such as baggage transfer, and telephone and telegraph expenses, as authorized by travel regulations.

22.0 Transportation of Things

Contractual obligations for the transportation of things (including animals), for the care of such things while in process of being transported, and for other services incident to the transportation of things. (Excludes transportation paid by a vendor, regardless of whether the cost is itemized on the bill for the commodities purchased by the Government.) Includes:

Freight and express - Charges by common carrier and contract carrier, including freight and express, demurrage, switching, recrating, refrigerating, and other incidental expenses.

Trucking and other local transportation - Charges for hauling, handling, and other services incident to local transportation, including contractual transfers of supplies and equipment.

Mail transportation - Postage used in parcel post and charges for express package services (that is, charges for transporting freight). (It excludes other postage and charges that are classified under object class 23.3.)

Transportation of household goods related to permanent change of station (PCS) travel - Payments to Federal employees for transportation of household goods and effects or house trailers instead of payment of actual expenses when payment is for transfer of personnel from 1 official station to another. Charges for other PCS expenses are classified under object class 12.1, 12.2, 21.0, or 25.0, as appropriate.

23.0 Rent, Communications, and Utilities

Charges for possession and use of land, structures, or equipment owned by others and charges for communication and utility services. Excludes charges for rental of transportation equipment, which are classified under object class 21.0 or 22.0. (See object classes 23.1 through 23.3.).

23.1 Rental Payments to GSA

Direct obligations for rental of space and rent related services assessed by the General Services Administration (GSA) as rent, formerly known as standard level user charges (SLUC). Excludes charges for related services provided by GSA in addition to services provided under rental payments, such as extra protection, extra cleaning, or extra alterations, which are classified under object class 25.

23.2 Rental payments to others

Obligations for possession and use of space, land, and structures leased from a non-Federal source. Rental payments to agencies other than GSA for space, land, and structures that are subleased or occupied by permits regardless of whether the space is owned or leased will be classified under object class 25.0.

23.3 Communications, utilities, and miscellaneous charges

Includes:

ADP and communication services and rentals - Obligations for the transmission of messages or data, such as land telegraph service, marine cable service, radio and wireless telegraph service, electronic data transmission service, and telephone and teletype service; postage (excluding parcel post and express mail service for freight); contractual mail (including express mail service for letters) or messenger service; and rental of post office boxes, postage meter machines, mailing machines and teletype equipment. Includes charges for the rental of ADP and telecommunications equipment. (Charges for maintenance to ADP and telecommunications equipment and related training and technical assistance, when significant and readily identifiable in the contract or billing, shall be classified under object class 25.0. Contractual services involving the use of equipment in the possession of others, such as computer time-sharing, shall also be classified under object class 25.0).

Utility services - Obligations for heat, light, power, water, gas, electricity, and other utility services.

Miscellaneous charges - Periodic charges under purchase rental agreements for equipment. (Payments subsequent to the acquisition of title to the equipment should be classified under object class 31.0.) Excludes payments under lease-purchase contracts for construction of buildings, which are classified under object class 32.0 or 43.0, and for ADP and telecommunications equipment, which are classified under object class 31.0.

24.0 Printing and reproduction

Obligations for contractual printing and reproduction (including photocomposition, photography, blueprinting, photostating, and microfilming), and the related composition and binding operations performed by the Government Printing Office, other agencies or other units of the same agency (on a reimbursable basis), and commercial printers or photographers. Includes all common processes of duplicating obtained on a contractual or reimbursable basis. Also includes standard forms when specially printed or assembled to order and printed envelopes and letterheads.

Note: This object class consists of both printing and binding as defined in the Government Printing and Binding regulations issued by the Joint Committee on Printing and reproduction of the type that does not come within the Joint Committee's definition. In determining subclasses for administrative use, DoD Components may appropriately maintain such a distinction.

25.0 Other services

Obligations for contractual services not otherwise classified. Supplies and materials furnished by the contractor in connection with such services are included even though they may be separately itemized on the voucher. Excludes obligations for services in connection with the initial installation of equipment, when performed by the vendor, which are classified under object class 31.0. Includes:

Repairs and alterations - Obligations for repairs and alterations to buildings, bridges, viaducts, vessels, equipment, and like items, when done by contract.

Storage and maintenance - Obligations for contractual services for storage and care of vehicles and storage of household goods, including those associated with a permanent change of station (PCS). Obligations for other PCS expenses are classified under object class 12.1, 12.2, 21.0, or 22.0.

Subsistence and support of persons - Obligations incurred for contractual services for board, lodging, and care of persons, including hospital care (except travel items, which are classified under object class 21.0).

Typing and stenographic service contracts

Publication of notices, advertising, and radio and television time

Tuition

Fees and other charges - Fees for abstracting land titles, premiums on insurance (other than payments to the Office of Personnel Management), and surety bonds.

Custom software - Obligations for contracts covering development of software of \$25,000 or less. Excludes custom software classified in object class 31.0.

Software and hardware maintenance - Obligations for contracts to maintain software or hardware, including maintenance that is part of a rental contract, when significant and readily identifiable in the contract or billing. Excludes charges for rental of ADP and telecommunications hardware and software, which are classified in object class 23.3.

Operation of facilities or other service contracts

Research and development contracts

26.0 Supplies and materials

Obligations for commodities whether acquired by formal contract or other form of purchase that are: ordinarily consumed or expended within one year after they are put to use; converted in the process of construction or manufacture; or used to form a minor part of equipment or fixed property.

Also includes charges for off-the-shelf software purchases of \$25,000 or less. Also includes charges for off-the-shelf software with a useful life of under 2 years. Other property of little monetary value that does not meet any of these 3 criteria listed above may also be classified as "Supplies and materials" at the option of the agency. Includes:

Office Supplies - Obligations for pencils, paper, calendar pads, stenographic notebooks, standard forms (except when specially printed or assembled to order), unprinted envelopes, other office supplies, and property of little monetary value (such as desk trays, pen sets, and calendar stands).

Publications - Obligations for purchases of or subscriptions to pamphlets, documents, books, newspapers, periodicals, records, cassettes, or other publications whether printed, microfilmed, photocopied, or otherwise recorded for auditory or visual use that are off-the-shelf rather than specially ordered by or at the request of the agency. Excludes publications acquired for permanent collections, which are classified under object class 31.0.

ADP supplies and materials - Obligations for computer and word processing tapes, discs, and manuals. Includes off-the-shelf software purchases and licenses of \$25,000 or less. Excludes off-the-shelf software classified under object class 31.0.

Chemicals, surgical and medical supplies

Fuel - Obligations for fuels used in cooking, heating, generating power, making artificial gas, and operating motor vehicles, trains, aircraft, and vessels.

Clothing and clothing supplies - Obligations for articles of clothing, together with materials and sewing supplies used in manufacture of wearing apparel.

Provisions - Obligations for food and beverages.

Cleaning and toilet supplies

Ammunition and explosives

Materials and parts - Obligations for commodities (including building materials) used in the construction, repair, or production of supplies, equipment, machinery, buildings, and other structures.

30 ACQUISITION OF CAPITAL ASSETS

31.0 Equipment

Obligations for the purchase of personal property of a durable nature; that is, property that normally may be expected to have a period of service of a year or more after being put into use without material impairment of its physical condition. Includes obligations for service in connection with the initial installation of equipment when performed under contract. Excludes off-the-shelf software valued at \$25,000 or less, and supplies and materials classified under object class 26.0. Also excludes fixed equipment that is classified under object class 32.0. This object class may consist of both equipment that is not capitalized (not set up in property accounts) and equipment that is capitalized. In determining subclasses for administrative use, agencies may appropriately maintain

such a distinction. Includes:

Transportation equipment - Obligations for vehicles, including passenger-carrying automobiles, motor trucks, motorcycles, tractors, aircraft, trains, steamships, barges, power launches, and other vessels.

Furniture and fixtures - Obligations for movable furniture, fittings, fixtures, and household equipment. Includes desks, tables, chairs, typewriters, word processing equipment, and calculators.

Publications for permanent collections

Tools and implements

Machinery - Obligations for engines, generators, manufacturing machinery, transformers, ship equipment, pumps, and other production and construction machinery.

Instruments and apparatus - Obligations for surgical instruments, X-ray apparatus, signaling equipment, telephone and telegraph equipment, electronic equipment, scientific instruments and appliances, measuring and weighing instruments and accessories, photographic equipment, picture projection equipment and accessories, and mechanical drafting devices.

ADP and telecommunications equipment - Obligations for hardware, such as central processing units (CPUs), punch card accounting machines, data entry machines, modems, telephone handsets, and personal computers. Also includes purchases of off-the-shelf and custom software of more than \$25,000.

Armaments - Obligations for tanks, armored carriers, tractors, missiles, machine guns, small arms, bayonets, anti-aircraft guns, artillery, searchlights, detectors, fire control apparatus, submarine mine equipment, ammunition hoists, torpedo tubes, and other special and miscellaneous military equipment.

32.0 Land and structures

Obligations for purchase of land, buildings, and other structures, additions to buildings, nonstructural improvements, fixed equipment when acquired under contract (whether an addition or a replacement), and payments for defaulted loan guarantees on loans that have been foreclosed, so that the Federal payment results in the acquisition of a physical asset rather than a loan asset. Includes:

Land - Obligations for the purchase of land and interest in lands, including easements and rights of way.

Buildings and other structures - Obligations for the acquisition or construction of buildings and structures, and additions thereto, when acquired under contract. Includes principal payments under lease-purchase contracts for construction of buildings.

Nonstructural improvements - Obligations for improvements of land, such as landscaping, fences, sewers, wells, and reservoirs, when acquired under contract.

Fixed equipment - Obligations for fixtures and equipment that become permanently attached to a part of buildings or structures, such as elevators, plumbing, power-plant boilers, fire-alarm systems, lighting or heating systems, and air conditioning or refrigerating systems (whether an addition or a replacement), when acquired under contract. Includes amounts for services for the initial installation of fixed equipment when performed under contract.

33.0 Investments and loans

Obligations for the purchase of securities, loans made to others, expenditures in the nature of capital for other funds, and payments for defaulted loan guarantees in those cases where the default has not resulted in foreclosure, so that the Government acquires title to the note rather than title to physical assets. If payment occurs for which there is no asset (property or enforceable notes) so that the payment is a sunk cost, it should be included under object class 42.0. Includes:

Investments in securities - Obligations for the purchase of stocks, bonds, debentures, and other securities (except the par value of U.S. Government securities or securities of wholly-owned government enterprises) in which money is invested either temporarily or permanently. Includes the amounts paid for interest accrued at the time of purchase and premiums paid on all investments, including payments over par value for the purchase of Government securities and discounts under par value on sales of Government securities.

Loans - Loans to foreign governments, States, and other political subdivisions; loans to other Government agencies; and loans to corporations, associations, and individuals.

40 GRANTS AND FIXED CHARGES

41.0 Grants, subsidies, and contributions

Grants (including revenue sharing), subsidies, gratuities, and other aid for which cash payments are made to States, other political subdivisions, corporations, associations, and individuals; contributions to international societies, commissions, proceedings, or projects, whether in lump sum or as quotas of expenses; contributions fixed by treaty; grants to foreign countries; taxes imposed by taxing authorities where the Federal Government has consented to taxation (excluding the employer's share of Federal Insurance Contribution Act taxes); and payments instead of taxes. Includes readjustment and other benefits for veterans, other than indemnities for death and disability.

Note: Obligations under grant programs that involve the furnishing of services, supplies, materials, and the like, rather than cash are not charged to this object class, but to the object class representing the nature of the services, articles, or other items that are purchased.

42.0 Insurance claims and indemnities

Benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. Includes:

Social insurance and retirement - Payments for individuals from trust funds for social security, medicare, unemployment insurance, railroad retirement, Federal civilian retirement, military retirement, and other social insurance and retirement programs.

Other claims or indemnities - Payments to veterans and former civilian employees or their survivors for death or disability, whether service connected or not. Payments of claims and judgments arising from court decisions or abrogation of contracts; indemnities for the destruction of livestock, crops, and the like; damage to or loss of property; and personal injury or death. Includes payments to or for persons displaced as a result of Federal and federally assisted programs, as authorized under 42 U.S.C. 4622-4624. Includes losses made good on Government shipments, and payments on guarantees where no asset is received and where forgiveness is not provided by law.

43.0 Interest and dividends

Payments to creditors for the use of moneys loaned, deposited, overpaid, or otherwise made available and the distribution of earnings to owners of trust or other funds. Includes interest payments under lease-purchase contracts for construction of buildings. If payment of claims under a contract has been delayed by the Government, the interest shall be recorded under the same object class used for the original contract and not in this object class.

44.0 Refunds

Payments made from an appropriation or fund account to refund amounts previously received by the Government to correct errors in computations, erroneous billing, and other factors. Also includes amounts refunded to former employees or their beneficiaries for employee contributions to retirement and disability funds (such as payments made when employees die before retirement or before their annuities equal the amount withheld). In the account receiving the refund, previously recorded obligations will be reduced in the appropriate object class(es) by the amount of the refund.

90 OTHER

The following object classes will be used, as appropriate, when preparing agency budget submissions. They will also be used at other times when such information is requested.

91.0 Unvouchered

Charges that may be incurred lawfully for confidential purposes, not subject to detailed vouchering or reporting, shall be recorded under this object class.

92.0 Undistributed

Charges that cannot be distributed to the object classes listed above. This object class shall be used for reporting purposes only with the prior approval of OMB.

93.0 Limitation on expenses

This object class is used when there is an annual limitation on administrative or nonadministrative expenses for revolving and trust funds. In the object class schedule for the revolving or trust fund, total obligations applicable to the limitation are reported as a lump sum entry without any distribution under object class 93.0. A separate object classification schedule for the limitation will distribute the lump sum obligations reported in the parent schedule in object classes 11.1 through 44.0, as appropriate, with an offsetting negative entry on line 93.0 equal to the total

obligations distributed. No amount will be shown on the subtotal line (99.0) of the separate object classification schedule for the limitation.

99.0 Subtotal, obligations

Subtotal of entries above for direct, reimbursable, or allocation account obligations when more than one of these categories are reported in a single account. The subtotal stub entry for reimbursable obligations, "Reimbursable obligations," should be used, even if all reimbursable obligations are classified in a single object class category.

99.9 Total obligations

This entry will equal the sum of the total obligations for all the object class entries. The amount must equal total obligations as shown on line 10.00 of the program and financing schedule. Only the final total of all obligations should be coded 99.9. Subtotals for schedules containing two or more sections will be coded 99.0 for the individual sections.

CHAPTER 6

DoD COMPTROLLER FINANCIAL MANAGEMENT AWARDS0601 PURPOSE

This chapter provides policy, responsibilities, and procedures for the Comptroller of the Department of Defense Financial Management Awards Program. This program is intended to recognize those individuals or groups in the Department of Defense who have made significant contributions to the improvement of financial management. This guidance also explains eligibility, criteria for nominations, and selection.

0602 APPLICABILITY AND SCOPE

Any DoD military or civilian employee or group who has made a significant contribution to the improvement of a financial management system is eligible for nomination for an award. Also eligible are those individuals or groups who have significantly contributed to a DoD-wide financial management initiative.

0603 POLICY

It is DoD policy that:

A. Military and civilian members who make outstanding contributions to the improvement of DoD financial management should be recognized.

B. Recognition, in the form of an engraved plaque, shall be presented to, and retained by, the individual or group deemed to have achieved the most outstanding contribution(s) to the improvement of a financial management system or initiative during the preceding fiscal year.

C. Award plaques shall be presented to winners in each of the following categories:

1. Financial management system improvement.

2. Financial management initiative.

D. An award shall also be presented to the activity that each award recipient represents.

0604 RESPONSIBILITIES

060401 The Comptroller of the Department of Defense shall:

A. Select award recipients for each award category.

B. Present awards to each recipient in an annual ceremony.

060402 The Deputy Comptroller of the Department of Defense (Management Systems) shall annually convene a Financial Management Awards Program Board to receive nominations from the DoD Components and to make award recommendations to the Comptroller of the Department of Defense.

060403 The Financial Management Awards Program Board shall:

A. Be composed of the Deputy Comptroller Of the Department of Defense (Management Systems) (Chair) with a representative from each of the Military Departments, the Defense Finance and Accounting Service, and a representative from among Defense Agencies. The representative from the Defense Agencies shall be selected by the Director, Washington Headquarters Services.

B. Convene annually to evaluate nominations and make recommendations for winners in each award category.

C. Recommend award winners for each award category based on the criteria in paragraph 0605.

060404 The Secretaries of the Military Departments, the Director of the Defense Finance and Accounting Service, and the Directors of the Other Defense Agencies shall:

A. Each select a representative to the Financial Management Awards Program Board and notify the Deputy Comptroller of the Department of Defense (Management Systems) by March 1, each year, of the representative selected from their DoD Component. The Director of the Washington Headquarters Services shall appoint a representative of the Defense Agencies (other than the Defense Finance and Accounting Service) from among nominees selected by the Directors of the applicable Defense Agencies.

B. Each year, nominate individuals for the Financial Management Award in accordance with the procedures and criteria in paragraph 0605.

0605 DoD FINANCIAL MANAGEMENT AWARD CRITERIA AND PROCEDURES

The procedures and criteria for the DoD Financial Management Award are as follows:

060501 Award Criteria.

A. Nominations for DoD Financial Management Awards shall be based on the individual's achievements during the immediately preceding fiscal year and evaluated on the nominee's:

1. Success in meeting assigned financial management goals.
2. Implementation of initiatives resulting in a superior improvement in the quality of financial management.
3. Other outstanding services or significant contributions to the DoD Financial Management Program.

060502 Nomination Format.

A. The narrative should be on standard letter size (8-1/2x11) paper with one inch margins. The heading of the narrative should be:

NOMINATION OF (Insert Nominee Name),
For the Fiscal Year (Insert Fiscal Year) Financial Management Award, For (Insert Award Category)

The initial paragraph should state the name of the financial management system or initiative to which the contribution was made.

The succeeding paragraphs of the narrative should contain a description of the achievement and its value to the Department of Defense. The last paragraph of the narrative should contain a proposed citation. The nominating official should sign at the bottom.

B. Included with the nomination, on a separate page, should be the following:

1. Name, rank or grade, duty title, office mailing address, and telephone number of the nominee.
2. Name and members of group if a group is nominated for the award.
3. Name of the activity to which the nominee is assigned.
4. Name and telephone number of the official to be contacted for further information.
5. Name, rank or grade, duty title, office mailing address, and telephone number of the nomination official. The nominating official shall sign and date the nomination.

060503 Submission of Nominations.

Heads of DoD Components shall submit nominations to the Deputy Comptroller (Management Systems), Office of the Comptroller of the Department of Defense, Room 3E825, the Pentagon, Washington, DC 20301--1100, so as to be received by the last workday in March of each year.

0606 AWARDS

The awards shall consist of an engraved plaque for each winning individual or group. There shall also be an award for each individuals assigned activity.

CHAPTER 7

DEPARTMENT OF DEFENSE STANDARD GENERAL LEDGER

0701 PURPOSE. This chapter prescribes the Department of Defense (DoD) Uniform Chart of Accounts that is required for use in the accounting systems of the Department.

0702 GENERAL.

A. The DoD Uniform Chart of Accounts provides the basic structure of the DoD Standard General Ledger. The DoD Standard General Ledger is based upon the U.S. Government Standard General Ledger. The DoD Standard General Ledger incorporates proprietary and budgetary accounts. Both the proprietary and budgetary accounts are self-balancing within themselves. The budgetary accounts are further divided into accounts applicable to three organizational levels within the DoD. The three levels are (1) Departmental level, (2) Intermediate Command level and (3) Installation level. Budgetary accounts applicable to each of the three levels must be self-balancing within that level. Since installation level budgetary accounts are used to record budget execution transactions, they are not limited for use at an installation and may be used at any, or all, DoD organizational levels.

B. Summary and posting accounts have been provided and are so designated in the DoD Uniform Chart of Accounts and associated account descriptions. A summary account is an account that has been subdivided into subsidiary posting accounts. Accounts that are not further subdivided are posting accounts. Postings should not be made to summary accounts.

0703 INTERNAL CONTROL STANDARDS. The objectives of internal controls are to reasonably assure that (1) obligations and costs comply with applicable law; (2) assets are safeguarded against waste, loss, unauthorized use, and misappropriation; (3) revenues and expenditures are recorded and accounted for properly so that accounts and reliable financial reports may be prepared and accountability of assets may be

maintained. Specific internal control standards to achieve these objectives are:

A. Documentation. Internal control systems and all transactions and significant events are to be documented clearly and the documentation is to be available for examination.

B. Recording of Transactions and Events. Transactions and significant events are to be recorded promptly and classified properly.

C. Execution of Transactions and Events. Transactions and significant events are to be authorized and executed only by persons acting within the scope of their authority.

D. Separation of Duties. Key duties and responsibilities in authorizing, processing, recording, and reviewing transactions should be separated among individuals.

E. Supervision. Qualified and continuous supervision is to be provided to ensure that internal control objectives are achieved.

G. Access to and Accountability for Resources. Access to resources and records is to be limited to authorized individuals. Accountability for the custody and use of resources is to be assigned and maintained. Periodic comparison shall be made of the resources with the recorded accountability to determine whether the two agree. The frequency of the comparison shall be a function of the vulnerability of the asset.

0704 APPLICABILITY AND SCOPE.

A. The DoD Uniform Chart of Accounts is applicable to all DoD accounting systems for all appropriations and funds.

B. A four digit account numbering system has been provided. In some instances, the numbering system has been expanded to accommodate specific DoD needs. The DoD Compo-

nents may expand this numbering system to as many alpha/numeric characters as are needed to accommodate specific DoD Component subsidiary accounts, provided such expansions continue to roll up to the basic account structure provided. The basic structure of the DoD Uniform Chart of Accounts consists of:

Proprietary Accounts

- 1000 Assets
- 2000 Liabilities
- 3000 Equity of the U.S. Government
- 5000 Revenue
- 6000 Expense
- 7000 Gains/Losses/Extraordinary Items, etc.

Budgetary Accounts

- 4000 Budgetary

0705 BASIC CONCEPT.

A. All resources acquired and used, and claims against those resources, are to be recorded on the basis of financial transactions (that is, recordation of amounts in general ledger accounts shall be transaction driven).

B. The DoD Standard General Ledger shall be used regardless of the sources of funds. However, fund identification of financial resources shall be maintained in order to (1) disclose compliance with financial authorizations and (2) prepare reports on the status of appropriations and funds for the Congress, the Office of Management and Budget, and the Treasury Department.

C. The DoD Standard General Ledger account structure is intended as the minimum structure required to assure consistent treatment of similar transactions. Additional subsidiary accounts may be established as needed to meet specific management requirements. However, the prescribed accounts shall be used as general ledger control accounts. Structures that are "similar," whether more or less detailed, are not authorized for use. Not all accounts are needed by all accounting entities.

D. The DoD Standard General Ledger account structure shall be used to record all of the series of events that occur from the time an appropriation is received until the resources acquired are used or disposed. A self-balancing set of budgetary accounts covers the appropriation, apportionment, allocation, commitment, obligation and expenditure process. Proprietary asset and liability accounts cover the receipt of funds in the Treasury, the proper classification of assets (such as receivables, prepayment, inventory and fixed assets), and the recognition and proper classification of liabilities. Revenue and expense accounts measure the realization of revenues from the sale of goods and services, and the recognition of costs through the use and consumption of assets. The financial control provided through accounting records for property provides managers with a tool that will help to discharge effectively their stewardship function for those resources.

E. The DoD Standard General Ledger account structure also facilitates the accumulation and recording of expenses by major areas of responsibility or activity. By having a single general ledger, expenses incurred by a DoD entity for any given activity for which it is responsible, and the associated revenues, if any, can be ascertained by managers with confidence that the accounting is complete and controlled. This will be possible regardless of the appropriation or fund that originally financed the cost and without the need for memorandum accounting records. Consistency in the accounting treatment of similar transactions, through the use of a uniform structure, creates reliable cost data for planning, budgeting and other management purposes.

0706 OBJECTIVES.

The objectives of the DoD Standard General Ledger are to:

A. Establish an account structure for the integration of appropriation or fund accounting, property accounting, revenue accounting and expense accounting.

B. Provide managers with the visibility over accurate and complete financial data, in-

cluding total operating expenses and total acquisition cost of real and personal property.

C. Achieve a uniform treatment of similar transactions by all DoD Components at all levels.

D. Establish accounting control over all resources from receipt to consumption or disposal.

E. Provide the capability of producing significant expense and cost information concerning programs, projects and other activities in accordance with internal management needs.

F. Provide appropriation and fund data needed to meet reporting requirements of the central fiscal agencies and the Chief Financial Officers Act of 1990, as well as to provide such other financial data as may be needed for internal and external reporting requirements.

G. Facilitate the development of future accounting improvements.

H. Assure compliance with the Office of Management and Budget pronouncements including those developed by the Federal Accounting Standards Advisory Board; DoD accounting policies and standards set forth in this Regulation; and other applicable regulations promulgated by the central fiscal agencies.

0707 BUDGETARY AND PROPRIETARY ACCOUNTING RELATIONSHIPS.

Figure 7-1 illustrates the following budgetary and proprietary accounting relationships.

A. An entry to record budget authority (vice budgetary resources) in budgetary accounts requires a corresponding entry to record funds with Treasury in proprietary accounts.

B. An entry to record accrued expenditures unpaid in budgetary accounts requires a corresponding entry to record accounts payable in proprietary accounts.

C. An entry to record accrued expenditures paid in budgetary accounts requires a corresponding entry to record funds disbursed in proprietary accounts.

D. An entry to record reimbursements earned but unpaid in budgetary accounts requires a corresponding entry to record accounts receivable in proprietary accounts.

E. An entry to record reimbursements earned and paid in budgetary accounts requires a corresponding entry to record funds collected in proprietary accounts.

F. An entry to record refunds due-accrued expenditures in budgetary accounts requires a corresponding entry to record refunds receivable in proprietary accounts.

0708 DoD UNIFORM CHART OF ACCOUNTS. A listing of the approved DoD Uniform Chart of Accounts for use within the Department is at Addendum 1. A description of the accounts is at Addendum 2. Accounts that are underlined in Addendum 1 are summary level accounts.

ADDENDUM 2
DEPARTMENT OF DEFENSE ACCOUNT/SUB-ACCOUNT DESCRIPTIONS

1000 Assets. Debit Balance. This is a summary account. No transactions should be posted to this account. These accounts represent amounts of physical (tangible) items or rights to ownership (intangible) owned or controlled by the Department of Defense.

1010 Fund Balance with Treasury. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the net funds available to the Department of Defense (DoD) from appropriations, reappropriations, continuing resolutions, advances, transfers in, allocations, reimbursements less rescissions, transfers out and disbursements.

1011 Funds Collected. Debit Balance. This is a summary account for Defense Business Operations Fund activities. For other activities, it is a posting account. Represents the funds received due to advances from outside sources, performance of reimbursable work, collection of receivables, sale of assets, etc. This account is subsidiary to Fund Balance with Treasury. Sub-accounts shall be maintained for each appropriation or fund.

1011.1 Funds Collected-Operating-Defense Business Operations Fund. Debit Balance. This account is used to record funds collected due to advances from outside sources, performance of reimbursable work, collection of receivables, sale of assets, and any other source other than Defense Business Operations Fund surcharge collections that are to be recorded to Subsidiary Accounts 1011.2, 1011.3 and 1011.4.

1011.2 Funds Collected-Capital Asset-Defense Business Operations Fund. Debit Balance. This account is used to record funds collected through Capital Asset surcharges included in billing rates of a business area (other than surcharges for depreciation and Military Construction (MILCON)) that are to be recorded in Subsidiary Accounts 1011.3 and 1011.4.

1011.3 Funds Collected-Depreciation-Defense Business Operations Fund. Debit Balance. This account is used to record funds collected through approved depreciation surcharges included in billing rates of a business area.

1011.4 Funds Collected-MILCON-Defense Business Operations Fund. Debit Balance. This account is used to record funds collected through approved surcharges for military construction included in the billing rates of a business area.

1012 Funds Disbursed. Credit Balance. This is a summary account for Defense Business Operations Fund activities. For other activities, it is a posting account. Represents the amount of payments made (net of refunds, erroneous payments and returns of advances) from a DoD appropriation or fund account. This account is subsidiary to Fund Balance with Treasury. Sub-accounts shall be maintained for each appropriation or fund.

1012.1 Funds Disbursed-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record disbursements made (net of refunds, erroneous payments and returns of advances) other than Defense Business Operations Fund capital disbursements (which are to be recorded to Subsidiary Account 1012.2).

1012.2 Funds Disbursed-Capital-Defense Business Operations Fund. Credit Balance. This account is used to record disbursements made for the acquisition of Capital Assets.

1013 Funds with Treasury. Debit Balance. Represents the fund balances on the books of the U.S. Treasury. The account is increased for funds made available by appropriations, reappropriation, continuing resolution, transfers in and allocations. The account is decreased for rescissions and transfers out. Sub-accounts shall be maintained for each appropriation or fund.

1014 Undistributed Collections. Credit Balance. Represents the amount of collections reported by the finance network which have not been accepted by the operating level accounting entity. Sub-accounts shall be maintained for each appropriation or fund.

1015 Undistributed Disbursements. Credit Balance. Represents the amount of disbursements as reported by the finance network which have not been accepted by the operating level accounting entity. Sub-accounts shall be maintained for each appropriation or fund.

1100 Cash. Debit Balance. This account is a summary account. Transactions should not be posted to this account. Represents the net funds available to DoD that are not yet deposited in the U.S. Treasury or are not considered an asset of a DoD Component.

1110 Undeposited Collections. Debit Balance. Represents amounts received for which a deposit confirmation has not been issued by the U.S. Treasury. This account is supported by an Agency cashier's record of collection. Sub-accounts shall be maintained for each appropriation, fund or receipt account.

1120 Imprest Funds. Debit Balance. Represents the authorized amount of cash advanced by disbursing officers and held by Agency cashiers at personal risk.

1190 Other Cash. Debit Balance. This account is a summary account. No transactions should be posted to this account. Currently, only a single subsidiary account (Account 1191) has been established. Additional subsidiary accounts that are not more appropriate to other cash accounts may be established as necessary for local and unique needs.

1191 Disbursing Officers' Cash. Debit Balance. Represents the authorized amount of U.S. Treasury cash held by disbursing officers at personal risk. It includes U.S. currency and coin on-hand, dollar equivalent of foreign currency and coin on-hand, cash in the hands of deputy disbursing officers, cashiers and agents, negotiable instruments on hand, military payment certificates, etc. A liability account for the total amount advanced by the U.S. Treasury shall be maintained.

1200 Foreign Currency. Debit Balance. Represents the U.S. dollar equivalent of foreign currency and other transactions occurring through use of the foreign currency.

1300 Receivables-Net. Debit Balance. This is a summary account. No transactions should be posted to this account.

1310 Accounts Receivable. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents amounts due from others when the right to receive funds accrues, which may result from the performance of services; delivery of goods; or, as in the case of interest income, the passage of time.

1311 Accounts Receivable-Government-Current. Debit Balance. Represents current amounts due from intrabudgetary Federal Agencies or funds. It also includes amounts due from Federal sources that are deposited into Treasury general fund receipt accounts when collected. Sub-accounts will be maintained for each appropriation, fund or receipt account.

1312 Accounts Receivable-Government-Noncurrent. Debit Balance. Represents noncurrent amounts due from intrabudgetary Federal Agencies or funds. It also includes amounts due from Federal sources that are deposited into Treasury general fund receipt accounts when collected. Sub-accounts will be maintained for each appropriation, fund or receipt account.

1313 Accounts Receivable-Public-Current. Debit Balance. Represents current amounts due from non-federal governmental organizations, commercial vendors, nonintrabudgetary transactions with Nonappropriated Fund Instrumentalities (NAFIs) and private parties. It also includes amounts from public sources that will be deposited into Treasury general fund receipt accounts when collected. Sub-accounts will be maintained for each appropriation, fund or receipt account.

1314 Accounts Receivable-Public-Noncurrent. Debit Balance. Represents noncurrent amounts due from non-federal governmental organizations, commercial vendors, nonintrabudgetary transactions with NAFIs and private parties. It also includes amounts from public sources that will be deposited into Treasury general fund receipt accounts when collected. Sub-accounts will be maintained for each appropriation, fund or receipt account.

1315 Refunds Receivable-Government. Debit Balance. Represents amounts of refunds due from intrabudgetary Federal Agencies or funds resulting from erroneous payments. Sub-accounts will be maintained for each appropriation or fund.

1316 Refunds Receivable-Public. Debit Balance. Represents amounts of refunds due from non-federal governmental organizations, commercial vendors and private parties resulting from erroneous payments and unliquidated advances. Sub-accounts will be maintained for each appropriation or fund.

1319 Allowance for Loss on Accounts Receivable. Credit Balance. Represents the estimated amount of uncollectible accounts and refunds receivable. Sub-accounts will be maintained for each appropriation or fund.

1320 Claims Receivable-Public. Debit Balance. Represents amounts due from (a) commercial carriers for damages to, and losses in, shipments occurring through the fault of the carrier; (b) vendors as a result of shortages or damages to shipments occurring through the fault of the vendor; (c) individuals held pecuniarily liable by report of survey for loss, damage or destruction of property; and (d) other claims. Sub-accounts will be maintained for each appropriation or fund.

1350 Loans Receivable. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the outstanding principal amounts due under lending and other programs. Includes the principal value of loans. Sub-accounts will be maintained for each appropriation or fund.

1351 Loans Receivable-Government-Current. Debit Balance. Represents the current outstanding principal amounts due from other Federal sources under lending and other programs. Sub-accounts will be maintained for each appropriation or fund. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1352 Loans Receivable-Government-Noncurrent. Debit Balance. Represents the noncurrent outstanding principal amounts due from other Federal sources under lending and other programs. Sub-accounts will be maintained for each appropriation or fund.

1353 Loans Receivable-Public-Current. Debit Balance. Represents the current outstanding principal amounts due from public sources under lending and other programs. Includes the principal value of mortgages that Federal Housing Authority (FHA) assumes under the Homeowners Assistance Program

and amounts of loans acquired under Defense Production Guarantees. Sub-accounts will be maintained for each appropriation or fund.

1354 Loans Receivable-Public-Noncurrent. Debit Balance. Represents the noncurrent outstanding principal amounts due from public sources under lending and other programs. Includes the principal value of mortgages that FHA assumes under the Homeowners Assistance Program and amounts of loans acquired under Defense Production Guarantees. Sub-accounts will be maintained for each appropriation or fund.

1359 Allowance for Loss on Loans Receivable. Credit Balance. Represents the estimated amount of uncollectible loans receivable. Sub-accounts will be maintained for each appropriation or fund.

1400 Advances and Prepayments. Debit Balance. This account is a summary account. No transactions should be posted to this account. The outstanding balance of amounts advanced to Federal and non-federal entities by DoD and prepayments made for future receipt of goods, services or other assets.

1410 Advances to Others. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the amount of payments made in contemplation of the future performance of services, receipt of goods, incurrence of expenditures or other assets.

1411 Travel Advances. Debit Balance. Represents the outstanding balance of advances made to military personnel, civilian employees and appointees for per diem, transportation and related expenses incidental to travel on official business or change of official duty station.

1412 Advances to Contractors and Suppliers. Debit Balance. Represents the outstanding balance of amounts advanced to organizations or individuals outside the U.S. Government under contracts for goods and services.

1413 Advances to Grantees. Debit Balance. Represents the outstanding balance of advances issued to grantees.

1414 Advances-All Others-Public. Debit Balance. Represents the outstanding balance of other amounts advanced to the public including personnel of foreign nations.

1415 Advances to Government Agencies and Funds. Debit Balance. Represents the outstanding balance of other advances made to U.S. Government organizations and funds.

1450 Prepayments. Debit Balance. This is a summary account used. No transactions should be posted to this account. Represents the amount of expenditures which provide future benefits. Prepayments are often recurrent in nature and cover items such as rent, taxes, royalties, commissions, insurance and supplies.

1451 Prepaid Expenses. Debit Balance. Expenditures which provide future benefits. Prepaid expenses are often recurrent in nature and cover items such as rent, taxes, royalties, commissions, insurance, and supplies.

1452 Progress Payments Made to Others. Debit Balance. Expenditures for assets in advance of their receipt.

1500 Inventories-Net. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the value of items or products held by the DoD.

1510 Inventory for Agency Operations. Debit Balance. Represents the acquisition cost of all items or products used by the DoD that have not been issued for use. This account is to be supported by subsidiary accounts for major classifications of supplies and material to support reporting requirements. Excluded from this account are equipment items not in use.

1519 Allowance for Loss on Inventory for Agency Operations. Credit Balance. The estimated amount of loss of inventory due to breakage, spoilage, obsolescence, etc.

1520 Inventory for Sale. Debit Balance. Represents the cost of acquired inventory on hand and for sale. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1529 Allowance for Loss on Inventory for Sale. Credit Balance. Represents the estimated amount of loss of inventory due to breakage, spoilage, obsolescence, etc.

1530 Inventory-Raw Material and Supplies. Debit Balance. Represents the cost of raw material and supplies used in production or manufacturing, less the cost of material and supplies issued or otherwise disposed of.

1539 Allowance for Loss on Inventory-Raw Material and Supplies. Credit Balance. Represents the estimated amount of loss of inventory due to breakage, spoilage, obsolescence, etc.

1540 Inventory-Work in Process. Debit Balance. This account is a summary account. No transaction should be posted to this account. Represents the cost of work in process, accumulated costs of materials, labor and overhead.

1541 Inventory-Work in Process-In House. Debit Balance. Represents the value of work in process performed by DoD personnel. This account is supported by subsidiary accounts for each project.

1542 Inventory-Work in Process-Contractor. Debit Balance. Represents the value of completed work in process reported by contractors. This account is supported by subsidiary accounts for each contractor and each contract.

1543 Inventory-Work in Process-Other Government Activities. Debit Balance. Represents the value of completed work in process reported as completed by other Federal Agencies. This account shall be supported by subsidiary accounts for each government activity and each contract.

1544 Inventory-Work in Process-Government Furnished Material. Debit Balance. Represents the value of property furnished by the DoD to contractors for inclusion in, or fabrication of, an end item. This account shall be supported by subsidiary accounts for each contractor and each contract awarded to each contractor.

1545 Customer Work in Progress-Capital-Defense Business Operations Fund. Debit Balance. This account is used to accumulate the cost of all capital assets developed or manufactured for other Defense Business Operations Fund activities.

1549 Allowance for Loss on Inventory-Work in Process. Credit Balance. Represents the estimated amount of loss due to break- age, spoilage, obsolescence, etc.

1550 Inventory-Finished Goods. Debit Balance. Represents the cost of manufactured finished goods available for sale that are transferred from work in process. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1559 Allowance for Loss on Inventory-Finished Goods. Credit Balance. The estimated amount of loss of inventory due to spoilage, obsolescence, etc. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1560 Other Inventory. Debit Balance. The value of inventory not otherwise classified. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1569 Allowance for Loss on Other Inventory. Credit Balance. The estimated amount of loss of other inventory due to breakage, spoilage, obsolescence, etc. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1570 Stockpiled Material and Supplies. Debit Balance. Represents the value of war material held in reserve or stockpiles.

1579 Allowance for Loss on Stockpiled Material and Supplies. Credit Balance. Estimated amount of loss of stockpiled material and supplies due to breakage, spoilage and obsolescence.

1580 Inventory in Transit. Debit Balance. Represents the value of inventory which has not been received and accepted. The account is supported by subsidiary accounts established to meet local reporting and management needs.

1600 Investments-Net. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the value of securities and other assets held for the production of revenues in the form of interest, dividends, rentals or lease payments, net of premiums and discounts.

1610 Securities-At Par. Debit Balance. The par value of securities held by DoD Components.

1611 Securities-Unamortized Premium or Discount. Debit or Credit Balance. The unamortized amount of premiums or discounts on securities.

1690 Other Investments. Debit Balance. Stocks and bonds held by DoD Components. (This account shall not be used without specific approval by the Office of the DoD Comptroller.)

1700 Fixed Assets-Net. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the current book value of real and personal property in accordance with the DoD capitalization criteria.

1710 Land. Debit Balance. Represents the cost or appraised value of land owned by DoD.

1720 Construction In Progress. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the value of real property construction in progress on DoD real property facilities.

1721 Construction In Progress-In House. Debit Balance. Represents the accumulated costs of real property construction in progress performed by DoD personnel.

1722 Construction In Progress-Contractor. Debit Balance. Represents the value of progress payments to contractors.

1723 Construction In Progress-Other Government Activities. Debit Balance. Represents the value of construction undertaken for the DoD by other Federal Agencies.

1724 Construction In Progress-Government Furnished Material. Debit Balance. Represents the value of government furnished material provided contractors for inclusion in DoD construction projects.

1725 Construction In Progress-Capital-Defense Business Operations Fund. Debit Balance. This account is for use by the Defense Business Operations Fund to accumulate the cost of all capital assets developed or manufactured for use by the performing business area activity.

1730 Buildings. Debit Balance. Represents the acquisition costs of DoD-owned buildings.

1739 Accumulated Depreciation on Buildings. Credit Balance. Represents accumulated depreciation on buildings.

1740 Other Structures and Facilities. Debit Balance. Represents the acquisition cost of DoD-owned structures and facilities other than buildings, utilities and ground improvements. Includes runways, bridges, port facilities, railroad tracks, etc.

1749 Allowance For Depreciation on Other Structures and Facilities. Credit Balance. Represents the amount of accumulated depreciation charged to expense for structures and facilities.

1750 Equipment. Debit Balance. Represents the amount of tangible items of a durable nature (other than identified in account 1760) used in DoD operations that meet the DoD capitalization criteria, including, but not limited to, items such as machinery, personal computers, calculators, copiers, machinery, automotive equipment and Automated Data Processing (ADP) equipment (excluding ADP software).

1759 Accumulated Depreciation on Equipment. Credit Balance. Represents the amount of accumulated depreciation charged to expense for equipment.

1760 Military Equipment. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents all categories of combat-type equipment such as ships, aircraft and other military hardware. Subsidiary accounts shall be established by major weapons classifications and to meet reporting requirements. Military equipment shall not be depreciated. Non-military equipment should be recorded to account 1750.

1761 Industrial Property in Layaway. Debit Balance. Represents the capitalized value of DoD property that is stored for future use in meeting mobilization purposes.

1762 Equipment in Use. Debit Balance. Represents the acquisition cost of equipment placed in use.

1763 Equipment with Contractors, Testing Agencies, Defense Industrial Facilities and Others. Debit Balance. Represents the value of equipment furnished to contractors (including other Federal Agencies, testing agencies, defense industrial facilities and others) for use in providing services or items to the DoD.

1764 Equipment on Loan. Debit Balance. Represents the value of DoD equipment loaned to others.

1765 Property Awaiting Disposal. Debit Balance. Represents the capitalized value of property designated for disposal, recovery or utilization.

1766 Equipment Not in Use. Debit Balance. Represents the acquisition value of equipment not in use. Includes costs of any additions, modifications, improvements and rehabilitation.

1769 Accumulated Depreciation on Military Equipment. Credit Balance. Represents the amount of accumulated depreciation charged to expense for military equipment.

1770 Equipment in Transit. Debit Balance. Represents the acquisition cost of equipment in transit.

1800 Other Fixed Assets. Debit Balance. This is a summary account. No transactions should be posted to this account. These accounts represent the amounts and value of fixed assets other than land, construction in progress, buildings, other structures and facilities, equipment, military equipment and equipment in transit.

1810 Assets Under Capital Lease. Debit Balance. Represents the capitalized value of assets being leased under terms which are essentially equivalent to an installment purchase.

1819 Accumulated Depreciation on Assets under Capital Leases. Credit Balance. Represents the amount of accumulated depreciation charged to expense for assets under capital leases.

1820 Leasehold Improvements. Debit Balance. Represents the capitalized value of improvements made to leased property.

1829 Accumulated Amortization on Leasehold Improvements. Credit Balance. Represents the accumulated amortization charged to expense for leasehold improvements.

1830 Automated Data Processing Software. Debit Balance. Represents the value of automated data processing software meeting the DoD capitalization criteria.

1839 Accumulated Amortization on Automated Data Processing Software. Credit Balance. Represents the accumulated amortization charged to expense for automated data processing software.

1840 Other Natural Resources. Debit Balance. Represents the cost or appraised value of natural resources on land owned by DoD.

1849 Allowance for Depletion. Credit Balance. Represents the accumulated amount charged to depletion expense.

1890 Other Fixed Assets. Debit Balance. Includes the value of fixed assets not otherwise classified above such as statues, monuments and artwork. (Do not use this account without specific approval from the Office of the DoD Comptroller.)

1900 Other Assets-Net. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the value of assets not specified in specific fixed asset accounts.

1910 Acquired Collateral. Debit Balance. Represents the value of property obtained by DoD as collateral to defaulted loans.

1919 Allowance for Loss on Acquired Collateral. Credit Balance. Represents the estimated amount of future losses pertaining to the net investment of property acquired through loan default.

1920 Unrequisitioned Authorized Appropriations. Debit Balance. Represents the amount of unrequisitioned disbursing authority as provided for in liquidating cash authority granted by the Congress.

1990 Other Assets. Debit Balance. Represents the value of assets not otherwise classifiable to a specific asset account.

1991 Intangible Assets. Debit Balance. This account is used to record amortizable investments of \$15,000 or more; with projected payback periods; with economic value but no physical substance; with an estimated useful life of 2 or more years; and with no useful value at the end of the estimated life.

1992 Accumulated Amortization on Intangible Assets. Credit Balance. This account is used to accumulate amortization expenses charged for intangible assets.

2000 Liabilities. Credit Balance. This account is a summary account. No transactions should be posted to this account. Represents amounts owed by DoD Components for items received, services received, expenses incurred, assets acquired, construction performed, and amounts received but not earned.

2100 Accrued Liabilities-Other. Credit Balance. This account is a summary account. No transactions should be posted to this account. Represents the amounts DoD Components owe for goods and other property ordered and received, and for services received by other than employees.

2110 Accounts Payable. Credit Balance. This account is a summary account. No transactions should be posted to this account. Represents amounts owed to Federal or non-federal entities for goods and property ordered and received, and for services rendered by organizations and people other than employees.

2111 Accounts Payable-Government-Current. Credit Balance. Represents amounts owed to Federal Agencies based on actual receipt of goods and services.

2112 Accounts Payable-Government-Noncurrent. Credit Balance. Represents amounts owed to Federal Agencies or funds that will not be paid within 1 year.

2113 Accounts Payable-Public-Current. Credit Balance. Represents amounts owed to non-federal agencies for receipt of goods or services.

2114 Accounts Payable-Public-Noncurrent. Credit Balance. Represents amounts owed to non-federal agencies that will not be paid within 1 year.

2115 Claims Payable. Credit Balance. Represents amounts owed based on adjudicated claims.

2120 Disbursements in Transit. Credit Balance. Represents payments transmitted to a disbursing office by an accounting activity, which have not been processed by the disbursing office. (Do not use this account without specific approval from the Office of the DoD Comptroller.)

2130 Contract Holdback. Credit Balance. Represents amounts withheld from contractors and grantees in accordance with contract provisions.

2140 Accrued Interest Payable. Credit Balance. Represents unpaid accrued interest on borrowings and overdue accounts. (Do not use this account without specific approval from the Office of the DoD Comptroller.)

2190 Other Accrued Liabilities. Credit Balance. Represents those amounts owed that cannot be classified to a specific accounts payable account. (Do not use this account without prior approval from the Office of the DoD Comptroller.)

2200 Accrued Liabilities-Payroll and Benefits. Credit Balance. This is a summary account. No transactions should be posted to this account. Reflects accrued funded payroll and benefits and accrued unfunded annual leave.

2210 Accrued Funded Payroll and Benefits. Credit Balance. This is a summary account. No transactions should be posted to this account. Reflects the estimated liability for salaries and wages of civilians that have been earned, but are unpaid, and amounts of funded annual leave, sick leave, and other employee benefits that have been earned, but unpaid.

2211 Accrued Payroll-Civilian. Credit Balance. Represents the amount of the estimated liability for civilian employee funded compensation earned, but unpaid as of the end of the current accounting period.

2212 Accrued Payroll-Military. Credit Balance. Represents the amount of the estimated liability for military personnel- funded compensation earned, but unpaid as of the end of the current accounting period.

2213 Accrued Payroll-Civilian-Employer Share of Fringe Benefits. Credit Balance. Represents the amount of the estimated liability for currently employed civilian employee benefits earned and funded, but unpaid as of the end of the current accounting period.

2214 Accrued Payroll-Military-Employer Share of Fringe Benefits. Credit Balance. Represents the amount of the estimated liability for currently employed military personnel benefits earned and funded, but unpaid as of the end of the current accounting period.

2220 Accrued Unfunded Annual Leave. Credit Balance. This is a summary account. No transactions should be posted to this account. Reflects amounts of annual leave which have been earned and are payable, and are expected to be paid from future years' appropriations.

2221 Accrued Annual Leave-Civilian-Unfunded. Credit Balance. Represents the amount of the unfunded liability for annual leave earned by civilian employees, but not used as of the end of the current accounting period.

2222 Accrued Annual Leave-Military-Unfunded. Credit Balance. Represents the amount of the unfunded liability for annual leave earned by military personnel, but not used as of the end of the current accounting period.

2300 Unearned Revenues (Advances). Credit Balance. This is a summary account. No transactions should be posted to this account. The outstanding balance of amounts advanced or prepaid by Federal and non-federal entities to the DoD and prepayments received for the delivery of goods, services or other assets.

2310 Advances from Others. Credit Balance. This is a summary account. No transactions should be posted to this account. Payments received in contemplation of the future delivery of services, goods, incurrence of expenditures or other assets.

2311 Unearned Revenue-Advances from Government Agencies and Funds. Credit Balance. Represents the outstanding balance of advances received from Federal Agencies' organizations and funds for goods and services to be furnished under the Economy Act, Project Order Law or other legal authority.

2312 Unearned Revenue-Advances from the Public. Credit Balance. Represents the outstanding balance of advances received from sources outside the U.S. Government. This account is supported by subsidiary records giving the details of each advance.

- 2320 Deferred Credits. Credit Balance. Represents revenue received but not earned.
- 2400 Liability for Deposit Funds and Suspense Accounts. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents amounts in deposit funds, Treasury cash advances to disbursing officers, suspense accounts and budget clearing accounts, awaiting disposition or reclassification.
- 2410 Treasury Cash Advances to Disbursing Officers. Credit Balance. Represents the amount of disbursing officers' personal pecuniary liability for cash advanced by the U.S. Treasury.
- 2411 Deposit Fund Liabilities. Credit Balance. Represents the amounts in deposit funds awaiting disposition.
- 2500 Debt. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the DoD liability in the form of notes payable and other borrowing agreements.
- 2510 Borrowing from Treasury. Credit Balance. Represents amounts borrowed from the U.S. Treasury by DoD Components. (Do not use this account without the specific approval from the Office of the DoD Comptroller.)
- 2520 Borrowing from Federal Financing Bank. Credit Balance. Represents amounts borrowed from Federal Financing Banks. (Do not use this account without the specific approval from the Office of the DoD Comptroller.)
- 2530 Securities Issued by Federal Agencies Under Special Financing Authority. Credit Balance. Represents the liability arising from issuing new borrowings authorized under special financing authorities. (Do not use this account without the specific approval from the Office of the DoD Comptroller.)
- 2540 Participation Certificates. Credit Balance. Represents the Department of Defense's share of participation certificates issued pursuant to legislative authority. (DoD Components do not have authority to issue new borrowings authorized under special financing authorities. Use of this account is not authorized.)
- 2590 Other Debt. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents all other forms of DoD obligations, secured and unsecured, not otherwise classified to another liability account.
- 2591 Mortgages Payable-Family Housing. Credit Balance. Represents the liability for outstanding mortgage balances on family housing properties owned by the DoD.
- 2592 Mortgages Payable-Homeowners Assistance Program. Credit Balance. Represents the outstanding balances of mortgages assumed by the DoD on homes acquired under the provisions of the Homeowners Assistance Program.
- 2600 Actuarial Liabilities. Credit Balance. This is a summary account. No transactions should be posted to this account. Reflects the estimated present value of program benefits that will be made in the future that relate to services performed or entitlements due as of the balance sheet date.
- 2610 Retirement Plans. Credit Balance. Reflects the actuarial present value of the accumulated plan benefits of the DoD Military Retirement Fund.

2620 Insurance Plans. Credit Balance. Reflects the actuarial liability for future policy benefits of insurance plans. (Do not use this account without the specific approval from the Office of the DoD Comptroller.)

2690 Other Actuarial Liabilities. Credit Balance. Reflects the actuarial present value of other actuarial plans not classified to other accounts. (Do not use this account without the specific approval from the Office of the DoD Comptroller.)

2900 Other Liabilities. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents amounts not otherwise classified to specific liability accounts.

2910 Prior Liens Outstanding on Acquired Collateral. Credit Balance. Represents the value of liens approved and accepted as being claims against assets acquired through loan defaults.

2920 Contingent Liabilities. Credit Balance. Represents the estimated value of a probable loss.

2990 Other Liabilities. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents liabilities not classified to another 2900 series account.

2991 Capital Leases Payable. Credit Balance. Represents the liability for capital leases which have not expired.

2992 Liability for Property Furnished by Others. Credit Balance. Represents the estimated fair market value of property on hand, which was originally intended to be returned to the entity that furnished it to the DoD, was acquired by seizure or held in trust or escrow.

2993 Accrued Civilian Severance Pay-Unfunded. Credit Balance. Represents the amount of the estimated liability for DoD civilian employee unfunded severance pay accrued as of the end of the current accounting period.

2994 Progress Billings to Others. Credit Balance. Recognizes the liability resulting from progress payments billed to and/or received from Federal and non-federal Agencies for goods or services that have been ordered by those activities, but that have not been completed or delivered.

3000 Equity. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the difference between the assets and liabilities of the DoD.

3100 Appropriated Capital. Credit Balance. Represents net amounts appropriated by Congress.

3200 Invested Capital. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the net investment of the U.S. Government in DoD revolving and trust funds.

3210 Capital Investments. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the initial investment to commence operations, revenues and expenses transferred to this account.

3211 Capital Investment-Defense Business Operations Fund. Credit Balance. This is a summary account to accumulate the total value of Capital Investments recorded in sub-accounts to this account. No transactions should be posted to this account.

3211.1 Appropriations Available. Credit Balance. This account is used to record amounts appropriated or reappropriated to establish or increase the working capital of the Defense Business Operations Fund.

3211.2 Assets Capitalized. Credit Balance. This account is used to (1) record, as an increase, the net book value (acquisition cost less accumulated depreciation) of assets such as materials and supplies, work in process at contractor plants, work in process at other government plants, and contributed assets that were initially recorded to Account 3221.1, "Transfers In from Others Without Reimbursement-Defense Business Operations Fund"; (2) record decreases due to the transfer out, donation, or other disposal of contributed capital assets that were originally recorded to Account 3233, "Transfers Out to Others Without Reimbursement-Defense Business Operations Fund," and Account 3232, "Transfers Out to All Others Without Reimbursement"; and (3) close (when applicable) current year contributed asset unfunded depreciation accounts.

3211.3 Liabilities Assumed. Debit Balance. This account is used to record (1) the sum of the amounts assumed without accompanying payment for accrued annual leave and other liabilities transferred in, and (2) holdbacks on progress billings from contractors at the time of initial capitalization.

3212 (No Account Currently Assigned to this Number.)

3213 Capital Investment-Special Defense Acquisition Trust Fund. Credit Balance. Represents the initial investment and subsequent appropriations to finance program activities.

3214 Capital Investment-Foreign Military Sales Trust Fund. Credit Balance. Represents the initial investment and subsequent appropriations made available to finance program activities. (The implementing legislation did not provide for initial capitalization of the Fund. Accordingly, the balance in this account remains zero at this time.)

3215 Capital Investment-Military Retirement Trust Fund. Credit Balance. Represents amounts appropriated by the Congress to establish the program. (The implementing legislation did not provide for initial capitalization of the Fund. Accordingly, the balance in this account remains zero at this time.)

3216 Capital Investment-DoD Education Benefits Trust Fund. Credit Balance. Represents amounts appropriated by the Congress to establish the program. (The implementing legislation did not provide for initial capitalization of the Fund. Accordingly, the balance in this account remains zero at this time.)

3217 Capital Investment-Other Trust Funds. Credit Balance. Represents the initial investment and any subsequent appropriations made available to finance the programs in the Fund.

3220 Transfers In from Others Without Reimbursement. Debit or Credit Balance. Represents amounts recorded on the transferor's books for an asset or a liability transferred to a DoD Component or other Federal Agency without reimbursement. (For Defense Business Operations Fund activities, this is a summary account. For other activities, this is a posting account.)

3221 Transfers In from Others Without Reimbursement-Defense Business Operations Fund. Credit Balance. Represents the value of transfers in of other than capital assets from other Defense Business Operations Fund entities for which reimbursement by the receiving Defense Business Operations Fund entity will not be required.

3221.1 Transfers In from Others Without Reimbursement-Defense Business Operations Fund-Capital-Defense Business Operations Fund. Credit Balance. This account is used to accumulate the net book value (acquisition cost less accumulated depreciation) of capital assets transferred in from other Defense Business Operations Fund entities for which reimbursement by the receiving entity will not be required.

3230 Transfers Out to Others Without Reimbursement. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the total transfers out to Federal Agencies and to others without reimbursement.

3231 Transfers Out to Government Agencies Without Reimbursement. Debit Balance. Represents the net book value (acquisition cost less accumulated depreciation) of property transferred out to another Federal Agency without reimbursement.

3232 Transfers Out to All Others Without Reimbursement. Debit Balance. Represents the net book value (acquisition cost less accumulated depreciation) of property transferred out without reimbursement to other than a Federal Agency.

3233 Transfers Out to Others Without Reimbursement-Defense Business Operations Fund. Debit Balance. Represents the value of transfers out of other than capital assets to other Defense Business Operations Fund entities for which reimbursement will not be received by the transferring Defense Business Operations Fund activity.

3233.1 Transfers Out to Others Without Reimbursement-Defense Business Operations Fund-Capital-Defense Business Operations Fund. Debit Balance. This account is used to accumulate the net book value (acquisition cost less accumulated depreciation) of capital assets transferred out to other Defense Business Operations Fund entities for which reimbursement will not be received by the transferring Defense Business Operations Fund activity.

3300 Results of Operations. Debit or Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the cumulative and net results of operations from inception to the beginning of the current fiscal year.

3310 Cumulative Results of Operations. Debit or Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the cumulative results of operations. This account is normally a credit balance account.

3311 Cumulative Results of Operations-Defense Business Operations Fund. Debit or Credit Balance. This is a summary account used to accumulate the value of annual operating results and real property maintenance and repair reserve amounts generated since the Fund was established. No transactions should be posted to this account.

3311.1 Accumulated Operating Results. Debit or Credit Balance. This account is used to accumulate the net difference between Defense Business Operations Fund expenses and financing sources (including gains and losses and other directed adjustments) since inception through the annual closing of the balance in Account 3321, "Net Results of Operations-Defense Business Operations Fund," and gains and losses from normal operations and other directed adjustments.

3311.2 Reserve-Major Real Property Maintenance-Defense Business Operations Fund. Credit Balance. This account is used to record, as a credit, the accumulation of the amounts expensed monthly to finance approved Major Real Property Maintenance and Repair projects; and, as a debit, the amount of the Reserve used for program purposes or, if directed by the DoD Comptroller, returned to Account 3311.1, "Accumulated Operating Results."

3312 (No Account Currently Assigned to this Number.)

3313 Cumulative Results of Operations-Special Defense Acquisition Trust Fund. Credit Balance. Represents the net difference between revenues and expenses (gains and losses from normal operations and other directed adjustments) from inception of the activity through the beginning of the current fiscal year.

3314 Cumulative Results of Operations-Foreign Military Sales Trust Fund. Credit Balance. Represents the net difference between revenues and expenses (gains and losses from normal operations and other directed adjustments) from inception of the activity through the beginning of the current fiscal year.

3315 Cumulative Results of Operations-Military Retirement Trust Fund. Credit Balance. Represents the net difference between revenues less expenses (gains and losses from normal operations and other directed adjustments) from inception of the activity through the beginning of the current fiscal year.

3316 Cumulative Results of Operations-DoD Education Benefits Trust Fund. Credit Balance. Represents the net difference between revenues less expenses (gains and losses from normal operations and other directed adjustments) from inception through the beginning of the current fiscal year.

3317 Cumulative Results of Operations-Other Trust Funds. Credit Balance. Represents the net difference between revenues and expenses (gains and losses from normal operations and other directed adjustments) from inception through the beginning of the current fiscal year.

3320 Net Results of Operations. Debit or Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the net results of operations for the fiscal year.

3321 Net Results of Operations-Defense Business Operations Fund. Debit or Credit Balance. This account is used to accumulate the net results of operations within a fiscal year. Income and expense (including gain and loss) accounts are closed into this account to obtain the net result of operations within a fiscal year. Following fiscal yearend financial report preparation, the balance of this account is closed to Account 3311.1, "Accumulated Operating Results."

3322 (No Account is Currently Assigned to this Number.)

3323 Net Results of Operations-Special Defense Acquisition Trust Fund. Debit or Credit Balance. Reflects at year end the results of operations within a fiscal year.

3324 Net Results of Operations-Foreign Military Sales Trust Fund. Debit or Credit Balance. Reflects at year end the results of operations within a fiscal year.

3325 Net Results of Operations-Military Retirement Trust Fund. Debit or Credit Balance. Reflects at year end the results of operations within a fiscal year.

3326 Net Results of Operations-DoD Education Benefits Trust Fund. Debit or Credit Balance. Reflects at year end the results of operations within a fiscal year.

3327 Net Results of Operations-Other Trust Funds. Debit or Credit Balance. Reflects at year end the results of operations within a fiscal year.

3400 Donations and Other Items. Credit Balance. Represents the total fair market value of donations received by the reporting entity. This account is available for use only by trust funds.

3500 Deferred Liquidating Cash Authority. Debit Balance. Represents the amount of liquidating cash disbursing authority that has not been transferred by the U.S. Treasury to the expenditure account by year end.

3600 General Fund Receipts. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of funds uncollected and returned to the General Fund.

3610 Uncollected Revenue-General Fund-Miscellaneous Receipts. Debit Balance. Represents the uncollected amount of receivables due to be returned to the U.S. Treasury-Miscellaneous Receipts.

3620 Funds Returned to General Fund-Miscellaneous Receipts. Credit Balance. Represents the funds returned and deposited to the General Fund Miscellaneous Receipts account.

4000 Budgetary. Debit Balance. This summary account reflects budgetary operations and conditions from the time appropriations are realized until they are expended. No transactions should be posted to this account.

4110 Appropriations Realized. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of appropriations specified in an appropriations act and becoming available on or after the first day of the fiscal year.

4111 Debt Liquidation Appropriations. Debit Balance. Represents the amount appropriated to liquidate debt as specified in applicable appropriation language.

4112 Deficiency Appropriations. Debit Balance. Represents the amount appropriated to eliminate a prior year deficiency.

4113 Appropriations Rescinded. Credit Balance. Represents the amount of appropriations rescinded by the Congress.

4114 Appropriations Realized but Withdrawn. Debit Balance. Represents the amount of appropriations realized but withdrawn upon expiration for obligation purposes.

4119 Other Appropriations Realized. Debit Balance. Represents the amount of all appropriations not classified as debt liquidation appropriations, deficiency appropriations or appropriations to liquidate contract authority.

4120 Appropriations Anticipated-Indefinite. Debit Balance. Represents the current estimate of amounts anticipated to become available under existing law.

4130 Contract Authority. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents amounts of authority under which contracts or other obligations may be executed in advance of the receipt of an appropriation, or in excess of amounts otherwise available in a revolving fund.

4131 Contract Authority-Without Liquidating Appropriation. Debit Balance. Represents the amount of contract authority authorized, less the amount of contract liquidating authority that has been enacted.

4132 Contract Authority-With Liquidating Appropriation. Debit Balance. Represents the amount of contract authority for which contract liquidating authority has been enacted.

4133 Contract Authority Lapsed. Debit Balance. Represents the amount of contract authority lapsed resulting from either program completion and/or time limitation.

4140 Borrowing Authority. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of statutory authority that permits a Federal Agency to incur obligations and to make payments for specified purposes from the proceeds of borrowed funds.

4141 Borrowing Authority-Definite. Debit Balance. Represents the amount of statutory authority that permits a Federal Agency to incur obligations and make payments for specified purposes out of borrowed monies when a specific sum or a specific aggregate amount "not to exceed" is stated at the time the authority is granted.

4142 Borrowing Authority-Indefinite. Debit Balance. Represents the amount of budget authority established by assumption of mortgages under the Homeowners Assistance Program. The account is increased when a mortgage is assumed and decreased by payments on mortgage principal, or upon sale of the mortgaged property.

4143 Borrowing Authority-Withdrawn. Debit Balance. Represents the amount of budget authority withdrawn due to payments on the principal of mortgages assumed under the Homeowners Assistance Program.

4150 Other New Budget Authority. Debit Balance. Represents the amount of new budgetary authority (other than appropriations) becoming available on or after the first day of a fiscal year. Reappropriations are included in this account.

4160 Anticipated Transfers of Current Fiscal Year Authority. Debit or Credit Balance. Represents the net amount of anticipated nonexpenditure transfers to or from current year appropriations and funds.

4170 Appropriation Transfers. Debit or Credit Balance. Represents the net amount of nonexpenditure transfers to or from current year appropriations and funds.

4180 Anticipated Transfers of Prior Fiscal Year Authority. Debit or Credit Balance. Represents the net amount of anticipated nonexpenditure transfers to or from prior year appropriations and funds.

4190 Transfers-Prior Year Budgetary Resources. Debit or Credit Balance. Represents the net amount of accomplished nonexpenditure transfers to or from prior year appropriations and funds.

4210 Anticipated Reimbursements and Other Income. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of anticipated reimbursements expected to be earned during the current fiscal year which are subject to specific Office of Management and Budget (OMB) apportionment, and other authorized reimbursements for which obligational authority is automatically established on the basis of customer orders received and accepted.

4211 Anticipated Reimbursements-Specific Apportionment. Debit Balance. Represents the amount of anticipated reimbursements expected to be earned during the current fiscal year which are subject to specific OMB apportionment.

4212 Anticipated Reimbursements-Automatic Apportionment. Debit Balance. Represents the amount of anticipated reimbursements expected to be earned during the current fiscal year which are subject to automatic apportionment by OMB based upon reimbursable orders accepted.

4220 Reimbursable Orders Accepted. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of reimbursable orders accepted for performance in the current fiscal year. Includes orders accepted under both automatic and specific apportionment.

4221 Customer Orders Accepted-Automatic Apportionment. Credit Balance. Represents the amount of reimbursable orders accepted against the automatically apportioned reimbursable program.

4222 Customer Orders Accepted-Specific Apportionment. Credit Balance. Represents the amount of reimbursable orders accepted against the specifically apportioned reimbursable program.

4230 Unfilled Customer Orders-Unobligated. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the balance of reimbursable orders accepted under both the automatic and specific apportionment programs.

4231 Unfilled Customer Orders-Without Advance-Automatic Apportionment. Debit Balance. Represents the balance of reimbursable orders accepted without advance payment or progress payment for which there is an automatic increase in obligational authority under an allotment. This account is increased when a customer order is accepted and decreased as reimbursements are earned. Sub-accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

- Non-Federal Sources
- Foreign Military Sales (FMS) Trust Fund
- All Other Trust Funds
- Off-Budget Federal Entities
- Other Defense Accounts
- Other Non-Defense Accounts
- Intrafund

4232 Unfilled Customer Orders-Without Advance-Specific Apportionment. Debit Balance. Represents the balance of reimbursable orders accepted without advance payment or progress payment against the specifically apportioned reimbursable program. This account is increased when a customer order is accepted and decreased as reimbursements are earned. Sub-accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

- Non-Federal Sources
- FMS Trust Fund
- All Other Trust Funds
- Off-Budget Federal Entities
- Other Defense Accounts
- Other Non-Defense Accounts
- Intrafund

4233 Unfilled Customer Orders-With Advance-Automatic Apportionment. Debit Balance. Represents the balance of reimbursable orders accepted with advance payment for which there is an automatic increase in obligational authority under an allotment. This account is increased when a customer order is accepted and decreased as reimbursements are earned.

4234 Unfilled Customer Orders-With Advance-Specific Apportionment. Debit Balance. Represents the balance of reimbursable orders accepted with advance payment against the specifically apportioned reimbursable program. This account is increased when a customer order is accepted and decreased as reimbursements are earned. Sub-accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

- Non-Federal Sources
- FMS Trust Fund
- All Other Trust Funds
- Off-Budget Federal Entities
- Other Defense Accounts
- Other Non-Defense Accounts
- Intrafund

4240 Unfilled Customer Orders-Obligated. Represents the amount of obligated orders accepted for goods and services to be furnished on a reimbursable basis. At such time as the goods or services are furnished, the amount obligated becomes reimbursements earned. (Do not use this account without specific approval from the Office of the DoD Comptroller.)

4250 Reimbursements and Other Income Earned. Debit Balance. This account is a summary account. No transactions should be posted to this account. Represents the amount of reimbursements and other income earned to date through the delivery of goods and performance of services, whether or not bills have been rendered or collections made. Includes reimbursements earned under both automatic and specific apportionment.

4251 Reimbursements Earned-Uncollected-Automatic Apportionment. Debit Balance. Represents the amount of uncollected automatically apportioned reimbursements earned during the fiscal year. Sub-accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

- Non-Federal Sources
- FMS Trust Fund
- All Other Trust Funds
- Off-Budget Federal Entities
- Other Defense Accounts
- Other Non-Defense Accounts
- Intrafund

4252 Reimbursements Earned-Uncollected-Specific Apportionment. Debit Balance. Represents the amount of uncollected specifically apportioned reimbursements earned during the fiscal year. Sub-accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

- Non-Federal Sources
- FMS Trust Fund
- All Other Trust Funds
- Off-Budget Federal Entities
- Other Defense Accounts
- Other Non-Defense Accounts
- Intrafund

4253 Reimbursements Earned-Collected-Automatic Apportionment. Debit Balance. Represents the amount of collected automatically apportioned reimbursements earned during the fiscal year. Sub-accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

- Non-Federal Sources
- FMS Trust Fund
- All Other Trust Funds
- Off-Budget Federal Entities
- Other Defense Accounts

Other Non-Defense Accounts
Intrafund

4254 Reimbursements Earned-Collected-Specific Apportionment. Debit Balance. Represents the amount of collected specifically apportioned reimbursements earned during the fiscal year. Sub- accounts are required to indicate the source of the reimbursement. These sub-accounts are as follows:

Non-Federal Sources
FMS Trust Fund
All Other Trust Funds
Off-Budget Federal Entities
Other Defense Accounts
Other Non-Defense Accounts
Intrafund

4255 Reimbursements Earned-Collected-Undistributed. Debit Balance. Represents the amount of collections reported by the U.S. Treasury, Departmental, or other finance network that are not immediately distributable at the installation level.

4310 Anticipated Recoveries of Prior Year Obligations. Debit Balance. Represents the estimated amount of cancellations or downward adjustments of prior year obligations anticipated for recovery in the current fiscal year.

4320 Actual Recoveries of Prior Year Obligations. Credit Balance. This account is a summary account. No transactions should be posted to this account. Represents the actual amount of any cancellation or downward adjustment since the first day of the current fiscal year for obligations reported in prior years. This account applies only to the unexpired portion of multiple-year and no-year appropriations.

4321 Actual Recoveries of Prior Year Obligations-Direct Program. Credit Balance. Represents the actual amount of any cancellation or downward adjustment since the first day of the current fiscal year for direct program obligations reported in prior years. This account applies only to the unexpired portion of multiple-year and no-year appropriations.

4322 Actual Recoveries of Prior Year Obligations-Reimbursable Program. Credit Balance. Represents the actual amount of any cancellation or downward adjustment since the first day of the current fiscal year for reimbursable program obligations reported in prior years. This account applies only to the unexpired portion of multiple-year and no-year appropriations.

4330 Funds Generated from Deobligations of Prior Year Funds. Debit Balance. Represents the actual amount of any cancellation or downward adjustment since the first day of the current fiscal year for direct and reimbursable program obligations reported in prior years. This account applies only to the unexpired portion of multiple-year and no-year appropriations.

4390 Balance Available for Restoration, Write Off and Withdrawal. Debit or Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the net difference between amounts previously written off which have been restored to the account during the current fiscal year and amounts actually written off to date as transactions of the current fiscal year.

4391 Restorations, Write Offs and Withdrawals. Debit or Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount available for obligation during the year that ceased to be available during or at the end of the fiscal year, other than amounts rescinded

by law. Includes amounts written off or withdrawn by administrative action, unobligated balances returned to unappropriated receipts, and amounts withdrawn/lapsed from liquidating appropriations.

4391.1 Restorations and Withdrawals-Annual and Multiyear. Debit or Credit Balance. Represents the net difference between the withdrawal of unobligated balances of expired appropriations (credits) and the restoration of withdrawn amounts to cover net upward obligation adjustments (debits). (NOTE: This account is not in use at this time.)

4391.2 Restorations and Write Offs-No Year. Debit or Credit Balance. Represents the net difference between write offs of unobligated balances pursuant to U.S.C. 1555 (credits) and restorations of amounts written off (debits).

4392 Withdrawals Due to Rescissions of Unobligated Balances. Credit Balance. Represents the amount of congressional rescissions of unobligated balances of prior year budgetary resources. Statutory citation is to the rescission act.

4410 Budgetary Authority-Not Available Pursuant to Public Law. Credit Balance. Represents the amount of appropriations/ reappropriations withheld by a specific provision in law. Includes those appropriations for which availability is contingent by law upon the occurrence of a specified event, such as enactment of authorizing legislation, emergencies arising from national disasters, unanticipated increases in costs, or other events specified by law.

4420 Appropriations Available for Apportionment-Withheld Pending Rescission. Credit Balance. Represents the amount of budget authority withheld pending the enactment of legislation canceling the authority to obligate such funds.

4430 Appropriations Available for Apportionment-OMB Deferred Programs. Credit Balance. Represents the amount of budget authority specifically withheld from apportionment by the Office of Management and Budget.

4440 Revolving Funds Available for Apportionment. Credit Balance. Represents the total amount of budgetary resources used for public enterprise and intragovernmental revolving funds that are subject to apportionment.

4450 Authority Available for Apportionment. Credit Balance. Represents the amount of appropriated, reappropriated or transferred funds not yet apportioned by OMB. Reductions are recorded in this account based on apportionments made and apportionment reserves established.

4510 Apportionment Available for Distribution. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of direct program obligational authority and current period reimbursable program specifically apportioned and available at the departmental level for distribution to operating agencies or other intermediate levels.

4511 Unallocated Apportionment-Direct Program-Current Period. Credit Balance. Represents the amount of direct program obligational authority currently available at the departmental level for distribution to operating agencies or other intermediate levels.

4512 Unallocated Apportionment-Direct Program-Subsequent Periods. Credit Balance. Represents the amount of direct program obligational authority available for subsequent periods at the departmental level for distribution to operating agencies or other intermediate levels.

- 4513 Unallocated Apportionment-Office of the Secretary of Defense (OSD) Withheld Programs. Credit Balance. Represents the amount of apportioned direct program obligational authority withheld by OSD.
- 4514 Unallocated Apportionment-Reimbursable Program-Current Period. Credit Balance. Represents the amount of the current period reimbursable program specifically apportioned, but unallocated.
- 4515 Unallocated Apportionment-Reimbursable Program- Subsequent Periods. Credit Balance. Represents the amount of subsequent period reimbursable program specifically apportioned, but unallocated.
- 4516 Unallocated Unfunded Contract Authority. Credit Balance. Represents the amount of unfunded contract authority apportioned.
- 4517 Unallocated Apportionment-Reserved for Other Anticipated Resources. Credit Balance. Represents the amount of apportioned anticipated resources available, other than anticipated automatically apportioned reimbursements, that must be withheld from availability for obligation until the anticipated resource actually materializes.
- 4518 Unallocated Apportionment-Reserve for Anticipated Resources-Automatically Apportioned. Credit Balance. Represents the amount of unobligated balances set aside pending realization of the anticipated automatically apportioned reimbursements underlying the obligational authority.
- 4520 Allocations to Others. Credit Balance. Represents the amount of apportioned funds transferred to other agencies for the accomplishment of work or projects in accordance with budget authority and negotiated agreements to carry out the purposes of the parent appropriation or fund.
- 4530 Allocations from Others. Debit Balance. Represents the amount of apportioned funds transferred in from other agencies for the accomplishment of work or projects in accordance with budget authority and negotiated agreements to carry out the purposes of the parent appropriation or fund.
- 4540 Internal Fund Distributions Issued. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of apportioned funds allocated from departmental level to intermediate levels. Included also are allocations of funds derived from appropriations that are not subject to apportionment.
- 4541 Allocations Issued-Direct Program-Current Period. Credit Balance. Represents the amount of current period, direct program, obligational authority allocated from departmental level to intermediate levels.
- 4542 Allocations Issued-Direct Program-Subsequent Periods. Credit Balance. Represents the amount of subsequent period, direct program, obligational authority allocated from departmental level to intermediate levels.
- 4543 Allocations Issued-Reimbursable Program-Current Period. Credit Balance. Represents the amount of current period, specifically apportioned, reimbursable program authority allocated from departmental level to intermediate levels.
- 4544 Allocations Issued-Reimbursable Program-Subsequent Periods. Credit Balance. Represents the amount of subsequent period, specifically apportioned, reimbursable program authority allocated from departmental level to intermediate levels.

4545 Allocations Issued-Withheld Programs. Credit Balance. Represents the amount of withheld programs allocated from departmental level to intermediate levels.

4550 Internal Fund Distributions Received. Debit Balance. Represents the amount of direct and reimbursable program authority received from departmental level by an intermediate level activity. It also can represent the amount of suballocations received from another intermediate level activity.

4560 Funds Available for Allotment. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of direct and reimbursable program authority available at an intermediate level activity for allotment to installation level activities, or suballocation to other intermediate level activities.

4561 Unallotted Allocations-Direct Program-Current Period. Credit Balance. Represents the amount of current period, direct program obligational authority available at an intermediate level for allotment to installation level activities, or suballocation to other intermediate level activities.

4562 Unallotted Allocations-Direct Program-Subsequent Periods. Credit Balance. Represents the amount of subsequent period direct program obligational authority available at an intermediate level activity for allotment to installation level activities, or suballocation to other intermediate level activities.

4563 Unallotted Allocations-Reimbursable Program-Current Period. Credit Balance. Represents the amount of specifically apportioned current period reimbursable program authority available at an intermediate level activity for allotment to installation level activities, or suballocation to other intermediate level activities.

4564 Unallotted Allocations-Reimbursable Program-Subsequent Periods. Credit Balance. Represents the amount of specifically apportioned subsequent period reimbursable program authority available at an intermediate level activity for allotment to installation level activities, or suballocation to other intermediate level activities.

4565 Unallotted Allocations-Withheld Programs. Credit Balance. Represents the amount of withheld program allocations received from departmental level by intermediate level activities.

4566 Unallotted Allocations-Operating Cost Authority-Defense Business Operations Fund. Credit Balance. This account is used to record, as a credit, the amount of operating cost authority received at the DoD Component Level and, as a debit, the amount of operating cost authority issued to a Defense Business Operations Fund activity (see also Account 4576).

4567 Unallotted Allocations-Capital Authority-Defense Business Operations Fund. Credit Balance. This account is used to record, as a credit, the amount of capital budget authority received at the DoD Component Level and, as a debit, the amount of capital budget authority issued to a Defense Business Operations Fund activity (see also Account 4577).

4570 Allotments Issued. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of direct and reimbursable program authority allotted by intermediate level activities to installation level activities.

4571 Allotments Issued-Direct Program-Current Period. Credit Balance. Represents the amount of current period direct program authority allotted by intermediate level activities to installation level activities.

4572 Allotments Issued-Direct Program-Subsequent Periods. Credit Balance. Represents the amount of subsequent period direct program authority allotted by intermediate level activities to installation level activities.

4573 Allotments Issued-Reimbursable Program-Current Period. Credit Balance. Represents the amount of current period reimbursable program authority allotted by intermediate level activities to installation level activities.

4574 Allotments Issued-Reimbursable Program-Subsequent Periods. Credit Balance. Represents the amount of subsequent period reimbursable program authority allotted by intermediate level activities to installation level activities.

4575 Allotments Issued-Withheld Programs. Credit Balance. Represents the amount of withheld programs allotted by intermediate level activities to installation level activities.

4576 Allotments Issued-Operating Cost Authority-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of operating cost authority issued from the DoD Component to a Defense Business Operations Fund activity.

4577 Allotments Issued-Capital Authority-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of capital budget authority issued from the DoD Component to a Defense Business Operations Fund activity.

4580 Allotments Received. Debit Balance. This is a summary account for Defense Business Operations Fund activities. For other activities, it is a posting account. Represents the amount of direct and specifically apportioned reimbursable program allotments received for the fiscal year.

4580.A Operating Cost Authority-A Goal-Defense Business Operations Fund. Debit Balance. This account is used to record, upon receipt of the operating cost authority issued from the Component level (see Account 4576), the amount of "A Goals" included in the Activity Operating Budget.

4580.B Operating Cost Authority-B Goal-Defense Business Operations Fund. Debit Balance. This account is used to record, upon receipt of the operating cost authority issued from the DoD Component level (see Account 4576), the amount of "B Goals" included in the Activity Operating Budget.

4580.C Operating Cost Authority-C Goal-Defense Business Operations Fund. Debit Balance. This account is used to record, upon receipt of the operating cost authority issued from the DoD Component level (see Account 4576), the amount of "C Goals" included in the Activity Operating Budget.

4580.D Operating Cost Authority-D Goal-Defense Business Operations Fund. Debit Balance. This account is used to record, upon receipt of the operating cost authority issued from the DoD Component level (see Account 4576), the amount of "D Goals" included in the Activity Operating Budget.

4581 Automatic Reimbursement Program. Debit Balance. Represents the amount of obligational authority required to cover the performance of reimbursable orders subject to automatic apportionment.

4582 Allotted Reimbursable Program-Current Period. Credit Balance. Represents the balance of current period, specifically apportioned, reimbursable program authority allotted.

4583 Allotted Reimbursable Program-Subsequent Periods. Credit Balance. Represents the balance of subsequent period, specifically apportioned, reimbursable program authority allotted.

4584 Anticipated Earned Authority-Defense Business Operations Fund. Credit Balance. This account is a summary account. This account is used to record (1) as a credit, the amount of cost and reimbursable authority anticipated to be earned during the year (see Account 4580) and (2) as a debit, the amount of actual cost authority earned.

4584.A Anticipated Earned Authority-A Goal-Defense Business Operations Fund. Credit Balance. This account is used to record (1) as a credit, the amount of "A Goal" reimbursements anticipated to be earned during the year (see Account 4580.A) and (2) as a debit, the amount of actual cost authority earned (see Account 4614.A).

4584.B Anticipated Earned Authority-B Goal-Defense Business Operations Fund. Credit Balance. This account is used to record (1) as a credit, the amount of "B Goal" reimbursements anticipated to be earned (see Account 4580.B) and (2) as a debit, the amount of actual cost authority earned (see Account 4614.B).

4584.C Anticipated Earned Authority-C Goal-Defense Business Operations Fund. Credit Balance. This account is used to record (1) as a credit, the amount of "C Goal" reimbursements anticipated to be earned (see Account 4580.C) and (2) as a debit, the amount of actual cost authority earned (see Account 4614.C).

4584.D Anticipated Earned Authority-D Goal-Defense Business Operations Fund. Credit Balance. This account is used to record (1) as a credit, the amount of "D Goal" reimbursements anticipated to be earned (see Account 4580.D) and (2) as a debit, the amount of actual cost authority earned (see Account 4614.D).

4585 Capital Program-Defense Business Operations Fund. Debit Balance. This is a summary account. No transactions should be posted to this account. This account is used to accumulate the amount of capital budget amounts authorized.

4585.1 Capital Authority-Defense Business Operations Fund- Equipment-Except Automated Data Processing Equipment (ADPE) and Telecommunications Equipment. Debit Balance. This account is used to record, upon receipt of the capital budget authority issued from the DoD Component level (see Account 4577), the amount of capital authority received for the purchase of equipment other than ADPE and telecommunications equipment.

4585.2 Capital Authority-Defense Business Operations Fund-ADPE and Telecommunications Equipment. Debit Balance. This account is used to record, upon receipt of the capital budget authority issued from the DoD Component level (see Account 4577), the amount of capital authority received for the purchase of ADPE and telecommunications equipment.

4585.3 Capital Authority-Defense Business Operations Fund- Software Development. Debit Balance. This account is used to record, upon receipt of the capital budget authority issued from the DoD Component level (see Account 4577), the amount of capital authority received to fund the development of approved software applications.

4585.4 Capital Authority-Defense Business Operations Fund-Minor Construction. Debit Balance. This account is used to record, upon receipt of the capital budget authority issued from the DoD Component level (see Account 4577), the amount of capital authority received to fund approved minor construction projects.

4585.5 Capital Authority-Defense Business Operations Fund- Management Improvement Initiatives. Debit Balance. This account is used to record, upon receipt of the capital budget authority issued from the DoD Component level (see Account 4577), the amount of capital authority received to fund management improvement efforts.

4610 Allotments Available for Commitment/Obligation. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of funds received and available for commitment/obligation or withheld programs allotted. Includes obligational authority available for both the direct and reimbursable programs.

4611 Uncommitted/Unobligated Allotments-Direct Program- Current Period. Credit Balance. Represents the amount of direct program obligational authority received for the current period, but not yet committed or obligated.

4612 Uncommitted/Unobligated Allotments-Direct Program- Subsequent Periods. Credit Balance. Represents the amount of direct program obligational authority allotted for use in subsequent periods.

4613 Uncommitted/Unobligated Allotments-Withheld Programs. Credit Balance. Represents the amount of withheld programs allotted to an installation level activity.

4614 Uncommitted/Unobligated Allotments-Reimbursable Program - Current Period. Credit Balance. This is a summary account for Defense Business Operations Fund activities. For other activities, it is a posting account. Represents the amount of reimbursable program obligational authority established upon acceptance of reimbursable orders, but not yet committed or obligated.

4614.A Actual Cost Authority Earned-A Goal-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of approved "A Goal" cost authority earned. Amounts posted to this account are determined by the work units produced times the approved unit cost goal.

4614.B Actual Cost Authority Earned-B Goal-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of approved "B Goal" cost authority earned. Amounts earned are actual costs incurred for performance under the "B Goal."

4614.C Actual Cost Authority Earned-C Goal-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of approved "C Goal" cost authority earned. Amounts earned are equal to obligation authority received on other funding documents for "C Goal" outputs.

4614.D Actual Cost Authority Earned-D Goal-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of approved "D Goal" cost authority earned. Amounts earned are equal to amounts approved for outputs listed on the Activity Operating Budget as "D Goal" outputs.

4615 Capital Authority Available-Defense Business Operations Fund. Credit Balance. This is a summary account. No transactions should be posted to this account. This account is used to accumulate the amount of capital authority available for use.

4615.1 Capital Authority Available-Defense Business Operations Fund-Equipment-Except ADPE and Telecommunications Equipment. Credit Balance. This account is used to record (1) as a credit, the amount of capital authority available for the purchase of equipment other than ADPE and telecommunications equipment (see Account 4585.1) and (2) as a debit, the amount of capital authority used to purchase of equipment other than ADPE and telecommunications equipment.

4615.2 Capital Authority Available-Defense Business Operations Fund-ADPE and Telecommunications Equipment. Credit Balance. This account is used to record (1) as a credit, the amount of capital authority available for the purchase of ADPE and telecommunications equipment (see Account 4585.1) and (2) as a debit, the amount of capital authority used to purchase ADPE and telecommunications equipment.

4615.3 Capital Authority Available-Defense Business Operations Fund-Software Development. Credit Balance. This account is used to record (1) as a credit, the amount of capital authority available to fund the development of approved software applications (see Account 4585.1) and (2) as a debit, the amount of capital authority used to develop approved software applications.

4615.4 Capital Authority Available-Defense Business Operations Fund-Minor Construction. Credit Balance. This account is used to record (1) as a credit, the amount of capital authority available to fund approved minor construction projects (see Account 4585.1) and (2) as a debit, the amount of capital authority used to fund approved minor construction projects.

4615.5 Capital Authority Available-Defense Business Operations Fund-Management Improvement Initiatives. Credit Balance. This account is used to record (1) as a credit, the amount of capital authority available to fund management improvement efforts (see Account 4585.1) and (2) as a debit, the amount of capital authority used to fund management improvement efforts.

4620 Other Funds Available for Commitment/Obligation. Credit Balance. Represents the amount of appropriated funds, not subject to apportionment, that are available for commitment/obligation.

4630 Other Funds Unavailable for Commitment/Obligation. Credit Balance. Represents the amount of appropriated funds, not subject to apportionment, that are not available for commitment/obligation.

4700 Commitments Available for Obligation. Credit Balance. This account is a summary account. No transactions should be posted to this account. Represents the amount of direct and reimbursable program authority committed in anticipation of obligation.

4710 Outstanding Commitments-Direct Program. Credit Balance. Represents the amount of direct program unobligated commitments.

4720 Outstanding Commitments-Reimbursable Program. Credit Balance. This account is a summary account. Represents the amount of reimbursable program unobligated commitments.

4721 Outstanding Commitments-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of unobligated commitments for operating cost items.

4722 Outstanding Commitments-Capital-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of unobligated commitments for capital asset purchases.

4800 Undelivered Orders. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of goods and services ordered and obligated, but which have not been received. This account includes any orders for which advance payment has been made, but for which delivery or performance has not yet occurred.

4810 Undelivered Orders-Direct Program. Credit Balance. This account is a summary of Account 4811, "Undelivered Orders-Without Advance-Direct Program," and Account 4812, "Undelivered Orders-With Advance-Direct Program." No transactions should be posted to this account. Represents the amount of direct program orders for goods and services for which delivery or performance has not yet occurred.

4811 Undelivered Orders-Without Advance-Direct Program. Credit Balance. Represents the amount of direct program orders issued without an advance payment for goods and services for which delivery or performance has not yet occurred. This account is subsidiary to Account 4810, "Undelivered Orders-

Direct Program." For undelivered orders with advances, record the amount of the obligation less the advance.

4812 Undelivered Orders-With Advance-Direct Program. Credit Balance. Represents the amount of direct program orders issued with an advance payment for goods and services for which delivery or performance has not yet occurred. This account is subsidiary to Account 4810, "Undelivered Orders-Direct Program." For undelivered orders with advances, record the amount of the advance.

4820 Undelivered Orders-Reimbursable Program. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of reimbursable program orders for goods and services for which delivery or performance has not yet occurred.

4821 Undelivered Orders-Without Advance-Reimbursable Program. Credit Balance. Represents the amount of reimbursable program orders issued without an advance payment for goods and services for which delivery or performance has not yet occurred. This account is subsidiary to Account 4820, "Undelivered Orders- Reimbursable Program." For undelivered orders with advances, record the amount of the obligation less the amount of the advance.

4822 Undelivered Orders-With Advance-Reimbursable Program. Credit Balance. Represents the amount of reimbursable program orders issued with an advance payment for goods and services for which delivery or performance has not yet occurred. This account is subsidiary to Account 4820, "Undelivered Orders-Reimbursable Program." For undelivered orders with advances, record the amount of the advance.

4823 Undelivered Orders-Without Advance-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of orders issued incident to operations without an advance payment for goods or services for which delivery or performance has not yet occurred.

4824 Undelivered Orders-With Advance-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of orders issued incident to operations with an advance payment for goods or services for which delivery or performance has not yet occurred.

4825 Undelivered Orders-Without Advance-Capital-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of orders, without an advance payment, for the acquisition of capital assets for which delivery or performance has not yet occurred.

4826 Undelivered Orders-With Advance-Capital-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of orders, with an advance payment, for the acquisition of capital assets for which delivery or performance has not yet occurred for goods or services.

4900 Expended Appropriations. Credit Balance. This account is a summary account. No transactions should be posted to this account. Represents the amount of paid and unpaid expenditures for (a) services performed by employees, contractors, vendors, carriers grantees, lessors, other government funds; (b) goods and tangible property received; and (c) amounts becoming owed under programs for which no current service or performance is required (that is, annuities, insurance claims and other benefit payments).

4910 Accrued Expenditures-Unpaid-Direct Program. Credit Balance. Represents the amount of direct program goods and services received for which payment has not yet been made.

4920 Accrued Expenditures-Unpaid-Reimbursable Program. Credit Balance. This account is a summary account. Represents the amount of goods and services received against the reimbursable program for which payment has not yet been made.

4921 Accrued Expenditures-Unpaid-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of goods and services received for which payment has not been made.

4922 Accrued Expenditures-Unpaid-Capital-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of capital asset acquisitions received for which payment has not been made.

4930 Accrued Expenditures-Paid-Direct Program. Credit Balance. This account is a summary of Account 4931, "Accrued Expenditures-Paid-Direct Program," and Account 4932, "Accrued Expenditures-Refunds Due-Direct Program." No transactions should be posted to this account. Represents the amount of direct program goods and services received for which (1) payment has been made; or (2) refunds are due of erroneous payments or unliquidated advances.

4931 Accrued Expenditures-Paid-Direct Program. Credit Balance. Represents the amount of direct program goods and services received for which payment has been made. This account is subsidiary to Account 4930, "Accrued Expenditures-Paid-Direct Program."

4932 Accrued Expenditures-Refunds Due-Direct Program. Credit Balance. Represents the amount of direct program refunds due from Federal Agencies organizations or funds, non-federal governmental organizations, commercial vendors, and private parties resulting from erroneous payments and unliquidated advances. This account is subsidiary to Account 4930, "Accrued Expenditures-Paid-Direct Program."

4940 Accrued Expenditures-Paid-Reimbursable Program. Credit Balance. This account is a summary of Account 4941, "Accrued Expenditures-Paid-Reimbursable Program," and Account 4942, "Accrued Expenditures-Refunds Due-Reimbursable Program." No transactions should be posted to this account. Represents the amount of goods and services received against the reimbursable program for which (1) payment has been made or (2) refunds are due of erroneous payments or unliquidated advances.

4941 Accrued Expenditures-Paid-Reimbursable Program. Credit Balance. Represents the amount of goods and services received against the reimbursable program for which payment has been made. This account is subsidiary to Account 4940, "Accrued Expenditures-Paid-Reimbursable Program."

4942 Accrued Expenditures-Refunds Due-Reimbursable Program. Credit Balance. Represents the amount of reimbursable program refunds due from Federal Agencies organizations or funds, non-federal governmental organizations, commercial vendors, and private parties resulting from erroneous payments and unliquidated advances. This account is subsidiary to Account 4940, "Accrued Expenditures-Paid-Reimbursable Program."

4943 Accrued Expenditures-Paid-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of goods and services received and accepted for which payment has been made.

4944 Accrued Expenditures-Paid-Capital-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of capital asset acquisitions received and accepted for which payment has been made.

4950 Accrued Expenditures-Paid-Undistributed. Credit Balance. Represents the amount of disbursements as reported by the U.S. Treasury, departmental, or other finance network that are not immediately distributable at the installation level.

5000 Revenue and Financing Sources. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents the amount of off-setting collections resulting from (a) services performed, (b) goods and tangible property delivered to purchasers, (c) interest and penalties and (d) trust fund receipts.

5100 Revenue from Goods Sold. Credit Balance. This is summary account for Defense Business Operations Fund activities. For other activities, it is a posting account. Represents the value of inventory and completed projects for which revenue is billed to DoD Components.

5101 Revenue from Goods Sold-Defense Business Operations Fund. Credit Balance. This is a summary account for Defense Business Operations Fund activities. No transactions should be posted to this account. This account is used to accumulate the value of inventory or completed projects provided to customers.

5101.1 Revenue from Goods Sold-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the value of inventory items or completed projects provided to customers incident to normal operations of the business area.

5101.2 Revenue from Goods Sold-Capital Asset-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of capital asset surcharges (other than surcharges for depreciation and MILCON which are to be recorded in Subsidiary Accounts 5101.3-4) included in the price of inventory items or completed projects provided to customers.

5101.3 Revenue from Goods Sold-Depreciation-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of depreciation surcharges included in the price of inventory items or completed projects provided to customers.

5101.4 Revenue from Goods Sold-MILCON-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of MILCON surcharges included in the price of inventory items or completed projects provided to customers.

5200 Revenue from Services Provided. Credit Balance. Represents revenue earned from the sale of services provided, including sale of power, transportation, etc. (This is summary account for Defense Business Operations Fund activities. For other activities, it is a posting account.)

5201 Revenue from Services Provided-Defense Business Operations Fund. Credit Balance. This is a summary account for Defense Business Operations Fund activities. No transactions should be posted to this account. This account is used to accumulate the amount of revenue earned from the provision of services to customers.

5201.1 Revenue from Services Provided-Operating-Defense Business Operations Fund. Credit Balance. This account is used to record the value of services provided to customers incident to normal operations of the business area.

5201.2 Revenue from Services Provided-Capital Asset-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of capital asset surcharges (other than surcharges for depreciation and MILCON which are to be recorded in Subsidiary Accounts 5201.3 and 5201.4) included in the price of services provided to customers.

5201.3 Revenue from Services Provided-Depreciation-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of depreciation surcharges included in the price of services provided to customers.

5201.4 Revenue from Services Provided-MILCON-Defense Business Operations Fund. Credit Balance. This account is used to record the amount of MILCON surcharges included in the price of services provided to customers.

5300 Interest and Penalties Revenue. Credit Balance. Represents the revenue earned on investments, delinquencies and loans.

5400 Benefit Program Revenue. Credit Balance. Represents revenue received by DoD Components that administer retirement plans, education benefit plans, insurance plans and other annuity programs.

5500 Insurance and Guarantee Premium Revenue. Credit Balance. Revenue earned by DoD Components that administer insurance plans and guarantee programs. (Do not use this account without specific approval from the Office of the DoD Comptroller.)

5600 Donated Revenue. Credit Balance. Represents revenue to donation trust funds from authorized acceptance from non-federal sources of payments in cash or kind to cover travel and/or subsistence expenses of employees and other authorized donations.

5700 Appropriated Capital Used. Credit Balance. This account is a financing source to be matched against current period expenses funded by appropriations. This includes expenses funded by prior year appropriations such as (1) depreciation of fixed assets and consumption of inventory related to prior year purchases of fixed assets and inventory, (2) accrued and actual losses on inventory write downs, and (3) bad debt expense related to capitalized long term loans receivable and related interest.

5900 Other Revenue. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents amounts of revenue earned by DoD Components from miscellaneous sources not specifically provided for in other revenue accounts.

5910 Miscellaneous Reimbursements. Credit Balance. Represents the amount of revenue earned by DoD Components from miscellaneous sources not specifically provided for in other revenue accounts and reimbursable to DoD appropriations or funds.

5911 General Fund Sales of Property. Credit Balance. Represents the amount of sales not otherwise classified that are to be returned to the miscellaneous receipts accounts of the Treasury. (Do not use this account without specific approval from the Office of the DoD Comptroller.)

5912 Miscellaneous General Fund Income. Credit Balance. Represents the amount of miscellaneous receivables by DoD Components for credit to Treasury general fund receipt accounts. (Do not use this account without prior approval from the Office of the DoD Comptroller.)

6000 Expenses. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents the out-flows of assets or incurrence of liabilities during a period resulting from the rendering of services, delivering or producing goods, or carrying out other normal operating activities.

6100 Operating/Program Expenses. Debit Balance. This is a summary account. No transactions should be posted to this account. Operational and program costs incurred throughout the year. Operating program/expenses are (1) the total outlay in cash or equivalent applied in carrying out a

specific program or function, (2) the total cost of goods sold plus all selling, administrative and general expenses applicable thereto and (3) the total cost assignable against operating income or profit.

6111 Personnel Compensation-Civilian. Debit Balance. Represents the gross compensation for personal services rendered by Federal civilian employees and non-federal employees.

6112 Personnel Compensation-Military. Debit Balance. Represents the earned basic, incentive and special pays for military personnel.

6113 Personnel Benefits-Civilian. Debit Balance. Represents the benefits paid directly to DoD civilian personnel and payments to other funds for the benefit of the employees.

6114 Personnel Benefits-Military. Debit Balance. Represents benefits paid directly to military personnel or to other funds for military personnel.

6115 Benefits for Former Personnel. Debit Balance. Represents the benefits due to former personnel or their survivors.

6116 Travel and Transportation of Persons. Credit Balance. Represents the expense of transporting employees and others, their per diem allowance while in an authorized travel status, and other expenses incident to travel that are to be paid by the U.S. Government either directly or by reimbursing the traveler.

6117 Transportation of Things. Debit Balance. Represents the expense of transporting things (including animals) and for the care of such things while in the process of being transported. Excludes vendor transportation expenses for fixed assets and inventory items, which shall be charged to the same account as the purchased items.

6118 Rents, Communications and Utilities. Debit Balance. Represents the expense incurred for rents, communications and utilities purchased from commercial or U.S. Government sources.

6119 Printing and Reproduction. Debit Balance. Represents the expense incurred for printing and reproduction, and the related composition and binding operations purchased from the U.S. Government or commercial printers.

6120 Other Services. Debit Balance. Represents the expense incurred for services received not otherwise classified.

6121 Supplies and Materials. Debit Balance. Represents the expense incurred for supplies and materials, including ammunition, petroleum, oil and lubricants. Includes all supplies and materials consumed or utilized that do not meet the capitalization criteria.

6122 Equipment-Not Capitalized. Debit Balance. Represents the acquisition costs of equipment that do not meet capitalization requirements.

6123 Grants, Subsidies and Contributions. Debit Balance. Represents the value of grants, subsidies, and contributions made to further or enhance the interest of national defense.

6124 Insurance Claims and Indemnities. Debit Balance. Represents payments to veterans and their survivors for death or disability, claims and judgments arising from court decisions, abrogations of contracts, claims arising from military operations and personal injury or death, etc.

6125 Depreciation of Equipment. Debit Balance. Represents a reasonable measure of the expiration of service potential of non-military equipment (see Account 1750) in use during the accounting period. Military equipment (see Account 1760) shall not be depreciated. Subsidiary accounts may be added as necessary to meet reporting requirements.

6126 Depreciation of Real Property. Debit Balance. Represents a reasonable estimate of the expiration of service potential of depreciable real property in use during the accounting period.

6127 Depletion of Natural Resources. Debit Balance. Represents the quantitative exhaustion of the physical units of the resources removed from its natural state that is a proration of the capitalized asset amount to the units removed during the accounting period.

6128 Amortization of Leasehold Improvements and Other Intangible Assets. Debit Balance. Represents a reasonable measure of the expiration during the accounting period of the service potential of leasehold improvements and other intangible capital assets subject to amortization.

6129 Bad Debts. Debit Balance. Represents the expense for bad debts. It is the estimated uncollectible portion of all receivables. If the direct write off method is used, this account is used to record receivables written off during the accounting period.

6130 Annual Leave. Debit Balance. Represents the expense for annual leave earned by military personnel and civilian employees during the accounting period.

6300 Interest Expenses. Debit Balance. This is a summary account. No transactions should be posted to this account. The interest incurred by DoD Components from late payment of accounts and loans payable and the current interest accruing on amounts owed to others.

6310 Interest Expenses on Borrowing from Treasury. Debit Balance. Represents interest payments on borrowings from Treasury. (Do not use this Account without specific approval from the Office of the DoD Comptroller.)

6320 Interest Expenses on Securities. Debit Balance. Represents interest payments on borrowings from U.S. Treasury. (Do not use this Account without specific approval from the Office of the DoD Comptroller.)

6330 Other Interest Expenses. Debit Balance. Represents the interest expense incurred for amounts due creditors for the use of moneys loaned, deposited, overpaid or otherwise made available. When a contract provides for interest to be paid to a contractor if payment of claims under a contract has been delayed by the DoD, the accrued interest payable shall be recorded in this account.

6400 Benefit Program Expenses. Debit Balance. Represents amounts paid by the Military Retirement Trust Fund and the DoD Education Benefits Trust Fund. (This account shall be used only by those DoD Components that administer the Military Retirement Trust Fund and the DoD Education Benefits Trust Fund.)

6500 Cost of Goods Sold. Debit Balance. Represents the cost of goods or services sold from stock by DoD Components authorized to provide services or material to other Federal Government Agencies, including other DoD Components, or non-federal government agencies.

6600 Applied Overhead. Debit Balance. The amount of overhead distributed to work in process or construction in progress.

- 6900 Other Expenses. Debit Balance. Represents expenses not otherwise classified.
- 7100 Gains. Credit Balance. This is a summary account. No transactions should be posted to this account. Represents gains on assets.
- 7110 Gains on the Disposition of Assets. Credit Balance. Represents the gain on the disposition of assets and personal property.
- 7190 Other Gains. Credit Balance. This is a summary account. No transactions should be posted to this account. Gains from the disposition of assets other than capital assets.
- 7191 Inventory Gains. Credit Balance. Represents inventory gains resulting from physical inventories or discovered during operations or price increases.
- 7192 Investment Gains. Credit Balance. Represents the gain on the sale, exchange, or redemption of investments held by the DoD.
- 7193 Other Miscellaneous Gains. Credit Balance. Represents the gain resulting from currency fluctuations or other transactions not classifiable in specific other gain accounts.
- 7200 Losses. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents losses on assets.
- 7210 Losses on the Disposition of Assets. Debit Balance. Represents the loss on the disposition of assets and personal property.
- 7290 Other Losses. Debit Balance. This is a summary account. No transactions should be posted to this account. Represents losses of assets other than from the disposition.
- 7291 Inventory Losses or Adjustments. Debit Balance. Represents losses discovered during a physical inventory or during operations. Also includes reductions in inventory value as a result of price decreases.
- 7292 Investment Losses. Debit Balance. Represents the loss on the sale, exchange or redemption of investments held by the Department of Defense.
- 7293 Other Miscellaneous Losses. Debit Balance. Represents those losses which are not classifiable to specific loss accounts.
- 7300 Extraordinary Items. Debit Balance. Represents those costs or income so unusual in type as to be accorded special treatment in the accounts or to be accorded separate disclosure in financial statements.
- 7400 Prior Period Adjustments. Debit Balance. Represents significant adjustments to expense or revenue transactions recorded in prior fiscal years.
- 7500 Distribution of Income-Dividend. Debit Balance. Represents distributions of income or dividends. (Do not use this Account without prior approval from the Office of the DoD Comptroller.)
- 7600 Changes in Actuarial Liability. Debit or Credit Balance. Represents the amount of increase or decrease in actuarial liability.

FOREWORD

Volume 2 of the Department of Defense Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures" which governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It identifies financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it identifies statutory and regulatory financial reporting requirements.

This volume of the Regulation establishes procedures for DoD Components to use in budget presentation and formulation and applies to the Office of the Secretary of Defense, the Military Departments, the Joint Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

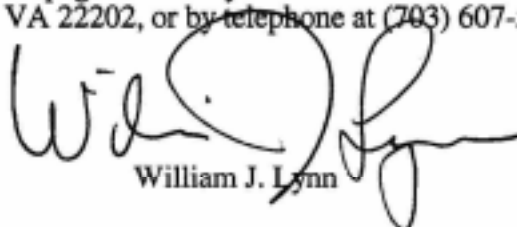

This update is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
Director for Plans and Systems
1100 Defense Pentagon
Washington, DC 20301-1100

All 15 volumes of the DoD Financial Management Regulation are available on the Internet at: <http://www.dtic.mil/comptroller/fmr>. Printed or CD-ROM copies of the regulation may be ordered through this Internet homepage or directly from the Defense Automated Printing Service, at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

William J. Lynn

Budget Formulation and Presentation**Volume 2 Structure**

<u>Chapter</u>	<u>Title</u>
<u>Volume 2A</u>	
1	General Information
2	Military Personnel Appropriations
3	Operation and Maintenance Appropriations
<u>Volume 2B</u>	
4	Procurement Appropriations
5	Research, Development and Evaluation Appropriations
6	Military Construction/Family Housing Appropriations
7	Base Realignment and Closure Appropriations
8	Real Property Maintenance/Minor Construction
9	Defense Working Capital Funds Activity Group Analysis
10	Public Enterprise, Management and Trust Funds
11	Offsetting Receipts
12	Defense Health Program
13	Defense Environmental Restoration Program
14	Drug Interdiction and Counter-drug Activities
15	Overseas Cost Report
16	Intelligence Programs/Activities
17	Command, Control and Communications
18	Information Technology
19	Other Special Analyses

Volume 2 has been divided into two books for the convenience of the user because of the Volume size. Volume 2A and 2B are both necessary for the formulation and preparation of the budget.

Foreword	i
Volume Structure	ii
Table of Contents	iii
Summary of Changes	iv

Chapter detail Table of Contents are at the beginning of each chapter. Chapter page numbers are preceded by the number of the chapter (e.g., 9-2 and 19-50.)

SUMMARY OF VOLUME 2 CHANGES

Section Number	Changes
0101	All References to the Defense Business Operations Fund (DBOF) have been changed to the Defense Working Capital Funds (DWCF).
010108	Identifies revised location of security classification instructions for intelligence programs/activities.
010201	<p>Adds expense/investment criteria to determine financing for engineering efforts to satisfy deficiency.</p> <p>Adds expense/investment criteria to clarify funding policy for incidental material and conditional requirements identified during a modification.</p> <p>Defines service life extension programs that can be funded in Procurement and in O&M.</p> <p>Clarifies software funding policy.</p> <p>Deletes "with the exception of investment funded parts" to eliminate confusion.</p> <p>Updates the expense/investment dollar threshold.</p>
010202	<p>Expands discussion on the use of long lead material.</p> <p>Clarifies economic order quantity purchase requirements.</p>
010203	Clarifies multiyear procurement requirements for stable configuration, realistic cost estimates, present value analysis, support cost certification, cancellation ceilings, and economic order quantity purchase requirements.
010205	<p>Deletes section requiring Intrusion Detection Systems to be funded only in the Other Procurement appropriations or in the Capital Budget of the DWCF business area.</p> <p>Adds section regarding engineering change order funding.</p>
010205	Adds paragraph acknowledging engineering change order funding requirements.
010208	<p>Deletes requirement for acquisition pilot program documentation. Renumbers remaining sections.</p> <p>Clarifies funding policy for nondevelopmental item (NDI) procurement.</p> <p>Clarifies appropriation that can be used to procure NDI items.</p>
010209	Deletes paragraph regarding funding replenishment spares in procurement.
010210	Deletes statement that assets can be retained in the Special Defense Acquisition Fund.

Section Number	Changes
010212	<p>Updates Low Rate Initial Production (LRIP) reference and clarifies appropriations that can be used for LRIP.</p> <p>Adds sentence regarding lack of competition and prioritization if efforts are not properly categorized in RDT&E.</p> <p>Clarifies when it is appropriate to use procurement or O&M funding for product improvements (as long as no development or initial operational tests are required).</p> <p>Clarifies funding policy for low rate initial production assets.</p> <p>Adds paragraph for test article funding for space systems. Renumbers remaining paragraphs.</p>
010213	<p>Adds another method to fund RDT&E requirements.</p> <p>Adds paragraph acknowledging engineering change order funding requirements.</p>
010217	Clarifies the method for computing military personnel costs.
010218	<p>Policy allowing the recovery of Accumulated Operating Results over a 2-year period is added.</p> <p>Policy concerning recovery of unplanned losses in Depot Maintenance activity groups is explained.</p>
010219	<p>Revises capital budget thresholds.</p> <p>Upper limits for Minor Construction Project is increased to \$500,000.</p> <p>Upper Limit for minor construction projects intended solely to correct a deficiency that is life threatening, health threatening, or safety threatening is increased to \$1,000,000.</p> <p>Depreciation schedules are updated for changes in Software Development. New Depreciation schedules which comply with FASAB #6 are listed for use beginning in FY 2000.</p>
010223	<p>Procurement Glossary: Established as separate section.</p> <p>Adds and clarifies several definitions.</p>
010224	<p>RDT&E Glossary: Established as separate section.</p> <p>Adds definition for test article.</p>
010301	Modified to indicate that Capital budgets are to be submitted in landscape format.
010302	<p>Distribution addresses revised.</p> <p>Distribution copy requirements revised.</p> <p>Guidance to call budget receiving office prior to delivery added.</p>

Section Number	Changes
010401	Information Technology budget requirements revised and reviewing organization changed. Intelligence and C ³ program guidance referred to Chapters 16 and 17.
010403	Guidance on distribution of President's budget justification material significantly revised. Requirements for Internet sites <u>and</u> CD-ROM for President's budget justification material added. Distribution requirements changed for copy quantities. Internal DoD paper copy distribution essentially limited to classified budget documents. Unclassified will be placed on Internet sites. Guidance to call budget receiving office prior to delivery added.
010404	Security review procedures clarified.
010405	Processing procedures updated.
010406	Guidance on classified appeals added. Reference to individual oversight committees deleted. Appeals will be to conferees.
010501	Deletes FYDP from Budget Automation Requirements reporting. New Section 0107 established for the Automated Future Years Defense Program (FYDP).
010502	Procurement Annex renamed to Procurement Programs. Adds P-1R report and Procurement Cost Type codes "S" for Reserve Equipment (Memo Non-Add) and "T" for National Guard Equipment (Memo Non-Add).
010503	RDT&E Annex renamed to RDT&E Programs.
010505	Updates list of accounts which require an Obligation Plan as part of the budget estimate submission. Updates financing code stub entries for Budget Review System (BRS) Programming and Financing schedule and updates the table displaying relationship between OMB's Program and Financing (P&F) Schedule in OMB Circular A-11 and DoD's Budget Review System. Updates diagnostics for BRS error messages. Budget execution report SF 133 replaces the DD 1176. Adds Component/Suffix codes for NIMA, DTRTCA and DMEA. Changes DNA to DSWA, DIS to DSS and CPMS to DHRFA. Adds default object class Tx2551 – R&D Contracts for accounts 2040a, 1319n, 3600f and 0400d. General default object class has been changed to Tx26.01 – Supplies and Materials.

Section Number	Changes
	Provides updated extracts from the “Budget Accounts Title File Listing.”
010506	Name Edit System (NES) Structure and Description, subparagraph O. – Object Class 25.2 has been restricted to no more than 15 percent of the total Object Class 25 resources.
010603	Updates appropriations and budget activities by functional title for military functions.
	Under the Heading Functional Title – Revolving and Management Funds, the William Langer Jewel Bearing Plant Fund, ADP Equipment Management Fund, Emergency Response Fund – Defense, and the Navy Management Fund are eliminated. The Army Conventional Ammunition Working Capital Fund is listed until closed.
0107	Automated Future Years Defense Program Database section added.
0108	Automated C ³ ISR Database section added.
0109	Renumbered from 0107.
010903	PB-39 appeal formats modified.
	Congressional Insert formats modified.
010904	Title changed for forms DD2235, DD2236 and DD2236-2 to include both End Strength and Full-Time Equivalent data.
	Instructions for SD Form 463 updated to include Cost Type codes “R” and “T” for Reserve and National Guard Equipment memo non-add entries.
020202	Adds new verbiage to reflect the consolidation of the Basic Allowance for Quarters (BAQ) and the Variable Housing Allowance (VHA) into the Basic Allowance for Housing (BAH). Also adjusts required exhibits to reflect the change.
020205	Adds guidance regarding the M-1 exhibit for Active Personnel appropriations.
020304	Adds guidance regarding the M-1 exhibit for Reserve Personnel appropriations.
0204	Deletes exhibit and requirement for submission for the Military Retirement Fund.
020602	Incorporates legislative proposals on Military Personnel summary exhibits.
	Includes Active Duty for Special Work on Milpers Summary exhibits.
	Adds new exhibit (PB-30F-1) on officer gains by month.
	Adds new exhibit (PB-30F-2) on enlisted accessions by month.
020603	Incorporates legislative proposals on Reserve Personnel summary exhibits.
030201	Incorporates new instructions for downloading the Comptroller computer software from the Internet website for submission of the automated exhibits and emphasizes review requirements for submission. Also updates appropriations and accounts required to submit automated data.

Section Number	Changes
	Deletes section and requirement for non-DBOF (now Defense Working Capital Fund) unit cost areas.
030301	Operations Accounts Exhibits list updated. (July 1998 change)
030302	Corrects paragraph numbering by remarking “H” as “G” and adds narrative to reiterate that Components are responsible for cross checking data among the exhibits.
	Updates to Organization/Exhibit Requirements for Justification Books for following requirements: Vol I – adds O-1 and deletes PB-31C; Vol II – adds PB-15 and PB-28 and deletes PB-31R; Vol III – Moves Real Property Maintenance and Minor Construction exhibits to Volume II., deletes OP-27H requirement in this volume. Requirement now in Vol. 11A. (June/July 1998 Change)
	Updates Additional Accompanying Exhibits by deleting requirement for PB-28 (sic), Waste Minimization Capitalization Account which should have been PB-29.
	Adds requirement for all O&M Overview exhibits to reflect price and program changes.
0304	<p>OP-5 Exhibit is revised to include OP-5 attachments. (July 1998 change)</p> <p>OP-8 Updates to reflect changes in FTE reporting.</p> <p>OP-20H Removes exhibit from Chapter 3 and includes requirement in Chapter 11A.</p> <p>OP-24 Adds narrative, “Provide written explanation/justification for changes between fiscal years.”</p> <p>OP-30 Revises exhibit in its entirety.</p> <p>OP-32 Updates line items to reflect current expense categories.</p> <p>OP-34 Adds requirement to identify costs associated with Category D Commissary Support.</p> <p>OP-78 Revises exhibit in its entirety.</p> <p>OP-80 Replaces exhibit in its entirety.</p> <p>PBA Exhibits Adds requirement to include price and program changes and verify data on related exhibits.</p> <p>PBA-2 Adds new requirement and section on inventory.</p> <p>PBA-4 Adds requirement to identify costs and explanations at the subactivity group level.</p> <p>PBA-5 Adds requirements and section on description of operations financed.</p> <p>PBA-11 Adds requirement to include civilian end strength.</p> <p>PBA-12 Revises program data for consistency with guidance in Chapters 17 and 19.</p>

Section Number	Changes
	PBA-13 Clarifies section on First Destination Transportation major commodity.
	PBA-15 Adds new requirement and exhibit for Commissary Support.
	PBA-26 Adds requirement and section to identify total aircraft inventory.
	PB-31D Revises information requirement, primarily to include information by budget activity. (July 1998 change)
	PB-31Q Adds requirement to include narrative explanation for changes in direct and indirect hires.
0403	Increases budget exhibit threshold from \$2 million to \$5 million.
0405	Reduces justification material requirements for programs with a funding value less than \$5 million (only the P-40 and P-40a exhibits are required.)
040502	P-1 Deletes the unit cost column from the exhibit.
	P-3a Adds clarifying instructions for modifications.
	P-8a Reinstates P-8a, Analysis of Ship Cost Estimates - Major Equipment.
	P-11 Deletes requirement for P-11, Electronic Warfare (EW) Funding Summary.
	P-21b Deletes requirement for P-21b, Production Schedule by Facility (Ammunition.)
	P-26 Eliminates requirement for unneeded information.
	Multiyear Exhibits Adds clarifying instructions for multiyear programs.
050403	Deletes the paragraphs regarding comparison reports and project listing and establishes the comparison report as an exhibit.
050404	Deletes requirement for electronic file submission to Defense Technical Information Center (DTIC). Requirement is accomplished through internet posting by Military Departments and by OUSD(Comptroller) for Defense-wide (Defense Agency, etc.) accounts.
0505	R-2a Adds new exhibit for project information. Information requirements have not changed; however, the new exhibit clarifies previous information requirements.
	R-3 Modifies the exhibit to portray information in a different format and adds clarifying instructions.
060201	Threshold raised from \$300,000 to \$500,000 for unspecified minor construction that may be funded with O&M.
	Design status milestones added. Projects using parametric cost estimates should be considered zero percent designed.

Section Number	Changes
060202	<p>Scope of the Family Housing New Construction account increased to include design costs of contractors when performing a turnkey contract.</p> <p>NFIP Budget Subactivities added.</p>
060301	<p>Deletes requirement to include Program and Financing schedules in Military Construction justification books.</p> <p>Requirement that all requested construction projects be at least 35 percent designed at the time of the budget estimate submission is deleted. However, requested projects that will not obtain the 35 percent design stage by January 1 must be identified to the OUSD(C) Military Construction Directorate.</p>
060302	<p>Deletes requirement to include Program and Financing schedules in family housing justification books.</p> <p>Updates number of family housing leases allowed and calculations of maximum lease costs.</p> <p>Adds the FY 1988 budgeted foreign currency exchange rates used in the calculation of maximum lease costs in foreign countries.</p> <p>Requires a PB-18 Exhibit be submitted with the Budget Estimate Submission for family housing O&M accounts participating in the Foreign Currency Fluctuations, Construction, Defense appropriation.</p>
060305	<p>Requirement for the NATO Security Investment Program to submit a list of all requirements, construction and procurement, associated with NATO expansion added.</p>
060306	<p>Budget estimate submission requirements for the Family Housing Improvement Fund added.</p>
060402	<p>Deletes requirement to include Program and Financing schedules and Object Classification schedules in justification books provided to Congress.</p>
060403	<p>Construction completion date added to DD Form 1391 Supplemental data.</p> <p>Requirement to provide an updated Military Construction/Family Housing Outyear Project Data exhibit added.</p> <p>Requirement added to DD Form 1391 Design Data to indicate whether an energy study and a life-cycle cost analysis was performed in support of the design of the proposed facility.</p>
060502	<p>Requirement to identify antiterrorism force protection/physical security measures on the DD Form 1391, Military Construction Project Data, added.</p> <p>Military Construction/Family Housing Outyear Project Data Exhibit revised.</p> <p>Exhibit FH-1, Tri-Service Family Housing Cost Model, revised.</p>
070302	<p>Revised Budget Estimate Submission guidance requires separate justification books for each Base Closure account vice each Base Closure Commission action.</p>

Section Number	Changes
	Requirement for a BRAC Cost and Saving Exhibit (BC-02) added.
	Requirement to update prior year estimated savings to reflect actual savings added.
	BRAC O&M Summary OP-5 Exhibit no longer required.
	OP-5 Attachment 1, Reconciliation of Increases and Decreases, no longer required.
	OP-32 Exhibit, Summary of Price and Program Changes, no longer required.
	BRAC ENV-1A/B exhibits requirement added to provide environmental progress and funding priority for BRAC sites.
070502	DD Form 1391 Military Construction Project Data - requirement to identify antiterrorism force protection/physical security measures on the added.
	BRAC ENV-1A/B Exhibits added to provide environmental progress and funding priority for BRAC sites.
	OP-5 Exhibit deleted.
080105	Real Property Maintenance, Defense account deleted – no longer applicable.
	Definition of Repair and Maintenance added.
080201	Threshold raised from \$300,000 to \$500,000 for unspecified minor construction that may be funded with O&M.
080202	OP-27H, Historic Buildings and Housing Costs, no longer required.
090102	The establishment of the Defense Working Capital Funds (DWCF) is noted.
090103	Provides a formula for calculating the appropriate cash level for a DWCF organization. Adds requirement for notification to Revolving Funds Directorate and the Congress when advance billing of customers is required.
	Adds depreciation schedules for fiscal year 2000 and beyond.
	Establishes a new threshold of \$1,000,000 and above for requirement to prepare an economic analysis to justify a Capital Investment Program (CIP) project. A cost analysis must be prepared for projects below \$1,000,000.
	Revises upper limits for minor construction projects.
	Changes requirements for preparation and submission of post investment analysis.
	Provides guidance for requesting carryover authority for CIP.
	Updates guidance for Unutilized and Underutilized Plant Capacity.
	Clarifies guidance for computing military personnel costs.

**Section
Number**

Changes

Specifies the use of Percentage of Completion Method for Revenue Recognition starting in the year 2000 for all nonsupply activity groups.

Specifies rules related to AOR loss recovery over a 2-year period.

Provides for the recovery of unplanned losses at Depot Maintenance Activities during the year of execution.

Specifies prior approval of extraordinary write-offs.

090104 Provides option for developing rates at the activity level or product line level within an activity group.

090203 SM-5A Adds requirement for backup for President's Budget.

SM-8 Deletes requirement for OSD/OMB submit. Still required for backup to President's Budget.

090204 SM-8 Deletes requirement for OSD/OMB submit. Still required for backup to President's Budget.

Fund-7a Adds requirement for back up to President's Budget. Deletes requirement for inclusion in President's Budget.

090402 Fund-5a Requires breakout of individual amounts for DLSC, DAASC, and DRMS.

Fund-1A Modifies exhibit to bring it in line with OP-32 format.

Fund-3 Changes format to include Unit cost information.

Fund-6 Exhibit deleted.

Fund-7b Updated to reflect impact of revised AOR loss recovery.

Fund-9a Updates capital investment threshold. Lists new category for Software Development. Provides guidance for dollar threshold reporting within categories.

Fund 9b Updates reporting requirements.

Fund-14 Updates exhibit to reflect adjustments to NOR and AOR. Also provides for a new category to display items recommended for exclusion from rate recovery.

Fund-14A Adds exhibit for Supply Management Business Areas. Two Part Format.

Fund-20 Updates exhibit to report workyears vice end-strength by grade.

Fund-21 Updates exhibit to include revised reporting for Disadvantaged employment and other personnel programs previously excluded.

Fund-28 Updates Format.

Section Number	Changes
	Fund-29 Updates Format.
100101	Clarified status of the Conventional Ammunition Working Capital Fund.
100102	Deletes Navy Management Fund, Emergency Stock Fund, Department of the Navy Trust Revolving Fund, and Department of the Air Force Revolving Trust Fund.
100202	Deletes Navy Management Fund, Emergency Stock Fund, Department of the Navy Trust Revolving Fund, and Department of the Air Force Revolving Trust Fund.
100402	Deleted exhibits related to the Army Conventional Ammunition Working Capital Fund.
	Exhibit CT-1 Revised formulas for calculations. Added line items for Unobligated balances at beginning and end of year.
	Exhibit SP-1 Modified format.
120402	Significantly revises exhibits to reflect creation of TRICARE Management Activity and the realignment of program elements into new budget activities.
130105	Revises and expands actions included under Installation Restoration Program.
	Revises section on Other Hazardous Waste.
130202	Adds narrative requirement for submission of the OP-32, Price and Program Growth, exhibit as instructed in Chapter 3.
130302	Changes submission requirements for ENV 30D-E from OUSD (Comptroller), Operations and Personnel, to DUSD (Environmental Security.)
130401	Revises to clarify format for environmental restoration submission.
130402	Renames and revises exhibits ENV-30A-E.
140202	Adds requirement for Counter-drug Enforcement, Policy, and Support (CDEP&S) to provide copies of procurement and RDT&E budget exhibits to OUSD(C) Operations and Personnel Directorate.
140302	Revises PB-43, PB-44, PB-45, and PB-47 exhibits in their entirety.
150402	Adds instructions concerning OP-53 and OP-53A.
160101	Replaces Defense Intelligence Program (DIP) with National Foreign Intelligence Program (NFIP).
	Adds Joint Military Intelligence Program (JMIP).
160104	Guidance on changing Intelligence program elements added.
160105	Definitions of NFIP, JMIP and TIARA added.

Section Number	Changes
160202	Provides a more complete listing of the NFIP Components.
160203	JMIP submission requirements added.
160302	Replaces DIP with NFIP.
	Provides a more complete listing of NFIP Components.
160304	Services and Defense Agencies required to provide an electronic file of Budget Line Items to maintain Automated Command, Control, Communications, Intelligence, Surveillance and Reconnaissance (C ³ ISR) database.
160402	Provides guidance on classified appeals to congressional action on NFIP, JMIP, and TIARA programs.
160502	Provides guidance on Automated C ³ ISR database.
160602	Updates crosswalk exhibit IP Form 1.
170101	Updates Information Systems Security Program to include the newly established Defense-wide Information Assurance Program and updates remaining references to same.
170103	Adds a paragraph regarding the composition of C ³ programs. Renumbers remaining section.
170201	Adds a paragraph regarding the composition of C ³ programs. Renumbers remaining section.
170305	Adds paragraph to define relationship of C ³ Congressional Justification Book with Military Department and Defense Agency Justification Material.
1704	Adds section on automated reporting requirements.
1801	Chapter 18 has been rewritten in its entirety. Significant changes are as follows: <ul style="list-style-type: none"> - Elimination of the requirement to submit an IT-43; IT-2, 3, 4, 5 formats. - The Executive Summary is renamed to the IT Overview, and contains expanded justification materials, as well as a simple audit trail of changes from last submission to current. (Similar to the O&M trails). Requires a crosswalk to other exhibits. - The IT-1 is updated to meet new OMB Circular A-11 requirements. - The Mission categorization reporting is accommodated by the IT/DII Reporting Categories. - IT/DII reporting levels eliminate the defunct CIM terminology, and reflects the DII Master Plan categories that align to DoD Missions and IT Backbone Activities. - Definitions reflect the Clinger-Cohen Act of 1996 terminology and requirements. - The IT-2 is eliminated. - The category Major is aligned with DoD 5000 terminology.

Section Number	Changes	
	<ul style="list-style-type: none"> - Major Initiatives must be reported on new IT(300b) Capital Investment Justification Exhibit. This exhibit incorporates some of the information requirements of OMB Circular A-11, Exhibit 40B, on financial systems. - PY, CY, BY1, BY2 data are required; BY2+1-3 are required on the IT 300b, and are optional on the other exhibits. 	
1902	Adds new section on Combating Terrorism.	
190301	Updates the list of activities that are designated as Major Range and Test Facility Bases.	
190402	Expands the types of programs for which an Exhibit T&E-1 must be submitted.	
190501	Exhibit requirement revised to reflect OMB Circular A-11 dated July 1, 1998. (July 1998 change)	
190902	PB-14	Adds Functional Transfer exhibit.
	PB-15	Revises definitions for Advisory & Assistance Services and revises exhibit in its entirety.
	PB-16	Adds new exhibit to summarize legislative proposals.
	PB-17	Adds new exhibit for Employee Relocation Expenses.
	PB-18	Adds Singapore to country list.
	PB-19	Adds new exhibit for Contract Reporting by Appropriation
	PB-22	Revises exhibit to reflect changes of Management Headquarters Working Group.
	PB-25	Deleted section on Indirect Support.
	PB-28	Amplifies guidance for submission requirement.
	PB-28A	Adds new exhibit for Environmental Security Technology.
	PB-41	Adds requirement to submit the Congressional Justification/Presentation input by January 5 th of each year.
	PB-42	Exhibit revised. Renamed as Competition and Privatization. (July 1998 change)
	PB-50	Expands data requirements.
	PB-54	Adds new exhibit for Civilian Personnel Hiring Plan.
	PB-55	Adds new exhibit for International Military Headquarters.
191203	MRTFB-2a	Element of Expense Listing revised to include a FY PY-1 column.
	MRTFB-2d	Source of Direct Funds revised to include a FY PY-1 column.

**Section
Number****Changes**

191204	T&E-1	Revised to include FY PY-1, BY2+1, BY2+2, BY2+3 and BY2+4 columns.
	T&E-1	Revises guidance on Instructions for Exhibit T&E-1.

CHAPTER 1

GENERAL INFORMATION

0101 GENERAL POLICIES**010101 Purpose**

A. Volume 2 of the Financial Management Regulation (FMR) provides general guidance on the formulation and submission of the budget requests to the Office of the Secretary of Defense for the fall budget review and the presentation and justification of the budget requests to the Congress. This volume is established under the authority of DoD Instruction 7000.14.

B. Volume 2 of the FMR is intended as a comprehensive reference book on budget matters of the Department of Defense. Budget policy memoranda issued throughout the year will provide any necessary changes or revisions to this standing document, as well as special instructions and nonrecurring requirements unique to that year's budget cycle.

C. The provisions of Volume 2 apply to all military and civil functions of the Department of Defense including military assistance.

D. An introduction to the total Financial Management Regulation, DoD 7000.14-R can be found in Volume 1 of the Regulation.

010102 Organization

A. Volume 2 is organized into 19 chapters that provide specific guidance, required budget exhibits and formats along with instructions for their preparation, and automated submission requirements.

010103 Changes to Volume 2

A. Changes to Volume 2 will be issued biennially, prior to the fall budget review of the initial biennial budget cycle. Pen and ink changes will not be used.

B. Generally, significant changes on a page will be indicated by the paragraph or section containing a change being printed in *ITALICS*.

010104 Reports Control Symbol

Data requirements established by this volume are exempt from the requirement for assignment of a Report Control Symbol.

010105 Requests for Exceptions to OMB Circular A-11

A. Each year the Office of Management and Budget (OMB) issues Circular No. A-11 which addresses the preparation and submission of budget estimates for all Federal Agencies.

B. Federal agencies are allowed to request exceptions to the requirements of Circular A-11 by submitting in writing to OMB all required exceptions by August 1. Exceptions approved by OMB are valid only for 1 year.

C. Each year the USD(Comptroller) requests certain exceptions to OMB Circular A-11. Generally, these exceptions concern special situations that are unique to the Department of Defense.

1. Subsequent to the issuance of Circular A-11 by OMB each year, any DoD Component requiring an exception to the requirements of Circular A-11 should submit in writing the specific section for which an exception is required and provide adequate rationale to justify the exception. The memorandum addressing the requested exceptions should be submitted directly to the Office of the USD(Comptroller), Program/Budget, Plans and Systems Directorate (Room 3A862, telephone (703) 697-9171) no later than July 15 of each year.

2. If the requested exception is acceptable to the USD(Comptroller), these proposals will be consolidated and forwarded to OMB for approval. Components will be advised of any exceptions approved by OMB.

3. All DoD Components are required to comply with any requested exceptions not approved and to properly reflect the information in the budget submissions.

010106 Proposed Changes in Budget Structure and Appropriation Language

A. Under the provisions of OMB Circular A-11, the following types of changes must be cleared with OMB:

1. Changes in the appropriation pattern, including proposed new accounts and changes in the titles and sequence of existing accounts.

2. Changes in the methods of funding a program.

3. Changes in program or budget activity classifications for the program and financing schedules for all appropriation accounts and funds.

B. Any proposed changes on the items listed above must be submitted in a memorandum to the Office of the USD(Comptroller) that explains the proposal and the rationale for the changes. If acceptable to the USD(Comptroller), these proposals will be forwarded to OMB for approval.

C. Proposed changes in the wording of appropriation language should be submitted to the Office of the Deputy General Counsel (Fiscal) (Room 3D961, telephone (703)695-5864) as soon as possible after the passage of the current year's appropriation act. ODGC(Fiscal) will coordinate changes with OMB.

010107 Budget Terminology/Definitions

A. Standard Government-wide definitions of budget terminology are provided in the Office of Management and Budget issuance's, most notably Circulars A-11 (Section 14.1) and A-34 (Chapter 1).

B. For the Department of Defense, some of the more common budget concepts applicable to budget formulation follow:

1. Accrual Basis of Accounting: A method of accounting in which revenues are recognized in the period earned and costs are recognized in the period incurred, regardless of when payment is received or made. There have been many initiatives over the years to convert the Federal Budget to an accrual accounting basis. Although the budget is on a cash basis, DoD accounting is on the accrual basis.

2. Advance Procurement: Authority provided in an appropriations act to obligate and disburse during a fiscal year before that in which the related end item is procured. The funds are added to the budget authority for the fiscal year and deducted from the budget authority of the succeeding fiscal year. Used in major acquisition programs for advance procurement of components whose long-lead-time require purchase early in order to reduce the overall procurement lead-time of the major end item. Advance procurement of long lead components is an exception to the DoD "full funding" policy and must be part of the President's budget request.

3. Appeal: A request for reconsideration of an action taken to adjust, reduce, or delete funding for an item during the congressional review of the defense budget (authorization and appropriation). This process is discussed in Section 010406.
4. Apportionment: A distribution by the Office of Management and Budget of amounts available for obligation in appropriation or fund accounts of the Executive Branch. The distribution makes amounts available on the basis of specified time periods, programs, activities, projects, objects, or combinations thereof. The apportionment system is intended to achieve an effective and orderly use of funds. The amounts so apportioned limit the obligations that may be incurred.
5. Appropriations: A provision of legal authority by an act of the Congress that permits Federal agencies to incur obligations and to make payments out of the Treasury for specified purposes. An appropriation usually follows enactment of authorizing legislation. An appropriation act is the most common means of providing budget authority (see Budget Authority). Appropriations do not represent cash actually set aside in the Treasury for purposes specified in the appropriation act; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts.
6. Authorization (Authorizing Legislation): Basic substantive legislation enacted by the Congress which sets up or continues the legal operation of a Federal program or agency either indefinitely or for a specific period of time or sanctions a particular type of obligation or expenditure within a program. Such legislation is normally a prerequisite for subsequent appropriations or other kinds of budget authority to be contained in appropriation acts. It may limit the amount of budget authority to be provided subsequently or may authorize the appropriation of "such sums as may be necessary."
7. Biennial Budget: The FY1986 Department of Defense Authorization Act required the submission of two-year budgets for the Department of Defense and related agencies beginning with FY 1988/FY 1989. The Department has fully institutionalized a biennial cycle for the Planning, Programming, and Budgeting System (PPBS), including the Defense Guidance (DG), the Program Objective Memorandum (POM), Volume 2 of the Financial Management Regulation (FMR) and budget formulation memoranda. A biennial budget, as currently structured, represents program budget estimates for a two-year period in which fiscal year requirements remain separate and distinct.
8. Budget Activity: Categories within each appropriation and fund account which identify the purposes, projects, or types of activities financed by the appropriation or fund.
9. Budget Amendment: A formal request submitted to the Congress by the President, after his formal budget transmittal but prior to completion of appropriation action by the Congress, that revises previous requests, such as the amount of budget authority.
10. Budget Authority: The authority becoming available during the year to enter into obligations that result in immediate or future outlays of Government funds.
11. Budget Deficit: The amount by which the Government's budget outlays exceed its budget receipts for any given period. Deficits are financed primarily by Treasury borrowing from the public.
12. Budget Receipts: Amounts received by the Federal Government from the public that arise from the exercise of governmental or sovereign power (primarily tax revenues, but also receipts from premiums of compulsory social insurance programs, court fines, license fees, etc.); premiums from voluntary participants in Federal social insurance programs; and gifts and contributions. Excluded from budget receipts are collections resulting from business-type transactions and payments between government accounts as a result of intragovernmental transactions.

13. Closed (Canceled) Accounts: An appropriation that is no longer available for the adjustment or payment of obligations. Appropriations are closed (canceled) after being in the expired status for five years. Once these appropriations are closed (canceled), no payments or adjustments may be made. (See Expired Appropriation.)

14. Concurrent Resolution: A resolution passed by both Houses of Congress, but not requiring the signature of the President, setting forth, reaffirming, or revising the congressional budget for the United States Government for a fiscal year. A concurrent resolution on the budget, due by April 15, must be adopted before legislation providing new budget authority, new spending authority, new credit authority or changes in revenues or the public debt limit is considered. Other concurrent resolutions for a fiscal year may be adopted at any time following the first required concurrent resolution for that fiscal year.

15. Constant Dollars: A dollar value adjusted for changes in prices. Constant dollar series are derived by dividing current dollar estimates by appropriate price indices, a process generally known as deflating. The result is a time series as it would presumably exist if prices were the same throughout as in the base year - in other words, as if the dollar had constant purchasing power. Any changes in such a series would reflect only changes in the real (physical) volume of output. Constant dollar figures are commonly used for gross national product and its components.

16. Continuing Resolution: Legislation enacted by the Congress to provide budget authority for specific ongoing activities in cases where the regular fiscal year appropriation for such activities has not been enacted by the beginning of the fiscal year. The continuing resolution usually specifies a maximum rate at which the agency may incur obligations, based on the rate of the prior year, the President's budget request, or an appropriation bill passed by either or both Houses of the Congress.

17. Controllability: The ability under existing law to control budget authority or outlays during a given fiscal year. "Relatively uncontrollable" usually refers to spending that cannot be increased or decreased without changes in existing substantive law. At the Federal budget level, the largest part of such spending is the result of open-ended programs and fixed costs, such as social security and veterans' benefits. For defense, controllability is limited by the payments due under obligations incurred during prior years.

18. Current Services Estimates: Estimated budget authority and outlays for the upcoming fiscal year based on continuation of existing levels of service, i.e., assuming that all programs and activities will be carried on at the same level as in the fiscal year in progress and without policy changes in such programs and activities. These estimates of budget authority and outlays, accompanied by the underlying economic and programmatic assumptions upon which they are based (such as the rate of inflation, the rate of real economic growth, pay increases, etc.), are required to be transmitted by the President to the Congress.

19. Deferral of Budget Authority: Any action or inaction by any officer or employee of the United States that withholds, delays, or effectively precludes the obligation or expenditure of budgetary resources, including the establishment of reserves under the Antideficiency Act, as amended by the Impoundment and Control Act. Section 1013 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting a proposed deferral of budget authority. Deferrals may not extend beyond the end of the fiscal year in which the message reporting the deferral is transmitted and may be overturned by the passage of an impoundment resolution by either House of Congress.

20. Disbursements: In budgetary usage, gross disbursements represent the amount of checks issued, cash, or other payments made, less refunds received. Net disbursements represent gross disbursements less income collected and credited to the appropriation or fund account, such as amounts received for goods and services provided.

21. Expenditures/Disbursements: A term generally used interchangeably with outlays.

22. Expired Appropriation: An appropriation whose period of availability for incurring new obligations has expired but the appropriation is not closed (canceled). During this period, the appropriation is

available for adjustment to, or payment of, existing obligations. Appropriations remain in an expired status for five years as shown in the table below. At the end of the five-year expiration period, the appropriation is closed (canceled) and is no longer available for the payment of unliquidated obligations. (See Closed (Canceled) Accounts.)

Life Cycle of Appropriations:

<u>Approp</u>	<u>Years For</u>		
	<u>New</u> <u>Obliga-</u> <u>tions</u> <u>Unexpired</u>	<u>Obligation</u> <u>Adjust. &</u> <u>Disburse.</u> <u>Expired</u>	<u>Closed</u> <u>End of</u> <u>Year</u> <u>Canceled</u>
MilPers	1	2-6	6
O&M.	1	2-6	6
RPM,D	2	3-7	7
RDT&E	2	3-7	7
Proc.	3	4-8	8
SCN	5	6-10	10
Mil. Con.	5	6-10	10

23. **Federal Debt:** Federal debt consists of public debt and agency debt. Public debt is that portion of the Federal debt incurred when the Treasury Department or Federal Financing Bank (FFB) borrows funds directly from the public or another fund or account. Agency debt is that portion of the Federal debt incurred when a Federal agency authorized by law, other than Treasury or the Federal Financing Bank, borrows funds directly from the public or another fund or account.

24. **Fiscal Year:** Any yearly accounting period without regard to its relationship to a calendar year. The fiscal year for the Federal Government begins on October 1 and ends on September 30. The fiscal year is designated by the calendar year in which it ends. Fiscal years are further designated as follows:

Past Year-1: Also referred to as Prior Year-1, the fiscal year immediately preceding the past year.

Past Year (PY): Also referred to as Prior Year, the fiscal year immediately preceding the current year; the last completed fiscal year.

Current Year (CY): The fiscal year in progress. Immediately precedes the budget year.

Budget Year (BY): The next fiscal year for which estimates are submitted if not a biennial budget.

Budget Year 1 (BY1): In a biennial budget submission (Department of Defense), the first fiscal year of a two-year period for which the budget is being considered.

Budget Year 2 (BY2): In a biennial budget submission (Department of Defense), the second fiscal year of a two-year period for which the budget is being considered

Budget Year(s)+1 (BY(s)+1): The fiscal year immediately following the budget year(s). This format continues through Budget Year +5 (BY+5), the fifth fiscal year following the budget year(s).

25. **Full Funding Policy:** The practice of funding the total cost of major procurement and construction projects in the fiscal year in which they will be initiated. See Section 010202 for further information.

26. **Full-time Equivalent (FTE):** Reflects the total number of regular straight-time hours (i.e., not including overtime or holiday hours) worked by employees divided by the number of compensable hours applicable

to each fiscal year. Annual leave, sick leave and compensatory time off and other approved leave categories are considered to be “hours worked” for purposes of defining full-time equivalent employment.

27. Future Years Defense Program (FYDP): The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data and force structure over a six-year period (force structure for an additional 3 years), portraying this data by major force program for internal DoD review and by appropriation for congressional review.

28. Impoundment: Any action or inaction by an officer or employee of the United States that precludes the obligation or expenditure of budget authority provided by the Congress.

29. Impoundment Resolution: A resolution of the House of Representatives or the Senate disapproving a deferral of budget authority set forth in a special message ordinarily transmitted by the President under section 1013 of the Impoundment Control Act of 1974. Passage of an impoundment resolution by either House of Congress has the effect of overturning the deferral and requires that such budget authority be made available for obligation.

30. Incremental Funding: The phasing of total funding of programs or projects over two or more fiscal years based upon levels and timing of obligational requirements for the funds. Differs from full funding concept where total funds for an end item, program or project are provided in the fiscal year of program or project initiation, regardless of the obligational requirement for the funds.

31. Multiyear Procurement: Procurement of a particular end item or system under a multiyear contract approved by specific provision of law. For the Department of Defense, multiyear procurement contracting of military hardware or systems must be specifically, and individually, approved by the Congress.

32. Object Classification: A uniform classification identifying the transactions of the Federal Government by the nature of the goods or services purchased without regard to the agency involved or the purpose of the programs for which they are used.

33. Obligations: Amounts of orders placed, contracts awarded, services received, or similar transactions made by Federal agencies during a given period, which will require outlays during the same or some future period.

34. Outlays: The amount of checks issued or other payments made (including advances to others), net of refunds and reimbursements. Outlays are net of amounts that are adjustments to obligational authority. The terms “expenditure” and “net disbursement” are frequently used interchangeably with the term “outlay”. Gross outlays are disbursements and net outlays are disbursements (net of refunds) minus reimbursements collected.

35. President’s Budget: The budget for a particular fiscal year transmitted to the Congress by the President in accordance with the Budget and Accounting Act of 1921, as amended. Some elements of the budget, such as the estimates for the legislative branch and the judiciary, are required to be included without review by the Office of Management and Budget or approval by the President.

36. Program Budget Decision (PBD): A budget decision document issued during the joint review of Service budget submissions by analysts of the Office of the Secretary of Defense (OSD) and the Office of Management and Budget (OMB). PBDs reflect the decisions of the Secretary of Defense as to appropriate program and funding to be included in the annual defense budget request which, in turn, is included in the President’s Budget.

37. Program Decision Memorandum (PDM): A document containing the decisions by the Secretary of Defense on the program and resource levels identified in the Program Objectives Memorandum.

38. Program Objectives Memorandum (POM): The final product of the programming process within the Department of Defense, the Program Objectives Memorandum (POM) displays the resource allocation decisions of the Military Departments in response to and in accordance with Defense Guidance.

39. Program Year: The fiscal year in which authorization was provided and in which funds were appropriated for a particular program, regardless of the fiscal year in which funds for that program might be obligated.

40. Reapportionment: A revision by the Office of Management and Budget of a previous apportionment of budgetary resources for an appropriation or fund account. A revision would ordinarily cover the same period, project, or activity covered in the original apportionment.

41. Reappropriation: Congressional action to restore the obligational availability, whether for the same or different purposes, of all or part of the unobligated portion of budget authority that has expired or would otherwise expire in an annual or multi-year account. Obligational authority in a current account may also be extended by a subsequent appropriation act.

42. Reconciliation Process: A process used by the Congress to reconcile amounts determined by tax, spending, and debt legislation for a given fiscal year with the ceilings enacted in the second and required concurrent resolution on the budget for that year. Section 310 of the Congressional Budget and Impoundment Control Act of 1974 provides that the second required concurrent resolution on the budget, which sets binding totals for the budget, may direct committees to determine and recommend changes to laws, bills, and resolutions, as required to conform with the binding totals for budget authority, revenues, and the public debt.

43. Recovery of Prior Year Obligations: Amounts made available in no year and unexpired multi-year accounts through downward adjustment of prior year obligations.

44. Reimbursements: Sums received by the Government for commodities sold or services furnished either to the public or to another Government account that are authorized by law to be credited directly to specific appropriation and fund accounts. These amounts are deducted from the total obligations incurred (and outlays) in determining net obligations (and outlays) for such accounts.

45. Reprogramming: Utilization of funds in an appropriation account for purposes other than those contemplated at the time of appropriation. Reprogramming is generally accomplished pursuant to consultation with and approval by appropriate congressional committees. Instructions will be contained in Volume 3 of this regulation.

46. Rescission: The consequence of enacted legislation which cancels budgetary resources previously provided by the Congress prior to the time when the authority would otherwise lapse. Section 1012 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting any proposed rescission of budgetary resources. These proposals may be accepted in whole or in part through the passage of a rescission bill by both Houses of the Congress.

47. Rescission Bill: A bill or joint resolution that provides for cancellation, in whole or in part, of budgetary resources previously granted by the Congress. Under Section 1012 of the Impoundment Control Act of 1974, unless Congress approves a rescission bill within 45 days of continuous session after receipt of the proposal, the budgetary resources must be made available for obligation.

48. Revolving Fund: A fund established to finance a cycle of operations through amounts received by the fund. Within the Department of Defense, such funds include the Defense Working Capital Fund, as well as other working capital funds.

49. Sequestration: The reduction or cancellation of new budget authority; unobligated balances, new loan guarantee commitments or limitations; new direct loan obligations, commitments, or limitations; spending

authority; and obligation limitations. OMB Circular A-11, section 14.2(e) provides additional guidance on sequestration rules of the Budget Enforcement Act of 1990 (BEA).

50. Supplemental Appropriation: An act appropriating funds in addition to those in an annual appropriation act. Supplemental appropriations provide additional budget authority beyond original estimates for programs or activities (including new programs authorized after the date of the original appropriation act) for which the need for funds is too urgent to be postponed until enactment of the next regular appropriation act.

51. Total Obligational Authority (TOA) Availability: The sum of (1) all budget authority granted (or requested) from the Congress in a given year, (2) amounts authorized to be credited to a specific fund, and (3) unobligated balances of budget authority from previous years which remain available for obligation. In practice, this term is used primarily in discussing the Department of Defense budget, and most often refers to TOA as “program” which equates to only (1) and (2) above.

52. Transfer Authority: Authority provided by the Congress to transfer budget authority from one appropriation or fund account to another.

010108 Security Classifications

A. General

1. Instructions concerning premature disclosure of budget information prior to presentation to the Congress are contained in OMB Circular A-11.

2. Instructions concerning security classification of the budget estimates submissions to OSD are contained in Section 010305.

3. Instructions concerning security classification of congressional justification material are contained in Section 010401.

B. Classification of Procurement Exhibit P-1 line items, RDT&E Exhibit R-1 line items, and the Construction Programs (C-1):

1. Procurement Exhibit P-1 line items: P-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program’s Security Classification Guide so dictates and when conditions in paragraph C.1. (below) apply.

2. RDT&E Exhibit R-1 line items: R-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program’s Security Classification Guide so dictates and when conditions in paragraph C.1. (below) apply.

3. The Construction Programs (C-1) is designed to be an unclassified document. See Section 010504 for instructions.

C. Security classification instructions for Intelligence Programs/Activities Resource Information are contained in Chapter 16

0102 FUNDING POLICIES**010201 Criteria for Determining Expense and Investment Costs**

A. Appropriation accounts form the structure for the President's budget request and are the basis for congressional action. The appropriations are further organized into budget activities of appropriations with programs, projects or activities of similar purposes. To support management of the Department of Defense's programs, projects or activities, resource requirements should be organized and categorized consistently within the appropriation and budget activity structure. The following sections provide guidance for categorizing resource requirements into the various appropriations.

B. Basic Distinctions Between Expense and Investment Costs. The criteria for cost definitions consider the intrinsic or innate qualities of the item such as durability in the case of an investment cost or consumability in the case of an operating cost and the conditional circumstances under which an item is used or the way it is managed. In all cases where the definitions appear to conflict, the conditional circumstances will prevail. The following guidance is provided to determine whether a cost is either an expense or an investment. All costs are classified as either an expense or an investment.

1. Expenses are the costs incurred to operate and maintain the organization, such as personal services, supplies, and utilities.

2. Investments are the costs that result in the acquisition of, or an addition to, end items. These costs benefit future periods and generally are of a long-term character such as real property and personal property.

C. Policy for Expense and Investment Costs.

1. DoD policy requires cost definition criteria that can be used in determining the content of the programs and activities that comprise the Defense budget. The primary reasons for these distinctions are to allow for more informed resource allocation decisions and to establish criteria for determining which costs are appropriate to the various defense appropriations.

2. The cost definition criteria contained in this policy are only applicable to the determination of the appropriation to be used for budgeting and execution. Cost definitions for accounting purposes are contained in Volume I of this regulation.

3. Costs budgeted in the Operation and Maintenance (O&M) and Military Personnel appropriations are considered expenses. Costs budgeted in the Procurement and Military Construction appropriations are considered investments. Costs budgeted in the Research, Development, Test and Evaluation (RDT&E), Base Realignment and Closure (BRAC), and Family Housing appropriations include both expenses and investments. Definitions for costs within the Defense Working Capital Funds are provided in Chapter 9 and Section 010214.

4. Items procured from the Defense Working Capital Funds will be treated as expenses in all cases except when intended for use in weapon system outfitting, government furnished material (GFM) on new procurement contracts, or for installation as part of a weapon system modification, major reactivation, or major service life extension.

D. Procedures for Determining Expenses Versus Investments. The following criteria will be used to distinguish those types of costs to be classified as expenses from those to be classified as investments for budgeting purposes:

1. Expenses. Expenses are costs of resources consumed in operating and maintaining the Department of Defense. When costs generally considered as expenses are included in the production or construction

of an investment item, they shall be classified as investment costs. Military personnel costs are an exception to this rule. The following guidelines shall be used to determine expense costs:

- Labor of civilian, military, or contractor personnel.
- Rental charges for equipment and facilities.
- Food, clothing, and fuel.
- Supplies and materials designated for supply management of the Defense Working Capital Funds.
- Maintenance, repair, overhaul, rework of equipment.
- Assemblies, spares and repair parts, and other items of equipment that are not designated for centralized item management and asset control and which have a system unit cost less than the currently approved dollar threshold of \$100,000 for expense and investment determinations. This criterion is applied on the basis of the unit cost of a complete system rather than on individual items of equipment or components that, when aggregated, become a system. The concept of a system must be considered in evaluating the procurement of an individual end item. A system is comprised of a number of components that are part of and function within the context of a whole to satisfy a documented requirement. In this case, system unit cost applies to the aggregate cost of all components being acquired as a new system.
- *Cost of incidental material and items that are not known until the end item is being modified are conditional requirements and are considered expenses because the material is needed to sustain or repair the end item.*
- *Engineering efforts to determine what a modification will ultimately be or to determine how to satisfy a deficiency are expenses.*
- Real property maintenance, including facility maintenance and repair and O&M-funded minor construction projects.

2. Investments. Investments are costs to acquire capital assets such as real property and equipment. The following criteria shall be used to determine those costs to be classified as investments:

- All items of equipment, including assemblies, ammunition and explosives, modification kits (*the components of which are known at the outset of the modification*), spares and repair parts not managed by the Defense Working Capital Funds, that are subject to centralized item management and asset control.
- All equipment items that are not subject to centralized item management and asset control and have a system unit cost equal to or greater than the currently approved expense and investment dollar threshold of \$100,000. The validated requirement may not be fragmented or acquired in a piecemeal fashion in order to circumvent the expense and investment criteria policy.
- Construction, including the cost of land and rights therein (other than leasehold). Construction includes real property equipment installed and made an integral part of such facilities, related site preparation, and other land improvements. (See paragraph F below for special guidance concerning real property facilities.)
- The costs of modification kits, assemblies, equipment, and material for modernization programs, ship conversions, major reactivations, major remanufacture programs, major service life extension programs, and the labor associated with incorporating these efforts into or as part of the end item are considered investments. All items included in the modification kit are considered investment even though some of the individual items may otherwise be considered as an expense. *Components that were not part of the modification content at the outset and which are subsequently needed for repair are expenses.* The cost of labor for the installation of modification kits and assemblies is an investment.

- Supply management items of the Defense Working Capital Funds designated for weapon system outfitting, government-furnished material on new procurement contracts, or for installation as part of a weapon system modification or modernization, major reactivation or major service life extension.
- Also considered as investments are support elements such as data, factory training, support equipment and interim contractor support (ICS), which are required to support the procurement of a new weapon system or modification.

3. Conditional Cases. The following are conditional cases that take precedence over the criteria contained in paragraphs 1 and 2 above:

- *A major service life extension program financed in Procurement extends the life of a weapon system beyond its designed service life. Depot maintenance financed in O&M is the maintenance that ensures the weapon system reaches its designed service life.*
- Initial outfitting of an end item of investment equipment, such as a ship or aircraft, with the furnishings, fixtures, and equipment necessary to make it complete and ready to operate is a part of the initial investment cost. Material procured through the Defense Working Capital Funds for initial outfitting will be financed by procurement appropriations when drawn from the supply system. This concept includes changes to the allowance lists of ships, vehicles, and other equipment. Changes to allowance lists will be budgeted as investment costs.
- Initial outfitting of a facility construction project financed by a Military Construction appropriation is financed as either expense or investment based on the general criteria. Collateral equipment and furnishings are not considered construction costs since these items are movable and are not installed as an integral part of the facility.
- When family housing is initially outfitted with kitchen equipment to include refrigerator, shades, carpeting, etc., these items are considered part of the construction costs.
- Construction program costs, associated with construction management in general, as distinguished from supervision of specific construction projects, are expenses. Costs incident to the acquisition (i.e., design, direct engineering, technical specifications) and construction of a specific project are investments. The cost of administering the real property maintenance program is an expense at all levels.
- Costs of minor construction projects, not financed by Military Construction appropriations, meeting the current criterion for funding from appropriations available for operation and maintenance are considered expenses. However, this definition does not abrogate the prohibition against the planned acquisition of, or improvements to, a real property facility through a series of minor construction projects (i.e., incremental construction).
- The cost of civilian personnel compensation and other direct expenses (i.e., travel, office equipment leasing, maintenance, printing and reproduction) incurred in support of procurement and/or production programs by departmental headquarters staff, contracting offices, contract audit offices, system project offices, and acquisition managers are expenses. Procurement and/or production direct support costs such as production testing, quality assurance, production engineering, and equipment assembly, whether performed under contract or by in-house personnel funded on a reimbursable basis are investments.
- When investment equipment is to be installed in a real property facility, the costs of both the equipment and its installation are considered investments.

E. Special Guidance Concerning General Purpose Communications and Information Systems Procurement. The following is guidance to apply the expense and investment criteria to general purpose communications and information systems.

1. New Equipment and System Procurement. The aggregate cost of new equipment and systems, including peripherals and system unique software, procured to address a requirement validated in an approved requirement document will be used to determine whether it should be treated as an expense or investment cost. The

determination of expense or investment cost will be applied on the basis of each system in the requirements document, if the document includes more than one system.

2. Additional or Replacement Equipment and System Procurement. When new requirements necessitate adding, replacing or modifying equipment or software that is a component of, or supports the functioning of an existing system, only the additional equipment and software procurement costs will be used to determine whether it should be treated as an expense or investment cost. Upgrades to an existing system involving multiple equipment component and software changes that are combined to address validated system deficiencies or to improve system performance will be treated as new equipment or system procurement in determining the applicability of the expense and investment criteria.

3. Software. *If only software is being procured and its intended use is to replace operational software, the cost is an expense funded in O&M. If the software requires developmental testing or initial operational test and evaluation (IOT&E) by an independent test agency, the expense is funded in RDT&E. If software is required for RDT&E test purposes, the cost is funded in RDT&E. Further guidance on funding information systems is found in Section 010212, paragraph C.10., Information Systems Costs.*

4. Requirements Determinations. The validated requirement for, or upgrade to, a communications or information system may not be fragmented or acquired in a piecemeal fashion in order to circumvent the expense and investment criteria policy.

F. Special Guidance Concerning Real Property Facilities

1. Construction includes real property equipment (often called installed equipment) which is affixed and built into a facility as an integral part of a facility. The cost of this equipment and its installation is part of the construction cost.

2. Items of equipment that are movable in nature and not affixed as an integral part of a facility are not normally considered construction costs, except for initial outfitting of family housing, as detailed in paragraph D3 above. This equipment includes all types of production, processing, technical, information systems, communications, training, servicing and RDT&E equipment. The cost of this equipment is an expense or an investment according to the policy criteria above. In addition, modifications to an existing facility required to support the installation of movable equipment, such as the installation of false floors or platforms, prefabricated clean rooms, or utilities, will be considered an integral part of the equipment costs. As such, the costs are either expense or investment, as long as the modifications do not include structural changes to the building. If the modifications include structural changes, they will be considered investment costs and budgeted as construction.

G. Expense/Investment Cost Determination

Expense/Investment Cost Determination						
Is the item a	If	Then	If	Then	If	Then
Centrally Managed/Asset Controlled Item?	Yes	Is the item purchased from DWCF?	Yes	Is the item part of a full funding effort? *	Yes	Classify as Investment
			No	Classify as Investment	No	Classify as Expense
	No	Is the unit cost more than \$100,000?	Yes	Classify as Investment		
			No	Classify as Expense		
* When intended for use in weapon system outfitting, government furnished material on new procurement contracts or for installation as part of a weapon as part of a weapon system modification, major reactivation or major service life extension.						

010202 Full Funding of Procurement Programs

A. Policy for Full Funding. It is the policy of the Department of Defense to fully fund procurements that are covered within the procurement title of the annual DoD Appropriations Act. There are 2 basic policies concerning full funding.

1. The first is to provide funds at the outset for the total estimated cost of a given program so that the Congress and the public can be fully aware of the dimensions and cost when the program is first presented in the budget.

2. The second is to provide funding each fiscal year to procure a complete, usable end item. In other words, an end item budgeted in a fiscal year cannot depend upon a future year's funding to complete the procurement. However, efficient production of major defense systems has necessitated two general exceptions to this policy - advance procurement for long leadtime items and advance economic order quantity (EOQ) procurement. EOQ is normally associated with multiyear procurements but can be requested for annualized procurements on an exception basis for unusual circumstances (such as combined parts buys for a block of satellites). Both efforts must be identified in an Exhibit P-10, Advance Procurement, when the Budget Estimate Submission is submitted to OSD and when the President's budget request is submitted to the Congress.

B. Procedures for Full Funding

1. Cost Estimates. Full funding applies to an initial estimate and can exist only at a point in time because estimates change. However, the Future Years Defense Program (FYDP) shall be a consistently reliable foundation for stating the total cost of acquiring defense systems. Thus, the FYDP shall reflect a DoD Component's best estimate at completion of the program. The estimate should reflect the most likely cost of a procurement. Program estimates shall be kept current and fully financed through the Planning, Programming, and Budgeting System (PPBS) process and established reprogramming procedures.

2. Time-Phased Procurement. Within defense system acquisition programs, nonrecurring costs and costs of certain production items related to, but not integral to, the end item of equipment are considered part of the overall acquisition cost. DoD Components shall plan and budget in a manner to ensure completion of the nonrecurring effort or delivery of such production items consistent with the planned delivery of the associated end items. That is, the programming and budgeting shall be on a time-phased "leadtime away" or "need to commit" basis. The Funded Delivery Period is part of the process to determine the quantities required to be budgeted in a particular fiscal year. DoD Components may not budget funds for obligation for items such as support, trainers, or data before the design or specifications of such items are essentially complete. These items shall be budgeted on an "ability to contract" basis as well as on a "leadtime away" basis.

3. Advance Procurement (Long Leadtime Items). Advance procurement requests for long leadtime items shall be limited to the end items in major procurement appropriations. Long leadtime procurements shall be for components, parts, and material whose leadtimes are greater than the life of the appropriation (3-5 years). In some circumstances, Advance Procurement is also warranted when items have significantly longer leadtimes than other components, parts, and material of the same end item or when efforts must be funded in an advance procurement timeframe in order to maintain a planned production schedule. For new development programs, the planned production schedule should be based on a full funding basis *without the use of long lead material. Planning the program content this way provides additional flexibility should development delays arise. When advance procurement is part of the program, however,* the cost of components, material, parts, and effort budgeted for advance procurement shall be relatively low compared to the remaining portion of the cost of the end item. Each budget request for advance procurement shall represent, at a minimum, the termination liability associated with the total cost of the long leadtime components, material, parts, and effort for which the advance procurement request is being made. The termination liability should not cover the cost of the end item budgeted in the following fiscal year(s). The full cost of components, material, parts, and effort included in the advance procurement request should be budgeted in the FYDP consistent with full funding procedures. The budget requests will properly debit and credit advance procurement budget requests as defined in Exhibits P-1, P-5, P-10 and P-40 instructions.

4. Economic Order Quantity (EOQ) Procurement. *EOQ is normally associated with multiyear procurements but can be requested for annualized procurements on an exception basis for unusual circumstances (such as combined parts buys for a block of satellites).* It is the general policy of the Department of Defense not to create unfunded contract liabilities for EOQ procurements. Rather, funding for EOQ procurements shall be included in advance procurement budget requests unless an exception to the general policy is granted by the USD(Comptroller). The EOQ procurement may satisfy procurement requirements for no more than five program years. Unless it would be more effective to fully fund the EOQ, or the USD(Comptroller) has granted an exception to the general policy to allow inclusion of EOQ costs in a cancellation clause, the advance procurement funding for an EOQ procurement shall cover, at a minimum, the estimated termination liability of the EOQ procurement.

5. Relationship of Budgeting and Contracting. An end item is fully funded only when funds are budgeted, programmed and available to cover the total estimated cost of the item at the time the procurement action is begun. Contracting, on the other hand, is a part of the execution phase or acquisition process within the framework of a program. The number of contracts required to procure a defense system, the type of contract awarded, and the timing of the award have no bearing upon whether or not an item is fully funded. In executing a program, no procurement of material or equipment, or work or services therefor, shall be directed or implemented unless the full program amount is available, except for authorized economical order quantity (EOQ) and advance procurement. For multiyear contracts, the test of full funding does not include the cancellation ceiling associated with items in the FYDP to be procured in fiscal years not yet funded (that is, beyond the budget year). Multiyear contracts may not be awarded unless the contract and the multiyear program are fully funded within the approved FYDP funding.

010203 Multiyear Procurement.

A. Multiyear procurement (MYP) is a generic term describing the process, planning, and contract under which the government may contract for the purchase of supplies or services for more than one, but not more than five, program years. Such a contract may provide that performance during the second and subsequent years of the contract is contingent upon the appropriation of funds, and may provide for a cancellation payment to be made to the contractor if such appropriations are not made. Multiyear procurements are budgeted and funded annually.

B. Statutory Requirements. Section 2306b of title 10 of the United States Code, section 806 of Public Law 105-85, the FY 1998 DoD Authorization Act, and section 8008 of Public Law 105-56, the FY 1998 DoD Appropriations Act, require that approval, initiation, and execution of a multiyear contract follow certain guidelines.

1. MYP approval is predicated on:

- Substantial Savings. The use of a multiyear contract will result in substantial savings of the total anticipated costs of carrying out the program through annual contracts.
- Stability of Requirement. The minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities.
- Stability of Funding. There is a reasonable expectation that throughout the contemplated contract period, the head of the agency will request funding for the contract at the level required to avoid contract cancellation.
- Stable Design. There is a stable design for the property to be acquired and the technical risks associated with such property are not excessive.
- Realistic Cost Estimates. The estimates of the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.
- National Security. Use of a multiyear contract will promote the national security of the United States.

2. In addition to the approval criteria, Congress requires that:

- MYP contracts cannot be initiated for any system or component thereof if the value of the MYP contract would exceed \$500.0 million unless specifically provided for in an Appropriations Act and an Act other than an Appropriations Act.
- Proposed legislation and funding must accompany the MYP request in the President's budget submission; or the MYP request must be formally submitted as a budget amendment; or the Secretary of Defense must request MYP approval in writing to the congressional defense committees.
- Congressional defense committees must be notified at least 30 days in advance of a proposed contract award that: employs economic order quantity procurements in excess of \$20.0 million in any one year of the contract; employs advance procurement leading to a multiyear procurement contract that employs economic order quantity procurement in excess of \$20.0 million in any one year; or includes an unfunded contingent liability in excess of \$20.0 million.
- A multiyear procurement contract cannot be initiated for which the economic order quantity advance procurement is not funded at least to the limits of the government's liability.
- A multiyear procurement contract must provide for production at not less than the minimum economic rate given the existing tooling and facilities.
- *A present value analysis must be used to determine the present value, or real worth, of the multiyear savings. Comparing the multiyear contracting approach to a conventional annual-buy approach derives the savings.*
- *The Secretary of Defense must certify to the Congress that the support costs associated with the multiyear procurement with a value greater than \$500 million are fully funded within the future years defense plan (FYDP). The Secretary of Defense in a March 23, 1998 memorandum delegated this certification to the USD Comptroller. Components must submit the certification letter to the USD Comptroller at least 30 days prior to the anticipated contract award for approval, signature, and transmittal to the congressional defense committees.*
- Multiyear procurement contracts may provide for cancellation provisions to the extent that such provisions are necessary and in the best interests of the United States. The cancellation provisions may include consideration of both recurring and nonrecurring costs of the contractor associated with the production of the items to be delivered under the contract. However, the Agency Head and the USD(C) must approve the inclusion of recurring costs in a cancellation ceiling (see paragraph C below).
- Before any multiyear procurement contract that contains a clause setting forth a cancellation ceiling in excess of \$100.0 million may be awarded, the head of the agency concerned shall give written notification of the proposed contract and of the proposed cancellation ceiling for that contract to the congressional defense committees. The contract may not be awarded until the end of a 30-day waiting period beginning on the date of such notification.
- MYP contracts cannot be terminated without a 10-day prior notification to the congressional defense committees.

C. DoD Requirements.

- *The item should be technically mature, normally having completed RDT&E (including development testing, or equivalent) and Initial Operational, Test and Evaluation (IOT&E), with relatively few changes in item design anticipated. Deliveries of production items will indicate that the underlying technology is stable. This does not mean that changes will not occur but that the estimated cost of such changes is not anticipated to drive total costs beyond the proposed funding profile.*

- *Estimates should be based on prior cost history for the same or similar items or proven cost estimating techniques. Normally, production assets should have been delivered in order to obtain actual costs for the comparisons (exceptions include satellites and ships).*
- *With the exception of funding for economic order quantity (EOQ) procurement and advance procurement for long leadtime items as defined in section 010202, multiyear procurement contracts will comply with full funding.*
- *The inclusion of recurring costs in cancellation ceilings is an exception to normal contract financing arrangements and requires approval by the Agency Head (FAR 17.106-3(e)) and the USD Comptroller.*
- *An exception, to be approved by the USD Comptroller, is needed to structure a contract with an unfunded cancellation ceiling. Justification explaining why an unfunded cancellation ceiling is the chosen acquisition strategy should be provided. This justification should specify what costs comprise the unfunded cancellation ceiling and why these costs are not funded under the full funding policy.*
- *Funds obligated for multiyear contracts must be sufficient to cover any potential termination costs. The costs of cancellation or termination may be paid from (1) appropriations originally available for the performance of the contract concerned; (2) appropriations currently available for procurement of the type of property concerned, and not otherwise obligated; or (3) funds appropriated for those payments.*

010204 Transportation

A. First Destination Transportation (FDT) is that transportation required to deliver production items from the manufacturer's plant or source of procurement to the first point of delivery where the Military Service or Defense Agency takes possession and/or ownership of that item. The procurement source, as used herein, is any supplier outside the DoD supply system or any DoD industrial activity that fabricates new materiel. The procurement source or the first point of delivery may be in the Continental United States (CONUS) or overseas. FDT is not applicable to components or items reworked by an industrial activity. In the case where the Government accepts the production item at the manufacturer's plant or source of production and legally owns the item, FDT extends to the first point of delivery for either use or storage by the Military Service or Defense Agency. For shipments destined to overseas locations that will enter the Defense Transportation System, FDT terminates at the port of embarkation (CONUS or overseas).

B. Second Destination Transportation (SDT) is any transportation other than FDT.

C. Budgeting Responsibilities for Transportation

1. Transportation of Supply Management Materiel of the Defense Working Capital Funds.

Transportation among the 50 states is financed by the supply management business area responsible for the shipment. Transportation of supply management standard items overseas is financed by the appropriation or fund ordering the materiel if within the definition of FDT, otherwise it is financed as SDT. Transportation of DWCF nonstandard items overseas is financed in the same manner as transportation of standard items overseas except for items that are shipped on a free-on-board (FOB) destination basis. In this case, the overseas shipment transportation cost is included in the cost of the nonstandard item and no additional transportation charges should be incurred for the overseas shipment.

2. Transportation of Items Procured by Other Than Procurement and O&M Appropriations, or Defense Working Capital Funds. In general, FDT is financed by the appropriation, which financed acquisition of the item, i.e., RDT&E appropriations for RDT&E materiel and Military Construction appropriations for items that are shipped to support such construction projects. All over-ocean shipment of subsistence items financed by the Military Personnel appropriations is considered as an exception and is financed as SDT.

3. Transportation of Items Procured by Procurement Appropriations. FDT is normally financed by the Procurement appropriation that financed acquisition of the item. SDT is normally financed by the Operation & Maintenance (O&M) appropriations. The following additional guidance applies:

a. Transportation costs integral to production contract price such as FOB destination charges are considered part of the end item contract price and are financed by the procurement appropriation that financed acquisition of the item.

b. All transportation of government furnished equipment (GFE) and government furnished materiel (GFM) prior to installation into an end item is considered FDT and is financed by the procurement appropriation that financed acquisition of the item.

c. The transportation of items that are not owned by DoD - such as nuclear materials and warheads that DOE provides to DoD but DOE retains ownership - is considered FDT and is financed by the procurement appropriation that financed the acquisition of the end item into which the item will be incorporated.

4. Transportation of Items Procured by O&M Appropriations. Transportation is financed by the O&M appropriation according to the FDT and SDT definitions.

010205 Engineering Change Orders

Engineering change orders should be funded commensurate with the level of risk in the program.

010206 Factory Training

Factory training course costs for initial cadre training are considered investment costs and should be budgeted and funded in the investment appropriation and the specific program used to procure the development, acquisition, or modification of the related end item. Temporary Duty (TDY) travel costs of military or civilian personnel attending factory training courses are funded in the Operation and Maintenance appropriations. Factory training courses acquired for end items no longer in production are to be funded in the Operation and Maintenance appropriations.

010207 Interim Contractor Support

Interim contractor support (ICS) is the maintenance and support of a new weapon system provided by a commercial vendor pending transition to organic support. Because ICS is a major component of the initial logistics support of a newly fielded system and integral to program acquisition, ICS funding requirements should be budgeted in the Procurement appropriations. However, ICS is intended to provide support for the brief period between initial item deployment and the permanent organic support. All acquisition strategies should attempt to minimize ICS requirements and duration. ICS will only be funded in Procurement appropriations until the organic support date specified in the acquisition program baseline is achieved. Continued funding of ICS after the baseline support transition date will be approved on an exception basis.

010208 Commercial Off-the-Shelf (COTS) and Non-Developmental Item (NDI) Procurement

A. Items purchased directly from a commercial source that can be utilized without alteration or modification are classified as COTS or NDI. All COTS and NDIs, including the first article and associated first article acceptance testing should be funded in the *Procurement or O&M appropriations, as determined by the Expense and Investment criteria*. If an end item requires design and development in order to accept the COTS or NDI, then the entire effort is not COTS or NDI, and funding for that effort should be budgeted in RDT&E. *If a COTS or NDI is required for RDT&E test purposes, the cost is funded in RDT&E.*

B. Commercially available items that must be modified to satisfy user requirements are classified as "modified COTS" or "modified NDI" articles. In this instance, the first article, modification of the first article, and first article testing should be budgeted in RDT&E. Follow-on purchases should be budgeted in the *Procurement or O&M appropriations, as determined by the Expense and Investment criteria*. The number of first articles procured will not exceed the quantity needed to conduct the acceptance tests.

010209 Spares and Repair Parts

A. This Section provides instructions applicable to funding requests for spares and repair parts procured with direct appropriations in the Procurement Title.

1. Initial Spares and Repair Parts. Initial spares and repair parts will include those repairable components, assemblies, and subassemblies required as initial stockage at all levels including the pipeline to permit fielding of new end items. Whole spare engines will be classified as initial spares through the life of system. Funding will be budgeted based on a first year obligation rate of 92 percent.

2. War Reserve Spares and Repair Parts. War reserve material (WRM) spares and repair parts for initial stockage will be budgeted in replenishment except for whole spare engines in accordance with the above definitions. See Section 010215, Defense Working Capital Funds - War Reserve Materiel, for additional budgeting WRM policies.

B. Spares budgeting can be aggregated by weapon system except for Selected Acquisition Report (SAR) systems.

010210 Direct and Reimbursable Budget Plans.

A. Direct Budget Plan. This plan includes those items of materiel to be purchased for delivery to service inventory and those procurement programs that support the acquisition of materiel for US forces. Financing for the direct budget plan is derived from: new budget authority provided by the Congress, the transfer of resources from other appropriations, and reimbursements. When dealing with reimbursements involving the sale of materiel, three situations can arise:

1. Replacement-in-Kind. In this situation an item of materiel is sold and will require replacement with an item of the identical type, model, and series or modified version of the same basic model (i.e., the sale of C-130E aircraft and purchase of C-130E aircraft). In this situation the reimbursement from the sale will be included in reimbursable financing and the buy-back of the item in the reimbursable program. There will be no reflection of this transaction in the Direct Budget Plan. For an ammunition item, the replacement-in-kind policy permits replacement of a round with any round that provides the same warfighting mission capability, providing the round to be purchased has been previously approved by the Congress for procurement, and the inventory objective presented to the Congress is not exceeded.

2. Replacement. In this situation an item of materiel is sold and will require replacement to compensate DoD inventories for the resultant loss of capability or readiness. Because of one or more circumstances, the replacement item will not be identical to the item sold. It must, however, be a later series or modified version of the same basic model (e.g., sale of a C-130A aircraft and purchase of a C-130E aircraft) or an acceptable substitute item used in the requirements computations (e.g. sale of an M-48 tank and purchase of an M-60 tank). In this situation the reimbursement from the sale will be included under reimbursable financing but the buy-back of the replacement item must be shown under the Direct Budget Plan and must comply with reprogramming requirements.

- Items sold from inventory with a unit cost less than \$5,000 will be treated as a replacement-in-kind if an improved model of the same end item is being procured, it provides the same warfighting capability, and the inventory objective presented to Congress is not exceeded.

- If an item is eligible for replacement or replacement-in-kind and is not replaced, the reimbursement should be treated as a "free asset."

3. Free Assets. In this situation an item of materiel is sold and will not require replacement. All free assets from FMS transactions are required to be deposited into the Miscellaneous Receipts of the US Treasury in accordance with 10 U.S.C. 114(c)(2).

B. Reimbursable Budget Plan. This plan includes those items of materiel to be purchased for delivery to and use by customers. These items will be included on the Exhibit P-45, Reimbursable Budget Plan. Financing for the reimbursable budget plan is derived from:

- Anticipated reimbursement based upon customer orders received for items (not stocked by or purchased for procuring service use) to be purchased for direct delivery to a customer. (Direct citation of customer funds for procurement against this type of order is encouraged where common components and/or common assembly with service production of similar items are not involved.)
- Anticipated reimbursement based upon customer orders received or to be received for items common to the procuring service and customer, for direct delivery to the customer.
- Where the materiel item is to be made available from on-order quantities under an existing contract of a Military Department, the sales transactions will be reflected as reimbursable transactions. The quantities and costs of the replacement procurement will be included in the reimbursable program.
- Where the materiel item is to be made available directly from a contract awarded after the date of the sales agreement and the contract includes a particular quantity of the item to fulfill the sales agreement, the transaction will be reflected as a direct cite transaction.
- In "Replacement-in-Kind" situations, the proceeds from the sale will be included under reimbursable financing and the buy-back program will be included in the Reimbursable Budget Plan.
- In "Replacement" situations, the proceeds from the sale will be included under reimbursable financing but the buy-back program will be included under the Direct Budget Plan (not the Reimbursable Budget Plan).
- Reimbursements from customer orders for secondary items, because of the nature of such commodities and the way they must be managed, will always be treated as a generic category requiring, by definition, "replacement-in-kind." Accordingly, the proceeds from such transactions will be included under reimbursable financing and the buy-back of an equivalent value of such commodities will be included in the Reimbursable Budget Plan.

010211 Not Used

010212 Research, Development, Test and Evaluation (RDT&E) - Definitions and Criteria

A. Definitions. The term "research and development (R&D)" is intended broadly to include the work performed by a government agency or by private individuals or organizations under a contractual or grant arrangement with the government. It includes R&D in all fields, including the physical sciences, engineering, etc.

1. Research is systematic study directed toward fuller scientific knowledge or understanding of the subject studied.
2. Development is systematic use of the knowledge and understanding gained from research, for the production of useful materials, devices, systems, or methods, including the design and development of prototypes and processes.

B. General Criteria. When, after consideration of the following criteria, there is doubt as to the proper assignment of costs between appropriations, the issue should be resolved in favor of using RDT&E funding. In general, the types of costs to be financed by RDT&E and related appropriations are:

1. RDT&E Appropriations
 - a. RDT&E will finance research, development, test and evaluation efforts performed by contractors and government installations, including procurement of end items, weapons, equipment, components,

materials and services required for development of equipment, material, or computer application software; its Development Test and Evaluation (DT&E); and its Initial Operational Test and Evaluation (IOT&E) as provided for in paragraph C.5. (Test Articles and Test Support) below.

b. The operation of R&D installations and activities engaged in the conduct of R&D programs, including direct and indirect efforts, expense and investment costs.

c. The acquisition or construction of industrial facilities costing less than \$500,000 at government owned, government operated (GOGO) facilities under the criteria of DoD Directive 4275.5 as provided for under 10 USC 2805 (unspecified minor construction). Use of RDT&E funds for acquisition and construction at contractor owned or contractor operated government facilities is authorized under 10 USC 2353, Contracts; Acquisition, Construction, or Furnishings of Test Facilities and Equipment.

2. Related Appropriations

a. All construction at R&D installations and activities other than that covered above will be funded in the Military Construction appropriations.

b. Equipment and material approved for production and intended for operational use or inventory upon delivery, and product improvement within the current performance envelope on systems in production, will be funded in the Procurement appropriations *as long as no development or initial operational tests by an independent test agency are required*.

c. Family housing construction, operation and maintenance at R&D installations and activities will be funded in the Family Housing appropriations.

d. Expenses of Headquarters R&D management, organizational management analyses, Follow-on Operational and Test and Evaluation (FOT&E) personnel and command support, and product improvement within the current performance envelope for systems out of production will be funded in the Operation and Maintenance (O&M) appropriations.

e. Research projects qualifying for financing as specific undertakings under the procedures and within the criteria established for the Special Foreign Currency Program will be funded in the Special Foreign Currency appropriation.

C. Specific Determinations. Additional details on the determination of proper funding for specific items or efforts are provided in the following paragraphs.

1. Organizational Funding Criteria

a. The RDT&E appropriation will finance expenses and investments for the operation and maintenance of R&D organizations, equipment (including R&D aircraft, ships and ship-type vehicles), installations and activities (including those operated by contract).

b. Expenses for the support of tenant activities will be funded in accordance with the following:

(1) Expenses for the support of tenant activities at R&D installations and activities will be RDT&E funded by the host activity, pending the establishment of reimbursable arrangements. Subsequent to the establishment of reimbursable arrangements, expenses for the support of the tenant will be funded by the tenant or as mutually agreed with the host.

(2) Where reimbursable arrangements exist, expenses for the support of R&D activities or organizations that are tenant activities at installations having a primary function other than research, development, test and evaluation will be funded by RDT&E.

(3) Expenses for the support of R&D activities or organization which are tenant activities at installations having a primary function other than R&D will be funded by the host, pending the establishment of reimbursable arrangements.

c. Expenses of R&D management and administrative organizations at major systems commands, headquarters organizations and administrative organizations at DoD component departmental headquarters levels (except for the Defense Advanced Research Projects Agency and the Ballistic Missile Defense Organization) will be financed in the Operation and Maintenance (O&M) appropriations.

d. Expenses and investments for the operation and maintenance of major range and test facilities, as defined under DoD Directive 3200.11, that conduct development testing as a primary mission as determined by workload, will be financed by the RDT&E appropriation. Major range and test facilities that primarily support follow-on operational testing or training exercises will be financed in the O&M appropriations.

e. Costs of evaluating organizational structure and distribution of function, administrative operating policies, procedures, methods and systems (management studies) and applications of the management sciences to improve effectiveness in carrying out assigned functions are financed in the O&M appropriations.

f. Expenses of operational military forces having a primary mission other than R&D and not specifically assigned to R&D that may, from time to time, be incidentally engaged in or support R&D activities, will be funded in the O&M appropriations.

2. Facilities Construction and Modification. When it is determined that DoD financing of real property projects is required, the projects shall be programmed, budgeted, and financed as follows:

a. Government-Owned, Government-Operated (GOGO) Facility on Government Land. When GOGO property is to be constructed on government-owned land, such construction will normally be financed as a Military Construction project. Construction of facilities for RDT&E costing \$500,000 or less may be funded with RDT&E appropriations. Such expenditures are authorized under 10 U.S.C. 2805 (unspecified minor construction). All minor construction must result in a complete and usable facility. In no event are two or more construction projects or minor and major construction projects to be contrived to be a usable facility. Construction projects at R&D installations and activities whose costs are greater than \$500,000 will be financed by the Military Construction appropriation in accordance with Chapter 6.

b. Government-Owned, Contractor-Operated (GOCO) Facility

(1) When the GOCO facility is on a military installation (post, camp or station) the primary funding is the Military Construction appropriation. However, if the facilities are contractor-operated, and the contractor is solely responsible for the complete and total operation and maintenance of the facility complex, construction may be financed in Procurement or RDT&E in accordance with DoD Directive (DoDD) 4275.5 and 10 USC 2353 criteria. Improvements having general utility or new construction are not authorized under 10 USC 2353.

(2) When GOCO facilities are constructed on government property other than a military installation, the Procurement or RDT&E appropriation will finance the construction in accordance with DoDD 4275.5 criteria.

c. Contractor-Owned, Contractor-Operated Facility. Under 10 USC 2353, a research or development contract may provide for the acquisition, construction, or furnishing of facilities and equipment that are necessary for the performance of the contract to the contractor. Improvements having general utility or new construction are not authorized under 10 USC 2353. Facilities that would not be readily removable or separable without unreasonable expense may not be installed or constructed on property not owned by the government, unless the contract contains:

- (1) A provision to reimburse the government for the fair value of the facilities;
- (2) An option for the government to acquire the underlying land; or
- (3) An alternative provision that protects the interests of the United States in the facilities.

d. All proposed RDT&E real property facilities will be identified to Congress in accordance with Chapter 5, Section 050402.

e. The Family Housing appropriation will provide for Family Housing construction and Family Housing O&M at R&D installations and activities.

3. Equipment. RDT&E appropriations will finance the development, design, purchase, installation, and acceptance testing of equipment or instrumentation required to support RDT&E activities. Costs of specialized equipment and instrumentation required for the support of research, development, test and evaluation contractor effort at government-owned, contractor-operated (GOCO) activities will be financed in RDT&E. DoD Directive 4275.5 applies. Installation costs include directly related foundations, shielding, environmental control, weather protection, structural adjustments, utilities and assets. Installation costs are excluded from RDT&E financing if the effort is accomplished concurrently with a military construction project, and in these instances, the military construction appropriation finances the installation cost. To the extent that the equipment installation occurs at a government activity and the cost exceeds \$500,000, no new facility or physical outer dimension expansion to an existing facility shall result from an RDT&E-funded equipment installation project.

4. Establishment of Pilot Line and Tooling Requirements

a. The costs associated with establishing an initial pilot line, which are necessary to acquire a limited number of representative items for test purposes, including the test items, will be financed by RDT&E. All items and costs associated with maintaining the initial pilot line beyond the quantity sufficient to test for operational acceptability will be financed from other appropriations.

b. When an end item under development has also been approved for procurement, operational use, and included in the force structure, then hard tooling requirements common to both the development and procurement phases will be financed by Procurement appropriations. When an end item under development has not been approved for procurement, operational use, or included in the force structure, then tooling and other preliminary production facilities required to produce realistic development hardware for test and evaluation will be financed by RDT&E, even though such tooling and facilities might later be used for production.

5. Test Articles and Test Support

a. As a general rule, the procurement of test articles and test support, including "Special Support" costs and "Command Support" costs (see Glossary), for all RDT&E tests preceding and leading to acceptance for operational use (i.e., through IOT&E) will be RDT&E funded. *Test articles and components or materials to be assembled into test articles shall be budgeted in accordance with the need for them in the development and test program. Purchases of full or nearly full test articles (e.g., off-the shelf drones) should be budgeted in accordance with the need for full units to test.*

(1) Development and preproduction prototypes (RDT&E financed) will be used for Development Test and Evaluation (DT&E), including scientific, technical and weapons effects tests. DT&E programs must provide complete and reliable data that can be used to estimate the military utility of new items as a basis for considering decisions to continue engineering development. To this end, it is essential to plan, program, budget and fund for an adequate number of R&D articles for development, test and evaluation that will be fabricated, manufactured or produced in a realistic preliminary production manner and thus provide such data.

(2) Development and preproduction prototypes (RDT&E financed) will be used for IOT&E. When so used, they must be sufficiently representative of the expected production items to provide from IOT&E a valid estimate of production items operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements).

(3) Low Rate Initial Production (LRIP) assets. LRIP, as defined in DoD 5000.2-R, is to provide production configured or representative articles for operational test (*RDT&E funded, see paragraph (2)*); establish an initial production base for the system (*procurement funded*); and permit an orderly increase in production rate for the system (*procurement funded*). *If the asset requires developmental or initial operational testing by an independent test agency, then it should be procured with RDT&E funds. If the asset, originally procured for testing, will subsequently be fielded, then either RDT&E or procurement can be used, depending on what makes the best business sense.* The LRIP quantity will be determined as part of the Engineering and Manufacturing Development (EMD) approval (Milestone II). RDT&E funds will be budgeted to procure the items required for operational test to facilitate the testing of LRIP assets in the EMD phase. LRIP test articles must be specifically identified in the budget documentation. Should LRIP items beyond the test quantity be required, they would need to be included in the Milestone II decision and a determination made at that time with respect to the more appropriate funding source. *Ships and space systems do not have LRIP periods like other systems. Special guidance relating to the transition of ships and space systems from RDT&E to Procurement is provided in paragraph 9 of this section.*

b. Conduct of testing that is not associated with RDT&E, such as the examples noted below, will be financed in the Procurement or O&M appropriations, as appropriate.

(1) Acceptance, quality control and surveillance testing of articles obtained for other than RDT&E purposes.

(2) Routine testing in connection with logistic support.

(3) Testing related to the operation and maintenance of equipment and material acquired for use under appropriations other than RDT&E.

(4) Testing required to prove the capability of facilities to produce items which have been approved for production will be funded by procurement as part of the initial acquisition cost.

c. The acquisition of commercial items for testing and operational evaluation that do not require RDT&E engineering, design or integration effort will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria). O&M appropriations will finance personnel and command support costs for testing and operational evaluation of commercial items by field units for doctrine, operational, or organizational purposes.

d. Articles (including end items, weapons, equipment, major test vehicles such as ballistic missile boosters or upper stages, components and materials) of types regularly procured to meet established general requirements such as operational training, operational use, or inventory which are assigned or allocated on a priority basis for use in support of approved R&D programs and which are not consumed in testing, may be financed by Procurement or O&M appropriations using the expense and investment criteria. In addition, excess items that can be made available on a priority basis from existing inventory will be reassigned for use in R&D test and evaluation programs without reimbursement. However, all items, expected to be consumed in R&D test and evaluation will be financed by RDT&E appropriations.

e. Consumable rounds of ammunition or rounds of similar tactical missiles otherwise procured in quantity for inventory under existing procedures, may be issued on a priority basis for use in R&D testing without reimbursement.

f. The acquisition of test articles will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria), and personnel and command support costs will be financed

by O&M appropriations for all test and evaluation (T&E) subsequent to acceptance for operational use and T&E to demonstrate the operational employment or develop operational tactics (i.e., subsequent to IOT&E).

6. Modification and Refurbishment of Test Articles.

a. Costs associated with modifying or reconfiguring an existing item for R&D test purposes will be funded in RDT&E. When an item that has been diverted from another use is not consumed in R&D testing, any costs necessary to return the item to serviceable condition or to its pre-existent configuration will be financed in RDT&E.

b. If an article initially acquired with RDT&E funds as part of an RDT&E test effort is still available at the completion of the test program, it may be reassigned for operational use or inventory. The cost to modify such an article for operational use would be borne by the Procurement and O&M appropriations, as appropriate.

7. Product Improvement

a. "Product improvement" of major end items and major components of major end items currently in production or in the operational inventory, is subject to the following:

(1) Redesign of an item to increase the current performance envelope, including related development, test and evaluation effort, will be financed in RDT&E.

(2) Engineering services or related manufacturing efforts applied to an item currently in production to extend its useful military life within the current performance envelope should be funded by Procurement appropriations *as long as no developmental testing (DT) or initial operational test and evaluation (IOT&E) by an independent test agency is required. If DT or IOT&E by an independent test agency are required, RDT&E finances the improvement.* The phrase "an item currently in production" implies that the item has end item procurement funding in the year the product improvement effort is to take place.

(3) Engineering services or related manufacturing efforts applied to an out-of-production, but still operational item to extend its useful military life within the current performance envelope should be financed by O&M appropriations *as long as no developmental testing (DT) or initial operational test and evaluation (IOT&E) by an independent test agency is required. If DT or IOT&E are required by an independent test agency, RDT&E finances the improvement.*

b. While existing off-the-shelf equipment may be procured with Procurement funds, items that require engineering design, integration, test, or evaluation effort shall be procured with RDT&E funds in sufficient numbers to support such effort.

c. Costs of fully developed and tested modification kits and associated installation costs should be financed from Procurement appropriations. *If DT or IOT&E by an independent test agency are required, RDT&E finances the RDT&E effort and the kits required for RDT&E testing. Procurement funds would then be used to procure the follow-on kits.*

d. Aircraft engine component improvement costs are budgeted in the RDT&E appropriations to provide for continuing improvements in the aircraft engines in the areas of reliability, maintainability, durability, correction of Service-revealed deficiencies, safety of flight, time-between-overhaul, etc. "Component Improvement" is established at the point in time when:

(1) There has been a Government acceptance of the first procurement funded engine,
and

(2) The engine has successfully completed stringent qualification or verification testing to demonstrate initial production suitability subject to:

- (a) Compliance with contractual specifications, performance guarantees and military specifications, as applicable to individual Service requirements;
- (b) Completion of endurance testing representative of the anticipated Service use to include completion of specified post test inspections, certification, and penalty runs;
- (c) Demonstration of prescribed performance capability; and
- (d) Accomplishment of prescribed durability, reliability, and environmental testing.

8. Ships and Ship-type Vehicles

- a. An experimental test bed type of ship or an experimental ship will be financed by RDT&E appropriations. This will include all such experimental ships required to support an approved R&D program or for the purpose of experimenting with new or radical ship concepts or to demonstrate the military usefulness of new ship designs, configurations or fabrication techniques, when the ship-type test vehicle itself can be predicted to be consumed or expended in testing, or to have little or no operational usefulness in the force structure. Prototype ships, when designated by the Secretary of Defense, are included.
- b. A ship of demonstrated, conventional concept and design having a high probability of military usefulness and inclusion in the force structure, even though first of a class, will be constructed using procurement funds. A ship of demonstrated conventional concept and design temporarily or permanently assigned from inventory to support R&D effort will be furnished without reimbursement, but the cost of providing all R&D types of equipment or instrumentation, the cost of "nonstandard" modifications of the ship required to make the ship suitable for R&D support, as well as the cost of any related restoration to conventional or operational ship conditions upon release from assignment to R&D, will be financed by RDT&E appropriations.
- c. Preliminary or contract design for new ship construction will be financed by RDT&E appropriations, including contractor and "field activity" effort costs. Detail design for ships appropriate for procurement funding will be funded by procurement accounts.
- d. Land-based or sea-based combat system test installations will be financed by RDT&E appropriations.

9. Space Systems. *Like shipbuilding programs, most space programs do not include dedicated test articles once they have entered the engineering and manufacturing development phase. The following guidance describes the circumstances in which RDT&E funds may be used for the acquisition of operational space systems.*

a. Expendable launch vehicles. *The first rocket of a new design is normally used to launch an operational satellite into orbit. This rocket may be financed with either RDT&E or Procurement appropriations. The second and subsequent expendable launch vehicles shall in all cases be financed with Procurement appropriations. The full funding policy shall apply to all expendable launch vehicles budgeted in Procurement appropriations.*

b. Satellites. *The first satellite of a new design is normally placed into operational use. For programs in which satellites are launched individually, the first two satellites may be financed with either RDT&E or Procurement appropriations. The third and subsequent satellites shall in all cases be financed with Procurement appropriations. For programs in which multiple satellites are launched with a single rocket, the satellites comprising the first launch may be financed with either RDT&E or Procurement appropriations depending upon which budgetary approach is most consistent with the contract structure. Satellites for the second and subsequent launches shall in all cases be financed with Procurement appropriations. The full funding policy shall apply to all satellites budgeted in Procurement appropriations. It is expected that satellite programs will make frequent use of advance procurement, combined parts buys, and multiyear contracts to efficiently use funds within the context of the*

full funding policy. To achieve these efficiencies, advance procurement funding may be budgeted two years (and, in rare instances, three years) prior to the year of full funding. The total advance procurement funding for a satellite should not exceed 20 percent of the unit cost of the satellite.

c. Ground Control and Ground Processing Systems. *The design and implementation of ground control and ground processing systems is an integral part of the development of new satellite systems. The entire cost of the primary ground system (including off-the-shelf workstations, power supplies, etc., but not including military construction) shall normally be financed with RDT&E appropriations. The cost of backup ground systems shall be financed with Procurement appropriations, and the full funding policy shall apply.*

d. User Terminals. *User terminals for space systems shall transition from RDT&E to Procurement in the same manner as non-space-related communications and electronics equipment.*

10. Information Systems Costs (Also see section 010201, paragraph E.3.)

a. RDT&E Funded Facilities: Funds required for the operation and maintenance of Information Systems units at RDT&E funded facilities and for the acquisition of information systems resources, including development, lease or purchase of information systems by such Information Systems units should be financed in RDT&E.

b. Other Facilities/Activities: For all other facilities/activities, the following rules apply:

(1) Information Systems Development. Information systems are categorized as either general purpose or special purpose.

(a) General Purpose Information Systems. Normally, general purpose Information Systems are commercially available off-the-shelf, easily adaptable to a variety of applications by configuring existing executive software and programming languages. For purposes of definition, embedded computers in Maintenance, Supply Handling, and Logistics Equipment are considered "general purpose." Except as provided in paragraph C.7.d. (Aircraft Engine Component Improvement) above, acquisition of this type of Information Systems is not considered developmental and normally will be financed to include the initial set of executive software that meets system operational specifications by Procurement or Operation and Maintenance (O&M) appropriations subject to the expense and investment criteria. Subsequent modifications to executive software and development of applications programs should be financed in O&M appropriations except as indicated in paragraph C.10.a. (RDT&E Funded Facilities) above.

(b) Special Purpose Information Systems. Special purpose information systems are designed to meet a specific military operational requirement or to perform a predetermined set or series of computational functions only, may be required to meet specific physical or environmental conditions, and are physically or functionally integral to a higher order system. Development, test, and evaluation of Special Purpose Information Systems will be financed in RDT&E. Purchase for operational use should be funded in the Procurement or O&M appropriations, subject to the Expense and Investment criteria.

(2) Acquisition of Software. Software is categorized as either "executive software" or "applications software."

(a) Executive Software. Where there is a standard, existing executive software package available with the purchase of general purpose information systems and this package will be used without modification in the intended application, its acquisition with procurement, RDT&E, or O&M funds (subject to the expense and investment criteria) is appropriate. If modifications to the executive software are required, the modification effort should be financed in O&M. If the hardware should be funded in RDT&E based on paragraphs C.7.d. (Aircraft Engine Component Improvement) or C.10.a. (RDT&E Funded Facilities) above, then the executive software package and/or any modification of it should also be RDT&E funded. The preparation or modification of executive software for special purpose information systems should be RDT&E funded.

(b) Applications Software. O&M will normally finance preparation of applications software for general purpose information systems. Where general purpose information systems are financed in RDT&E appropriations in accordance with paragraph C.7.d. (Aircraft Engine Component Improvement) above, such applications software development will be RDT&E financed. RDT&E will finance preparation of applications software for special purpose information systems.

(3) Product Improvement of special purpose information systems and its associated software should be funded in accordance with paragraph C.7.a. (Product Improvement).

(4) Proprietary software carries a copyright from the vendor that prohibits duplication or modification. Essentially, the purchaser is buying a license from the vendor to use the software on a particular system. Proprietary software is an investment, subject to the expense-investment criteria, unless it is financed on an "annual fee" basis. In that case, it is an expense item properly financed in RDT&E or O&M.

11. Training Devices. A training device is composed of components and software that have been designed or modified to demonstrate or illustrate a concept or simulate an operational circumstance or environment. The initial or prototype training device and all its support costs through service acceptance will be funded in RDT&E. RDT&E will not fund beyond the initial system unless more than one full system is required to demonstrate the training device performance. The initial or prototype training device that employs new or off-the-shelf computers and system components, but has training system unique software and interface components, will be developed and procured with RDT&E funds. Typically, these training devices have small quantity requirements and the initial or prototype device is used for operational training. Modifications or updates to existing training devices will normally be funded in the applicable Procurement or O&M appropriation, subject to the expense and investment criteria. Any necessary development effort for these modifications or updates will be funded in RDT&E.

12. Joint Test and Evaluation

a. Joint Test and Evaluation (JT&E) refers to T&E conducted jointly by two or more DoD components as directed by the Director for Test, Systems, Engineering, and Evaluation (DTSE&E) or the Director of Operational Test and Evaluation (DOTE). JT&E will be conducted to test and evaluate capabilities of developmental and deployed systems in a joint environment, to evaluate joint operations concepts, and to determine requirements and interoperability of systems and forces. Testing will be accomplished in realistic operational conditions when feasible and essential to the evaluation. Testing will be in accordance with established joint doctrine and will be consistent with the assigned missions of the participating Components. Tests involving alternative concepts, organization, tactics, or procedures will be coordinated with the Components and The Joint Staff. As such, JT&E should not be construed to encompass the DT&E - IOT&E - OT&E - FOT&E process for hardware oriented weapon system acquisition. Further, DTSE&E/DOTE-directed JT&E does not include that joint testing initiated by and mutually agreed to by two or more Components for their own purposes.

b. Funding for DTSE&E-directed JT&E is financed in the Developmental Test and Evaluation (DT&E), Defense appropriation (program element 0605804D). DOTE-directed JOT&E is financed in the Operational Test & Evaluation (OT&E) Defense appropriation. The costs incurred are for the direction, supervision, and performance of JT&E and will be for those areas that are unique to the needs of the JT&E. In the accomplishment of Joint Tests, the Components will be reimbursed from these funds for those unique costs as defined in the Glossary of Terms. When directed as Executive Agent for a particular JT&E, the Component will be responsible to the Secretary of Defense for ensuring that all resources necessary for the successful accomplishment of the JT&E are available to the Joint Test Director (JTD). This includes administrative management support and facilities for the JTD. The Components' support costs (O&M, Procurement, and RDT&E) are to be programmed and budgeted in accordance with established budgetary procedures.

13. Manufacturing Technology. The Department of Defense Manufacturing Technology program, which demonstrates factory application of new or improved technology in producing defense items, will be financed in the RDT&E appropriations.

14. Development Efforts Related to Future Leased Services. When the provider of a leased service that will ultimately be financed in O&M requires initial funding in order to design or develop major changes or improvements to meet the government's requirement for that service, then the costs of such development efforts will be financed in RDT&E.

15. Subsystem Integration into Weapon Systems. Research and development necessary for the integration of subsystems into weapon systems should be financed from the weapon system program. For example, the R&D cost of integrating an electronic warfare black box into an aircraft should be borne by the aircraft R&D program.

16. Engineering change orders should be funded commensurate with the level of risk in the program.

010213 RDT&E - Incremental Programming and Budgeting Basis

A. Purpose This Chapter specifies the principles to be followed, and establishes the criteria and definitions to be used, in the preparation of the annual Research, Development, Test and Evaluation (RDT&E) budget estimates on an incrementally funded basis. The incremental budgeting policy provides that only those funds required for work in a given fiscal year shall be included in the RDT&E budget request for that fiscal year for most classes of effort.

B. Policy The annual budget estimates for Research, Development, Test and Evaluation (RDT&E) projects and programs, including Developmental and Operational Test and Evaluation programs, are to be prepared on an incrementally programmed basis (as opposed to the fully funded program basis used in preparing procurement budget estimates).

C. Guidance

1. The budget request for DoD projects and programs will be developed and presented in accordance with the following principles:

a. Annual estimates of initial financing needed for new major weapon systems and other development programs and projects requiring several years to complete, and which involve contracts spanning more than one year, should be formulated to cover costs expected to be incurred during each fiscal year. Generally this will represent a 9-month or lesser period for the initial, first year increment of a new start program due to the nature and timing of the congressional budget approval. The second and succeeding increments will be programmed and financed for the entire fiscal year. However, the Service or Defense Agency Comptroller must approve extensions of up to 3 months beyond the end of the fiscal year for which funds are requested. In this regard, DoD components should make every effort to align subsequent years' funding requirements on an annual basis coincident with the fiscal year, although it is recognized that there may be circumstances where this will not be feasible. The estimate of the financing required in the budget year to continue development projects must always take into account any changes (such as slippages) that have occurred. *RDT&E funding requirements should be based on forecasted obligations that consider costs and timelines for each milestone and other programmatic event.*

b. There are requirements in which there is no logical way to divide the work; it is clearly unfeasible to limit the contract to a shorter period; or the planned technical effort is such that no responsible contractor can be found who will accept a contract for a less-than-completion increment. For these type efforts that take longer than 12 months but less than 18 months, the Service or Defense Agency Comptroller may approve financing the total requirement in one fiscal year.

c. While it is intended that the foregoing guidelines will be applicable to program execution as well as program formulation, there may be circumstances that could delay the start of an annual increment (such as legal, administrative, or technical problems). The 2-year availability of funds authorized for the Research, Development, Test and Evaluation appropriation provides the necessary flexibility for program execution in those circumstances.

d. *Engineering change orders should be funded commensurate with the level of risk in the program.*

010214 Defense Working Capital Funds - Operating Budget

The operating budget represents the annual operating costs of an Activity or Component, including depreciation and amortization expenses. Detailed requirements and guidance can be found in Chapter 9.

010215 Defense Working Capital Funds - Mobilization/Surge Costs

A. Separate funding is provided for those costs related to mobilization and wartime surge capacity that would not otherwise be incurred to meet peacetime requirements. The prices of services and products provided to peacetime customers exclude these costs, to more appropriately reflect consistent pricing between competing activities. Similarly, better visibility is provided to decision makers at every level of surge or readiness requirements. These "mobilization" costs, although funded and justified as non-Fund direct appropriation to Component budgets, are elements of business area costs and must be fully justified on the SM-3 and Fund-8 schedule. Detailed requirements and guidance can be found in Volume 2B, Chapter 9, paragraph 090103F(2).

B. Unutilized capacity that is associated with the ability to satisfy a projected surge capability is considered a mobilization requirement that is to be funded by appropriated funds provided by the DoD Component having management responsibility for the Fund activity. Costs applicable to unutilized plant and equipment, such as depreciation, or maintenance, are not to be charged to the customers of the Fund activity.

C. The justification for costs related to mobilization and wartime surge capacity must identify the scenario assumptions or other basis for the requirement under which these costs were calculated. Additionally, a description of how these costs will be collected and accounted for in execution must be provided.

D. Volume 2B, Chapter 9 provides additional guidance and instructions associated with mobilization/surge requirements.

010216 Defense Working Capital Funds - War Reserve Materiel

War reserves are procured and maintained to meet wartime requirements as determined by the Defense Guidance. These costs will be funded with direct appropriations in the Components' budgets, not through customer rates. However, since the war reserve materiel will be under the management of supply management businesses, war reserve requirements will also be described and justified on the SM-3 and Fund-8b. Detailed requirements and guidance can be found in Volume 2B, Chapter 9.

010217 Defense Working Capital Funds - Military Personnel Costs

A. Military personnel costs have been included in revolving funds since FY 1991. This change was made to ensure that the total costs of the business were being captured. The cost of military personnel assigned to DWCF activities will be included in the total cost of operations of DWCF activities at civilian equivalent rates and reflected in the stabilized rates charged to customers. This policy is based on the concept of total costing, which is designed to ensure that the total cost of producing products and services is being identified to both DWCF activities and customers.

B. The amount expensed for military personnel by DWCF activities and the amount reimbursed to the appropriate military personnel will be the same as the amount budgeted. *The budget amount will equal the average strength multiplied by the civilian equivalency rate for each grade. The average strength for the budget year(s) will be calculated using the average fill rate for the three prior years. The fill rate is calculated by dividing actual average strength by the authorized strength for each grade.* No adjustments will be made to the DWCF cost of operations to reflect the actual cost of military personnel employed by DWCF activities.

C. See Volume 2B, paragraph 090103G, for budget formulation, execution, and reimbursement procedures.

010218 Defense Working Capital Funds - Full Recovery of Costs/Setting Prices

A. General Guidelines

1. All business areas in the Fund are required to set their prices based upon full cost recovery, including all general and administrative support provided by others. Prices are established through the budget process. *Except for Depot Maintenance Activity Groups, prices remain fixed during the year of execution; actual costs are evaluated against revenue generated by workload at established prices; and the financial condition of the business assessed accordingly.* Profits or losses will be determined at the end of the year and will be employed as a basis for evaluating operating efficiency.

2. Prices for every Defense Component business activity are established for each fiscal year. Once established, these prices are held constant (stabilized) through program execution. This stabilized rate policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher than anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective utilization of Fund resources.

3. Prices for the budget year(s) will be set to recover costs over the long run. This means that prices will be set to achieve an Accumulated Operating Result (AOR) of zero. During budget execution, business areas will have either a positive or negative Net Operating Result. Accordingly, prices in the budget year will be set to either make up actual/projected losses or to give back actual/projected gains in the budget year(s).

4. *An activity group may request that AOR losses be recovered over a two year period. The request must be included in the budget submission, may recover no more than 50% of the loss in the second year, and must demonstrate that the delay in the recovery of losses will not adversely effect the cash balance of the activity group.*

5. In the supply management businesses, the price setting process will be consistent with the rate changes approved during the budget review.

B. Recovery of Unplanned Losses in Depot Maintenance

1. Unbudgeted Depot Maintenance operating losses and operating gains of \$10 million or more per activity group will be recouped or returned as appropriate, in the current fiscal. This rate adjustment will increase financial discipline, encourage depot commanders to implement cost controls more rapidly, provide the right incentives to set rates correctly in the budget, eliminate the routine use of advance billing to cover execution losses, and improve operational efficiency.

2. The established procedures will impose a surcharge on customer bills to recoup losses. The amount of the losses to be recouped will be determined at the first budget execution review meeting of the fiscal year. Additional adjustments will be determined during the mid-year review and Budget Estimates Submission (BES) review, as needed. Customers will be required to absorb or finance all cost increases.

C. Detailed requirements and guidance can be found in Chapter 9.

010219 Defense Working Capital Funds - Capital Budgeting

A. Budgetary resources for capital investments will be separately identified in an approved capital budget. Any investment in equipment, other than information systems and telecommunications equipment, information systems and telecommunications resources, software development, and minor construction investments

having a value of \$100,000 or more, and having a useful life of two years or greater, will be funded through the capital budget and its costs will be depreciated over a predetermined period. The \$100,000 threshold is based on congressional actions and policy. Depreciation of capital equipment will be fully reflected in the operating costs and rates of Fund businesses.

B. Minor Construction

1. Minor Construction projects costing \$100,000 but less than \$500,000 will be funded through the capital budget and depreciated.

2. Effective in FY 1996, 10 U.S.C. 2805(c)(1) was amended to increase the threshold for unspecified military construction projects funded by appropriations available for operations (including DWCF) and intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening from \$300,000 to \$1,000,000.

3. Effective in FY 1996, 10 U.S.C. 2805(c)(1)(B) was amended to increase the threshold for minor construction projects from \$300,000 to \$1,000,00 for activities designated under the DoD Laboratory Demonstration Program. Fund activities may be designated to participate in the DoD Laboratory Revitalization Demonstration Program. The authority for the Laboratory Revitalization Demonstration Program expires on September 30, 1998.

4. Project planning and design costs are considered a capital investment cost that is capitalized by the DWCF activity and financed in the minor construction portion of the capital budget. Planning and design costs are not included as part of the statutory threshold for minor construction projects.

5. See Volume 2B, paragraph 090103, for budget formulation and execution procedures.

C. Depreciation

All capital assets owned by activities in the Fund will be depreciated or amortized by the individual Component business area. Depreciation will be on a straight-line basis and based on the acquisition cost, less residual value when residual value is expected to be 10 percent or more of the acquisition cost, including installation and related costs.

1. The following is the depreciation schedule assets *acquired prior to October 1, 1999*:

- Facilities construction (including minor construction) projects - 20 years
- Equipment Purchases, Other than information systems and Telecommunications Equipment - 10 years
- Information systems and Telecommunications Resources - 5 years
- General Purpose Vehicles - 5 years
- *Externally Developed Software* - 5 years
- *Internally Developed Software – 10 years (For projects implemented beginning in FY 1998).*

2. *For assets acquired on or after October 1, 1999, the following depreciation schedule will apply:*

- *General Purpose Vehicles (includes heavy-duty trucks and buses), ADP Systems and Hardware (Computers and Peripherals), High Tech Medical Equipment, Equipment used in RDT&E, Radio and Television Broadcasting Equipment, Commercial Software – 5 years.*

- *Printing, Publishing, and Duplicating Equipment; Telecommunications Equipment and Towers; Internally Developed Software – 10 years.*
- *All Other Equipment, Machinery, and Automated Warehouse Retrieval Systems – 12 years.*
- *Vessels, Tugs, Barges, and Similar Water Transportation Equipment (non-national Defense PP&E vessels/ships) – 20 years.*
- *Steam (12.5K pounds per hour or more) and Electrical Generation Equipment (500 Kilowatt or more) – 20 years*
- *Improvements made of added to Land (i.e. Fences, Roads, Bridges, Sewers, Ships and Railroad Wharves and Docks, Dry Docks) including improvements made to Stewardship Land – 20 years.*
- *Buildings, Leasehold Improvements to Buildings (includes improvements to Heritage Buildings), Hangars, Warehouses, Fuel Storage Facilities, Air Traffic Control Towers, and Other Real Property Structures – 40 years.*

3. *Use the depreciation schedule applicable to the Plant Property and Equipment Asset when it was placed in service. Depreciation schedules will not be changed on existing assets due to subsequent changes in the standard asset life tables unless directed by higher authority.*

010220 Base Support

Interservice and intragovernmental support, as identified in DODI 4000.19, is reimbursable by the DWCF activity to the extent that the specified support for the DWCF activity increases the host activity's direct costs (i.e., incremental direct cost). Costs associated with common use infrastructure are non-reimbursable, except for support provided solely for the benefit of one or more tenants. Support costs that are charged to a tenant DWCF activity (i.e., reimbursable cost) must be measurable and directly attributable to the DWCF activity. Indirect costs will not be included in reimbursement charges, except those included in stabilized rates charged for DWCF mission products and services. Host activities (suppliers of base support) are permitted to waive reimbursement from tenants who use or benefit from available support without appreciably increasing the host activities' costs (i.e., revenues would be less than the anticipated expense of billing and disbursing funds).

DWCF activities that use any of the common base support functions identified in DoDI 4000.19 (Interservice and Intragovernmental Support) are to reimburse host activities for this support. Reimbursement for DWCF mission products and services (e.g., depot supply, depot maintenance, public works center services, information processing, communications, and software development) shall be based on the approved stabilized rate. Other support incidental to the DWCF activity's primary mission or purpose is to be budgeted and reimbursed based on direct costs measurable and directly attributable to the DWCF activity. Only the incremental change in cost attributable to the DWCF activity (incremental direct cost) shall be chargeable to the DWCF activity. Indirect costs are not to be included as a cost to the DWCF activity.

Volume 2B, Chapter 9 provides budget formulation and execution procedures.

010221 Dual Funded Organizations

A dual funded organization is an organization that is funded (including reimbursable funding) by both the DWCF and other appropriations or accounts. In those instances where a function is funded with a combination of both DWCF and appropriated funds, the function initially will be funded in its entirety either by the DWCF or by appropriated funds. The determination of whether the particular function initially is to be funded by the DWCF or appropriated funds will be based on the predominance of definable units of measure for the function. Examples of definable units of measure include work load, productive hours, outputs, or ultimate use. The appropriation or

account initially funding the function shall be reimbursed by the other account(s) at the same unit of measure as was used to determine the initial funding source. The amount of reimbursement shall be determined based on the relative portion of that unit of measure attributable to each part of the organization (or funding source) involved.

This policy does not change the policy for reimbursement for base support services provided by the DWCF to tenant activities. DoDI 4000.19, Volume 2A, paragraph 0102020 and Volume 2B, paragraph 090103.K provide guidance for funding base support services.

010222 Customer Mandated Schedule

When a job order is canceled or reduced in scope, after a DWCF activity has commenced work or incurred costs on the order, the costs incurred plus the applied overhead (that is indirect and other normally allocated overhead (G&A costs)) plus costs associated with the cancellation or reduction shall be charged to the customer.

Examples of directly associated cancellation or reduction costs to be charged to customers are advance planning costs, non-creditable direct material, special test equipment, necessary preservation and/or shipment effort, and any additional effort necessitated by the cancellation and/or reduction (e.g., salvaging of material). In addition, costs charged to customers should include the costs of salaries payable to employees hired specifically to work on the canceled order until the employees are or could have been separated through a reduction in force or other appropriate action (taking into account appropriate administrative lead time), or reassigned to other direct jobs. Costs which are indirectly associated with the cancellation or reduced customer orders, under-applied overhead costs that may result in a DWCF activity as a whole from a reduced work load base shall not be charged to the customer canceling or reducing their order but shall be recorded against the net operating results of the performing DWCF activity.

010223 Glossary of Terms – Procurement

<u>Term</u>	<u>Meaning/Funding Connotation</u>
Advance Procurement (Long Lead Items)	A pre-approved exception to the full funding policy that allows procurement of long leadtime components, material, parts, and effort in a fiscal year before that in which the related end item is to be procured.
<i>Cancellation</i>	<i>Cancellation means the cancellation (within a contractually specified time) of the total requirements of all remaining program years. Cancellation results when the contracting officer notifies the contractor of nonavailability of funds for contract performance for any subsequent program year or fails to notify the contractor that funds are available for performance of the succeeding program year requirement.</i>
<i>Cancellation Ceiling</i>	<i>The maximum cancellation charge that the contractor can receive in the event of cancellation (reference Federal Acquisition Regulation (FAR) 17.103).</i>
<i>Cancellation Charge</i>	<i>The amount of unrecovered costs that would have been recouped through amortization over the full term of the contract, including the term canceled.</i>
<i>Contingent Liability</i>	<i>As a budgetary term, contingent liability represents variables that cannot be recorded as valid obligations. Such variables include: (1) outstanding fixed price contracts containing escalation, price redetermination, or incentive clause; or (2) contracts authorizing variations on quantities to be delivered; or (3) contracts where allowable interest may become payable by the U.S. government on contractor claims supported by written appeals pursuant to the DISPUTES clause contained in the contract.</i>
Centralized Item Management and Asset Control	The management in the central supply system or a DoD-wide or Service-wide acquisition and control system in which the manager has the authority for management and procurement of items of equipment. This includes such functions as requirement determination, distribution management, procurement direction, configuration control and disposal direction. Asset control includes the authority to monitor equipment availability and take such actions as necessary to restock to approved stockage levels.
Construction	The erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; the acquisition of a facility; or the relocation of a facility from one installation to another.
Detail Design Costs	The final design effort on ships normally performed in conjunction with lead ship construction, is called "detail design." This effort is procurement funded (SCN).
Economic Order Quantity (EOQ) Procurement	An exception to the full funding policy that allows the use of advance procurement to purchase more than one fiscal year's program increment of components, materials, and parts in order to obtain the economical advantages, sustain a production line, etc.
Facility Maintenance	The recurrent, day-to-day, periodic or scheduled work required to preserve real property in such condition that it may be used for its designated purpose.
Facility Repair	The restoration of real property to such condition that it may be used for its designated purpose.

Full Funding	At the time of contract award, funds are available to cover the total estimated cost to deliver the contract quantity of complete, militarily usable end items. If a future year's appropriation is required for delivery of an end item, the end item is not fully funded.
Funded Delivery Period (FDP)	A funded delivery period encompasses a 12-month period that begins when the contractor delivers the first item of a fiscal year procurement. Confusion exists regarding this time period because, in many instances, accurate administrative and production leadtimes (ALT/PLT) have not been included in the calculation. The calculation should begin with October 1. From this point in time, the ALT and PLT should be added. This amount of time plus the next 12 months are included in the funded delivery period. When excessive leadtimes are included in the calculation, additional quantities are procured that could have been funded in the following fiscal year with no change in the delivery schedule.
Leadtimes	<u>Administrative Leadtime (ALT)</u> . This is the amount of time required to complete the administrative actions leading to contract award. In most cases, ALT actions do not require funding and can therefore be accomplished prior to October 1, at which time the next fiscal year's funding is appropriated. The ALT is used to forecast contract awards. Longer leadtimes require that a larger quantity be purchased to support yearly requirements. Leadtimes should therefore reflect an accurate assessment of the time required to process the administrative actions. <u>Production Leadtime (PLT)</u> . This is the amount of time required by a contractor to produce the first item after contract award until deliveries begin. <u>Procurement Leadtime</u> . This is the total of ALT and PLT. When used to determine quantity requirements, calculations should begin when the first ALT action begins.
Modification	The alteration, conversion, or modernization of an end item of investment equipment which changes or improves the original purpose or operational capacity in relation to effectiveness, efficiency, reliability or safety of that item.
Maintenance	The routine, recurring effort conducted to maintain an end item of investment equipment at its intended capability or designed performance level.
Nonrecurring Costs	Nonrecurring costs are generally incurred on a one-time basis. Costs may include: plant or equipment relocation; plant rearrangement; special tooling and test equipment; preproduction engineering; initial spoilage and rework; pilot runs; allocable portions of the costs of facilities acquired or established to conduct the work; costs incurred for the assembly, training, and transportation of a specialized work force to and from the job site; and unrealized labor learning.
Production Rates	<u>Minimum Sustaining Rate</u> is the production rate for each budget year that is necessary to keep production lines open while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost. <u>Economical Production Rate</u> is the most efficient production rate for each budget year at which the item can be produced with existing or planned plant capacity and tooling, with one shift a day running for eight hours a day and five days a week (1-8-5). <u>Maximum Production Rate</u> is the maximum capacity rate that a contractor can produce with extant or prior year funded tooling.
Recurring Costs	Production costs that vary with the quantity being produced, such as labor and materials.
Real Property Maintenance	The various functions for the maintenance and repair of facilities and the accomplishment of minor construction financed by an O&M appropriation.

System	The combination of a number of components that are functioning with the context of a whole to satisfy a documented requirement.
Termination	The right of the government to terminate the performance of work in whole or part under a contract as specified by the contract's Termination for Convenience or Default provisions. Unlike cancellation, which is effected between fiscal years and must apply to all subsequent fiscal years' quantities of items, termination may be effected at any time during the life of a contract and may apply to the total quantity or to a partial quantity of items.
Termination Liability Funding	A budgeting technique that would provide funds on a contract to cover the maximum value of outlays that could be incurred for work accomplished by the end of the budget year plus the maximum cost to the government associated with termination of the contract at the end of the budget year.

010224 Glossary of Terms – RDT&E

<u>Term</u>	<u>Meaning/Funding Connotation</u>
Accepted for Service Use	This is the major milestone in a development program that represents the formal acceptance of an item for operational use by the Service. In some instances items are approved for Service use with qualifying restrictions or provisions pending completion of specific development deficiencies. In such instances the appropriation to fund the correction and test must be determined on a case-by-case basis, according to the expense and investment criteria. Typically, all post-Service acceptance effort will be funded in Procurement appropriations.
Command Support Costs	This term also is used in the context of the T&E programs. It refers to the "people-related" costs of the command and operational units providing collateral support to the T&E effort. These are additional costs incurred because of this test support. Examples are per diem pay, travel allowances, overtime, etc.
Contract Design Costs	The contract design phase of shipbuilding programs follows the preliminary design phase and results in a design that carries the equipment specifications necessary to meet the Navy requirements. These costs are RDT&E-funded.
Developmental Test and Evaluation (DT&E)	DT&E is that test and evaluation conducted to assist the engineering design and development process and to verify attainment of technical performance specifications and objectives.
Government Acceptance of the First Procurement-Funded Engine	This term, which is one of the two minimum requirements for initiation of engine component improvement funding, refers to the date the Government formally accepts delivery (DD Form 250) of the first engine funded under procurement appropriations.
Initial Operational Test and Evaluation (IOT&E)	It is DoD policy that there shall be conducted, before commitment of a system to production, at least an initial phase of operational test and evaluation (OT&E) adequate to provide a valid estimate of expected system operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements). This early phase of the normally longer, overall OT&E program is known as IOT&E.
Operational Test and Evaluation (OT&E)	OT&E is that test and evaluation conducted to estimate a system's operational suitability, identify needed modifications, and provide information on tactics, doctrine, organization, and personnel requirements.
Performance Envelop	The demonstrated capability of a system, system components, and special purpose software to perform its mission in relation to essential characteristics such as: speed, range, payload, altitude, rate of fire, etc.
Preliminary Design Costs	This term refers to those costs incurred in shipbuilding programs in the early stages of the cycle. They should result in a design that, on a performance or requirement basis, approaches the Navy's goal. These costs are RDT&E-funded.
Product Improvement	This term embraces all efforts of a research, development, design, or engineering nature that have the objective of improving major end items or major components of major end items. <i>The improvement may involve expanding the useful life of the end item or component, or it may increase the performance capability.</i>

Prototype	This term connotes an item from an R&D program and also connotes RDT&E financing.
R&D Installation or Activity	This term refers to those installations or activities whose support and operating costs are financed predominantly with RDT&E funds.
Special Support Costs	This term, as used in the context of test and evaluation programs, refers to those acquisition or hardware costs, other than those associated with the item that is the subject of the test, which are incurred in direct support of the T&E effort. A good example would be special range instrumentation costs.
Test Article	<i>A system representative prototype designed to obtain, verify or provide data for the evaluation of research and development or evaluate progress in accomplishing development objectives.</i>
Unique Joint Test and Evaluation (JT&E) Costs	This refers to costs such as: feasibility determinations of proposed joint tests; the provision for test design and planning support for joint tests selected; the development, procurement, installation, and operation of special instrumentation; transportation, travel, and per diem costs for the Test Director's staff; the modification of test articles as surrogates and to permit obtaining test data; transportation of equipment from permanent bases to the test site and return; and the provision for data collection/collectors, data reduction, analysis, and test reporting services. Transportation and per diem of participating personnel and maintenance and supply costs are not considered unique.

0103 BUDGET ESTIMATES SUBMISSION**010301 General**

A. This section, Budget Estimates Submission, provides guidance for the development and submission of the biennial budget estimates to OSD. Much of the budget guidance material formerly included in the "guidance" and "call" memoranda are now included in this Part of Volume 2. The USD(Comptroller) guidance memorandum, transmitted in June or July of each year, will hereafter include only specialized instructions such as program basis for the estimates, key assumptions to be used, and special supporting material requirements. Likewise, "supplementary instructions" memoranda issued on an "as needed" basis (usually in August) by OUSD(Comptroller) Program/Budget will be limited to specific instructions which amplify guidance included in the OUSD(Comptroller) memorandum and in this volume. The use of other memoranda to transmit budget guidance will be restricted to new or nonrecurring requirements.

B. Guidance for development of the National Foreign Intelligence Program Intelligence Budget Estimate Submission will be issued by the Director of Central Intelligence. Additional detail is found in Chapter 16.

C. The instructions for submitting certain summary schedules are provided in Section 010305. The instructions for back-up material tailored to each appropriation or fund category are provided in subsequent chapters. Materials required by OMB Circular A-11, which are not otherwise required by this manual, will be submitted in accordance with that Circular, unless specific exception is granted by the OMB. This is covered in Section 010105.

D. A budget work schedule will be forwarded by separate memorandum at the beginning of each budget formulation cycle. This schedule will show the dates to be used for planning the various phases involved in the formulation process.

E. Budget Material

1. The material required for the budget estimates submission will be prepared in the formats prescribed in this Part. Material submitted in accordance with OMB Circular A-11 will follow the format prescribed by that Circular. All material, with the exception of fold-in charts and tables which may be included, will be prepared on 8.5" x 11" paper. Material fulfilling Circular A-11 requirements will be bound on the left side. All exhibit books, except for Military Construction, Family Housing, Base Closure, and Information Technology, will be printed horizontally (landscape) on 11" x 8½" paper. Addressees will reduce all larger pages to the standard 11" x 8.5" size. All pages in each book are to be consistent in size. The following identifies specific requirements:

- (1) Military Personnel - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- (2) Operation and Maintenance (to include the Defense Health Program) - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- (3) Research, Development, Test and Evaluation - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Begin each program element on a facing page. Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3

holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

- (4) Procurement - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- (5) Military Construction - The justification material for Military Construction will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.
- (6) Family Housing - The justification material for Family Housing will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.
- (7) Base Closure - The justification material for Base Closure will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.
- (8) Revolving Funds - Material submitted for the budget estimate submission for **revolving funds** is to be submitted by business area on 8.5"x 11" paper, with 3 holes punched along the 11 inch side to fit standard three-hole binders. *Capital Investment Program exhibits will be prepared in landscape format.* Budget submitting offices should ensure that all narrative type is consistent. Revolving funds justification books prepared by the Components are to be unclassified. Classified exhibits will be submitted under separate cover.
- (9) Information Technology – Provide justification material in accordance with Chapter 18 Section 180202.

2. Whenever revisions or correction sheets are necessary, the revised pages showing the date of the change will be inserted in each budget book by a staff member of the DoD Component submitting the change. OUSD(Comptroller) Program/Budget staff will instruct the DoD Component's staff member as to the location of the budget books. Corrections should be held to a minimum and are not necessary for minor typographical errors which make no material difference in the analysis and evaluation of the estimates.

010302 Distribution

Distribution of budget estimates submission material will be made in accordance with the charts on the following pages. All required copies will be delivered directly by each Military Department/Defense Agency to the appropriate offices at the room numbers listed on the following page:

010303 Preparation of the Biennial Budget Estimates**A. General Guidance**

1. The Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) will send, in June or July, a budget guidance memorandum establishing submission requirements not included in this volume. Included in this guidance will be budget material due dates and instructions for preparing estimates for the prior year (PY), current year (CY), biennial budget years (BY1 and BY2), and the outyears

2. Estimates for the biennial budget years and outyears will be based upon the force levels, program decisions, and the TOA levels contained in the Program Objective Memorandums (POMs) as modified by the Program Decision Memorandums (PDMs).

3. At various organizational levels throughout the Department of Defense, a systematic cost-benefit analysis of proposed expenditures can be of significant value in program formulation. Investments and expenditures in each appropriation category will normally be supported by an analysis which matches estimated costs with benefits (outputs), subject to the following criteria:

a. Funding is, for the first time, shown as required in the period covered by the fiscal guidance, or

b. Previously established funding requirements in these years are significantly altered by changed program or project plans.

The criteria in DoDI 7041.3, "Economic Analysis and Program Evaluation for Resource Management," will apply. Budget submissions will, as a minimum, be accompanied by a statement that (1) the submission is supported by an economic analysis, or (2) an economic analysis is not required, citing the reason. Submission of detailed backup information to OSD will be on "as requested" basis.

4. Transfers of functions between DoD Components will not be reflected in the September 15 submissions unless they have been approved by the Secretary of Defense and the dollar amounts and personnel spaces to be transferred in the current year are fully decided upon by all DoD Components concerned when the estimates are prepared. Under these circumstances, both the gaining and losing Components will reflect the decisions in their estimates with equal and offsetting manpower and dollar amounts. The gaining DoD Component is responsible to confirm that this is the case. If this cannot be confirmed, then neither Component will reflect the transfer in their budget estimates. The exhibit PB-14, Functional Transfers, found in Chapter 19 of this volume will identify all functional transfers included in the budget. Each Component will also notify OUSD(Comptroller) Program/Budget of the planned functional transfers not reflected in the budget.

5. Adjustments necessary to properly reflect functional transfers agreed upon by the parties, but not included in the Budget Estimates Submission (BES), may be accomplished in the budget review process. Functional transfers not submitted in the BES or incorporated during the budget review process will be financed by reimbursement in the current year and the budget year. Necessary exceptions to this general rule will be authorized on a case-by-case basis.

6. Material should be "Unclassified" "For Official Use Only" unless contents otherwise require a higher classification. All Budget Estimates Submission material is subject to DoD 5400.7-R, DoD Freedom of Information Act Program, Chapter II, Exemptions and in particular exemption number 5.

B. Pricing in the Biennial Budget Estimates

1. It is DoD policy to reflect the most likely or expected full costs (including military and civilian personnel pay) for the current year, the biennial budget years, and outyear estimates for all appropriations.

2. Estimated price level changes will be based on data provided by OUSD (Comptroller). These indices, which will be updated as economic conditions warrant, will be used to (1) determine the amount of price escalation for a procurement line item, major RDT&E system, or construction item over a given time period, and (2) project inflation in other noncompensation areas of all other appropriations.

3. Military and civilian personnel compensation will be fully funded in the biennial budget estimates using the rates provided by the OUSD(Comptroller).

4. Biennial budget estimates for goods and services will in all cases reflect the following considerations:

a. Cost-quantity relationships as they affect unit prices -- e.g., the unit price forecast in the biennial budget estimates will be higher or lower than the unit price current when the estimates are prepared, if differences in the quantities involved are price-significant.

b. The state of development or production and the learning curve.

c. Specific price changes, to take effect at a future date -- e.g., a specific and authoritative rate or tariff schedule to take effect on a definite future date, which may involve higher or lower prices than those in effect at the time estimates are prepared.

d. Predictable cost increases due to risk.

C. Preparation of Biennial Budget Estimates - Multiple Appropriations

1. Section 0109 contains formats for those exhibits applicable to more than one appropriation.

2. In addition to those exhibits identified in Section 0109, there are exhibits required by other chapters and included in other appendices which require identification of budget estimates/requirements for more than one appropriation. This is particularly true of requirements discussed in Chapter 19. Offices responsible for budget estimates submissions must ensure that all such exhibits reflect total requirements for all appropriations.

D. Preparation of Biennial Budget Estimates - Operations

1. Separate identification and justification (including cost-benefit studies) are required for management actions such as data automation and systems engineering. The development, implementation and expansion of automated data systems will be based on an economic analysis which should show that the proposed management action will produce an early and demonstrably high return on investment or result in substantial increases in mission performance and effectiveness. Savings from previously approved investments and management actions will be separately identified.

2. The Dependents' Education Program in the budget years would be based on the best estimate of student load and planned at the current year program level in accordance with the criteria for the regular school program which will be set forth in a separate USD(P&R) memorandum.

E. Preparation of Biennial Budget Estimates - Procurement

1. In development of requirements for procurement of modern equipment to offset consumption or attrition of older items, all assets of the older items, as well as acceptable substitutes, will be applied against gross requirements in determining net procurement requirements.

2. Administrative leadtime requirements in the budget years for any principal item should not exceed the leadtime used in the development of the current year budget program.

3. Production leadtimes utilized in preparation of estimates for the budget years should be based on the latest contract experience and current conditions, and generally should not be greater than those used for the same item in the development of the current year budget program. Any increases should be clearly identified and accompanied by an explanation of the reason along with an identification of the pacing components/manufacturers causing the increase.

4. Use of long leadtime component procurement will be consistent with the full funding policy expressed in DoD Directive 7200.4. In this regard, long leadtime component procurement will be limited to those few critical components whose leadtimes exceed the obligation availability of the appropriation or are significantly longer than other components of the same end item.

5. For comparability purposes the P-1 Exhibit will show the prior fiscal year program in amounts to reflect reprogramming actions planned to be accomplished through the first quarter of the current year. To the extent that such reprogramming actions are not approved for budget purposes, the changes will be documented by PBD action to adjust the prior year program in the computer record.

6. Budget estimates will reflect economic production rates, unless there is strong justification (other than funding constraints) for the use of other rates.

F. Preparation of Biennial Budget Estimates - Research, Development, Test and Evaluation

1. In the development and review of RDT&E programs, special attention will be devoted to the numbers of civilian and military personnel required for support of those programs.

2. Increased emphasis will be placed on application of standards and austere limitations to housekeeping and support activities including real property maintenance, facilities operations, equipment replacement and maintenance, and supply inventory levels.

G. Preparation of Biennial Budget Estimates - Revolving and Management Funds

1. Revolving and management fund programs and biennial budget estimates will be consistent with, and justified by, related support requirements; that is, program and budget estimates will be based on anticipated customer needs for associated supplies, equipment, and services, loan purchase requirements for production guarantee accounts, scope of operations to be financed through management funds, etc. Biennial budget estimates will be consistent with the anticipated customer needs that can be financed by the related program included in the customers' budget estimates. Increased emphasis should be directed toward assuring that customers are getting maximum value for their appropriated funds.

2. Appropriations funded requirements for the Defense Working Capital Fund will be computed under the same guidance as outlined above for the specific appropriations.

010304 Not Used

010305 Budget Estimates Summaries and Transmittal

A. Budget Estimates Transmittal

1. The budget estimates will be transmitted by memorandum to the Secretary of Defense from the Secretary of each Military Department, the Director of each Defense Agency, the Assistant Secretary of Defense (Health Affairs), the Deputy Assistant Secretary of Defense (Environment), the Deputy Assistant Secretary of Defense (Administration), the Deputy Assistant Secretary of Defense (Drug Enforcement Policy and Support), and the Director, The Joint Staff. While it is mandatory that the exhibits below be submitted in the precise formats specified, any explanations or highlight information that the submitting official considers appropriate may accompany the transmittal. Exhibits PB-1, PB-4, and PB-8 include budget estimates summary data and will be "Unclassified", "For Official Use Only" unless the contents otherwise require a higher classification.

- PB-1. Summary of FY 19PY thru 19BY2 Budget Estimates. [Section 0109]
- PB-2. Program and Financing Schedule, Annual Accounts. (FY 19PY thru 19BY2) [Section 0109]
- PB-2A Program and Financing Schedule, Other Accounts. (FY 19PY thru 19BY2) [Section 0109]
- PB-4. FY 19BY1 and 19BY2 Budget Estimates - Schedule of Civilian and Military Personnel. (FY 19PY thru 19BY2+4) [Section 0109]
- PB-8. FY 19CY Supplemental Appropriation Requirements (Described in Section 010306). [Section 0109]

2. The specified exhibits, transmittal memorandum to the Secretary of Defense, and other explanatory or highlight information will be submitted as follows:

a. Secretary of Defense transmittal memorandum, with exhibits PB-1, PB-4, and PB-8 attached. Deliver six copies to OSD Correspondence Control, Room 3A948. Other copy requirements are identified in Section 010302.

b. Secretary of Defense transmittal memorandum, with exhibits PB-1, PB-4, and PB-8 attached. Copy requirements are identified in Section 010302.

c. Overview booklets, such as the Air Force "Highlights," Navy "Blue Book," etc. Copy requirements are identified in Section 010302.

d. Exhibits PB-2 and PB-2A for each appropriation account. Deliver two copies to Office of the USD(Comptroller), Directorate for Program and Financial Control, Room 3B872.

3. Budget estimates for the Defense portion of the National Foreign Intelligence Program will be submitted as prescribed by the Director of Central Intelligence (DCI). In addition to budget exhibits specified by the DCI, the Office of the Secretary of Defense requires certain other materials as outlined in Chapter 16.

4. Machine-readable data will be submitted to support Exhibits PB-2, PB-2A, and PB-4 (see Section 010505). A hard-copy submission of these exhibits, including FY PY, CY, BY1 and BY2 for the PB-2, PB-2A, and PB-4, will also be required. The hard copy submission should be a computer-prepared print-out of the machine data using the exhibit formats specified herein. Extreme care must be exercised to assure that the machine-readable data and the exhibits are identical in data content. As described in Section 010505, the machine data are the basis for the OSD budget review.

B. Program and Financing Schedules

1. Data for the program and financing schedules (Exhibits PB-2 & 2A) are required on the due date established for the budget submission for each appropriation and fund. Section 32.8 of OMB Circular A-11 requires the separate submission of supplementary program supplementals and proposed rescissions.

2. Program data will be presented in the program and financing schedule on an obligation basis consistent with the presentation in the President's Budget of previous years, unless other directions are transmitted by separate memorandum.

3. Actual prior year data will be required when available in accordance with specific update instructions issued separately.

4. Budget subactivities will be shown on program and financing schedules in all cases as they appear in the "Budget Account Title File Listing" of the Name Edit System structure referenced in Section 010506.

5. Special care should be taken to assure that data presented in the object classification schedule (Section 010506) is consistent with information required on special exhibits. For example, object class data provided for advisory and assistance services (BRS Object Class Tx2511) is the basis for Exhibit PB-15 (Chapter 19).

6. The hard-copy and machine-readable submissions of the section entitled "Relation of Obligations to Outlays" (commonly called the "expenditure tail") is required only from the Military Departments. It will show the budget activities/subactivities used as computer input and will also show the various computed subtotals and totals as described in Section 010506. (Hard-copy and machine-readable input are not required for "Relation of Obligations to Outlays" for Defense accounts with a component identification code of "97" except for the three Defense accounts required by paragraph F of Section 010506.)

010306 Supplemental Appropriation Submission

A. Budget Estimates Transmittal

1. Supplemental appropriations are normally allowed to meet unforeseen contingencies of a magnitude that cannot be absorbed or accommodated through reprogrammings and transfers. Specific guidance on this will be provided on a case-by-case basis.

2. OMB Circular A-11 provides additional policy guidance on supplemental estimates.

B. Supplemental appropriation requirements will be submitted on a schedule in the format of Exhibit PB-8, provided in Section 0109. This exhibit will be transmitted in the same manner as the budget estimate summaries (see Section 010305).

C. Material Included for Informational Purposes

1. Under the 41 U.S. Code authorizations (formerly Section 3732 of the revised statute), the law provides that the President may exempt appropriations, funds, and contract authorizations which are available for military functions under the Department of Defense from the antideficiency provisions of 31 U.S. Code 1517 (formerly Section 3679 of the revised statute) whenever he deems such action necessary in the interests of national defense. Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost as an accepted expense. For example, if the President determines that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in the annual appropriation act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel as an accepted expense. Obligations are then authorized to be incurred in excess of amounts appropriated. After substantially all obligations have been liquidated, an appropriation is requested to liquidate any unfinanced balances.

2. The law provides essentially that, notwithstanding the balances available, revolving funds may incur obligations to provide for making issues through the production lead-time period (10 USC 2210(b)). As a technical matter, this constitutes a form of contract authorization, and is so displayed in the President's Budget.

010307 Additional Budget Submissions

A. General Guidance. Following the initial biennial budget estimates submission (initial submit), normally on September 15, additional budget estimates submissions (additional submits) may be made, where warranted by specific changes in circumstances, within approved TOA control totals established by the USD(Comptroller) and under the following restrictions:

1. Additional budget submissions must be submitted as adjustments to, not substitutes for, the initial submit.

2. Unless otherwise directed by the USD(Comptroller), additional budget submissions must be offset with equal or greater cost tradeoffs, and must clearly indicate the areas of increase and decrease consistent with the justifications submitted as part of the initial submit.

3. Proposed decreases may not consist of reductions already effected or imminently planned to be effected as part of the budget review.

4. Additional budget submissions may not be used to compensate for incomplete or inadequate initial submits.

5. Additional budget submissions may not be used to appeal budget decisions.

6. If an additional budget submission results in an impact on revolving funds, those related requirements must be incorporated in the additional budget submission.

B. Submission Requirements In order to be considered during the budget review, all additional budget submissions must be received no later than September 30 or as specified in the annual guidance. Additional budget estimates for the current year or biennial years 1 and 2 will be accompanied by Exhibit PB-10, provided in Section 010702, plus the necessary justification material. This should take the form of a complete narrative justification and may be included on the transmittal memorandum or as an attachment to Exhibit PB-10. The applicable out-year impact of the additional budget submission will also be shown on Exhibit PB-10. The additional estimates will be transmitted in two copies (plus two additional copies for each appropriation affected) by memorandum to the USD(Comptroller) and signed by the same official who submitted the initial budget estimates or his appointed deputy. All additional budget submissions will be hand carried to the Office of the USD(Comptroller), Directorate for Program and Financial Control, Room 3B872, for OSD processing. The additional budget submission will be addressed in subsequent budget decision document(s).

010308 Major Budget Issues (MBIs)

Near the end of the budget review process, the Secretary of Defense and the Deputy Secretary of Defense may provide for the review of Component major policy or budget issues that have not yet been resolved. Resolution of these issues may displace other programs within the fixed DoD topline. Copy requirements of Component issues will be provided if an MBI review is scheduled. A general format is provided in Section 0107.

010309 Budget Review Procedures

A. Budget Review System. The automated Budget Review System is the official OSD record of the budget estimates as submitted by the DoD Components and adjusted by Secretary of Defense decisions known as Program Budget Decisions (PBDs). The data contained in the Budget Review System is the base for preparation of the Program and Financing Schedules, Relation of Obligations to Outlays, Object Classification Schedules, and the data required for OMB MAX Budget System, as required by OMB Circular No. A-11. These documents are forwarded to OMB for preparation of the President's Budget. In addition, the automated Budget Review System is used to prepare a comprehensive set of management information summaries used to support the budget press release, statements to the Congress and other information requirements. Financial data, military end strength, and civilian full time equivalent (FTE) data are provided. Budget estimate submissions are entered into the system through machine readable inputs from the DoD Components. The formats and requirements are prescribed in Sections 010505 and 010506. During the joint OMB/OSD Budget Review, budget decision documents are recorded into the computer system and the current status of the budget review is available on a recurring basis.

B. Development of Out-year Data During the Budget Review

1. The automated Budget Review also includes a continuing update of the out-year TOA and manpower, adjusted to reflect the extension of CY, BY1, and BY2 decisions made during the budget review.

2. TOA, military end strength and civilian FTE data for the initial out-year data base are provided by each of the DoD Components (reference Section 010505). During the budget review, as budget decision documents are approved and recorded into the automated record, the TOA and manpower out-year impact of each decision is addressed on the decision document and is also entered into the automated record. The budget decision document will contain one of the following descriptors of out-year impact:

- a. The estimated out-year impact for each year in thousands of dollars and full-time equivalents/end strength.
- b. Substantive program direction for the out-years as a basis for DoD Component determination of dollar amounts and manpower involved (to be used if out-years are not specifically addressed in a budget decision document).
- c. No known out-year impact.

3. As with the CY, BY1, and BY2 decisions, the out-year adjustments approved in the Secretary of Defense decisions are entered into the automated Budget Review System using record layouts shown in DD Form 2234, Out-year Recording Form (\$\$), and DD Form 2236-1, End Strength Out-year Recording Form. TOA adjustments are recorded at the appropriation account level by budget subactivity, and by program budget decision number. Manpower data is recorded at the appropriation account level by budget subactivity, and by program budget decision number with active military manpower detailed by officer, enlisted and cadets; selected reserve manpower detailed by officer and enlisted personnel category; and civilian FTE detailed by U.S. direct hire, foreign national direct hire, and foreign national indirect hire.

4. The automated Budget Review System produces Out-year Impact Status Reports on a recurring basis throughout the budget review. These reports, which are distributed to the applicable DoD Components, show TOA & manpower data by appropriation, budget activity/subactivity and personnel category for the budget submission base and all adjustments to the base resulting from decisions made during the budget review. The final reports at the conclusion of the budget review reflect the out-year numbers (TOA and manpower) which are the control numbers for the President's Budget update of the Future Years Defense Program (FYDP). It is essential that the Out-year Impact Status Reports be reviewed by the DoD Components on a recurring basis during the budget review so the out-year numbers are under continuous scrutiny and the President's Budget update for the FYDP may proceed in a timely manner.

C. Printing Schedule for Budget Material

1. OMB Circular No. A-11 prescribes the requirements for materials to be included in the President's Budget document. Annually, the ODC(P/B), OUSD(Comptroller) publishes instructions on the procedures to be followed during the budget review. These instructions detail the sequence of events necessary to finalize the budget review and complete the printing phase of the budget. All actions concerning printing of budget material will be accomplished in accordance with these references and the following paragraphs.

2. OMB will provide ODC(P/B), OUSD(Comptroller) with reprinted galleys based on last year's President's Budget document. These galleys will omit all amounts in the schedules and tables. The submission of marked-up reprinted galley and new material is intended to fill technical budget preparation needs (i.e., determine that all lines, account titles, text, and appropriation language are correct and that all required schedules are in print). Additionally, by representing the best estimate of the current status of programs, the impact of any further changes, as final decisions are made, will be minimized. The reprinted galleys will be marked-up by the ODC(P/B), OUSD(Comptroller) staff, probably in mid-December, to show the current status of the budget after the prior year column has been updated and validated. The data in the current year and both biennial year columns will be blank at this time.

3. There will be no changes to the prior year column of the budget after reprinted galley, except to correct printer errors. In some cases, new print materials may be required after reprinted galleys, (e.g., new

accounts, accounts with supplementals requiring separate schedules, rescission proposals and other material to be presented in the President's Budget document for the first time).

4. OMB will cycle the reprinted galley and provide galley proofs to ODC(P/B), OUSD(Comptroller). Further instructions on processing galley beyond the first step will be contained in the ODC(P/B), OUSD(Comptroller) instructions cited in 1. above or some other appropriate guidance memorandum.

0104 CONGRESSIONAL JUSTIFICATION/PRESENTATION**010401 General****A. Purpose**

1. This section provides instructions for the preparation of justification material for presentation to congressional committees. Justification material should be developed using the guidelines established herein as the minimum requirements to be included in the Justification Books. Any exception to these minimum requirements must be cleared with OUSD(Comptroller) Program/Budget.

2. Justification of proposed supplemental appropriations and budget amendments are covered in OMB Circular A-11 and Section 010402; however, separate instructions will be issued by OUSD(Comptroller) Program/Budget as the need arises.

3. General preparation and submission instructions pertaining to individual appropriations, Intelligence Programs and Communications, Command and Control (C³) Programs are contained in Chapters 2 thru 7, 9, 10, 16, 17 and 19.

4. All congressional budget/presentation material is subject to DoD 5400.7-R, DoD Freedom of Information Act(FOIA) Program requirements. Chapter II, Exemptions of this regulation should be reviewed carefully before denial of any FOIA request. Exemptions will generally fall into category 5.a.9 in section 3-200. Use of For Official Use Only (FOUO) must meet the requirements of DoD 5400.7-R Chapter IV.

B. Preparation of Material

1. Separate Justification Books will be furnished for each Public Law title relating to each Military Department. An O&M Overview book will be developed within OUSD(Comptroller) Program/Budget as well as a consolidated overview of Multiyear Procurement programs based on submissions of the Military Departments. Material prepared by the individual Defense Agencies also will be consolidated by OUSD(Comptroller) Program/Budget into a single Justification Book for each Public Law title. Material for the Operation and Maintenance, Defense Agencies; U.S. Court of Appeals for the Armed Forces, Defense; Environmental Restoration, Defense; Office of the Inspector General; Overseas Humanitarian Disaster and Civic Aid, and Contingencies, Defense; appropriations will be consolidated into a single Justification Book. Additionally, information technology budget material prepared by the Military Departments and other DoD Components will be consolidated by the *Office of the ASD(C³I) Resource Management Directorate* into a single Justification Book. The Department of the Army will prepare a justification book for Chemical Demilitarization programs and will consolidate material for the Family Housing and Homeowners' Assistance Fund, Defense appropriations into a single Justification Book. Each Department will prepare a Justification Book for each Base Closure Account. In addition, separate Justification Books will be prepared for Intelligence-Related Activities and the Defense portion of the National Foreign Intelligence Program, the latter as prescribed by the Director of Central Intelligence. All other Justification Books will be annotated as appropriate to indicate items and resources supported in Intelligence Program Justification Books. Also, separate Justification Books will be prepared for JMIP and TIARA program aggregations as prescribed in Chapter 16. A separate Justification Book will be prepared for C³ programs, with DoD component input as prescribed in Chapter 17.

2. Classified and unclassified data will be included in the single volume or set of volumes for each title with the classified pages bearing the appropriate security classification, except that all materials contained in the Military Personnel and Operation and Maintenance justification books will be unclassified. Classified exhibits will be submitted separately and explanation provided for their being classified. Fiscal data pertaining to explicitly identified portions of the National Foreign Intelligence Program shall be classified in accordance with instructions in Chapter 16.

The highest security classification of data included in Justification Books will be SECRET. Information requiring a higher classification will be discussed with OUSD(Comptroller) Program/Budget on an individual situation basis. All classified data will be bracketed by pencil as thus [] to permit the congressional committees to publish an unclassified version. Data not bracketed will be assumed to be unclassified. In bracketing classified columnar data, each column will be individually bracketed. Care must be taken to assure that unclassified data are not bracketed. Security classification markings should be centered at the top and bottom of applicable pages using gummed-back markings to assure clarity. The appropriate automatic downgrading notation will be used in accordance with DoD 5200.1-R "Information Security Program Regulation". The appropriate classification cover sheet must be utilized.

3. Military Departments will be responsible for clearing the justification material with the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, prior to transmittal to the congressional committees. OUSD(Comptroller) Program/Budget will be responsible for the security clearance of the consolidated Defense Agencies Justification Books, as necessary.

4. The Program and Financing, Object Classification and Personnel Summary schedules will reflect the full current year program, including those parts which require supplemental appropriation action.

5. Computer-prepared print-outs of the Program and Financing and Object Classification Schedules (Budget Review System Report 21) will be available from OUSD(Comptroller) P/B and will be used in the Justification and Backup Books as specified for each appropriation title in the following chapters. Computer print-outs will be reduced to the size specified herein.

6. Printing of Congressional Budget Material:

- General. Tabs will be used only where specified by OSD; McCall (edge) indexing will be used as appropriate. Justification material should be printed on both sides of the page wherever feasible. Headings for an appropriation or budget activity will appear on the initial page of the subdivision and will not be repeated on subsequent pages, except RDT&E Program Element Listings. The Components will work with DPS to determine the most appropriate and quickest method of printing and fastening each of the books subject to the guidance by appropriation title below.
- Military Personnel. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- Operation and Maintenance. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- Research, Development, Test and Evaluation. Material is to be printed horizontally (landscape) on both sides of the page on 11" x 8½" paper using a 1" margin on the side to be bound and 1/2" for other edges. Components will request DPS to reduce all larger pages to the standard 11" x 8½" size so that all of the pages in each book are consistent in size. The material will be printed head to toe with 3 holes punched across the top margin. The following is the fastening preference:: staples, screw posts, ACCO fasteners, etc.. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Books are to be a maximum range of about 600-650 pages where possible (300-325 sheets of paper printed both sides).

Since the justification material is printed double sided, then each PE package must begin on the front side of a new page. When the last page of a PE package does not end on the backside of the paper, then a blank page

must be inserted with the wording “This page intentionally left blank” in bold letters, centered on the page. The reason for this is so that the justification material can be easily broken apart and sorted by PE with all of the pertinent exhibits.

For those Components that have a large number of PEs and printing the material all in one volume is impractical, it is preferred that the justification material be submitted by budget activity with the Science and Technology budget activities (BA 1 through BA 3) printed in one volume and the remaining budget activities printed in a separate volume or in individual volumes. Each separate book should include an R-1 listing and a table of content indicating which volume and page the applicable program element can be found.

- Procurement. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

- Military Construction. The justification material for Military Construction will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. All exhibits will be printed utilizing white paper. . Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Family Housing. The justification material for Family Housing will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. . Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Base Closure. The justification material for Base Closure will be provided on 8.5” x 11” paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1” margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Revolving Funds. Justification books for revolving funds are to be submitted in one volume with 3 sections: Component Overview; Operating Budget and Capital Budget. Component Overview and Operating Budget sections are to be printed in portrait format (vertically) on 8.5” x 11” paper head to head on 2 sides. Capital budget exhibits are to be printed in landscape format (horizontally) on 11” x 8.5” paper head to toe on 2 sides. Budget submitting offices should ensure that all narrative type is consistent. All justification material will be punched to fit standard three-hole binders. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Information Technology. Provide material in accordance with guidance contained in Chapter 18, Section 180304.

- Intelligence and C³ Programs. *Instructions for these books are contained in Chapters 16 and 17.*

7. Justification book cover inserts will be 220 index stock using the following colors: Army - green; Navy - buff; Air Force -blue; Defense Agencies (including the U.S. Special Operations Command and the U.S. Transportation Command) - white. Covers will bear the appropriate security markings, title of the volume as specified herein, the phrase "Submitted to Congress February 19...", and the appropriations included.

8. The use of acronyms and abbreviations in the justification material should be held to a minimum. However, where acronyms and abbreviations are used, they must be identified on the page on which they appear.

9. The exhibit numbers used in this section are for reference purposes only and should not be used in the Justification Books.

C. Submission of Justification Books for Review

1. Before the justification material can be released to the Congress, it must be reviewed by the appropriate OUSD(Comptroller) or OASD(C³I) directorate to ensure that policies and decisions made by the President and Secretary of Defense are fully reflected. Accordingly, three advance sets of Justification Books will be forwarded to the appropriate OUSD(Comptroller) or OASD(C³I) directorate for review. The following is a list of the directorates:

Directorate for Operations and Personnel,
3D868, 697-9317
Directorate for Investment,
4B916, 695-5507
Directorate for Revolving Funds,
3B866, 697-1880

Directorate for Military Construction,
3D841, 697-4829
Office of the ASD(C3I) Resource Management
Directorate, 3D228, 695-6735
(For IT Justification)

In addition, 1 set of the Military Personnel Justification Books for the Reserve Components will be delivered to OASD(RA), Room 2D528.

The Military Departments should also send two copies of advance sets of justification books to Washington Headquarters Services, Directorate for Freedom of Information and Security Review (Room 2C757, Pentagon) for clearance. Clearing material through this Directorate should be accomplished piecemeal to expedite the final review. Clearance by OUSD(Comptroller) P/B will be evidenced by an approval from the applicable Program/Budget Director, initialed on one of the advance copies of each Justification Book and returned to the applicable service. Upon advice from OUSD(Comptroller) P/B and Washington Headquarters Services, Directorate for Freedom of Information and Security Review that the advance sets of justification books are acceptable, the DoD components will complete preparation and assembly of Justification Books.

Under no circumstances will justification material be released to congressional committees or the public prior to receipt of these clearances.

The Communications, Command and Control (C³) Justification Books will be reviewed by ASD(C³I). Ordinarily, the OUSD(Comptroller) P/B Director will not initial the advances for release until these reviews are accomplished.

2. Except as specified herein, submission dates will be provided in separate correspondence from OUSD(Comptroller) Program/Budget.

010402 Supplemental and Amended Appropriations Requests

A. Organization of Supplemental Appropriations Requests Justification Books

1. Justification Books in support of supplemental appropriations requests will be prepared by OUSD(Comptroller) P/B, based on material furnished by the DoD Components. Justification materials will be addressed in separate correspondence from OUSD(Comptroller) P/B.

2. The Justification Book will be arranged as follows:

a. Table of Contents and Summaries. These items will be prepared by OUSD(Comptroller), P/B.

b. Section 1 - Title I - Proposed Appropriations for Various Programs. This section will contain appropriate language, narrative justifications, and any special exhibits in support of program supplemental

requests. The appropriation language will be extracted by OUSD(Comptroller) P/B from the Budget Appendix. Supplemental appropriation requests related to all program supplementals will be supported by a narrative justification in the format of Exhibit PB-37A, provided in Section 0109.

B. Organization of Amended Appropriations Requests Justification Books

1. A separate abbreviated Justification Book will be prepared by OUSD(Comptroller) and/or each Military Department for each affected appropriation title; e.g., Operation and Maintenance; Procurement; RDT&E; etc. (Additional justification materials required of Defense Agencies and for Defense-wide accounts will be identified in separate correspondence from OUSD(Comptroller). Related Justification Books will be prepared by OUSD(Comptroller) P/B.) Each Book should be stapled but must contain holes punched to fit existing Justification Book binders. (NOTE: Depending on the magnitude of a particular budget amendment; i.e., number of DoD components and appropriation accounts affected, single Justification Books may be prescribed for each DoD component, or a single Justification Book may be prepared by OUSD(Comptroller) P/B with input from the affected DoD components.)

2. Each Justification Book will contain the following, as a minimum:

- a. A single Table of Contents
- b. By individual appropriation account:

(1) Revised appropriation language (retyped from Budget Appendix to reflect revised request).

(2) Budget Amendment Summary, in the format of Exhibit PB-37R (see Sec 0109), highlighting changes to the pending request.

(3) Program and Financing Schedule (abbreviated) in the format of Exhibit PB-37S (see Section 0109). Both the Budget Plan and Obligation Plan will be shown for multi-year accounts.

(4) Narrative Justification by Budget Activity in the format of Exhibit PB-37T (see Section 0109). Narrative will discuss dollar, quantity, personnel changes, etc., at least at the level of changes indicated on the Budget Amendment Summary (Exhibit PB-37R).

(5) Existing P-1 and R-1 Exhibits will be marked up to indicate changes resulting from the proposed amendment.

(6) Procurement and RDT&E Justification material will be retyped, where applicable, to encompass changes resulting from the proposed amendment.

3. Three advance sets of materials will be forwarded to the Directorate for Plans and Systems, OUSD(Comptroller), Room 3A862. Two copies should also be submitted at that time to Washington Headquarters Services, Directorate for Freedom of Information and Security Review, Room 2C757, for security clearance. Other appropriate provisions of Section 010401 of this Volume pertain. Military Departments will make the same distribution of above Books as for regular congressional justification materials.

C. References Additional instructions are contained in OMB Circular A-11.

010403 Distribution/Internet Posting of Budget Material

A. Copies of ***OSD-generated*** justification materials for congressional distribution will be delivered to OUSD(Comptroller), Plans and Systems, Room 3A862 for delivery to the congressional committees.

B. Each Military Department will deliver copies for congressional committees, GAO, Library of Congress, CBO, and OMB, etc. OUSD(Comptroller) (P/B) will distribute copies of the consolidated Defense Agencies justification material. The Office of the ASD(C³I) Resource Management Directorate will distribute copies of the consolidated Information Technology Justification.

C. **Copies of classified material and other backup documentation for OSD will be delivered directly by each Military Department to the offices listed.** Total distribution including the number of copies are also provided on the following tables. Advance books (40) are required to be produced by the due dates so that immediate distribution may be made to the congressional committees. The remaining quantities will be delivered/distributed 3 to 5 days thereafter.

D. Internet Posting of Unclassified Budget Justification Material.

1. Justification material for the President's budget will have limited paper copy distribution as shown on the distribution charts. No internal DoD distribution will be made of unclassified justification material that is provided to the Congress, OMB and other non-DoD organizations. This justification material will be available solely through posting to Component internet sites.

2. However, classified budget justification and budget backup material as identified in the distribution tables will be provided in paper copy to the organizations listed. Appropriate OUSD(Comptroller) directors should be consulted prior to distribution of material not listed.

3. Internet posting on Component Web Sites.

(a) Web pages presenting Defense budget documents must be designed to facilitate user discovery of the information. These pages will be used extensively by Congressional staffs, the media, and the public, and the presentation of material reflects upon the organization sponsoring the site. Budget documentation should be logically grouped, and link names should be clear and concise, to allow the user to rapidly navigate to the document of interest. Graphical content should be limited, to allow reasonable download times when accessed via modem. The Military Departments must ensure that established web pages meet these criteria.

(b) Defense Agencies and managers of Defense-wide accounts will be provided separate guidance for the submission of budget justification in an electronic format. OUSD(Comptroller) will consolidate Defense-wide justification and distribute/post to the Comptroller internet site.

(c) Posting of justification material on Component web pages should occur no later than 5 working days after delivery of the paper copies to the Congress, but not prior to delivery to the Congress.

(d) As a reminder, for Freedom of Information requests received prior to posting the unclassified budget material on the internet, it is the responsibility of the DoD component to comply with the request in accordance with DoD 5400.7-R.

E. CD-ROM Production

Upon completion of the posting of budget justification material to the Component internet site, a CD-ROM containing all of this material will be produced and distributed in accordance with the distribution tables that follow. This CD-ROM should be distributed not later than 45 days after the Budget of the United States Government is presented to the Congress. This process will make budget material available for those that lack internet access and for historical purposes.

010404 Witness Statements

A. Purpose This section provides instructions for preparation of witness statements for testimony at hearings before congressional committees.

B. Preparation

1. Each witness statement should contain a cover page that includes the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing; and an embargo statement "Not for Publication Until Released by the Committee" (or Subcommittee, if applicable).

2. The following line-spacing guidelines should be followed in typing statements:

a. Double space statements prepared for presentation to the committees, for easy reading by the members.

b. Single space statements that will be returned with transcripts or those prepared solely for inserting into the record.

3. The various congressional committees publish instructions for preparation of witness statements for their committee. These instructions, unique to each committee, are available from the following offices:

a. House and Senate National Security/Defense and Military Construction Appropriations Subcommittees - Directorate for Plans and Systems, USD(Comptroller) and Service Budget Liaison offices.

b. House National Security and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

c. Other congressional committees - Instructions are normally included in the letter requesting the hearing.

4. In order to provide some background on the witness for a committee, a biographical sketch of the witness should be included in the witness statement following the cover page. This is normally not necessary for witnesses such as Service Secretaries unless they are appearing for the first time before the committee.

C. Security Review

1. *DoD Directive 5400.4 calls for DoD witnesses to submit their prepared statements to Washington Headquarters Services, Directorate for Freedom of Information and Security Review, Room 2C757, (703)697-4325, for clearance.*

2. *This should be done as far in advance of the required date of transmittal to a congressional committee as possible, usually 5 or more working days prior to the date clearance is desired.*

D. Number of Copies

1. *Upon completion of the security review process, the originating office should ensure that 75 copies of unclassified statements are delivered to the Directorate for Defense Information, Office of the Assistant to the Secretary of Defense (Public Affairs), Room 2E765, Pentagon. This should be done at least 24 hours in advance of the scheduled appearance of the witness before the congressional committee. Be prepared to provide additional copies on short notice.*

2. *These procedures will allow the Office of the Assistant Secretary of Defense (Public Affairs) to meet news media requirements as soon as statements are released by the congressional committee or subcommittee.*

3. *A chart identifying the various oversight committees' copy requirements for witness statements and the date that the statements are due to the committee is republished periodically by the Directorate for Plans and Systems, USD(Comptroller), as committee requirements change. Be careful to use the most recent chart.*

4. *Special care should be exercised to ensure that specified due dates are met. The committees use the witness statement in preparing for the hearing and so suspense dates are important. Committees will routinely predicate cooperation in discussing or releasing possible hearing questions or topics on the timely delivery of these statements.*

5. *Offices responsible for arranging the attendance of principal and supporting witnesses at a hearing normally prepare a listing of witnesses known as the Witness List. These offices will contact all involved parties to obtain the names and positions of the witnesses for the Witness List.*

010405 Transcript Processing

A. Purpose This section provides instructions for processing transcripts of witness testimony at hearings before congressional committees.

B. Initial Receipt

1. The House and Senate Appropriations subcommittees on National Security/Defense, and Military Construction Appropriations provide hearing transcripts directly to Budget Liaison offices of the Services and to the Director for Plans and Systems, Under Secretary of Defense (Comptroller). All other hearing transcripts are provided directly to the Legislative Affairs office of the Services and to the Office of the Assistant Secretary of Defense (Legislative Affairs).

2. The original copy of the transcript is then provided to the office of the principal witness utilizing DD Form 1587, Record of Congressional Transcript Review, as the transmittal document. To meet committee requirements and allow time for final review by Washington Headquarters Services, Security Review, each element in the review process must give cooperative consideration to the time requirements of all elements in meeting due out dates. DoD Directive 5400.4 provides guidance in utilizing DD Form 1587. Instructions are also printed on DD Form 1587.

3. The various committees publish instructions for processing transcripts for their committee hearings. These instructions, unique to each committee, are available from the following offices:

a. House and Senate National Security/Defense and Military Construction Appropriations Subcommittees - Directorate for Plans and Systems, USD(Comptroller) and Service Budget Liaison offices.

b. House National Security and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

c. Other congressional committees - Instructions are normally included in the letter requesting the hearing.

C. Processing Procedures

1. Upon receipt of the transcript in the office of the primary witness, that office will review and edit the transcript and prepare the necessary inserts including questions for the record. At the same time, those staff offices required to provide input to the transcript should be tasked, in writing, for their specific portion. Page and line number/question number should be referenced when tasking inserts for the record.

2. Offices providing input to transcripts should clear their internal security review office prior to providing their input to the principal witness' office. After consolidation of the edit/review of the transcript and inclusion of necessary inserts, the office of the principal witness will then need to obtain the proper security clearance for the transcript and inserts from Washington Headquarters Services, Directorate for Freedom of Information and Security Review. A DD 1790, Prepared Testimony Review must be used. DoD Directive 5400.4 provides instructions to be followed in processing the transcript through the security review process.

3. *Plain bond (8.5" x 11.0" with left and right margins of 1.5")* Insert for the Record, will be utilized for all inserts to congressional testimony and questions/answers for the record. Formats for completing these for the four oversight committees are provided in Section 0109.

4. After completing the security review process and required coordination's, the completed transcript should be returned to the office from which the transcript was received (Transcript Action Monitor) for final review and delivery to the congressional committee.

5. Special care should be exercised to ensure that transcript processing suspense dates are met. The committees emphasize that the deadline dates imposed by them must be met. As the committees approach mark-up, the importance of meeting deadlines becomes even more critical. Transcripts should not be unduly delayed while gathering information for the record. If a delay is encountered, a note that the data will be furnished at some specified date should accompany the transcript and processing should proceed.

D. Page Proofs/Galleys Often committees allow DoD to review "page proof"/"galleys" of congressional testimony to ensure that changes have been incorporated and that classified data has been deleted from the version that will be made public. Extreme care must be exercised to ensure that all classified data have been excised.

010406 Appeal Process on Congressional Actions

A. Purpose Each year the actions taken by congressional committees during consideration of the DoD authorization and appropriation bills are reviewed by DoD components. This Section provides policy guidance and procedures for appealing such congressional actions.

B. Scope of Material

1. DoD appeals to congressional committees may be in the form of a letter to the appropriate committee chairman (or chairmen in the case of appeals to joint conferees), which sets forth the Department's position on the most significant programs/items impacted by congressional actions. This letter is prepared for the signature of the Secretary of Defense. Only the Secretary will provide the Department's position on appeal items.

2. DoD appeals also may be in the form of an appeal package consisting of as many as 100 or more pages, one for each action being appealed. This package is submitted to the appropriate committee by the USD(Comptroller). It is not submitted as an enclosure to an appeal letter, but may be referred to in the letter.

3. The submission of appeal material can vary each year and is primarily dependent upon the timing of each committee's actions on the budget request. The preparation of appeal items begins when the actions of the committees become known, usually with release of the committee's report. Normally, appeal material will be modified to reflect final floor action since amendments adopted on the floor can significantly change positions reported out by the committees. In most cases, the process is as follows:

a. To Authorization Conferees. *This appeal is based on the actions of both the House National Security and Senate Authorization Committees, as modified by House and Senate floor action.*

b. To Appropriations Conferees. *This appeal is based on the actions of both the House and Senate Appropriations Committees, as modified by House and Senate floor actions.*

C. Preparation of Appeals

1. Once the actions of an oversight committee become known, DoD components normally will be requested to provide input for incorporation into the Secretary's appeal letter or appeal package. Appeal input will be submitted in the general format of Exhibit PB-39A-1 and PB-39A-2 (provided in *Section 0109*) in both hard copy and on floppy disk in either Microsoft Word or WordPerfect format for DOS (with no graphics). Components may be asked to assign a priority to the actions they want appealed.

2. All appeal materials must be unclassified. Verification that materials are entirely unclassified must be obtained by the DoD component from the component's security review prior to submission to OSD. USD(Comptroller) will obtain clearance of the consolidated appeal package from the Washington Headquarters Services, Directorate for Freedom of Information and Security Review, Room 2C757, the Pentagon.

D. Policy Guidance, Preparation and Coordination of Budget Appeals

1. By memorandum of May 27, 1983, Subject: "Congressional Justification of the President's Annual Defense Budget," the Secretary of Defense charged the Comptroller with the responsibility to coordinate all justification actions for his consideration that may be interpreted as reprogramming, supplementals, amendments, or appeals to the Defense budget. Therefore, in order to ensure that the Department speaks to the Congress in this area with one voice and remains consistent with the Secretary's policy direction, all appeals to congressional committees will be prepared by the USD(Comptroller).

2. The Directorate for Plans and Systems, within the Office of the USD(Comptroller) (Program/Budget), will issue instructions for submission of appeal input. Along with other Comptroller directorates, Plans and Systems will review the input and prepare a draft appeal letter and appeal package. Normally, these drafts will be sent for comments to the appropriate DoD offices. Clearance on all appeal materials will be requested from the Office of Management and Budget.

3. While responsibility for consolidation and coordination of appeal materials resides with the USD(Comptroller), all offices are responsible for ensuring that the materials they submit remain up to date. Submitting components e.g. The Joint Staff) should provide only one position on each issue submitted.

E. Classified Appeals. Actions of congressional committees documented in classified annexes (such as by the Intelligence Committees) to reports or classified letters may be addressed in classified appeals prepared by the ASD(C³I). Further guidance is contained in Chapter 16.

0105 BUDGET AUTOMATION REQUIREMENTS**010501 Automated Future Years Defense Program (FYDP) Data Base**

Automation requirements for the FYDP and technical guidance for the submission of program element change data have been moved to Section 0107. Director, Program Analysis & Evaluation (PA&E), will provide Components with guidance on submission requirements.

010502 Automated Procurement Programs Database

A. Purpose and Objectives. This section provides for the maintenance of the Procurement *Programs* as an automated database which will be the primary structure for quantity and program cost at line item level of detail for a number of related procurement program documents. The Procurement *Programs* supports and should be consistent with the following documents: (1) Procurement Programs (P-1 and *P-1R*) Reports and all supporting budget backup exhibits, (2) Congressional Data Sheets, (3) Selected Acquisition Report (SAR), and (4) Procurement Program and Financing Schedules of the President's Budget.

B. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, and the Defense Agencies (hereafter referred to as "DOD Components") that contribute data to the Procurement *Programs*.

C. Reporting Requirements. The initial automated database was established consistent with the procurement data submitted to the Congress in support of the FY 1974 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program Objective Memoranda, (2) Budget Estimates, and (3) President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

D. General Instructions - Preparing the Procurement Programs. The Procurement *Programs* provide resources in a line item level of detail with appropriation identification. A detailed description of line item entries is listed in Volume 2B, Chapter 4, Section 0402 of the Budget FMR. The minimum information required in the Procurement *Programs* is as follows:

1. A summary by appropriation account with subtotals for DOD Components.
2. A summary of each appropriation account by budget activity with an appropriation total.
3. A detailed line item listing in budget activity/subactivity sequence.
4. Entries for the individual line items should be on the same basis as that used for budget submissions. Multiyear procurements (MYP) are identified for P-1 line items with MYP as defined in Section 010203. Advance procurement entries should be used as specified in Volume 2B, Section 040502. Initial spares listed with the procurement item (post delivery and outfitting costs for Shipbuilding and Conversion, Navy) should be shown immediately following the line as a memorandum entry--non-add to the budget activity total.
5. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations, upward obligation adjustments, and rescissions, as appropriate, after the appropriation expires but before it is canceled.
6. Cost to complete column provides the data necessary to obtain the total procurement cost for acquisition of weapon items. It is necessary to estimate the cost of completing the approved program for major weapon systems included in the Selected Acquisition Report (SAR) reporting system and for multiyear contracts utilizing economic order quantity advance procurement. Such costs will be entered in the "cost to complete" column of the Procurement *Programs*. Entries in the "cost to complete" column are not required for other procurement line

entries. The “cost to complete” estimate will include: (1) the portion of the “approved quantity” to be procured beyond the FYDP, and (2) costs to complete acquisition of units procured in prior years such as outfitting and post delivery requirements for ships which will not deliver during the FYDP.

7. Security classification of line items is determined by the submitting component subject to OSD Security review. Except for information published in the unclassified version of the P-1 Report, data contained in the Procurement *Programs* may not be released outside the DoD without the expressed written consent of the Under Secretary of Defense (Comptroller). (In the case of the Procurement *Programs* update for the Program Objectives Memorandum, this consent must come from the Director of Program Analysis and Evaluation.)

E. General Instructions - Preparing the Procurement Programs (P-1). The P-1 document is derived from and consistent with the *Budget Review System*. *The P-1 is provided annually to the DoD oversight committees of the Congress coincident with the transmittal of the President’s Budget. An unclassified version is provided to OASD(PA) for use by non-DoD activities. The minimum information required in the P-1 is as follows:*

1. Identification codes and a detailed description of line item entries are explained in paragraph F below.

2. The line item data provided is PY, CY, BY1 and BY2.

3. The security classification will be in accordance with the criteria set forth in Section 010108.

F. Procurement Data Elements and Record Formats

1. Codes - Appropriation Code, Component Code, and Budget Activity Code are as specified in Section 010506. Budget Subactivity Codes will be assigned by the responsible Military Department or Agency.

2. Item Control Number - This control number will be assigned by the responsible Military Department or Agency. Since this control number will serve to identify the item and relate it to its respective nomenclature, it will be assigned in such a way as to serve for the life of the line item in the data base. It is not to be confused with the numeric, sequential, line item number printed in the first column of the procurement exhibit P-1. Care should be exercised by each Department that the Item Control Number be assigned to provide for additions, deletions, and generic and/or logical sequencing of line items within the budget subactivity. Uniformity among the Military Departments or Agencies will not be necessary but the code will not exceed ten (10) alphanumeric characters. The code will be entered in the data field left justified.

3. Cost Type Codes.

Authorized for use are:

Code Cost Type:

A Weapon System Cost

B Advance Procurement (PY)

C Advance Procurement (CY)

D Contract design - Historical SCN only

E Contract Cancellation - SCN only

F PY Unfunded Deficiencies

G Over Target

- I Future Cost/Growth Escalation - SCN only
- J Initial Spares* (Outfitting for SCN) (Memo non- add)
- K Post Delivery - SCN only
- L Cost Growth - SCN only
- M Shipbuilding Escalation - SCN only
- N Completion of PY Programs
- P Unfunded NSSF (Memo)
- R Reserve Equipment (Memo Non-Add)*
- S Anticipated Escalation (Memo for historical updates)
- T National Guard Equipment (Memo Non-Add)*

*Initial Spares must be identified by weapon system. The Item Control Number for each initial spare entry must be identical to its parent weapons system.

4. Fiscal Year - The four digits of the applicable fiscal year.
5. Advance Procurement Fiscal Year - Enter the future fiscal year to which the advance procurement cost is associated.
6. Action Code - To ensure proper action against each Nomenclature Record and/or procurement data record, the following action codes are to be used:
 - Code 1 - Use only for nomenclature record.
 - Code 9 - Use only for changes to procurement program resources - Identifies all data changes either added to the file or net changes to an existing data record.
7. Program Budget Decision (PBD) Number - During the Program Budget Decision cycle only, enter PBD number (to include any revised PBDs).
8. Nomenclature Record - Enter only the proper English language title of the item to be procured which is most commonly used. Abbreviations, acronyms and codes will be avoided where possible. The item nomenclature will not exceed 45 alphanumeric characters.
 - a. SAR Item Designator - The single character "X" in the appropriate data field will indicate a SAR item.
 - b. Security Classification - Secret will be indicated as "S"; Confidential will be indicated as "C"; Unclassified will be indicated as "U."
 - c. Program Quantity - The quantity for a line item which has a quantity designator of "U" will be expressed in units; for a quantity designator of "T" enter the units quantity divided by 1,000; and for a quantity of "M" enter the units quantity divided by 1,000,000.
 - d. Identification Record - Entries will be limited to "A" or "B" as specified and defined in Volume 2B, Section 0401.

9. Formats are provided in Section 010704.

G. Instructions for Response to Procurement Appendix

1. General. Program Budget Decision documents for procurement appropriations will contain a Procurement Appendix as an attachment. The Appendix requires DoD Components to record line item net changes to TOA on SD Form 463 consistent with the expressed intent of the Program Budget Decisions (PBDs).

2. Instructions Pertaining to SD Form 463. Instructions for preparation of SD Form 463 appear on the reverse of the form. Floppy disk submissions should be made in accordance with SD Form 463 and meet the following criteria:

Floppy Disk Format:

- ASCII file.
- Character record length --
(length of record on code sheet -- i.e. 56 for the Procurement *Programs* data transactions).
- Formatted PC DOS - releases 2.0 or higher.
- 3 1/2" diskette
and
Double Sided and Double Density.
or
Double Sided and High Density.
- Attach a printed label showing the file name and the number of transactions it contains to the front of the disk.

3. All submissions will be in accordance with Procurement Data Elements and Record Formats printed in this chapter.

010503 Automated RDT&E *Programs* Database

A. Purpose and Objectives. This Section provides for the maintenance of the RDT&E *Programs* automated database which will be the primary structure for program element detail in a number of related RDT&E program documents. Included are the (1) RDT&E Programs (R-1) and all supporting budget backup exhibits, (2) FYDP Summary and Program Element Detail, (3) Selected Acquisition Reports, and (4) RDT&E Program and Financing Schedules of the President's Budget. The RDT&E *Programs* database also will be used to reconcile differences with the automated update of the Future Years Defense Program Summary and Program Element Detail for RDT&E accounts.

B. Applicability. The provisions of this Section apply to the Office of the Secretary of Defense (OSD), the Military Departments and the Defense Agencies (hereafter referred to as "DoD Components") that contribute data to the RDT&E *Programs*.

C. Reporting Requirements. The initial automated database was established consistent with the RDT&E data submitted to the Congress in support of the FY 1976/1977T Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program Objective Memoranda, (2) Budget Estimates, and (3) President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

D. General Instructions - Preparing the RDT&E Programs. The RDT&E Programs is consistent with the program element identification of resources contained in the Future Years Defense Program Summary and Program Element Detail. Data in the RDT&E Programs is summarized by appropriation account with recaps by budget activity and FYDP programs. Security classification of line items is determined by the submitting component subject to OSD Security review. Except for information published in the unclassified version of the RDT&E Programs (R-1) report, data contained in the RDT&E Programs may not be released outside the DoD without the written consent of the Under Secretary of Defense (Comptroller). (In the case of the RDT&E Programs update for the Program Objectives Memorandum, this consent must come from the Director of Program Analysis and Evaluation.)

E. General Instructions - Preparing the RDT&E Programs (R-1). The R-1 document is derived from and consistent with the *Budget Review System database*. The R-1 is provided annually to the DoD Oversight Committees of the Congress coincident with the transmittal of the President's Budget. An unclassified version is provided to OASD (PA) for use by non-DoD activities. The unclassified R-1 is the only document from the RDT&E Programs database available for public distribution. The minimum information required in the R-1 is as follows:

1. The program element line item data provided is PY, CY, BY1 and BY2.
2. The security classification shall be in accordance with the criteria set forth in Section 010108.
3. A detailed program element listing in budget activity sequence.

F. RDT&E Data Elements and Record Formats

1. Codes - Treasury Code, Component Code, and Budget Activity Code are as specified in Section 010506.
2. Program Element - These program element (PE) codes are published in the DoD 7045.7-H (FYDP Program Structure Handbook).
3. SAR Item Designator - The single character "X" in card column 31 in the Nomenclature Format, SD Form 463-1N, (Section 010904) will indicate a SAR item.
4. Action Code - To ensure proper action against each nomenclature record and/or RDT&E data record, the following action codes will indicate the desired action against the data base:

Code 1 - Use Only for Nomenclature Record

Code 9 - Use Only for Changes to RDT&E Program Resources

5. Cost Type - Use cost type code A for program value.
6. Formats are provided in section 010904.

G. Instructions for Response to RDT&E Appendix

1. General. Program Budget Decision documents for RDT&E appropriations will contain an RDT&E appendix as an attachment. The appendix requires the DoD components to record program element net changes to TOA on SD Form 463-1 consistent with the expressed intent of the Program Budget Decisions (PBDs).
2. Instructions Pertaining to SD Form 463-1. Instructions for preparation of SD Form 463-1 appear on the reverse side of the form. Floppy disk submissions should be made in accordance with SD Form 463-1 and meet the following criteria:

Floppy Disk Format:

- ASCII file.
- Character record length --
(length of record on code sheet -- i.e. 40 for the RDT&E *Programs* data transactions).
- Formatted PC DOS -- releases 2.0 or higher.
- 3 1/2" diskette and
Double Sided and **Double Density** – or - **Double Sided** and **High Density**..
- Attach a printed label showing the file name and the number of transactions it contains to the front of the disk.

3. All submissions, regardless of media will be in accordance with RDT&E data elements and record formats printed in this chapter.

010504 Automated Construction Program Database

A. Purpose and Objectives. This section provides for the establishment of an Automated Construction Program Database to supplement the Defense Components' military construction justification materials. The Construction Program also will be used to track Program Budget Decisions at the project level, track congressional action on the President's budget submissions, and provide the baseline data required for special analysis.

B. Applicability. The provisions of this section apply to all requirements financed by the Military Construction, NATO Security Investment Program, Base Realignment and Closure, Family Housing, DoD Family Housing Improvement Fund and Homeowners Assistance appropriations of the Departments of Army, Navy, Air Force and Defense-Wide as applicable.

C. Responsibilities. The DoD components will submit Construction Program data for their Active, Guard and Reserve forces construction projects, their portions of the Family Housing, DoD Family Housing Improvement Fund and Homeowners Assistance programs, and multi-service or national level projects for which they are executive agent as described in DoD Directive 7150.5, "Responsibilities for Programing and Financing Facilities at DoD Installations Utilized by Two or More DoD Components."

D. Reporting Requirements. Update submissions will coincide with the September budget submissions and the January budget presentation. Detailed requirements not contained herein will be specified by memorandum for all update submissions.

E. Construction Data Elements and Record Formats. The data elements authorized for entry into the Automated Construction Program Database are as follows:

1. Appropriation Code - As specified in Section 010506.
2. Component/Suffix Code - As specified in Section 010506.
3. Budget Activity Code - As specified in Section 010506.
4. Major Command Code - Any two digit numeric code (01 through 99) that will uniquely identify a major command for that component.
5. Location Code

a. State/Country Code - Use the applicable code given at Tables II and III at the end of Section 010504. Exigent minor construction and all other lump-sum amounts should use the worldwide unspecified state/country code "ZU."

b. Installation Code - Use any three digit numeric code, right justified zero filled, that will uniquely identify the installation within the state or country. The installation code for exigent minor construction and all other lump-sum amounts should be 9's filled.

6. Project Identification Code - Use any six digit numeric code, right justified zero filled, that will uniquely identify the project for this location. Code lump-sum values as described in Table I at the end of Section 010504. Classified projects should have a valid project identification code, but the title associated with the code should be "classified project."

7. Facility Category Code - Use the three digit code as specified in DoD Instruction 4165.14. This field will be 9's filled for "Exigent Minor Construction" and all Lump-Sum Records. Family Housing new construction projects (budget activity 01) must have a valid facility category code.

8. Fiscal Year Program - The two digits of the applicable fiscal year.

9. Action Code - To ensure proper action against each Nomenclature Record and/or Decision Record, the following action code (not to be confused with Action Document Code) will indicate the desired action against the database.

Code 1 - Use only for nomenclature record - Identifies the addition of major command.

Code 2 - Use only for nomenclature record - Identifies a change to a major command title already on file.

Code 3 - Use only for nomenclature record - Identifies the addition of an installation title record.

Code 4 - Use only for nomenclature record - Identifies a change to an installation title already on file.

Code 5 - Use only for nomenclature record - Identifies the addition of a project to the database.

Code 6 - Use only for nomenclature record - Identifies changes to a project record already on the file.

Code 9 - Use only for changes to construction program resources - Identifies all data changes either added to the file or net changes to an existing data record.

10. Cost Type - Cost type codes authorized for use are:

<u>Code</u>	<u>Cost Type</u>
A	Project Value
M	Memo non-add projects

Use the "M" code for projects proposed for authorization under the Military Construction Act but for which funding under the Military Construction Act is not proposed. (For instance, a project to be funded with prior year military construction savings or to be funded in another appropriation, such as procurement.)

11. Action Document Code - Each change, introduction of new data, or deletion of existing data to the database must be substantiated by an approved decision document. These documents are the only approved sources to reflect Secretary of Defense decisions and thereby authorize changes to the base file. The following codes are assigned to identify the appropriate documents:

01	Program Change Decision
02	Program Budget Decision
04	Program Decision Memorandum
16	Congressional Action

12. Document Decision Number - All transactions necessary to reflect the decision document directing the change will be coded consistently in this six character alphanumeric data element. Examples include, but are not restricted to the following:

<u>Type of Decision</u>	<u>Document Decision</u>					
	<u>Number</u>					
	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>
PBD	3	0	1			
PBD,Revision (1st)	3	0	1	C		
PBD,Revision (2nd)	3	0	1	C	2	
PBD,Reclama (1st)	3	0	1	R		
PBD,Reclama (2nd)	3	0	1	R	2	
PBD, Rev to 2nd Reclama	3	0	1	R	2	C

13. Approval Date - The date of the decision document which approved the changes in six digits representing year, month, and day in that order.

14. Program Cost - The TOA amount will be expressed in thousands of dollars. Negative values should be represented by a minus sign to the immediate left of the dollar amount (e.g., -4328).

15. Title - This will be the Command, Installation or Project title, depending on the action code.

16. Authorization Indicator - Code "X" in this field if the project is subject to authorization. Code "P" in this field if the project was authorized for appropriation in a prior year or code Y if the project was authorized in a prior year.

17. Major FYDP Program - Use the two digits of the applicable major Defense Program the project supports.

18. Special Interest Indicator - Use this code to indicate if the project falls into one of the special categories given below:

- 1 = Energy Conservation
- 2 = Air Pollution Abatement
- 3 = Water Pollution Abatement
- 4 = Noise Pollution Abatement

19. Formats are provided in section 010904.

F. Level of Detail

1. Data will be reported at the level specified for the justification material (DD Form 1391) in Chapters 6 and 7. A summary of the levels required follows:

2. Military Construction 1/

- Major Construction - project detail
- Minor Construction - lump-sum for exigent minor construction
- Planning and Design - lump-sum
- Supporting Activities - project detail

3. NATO Security Investment Program - lump-sum 1/4. Base Realignment and Closure - lump-sum 1/5. Family Housing Construction 1/

- Construction of new housing - project detail. Under normal conditions the project title should indicate the number of units to be constructed, e.g. "NEW CONSTRUCTION (265)"
- Construction Improvements - lump-sum
- Planning - lump-sum

6. Family Housing Debt, Operation & Maintenance 1/ Lump-sum for each budget activity except Operating Expenses, which will be reported by account as shown below:

- Operating Expense
 - Management Account
 - Services Account
 - Utilities Account
 - Furnishings Account
 - Miscellaneous Account
- Leasing
- Maintenance of Real Property
- Interest Payments
- Mortgage Insurance Premiums

7. Homeowners Assistance Fund 1/

- Payment to Homeowners
- Other Operating Costs
- Acquisition of Real Property
- Mortgages Assumed

8. DoD Family Housing Improvement Fund - lump sum 1/

1/ Nomenclature records for all lump-sum values will be generated by the OSD computer system; DoD Components should not submit nomenclature records for lump-sum values.

G. General Instructions - Updating the Construction Program Database.

1. General

a. Nomenclature Records - Nomenclature or title records are used to assign names to major commands, installations and projects, and are submitted by the components on Construction System Database Nomenclature Recording Form, SD Form 463-2N. The system will determine what is being assigned a name by examining the action code.

(1.) Major Commands - To assign a major command title, specify the treasury code, component/suffix code, two digit command code, action code 1 and title. Defense-Wide, Guard and Reserve accounts should have a command of "99" and a title of the account name. To change an existing command title, specify the same data as above, but use action code 2.

(2.) Installation - To assign an installation title, specify the Treasury code, component/suffix code, location code, action code 3, command code and title. The title should not contain the state, e.g., "Fort Bragg, North Carolina." If an installation houses elements of several commands, there should be an installation transaction for each command having a project at that installation. To change an installation title, specify the same data as above, but use action code 4. (Note - the command code cannot be changed with a "4" record.)

(3.) Project - To assign a project title specify the treasury code, component/suffix code, budget activity, location code, project identification code, action code 5, major command, major FYDP Program, facility category code, special interest indicator, authorization indicator and title. An explanation of the data elements is given in paragraph E. of this section. The following items in a project nomenclature record may be changed by using action code 6: command code, major FYDP Program, facility category, special interest and authorization indicator codes, and project title. To change any or all of these data items, specify (from the record to be changed) the Treasury code, component/suffix code, budget activity, location code, project code, action code 6, fiscal year, and one or more of the items to be changed.

b. Decision Data Records - The data records are used to assign values or adjust values for specific projects identified by the location and project identification and are submitted by the Components on Construction System Database Decision Reading Form, SD Form 463-2. An explanation of the data elements is given in paragraph E. of this section.

2. Classification. A project may be classified due to the nature of the project, the location of the project, or both. Since the Construction Programs (C-1) is an unclassified document generated from an unclassified database, use the conventions given below to desensitize the data:

a. If the location is classified, use the applicable special State/Country code given in Tables II and III at the end of this section.

b. If the project is classified, assign the project a title of "Classified Project."

c. If both location and project are classified, use both conventions given above.

d. The various DoD Components are responsible for ensuring that the database describing their projects does not contain classified information.

3. Initial Budget Submission. The initial September budget submission of Construction Program data will be consistent with data submitted for the budget. The document serial number (positions 29-31 of SD Form 463-2) will be the PBD wherein the resources for this project will be addressed, and position 32 of the record will contain an S. (Note - Additional requirements may be specified by the Memorandum calling for the update submissions.)

4. Decisions

a. PBDs for Military Construction, NATO Security Investment Program, Base Realignment and Closure, Family Housing, DoD Family Housing Improvement Fund, and Homeowners Assistance Fund will contain a Construction Appendix sheet as an attachment. The DoD components will record net changes to TOA by

project on SD Form 463-2 consistent with the intent of the PBD. The SD Form 463-2 will be submitted to OUSD(C)(P/B) within five working days after the date of the PBD. This response will be shortened toward the end of the budget review.

b. If the Construction decision is reclamaed, it must be definitized to the level of detail contained in the PBD Construction Appendix. Reclama decisions will be processed in the same manner as the original decision document; however, SD Form 463-2 must be submitted by the DoD components to OUSD(C)(P/B) within 24 hours after receipt of the reclama decision.

5. Instructions Relating to SD Form 463-2 and SD Form 463-2N. Instructions for the preparation of SD Form 463-2 and SD Form 463-2N appear on the reverse side of the forms. Floppy disks are preferred in lieu of the forms. Floppy disk format: **MUST BE** ASCII; Character record length will be the same as the length of the record on the code sheet; formatted PC DOS - release 2.0 or higher; 3 1/2" diskette, (double sided and double density or double sided and high density) - attach an outside printed label showing the file name, Component and number of transactions). All submissions, regardless of media, will be in accordance with Construction data elements and record formats outlined in paragraph E. of this section.

6. Status Reporting. Periodic status reports in the form of an updated C-1 and audit trail reports reflecting these decision adjustments will be provided. It is essential that these status reports be reviewed by the components on a recurring basis during the Budget Review to assure all concerned that PBDs and related decisions are accurately reflected in the Construction database.

Table I

<u>P.L.</u>	<u>Treasury Code</u>	<u>BA</u>	<u>Valid State/Country</u>	<u>Valid Installation</u>	<u>Valid Project ID</u>
50	All	01	ALL	See Note 1	See Note 2
*		02	"ZU"	"999"	"999902"
*		03	"ZU"	"999"	"999903"
*		04	ALL	See Note 1	See Note 2
60	See Note 4	01	ALL	See Note 1	See Note 2
*		03	"ZU"	"999"	"999903"
*		04	"ZU"	"999"	"999904"
*	See Note 5	09	"ZU"	"999"	"999909"
*		10	"ZU"	"999"	"999910"
*		11	"ZU"	"999"	"999911"
*		06	"ZU"	"999"	See Note 3
*		07	"ZU"	"999"	"999907"
*		08	"ZU"	"999"	"999908"
*	4090	01	"ZU"	"999"	"999901"
*		02	"ZU"	"999"	"999902"
*		03	"ZU"	"999"	"999903"
*		04	"ZU"	"999"	"999904"
*	0834	01	"ZU"	"999"	"999901"

* Denote Budget Activities that are represented as Lump-Sum Amounts.

Note 1 - If State/Country Code is any of the special codes, installation may be "999."

Note 2 - Must be a valid project number assigned via a nomenclature record.

Note 3 - Must be one of the following:
888805 Management Account
88810 Services Account
888815 Utilities Account
88820 Furnishings Account
88825 Miscellaneous Account

Note 4 - For 0702A - Use 7020A
For 0703N - Use 7030N
For 0704F - Use 7040F
For 0706D - Use 7060D

Note 5 - For 0702A - Use 7025A
For 0703N - Use 7035N
For 0704F - Use 7045F
For 0706D - Use 7065D

010505 Automation Requirements for the Biennial Budget Estimates Submission

A. Purpose. The budget estimates submissions are entered in the Budget Review System from machine-readable magnetic media provided by the Military Departments and Defense Agencies. This chapter prescribes the specifications for submission of machine-readable data.

B. Submission Requirements

1. Exhibits PB-2, PB-2A, and PB-4 (on-board yearend strength only), as prescribed in Section 010305, will be supported by automated records in the record layouts specified in Section 010904 and in the detail prescribed by the Budget Account Title File Listing. All data will be listed.

2. Machine-readable data must follow the record layouts shown in Section 010904. Negative numeric values will be preceded by a minus sign. A hard copy listing of each data type must accompany the machine-readable data.

a. *Submissions must be in ASCII format on 3 1/2" diskettes, readable on IBM compatible PCs. For those Components with accounts on the Single Agency Manager's (SAM) Classified IBM mainframe computer (System IS), submission files may be placed on the virtual disk on System IS, provided OUSD(C)P&FC analysts have access to the disk.*

b. Data submitted must have each record followed by a carriage return and tabs between appropriated fields. Templates with fill-in capability are available on floppy disks for use with MSWord.

3. In addition to the hard copy exhibits specified in Section 010305, a single hard copy, listing each record, will be provided. Separate listings will be prepared for financial data, civilian full-time equivalent (FTE) data, and military end strength data. The format for the hard copy printout will show data in the same order as that prescribed for the record layouts. Control totals will not be included in the machine-readable data.

4. Machine-readable data conforming to paragraph B.2. of this section for all accounts, the corresponding hard copy printout, two copies each of Exhibit PB-1, PB-2, PB-2A, PB-4, and PB-8 will be submitted concurrently with the budget estimates and delivered to Room 3B872, Pentagon. The delivery should be made by the Component designated principal or alternate coordinator for budget submissions.

5. Components unable to provide machine-readable input as specified in paragraph B.2. above should make prior arrangements with the Directorate for Program and Financial Control, Room 3B872, Pentagon.

C. Record Layouts

1. The following transcript sheets provide the record layout required for input on machine-readable media. Examples of these transcript sheets and their coding instructions are provided in Section 010904:

DD Form 2232	Budget Estimates Recording Form (\$), PY, CY, BY1, and BY2.
DD Form 2233	Decision Recording Form (\$), PY, CY, BY1, and BY2.
DD Form 2234	Outyear Recording Form (\$), BY+1, BY+2, BY+3, and BY+4.
DD Form 2235	Budget Estimates Recording Form (End Strength/FTE), PY, CY, BY1, and BY2.
DD Form 2236	Decision Recording Form (End Strength/FTE), CY, BY1, and BY2.
DD Form 2236-1	Outyear Recording Form (End Strength/FTE), BY+1, BY+2, BY+3, and BY+4.

2. Coding Instructions. Coding instructions for preparation of the transcript sheets are included on the reverse of each form. These codes are precise and must be coded as shown in the “Budget Account Title File Listing,” which lists the valid budget activity/budget subactivity codes for each appropriation as well as all valid financing and object classification codes. This listing will be distributed by the Directorate for Program and Financial Control prior to the September budget submission. In addition, Section 010506 provides a sample budget activity/budget subactivity structure as well as a listing of all valid financing and object classification codes.

D. Technical Instructions

1. Submission of Budget Estimates for PY, CY, BY1 and BY2

a. Budget Submission (Dollars): Coincident and consistent with the hard copy submission of the budget estimates, Military Departments and Defense Agencies, as applicable, will submit machine-readable data entries for all schedules and for all applicable budget accounts for all years. Detailed data entries only will be submitted since subtotals and summary totals are computer generated. Input data will be formatted in accordance with DD Form 2232 on a media type specified in paragraph B.2. of this section. All TOA values for PY, CY, BY1, and BY2 will be submitted in accordance with the detail prescribed by the Budget Account Title File Listing. Amounts will be in agreement with the PB-2 and PB-2A exhibits.

b. Budget Submission (Personnel Data): Budget estimates submission of on-board year end personnel data entries for military end strength and civilian full-time equivalents (FTEs) will be formatted in accordance with DD Form 2235 and will be in exact agreement with the PB-4 exhibit. Personnel data will be submitted for all years in accordance with the detail prescribed by the Budget Account Title File Listing.

c. *Hard copy coding sheets (DD Form 2232 and DD Form 2235) will only be accepted for less than 5 lines of corrections of PY, CY, BY1, and BY2 data.*

2. Submission of Outyear Estimates

a. Budget Submission (Dollars): The submission for BY+1 through BY+4 TOA will be made coincident with the budget submission. Input to the database will be formatted in accordance with DD Form 2234 at the PDM level, by appropriation account and budget subactivity.

b. Budget Submission (Personnel Data): Budget estimates for BY+1 through BY+4 military end strength and civilian full-time equivalents (FTEs) will be made coincident with the budget submission. Input to the database will be formatted in accordance with DD Form 2236-1 and agree with the PB-4 exhibit.

c. *Hard copy coding sheets (DD Form 2234 and DD Form 2236-1) will only be accepted for less than 5 lines of corrections for outyear data.*

3. Decision Recording

a. DD Form 2233 and DD Form 2236 will not be used for budget estimates submissions. These forms are used to record *CY, BY1 and BY2 changes* documented by Program Budget Decisions (PBDs).

b. DD Form 2234 and DD Form 2236-1 are used for recording PBD decisions impacting the outyears as well as outyear budget estimates submission..

010506 Name Edit System (NES) Structure and Description

A. Purpose The NES File reflects the official Department of Defense budget account structure for submission of the budget estimates in machine-readable form (as described in Section 010505, paragraph B.2.). The structure is documented in the Budget Accounts Title File Listing, a sample of which is provided in Section 010506.

The complete Budget Accounts Title File Listing will be distributed by the Directorate for Program and Financial Control to the Services and Defense Agencies prior to the September budget submission.

B. Organization of the NES File The NES File is structured to validate Budget Plan, Obligation Plan, Financing, Budget Authority, Expenditure Tail, and Object Classification input. Valid Budget Plan and Obligation plan entries are present for each appropriation account and are established at the budget activity level (in some cases, budget subactivity). These entries comprise the "Program by Activities" section for each account and must be identical to the entries shown in the hard copy Program and Financing Schedule submission. Financing, Budget Authority, Expenditure Tail, and Object Classification entries are valid for use in any applicable appropriation account. Where specific Financing, Budget Authority and Expenditure Tail entries are restricted for use, the appropriate accounts and/or fund types against which these entries may be used are identified in the "comments" section of the Budget Accounts Title File Listing.

C. Responsibility. Responsibility for the accuracy of the NES File rests with the OUSD(C)(P/B). Components should notify the Directorate for Program and Financial Control, OUSD(C)(P/B), of any changes considered to be necessary to properly reflect budget estimates through budget subactivity level prior to transmission to OSD.

D. Input Requirements

1. Input coding for all budget estimates will be entered precisely as listed in the Budget Accounts Title File Listing. Features which should be considered in the preparation of data are:

a. The presence of a "P" and/or a "\$" in the "PER/\$\$ Inputs" column indicates those budget activities/subactivities (program budget decision) against which resources (\$ or personnel data) may be entered. Requests to add a "P" or a "\$" to an existing line may be made to the Directorate for Program and Financial Control, OUSD(C)(P/B), through the respective Program/Budget Directorate responsible for that appropriation.

b. Military Personnel Accounts:

(1) The Military Departments will prepare and submit the military personnel account data. Machine-readable input for military personnel dollars should not be submitted by Defense Agencies.

(2) In addition, military personnel costs associated with intelligence programs will be entered under budget activity 20 (see Budget Accounts Title File Listing). An offsetting entry must be made against the "NFIP Offset" budget subactivity such that the sum of these intelligence program entries net to zero.

(3) The Military Departments will prepare and submit end strength data on a Component basis; i.e., Army submits data on personnel assigned to Army as well as Army personnel assigned to each Defense Agency (see Budget Accounts Title File Listing). The Defense Agencies must coordinate their end strength requirements with the Military Departments prior to the Military Departments' data submissions.

c. Input coding for the Defense *Working Capital* Fund must include the appropriate budget subactivity code assigned to each business area for operating and capital expenses, civilian full-time equivalents (FTEs), and military end strengths.

d. Obligation Plan data will be coded with a "2" in column 1 for all accounts listed below and for any other "multiyear" account:

0107D	Office of the Inspector General
0130D	Defense Health Program
0132D	Disaster Relief
0134D	<i>Former Soviet Union Threat Reduction</i>
0819D	<i>Overseas Humanitarian, Disaster and Civic Aid</i>

0828D	Reinvestment for Economic Growth
0838D	<i>Quality of Life Enhancements</i>
2031A	Aircraft Procurement, Army
2032A	Missile Procurement, Army
2033A	Procurement of Weapons and Tracked Combat Vehicles, Army
2034A	Procurement of Ammunition, Army
2035A	Other Procurement, Army
1506N	Aircraft Procurement, Navy
1507N	Weapons Procurement, Navy
1508N	Procurement of Ammunition, Navy and Marine Corps
1611N	Shipbuilding and Conversion, Navy
1810N	Other Procurement, Navy
0380N	Coastal Defense Augmentation
1109N	Procurement, Marine Corps
3010F	Aircraft Procurement, Air Force
3020F	Missile Procurement, Air Force
3011F	Procurement of Ammunition, Air Force
3080F	Other Procurement, Air Force
0300D	Procurement, Defense-Wide
0350D	National Guard and Reserve Equipment, Defense
0360D	Defense Production Act Purchases
0390A	Chemical Agents and Munitions Destruction, Defense
2040A	RDT&E, Army
1319N	RDT&E, Navy
3600F	RDT&E, Air Force
0400D	RDT&E, Defense-Wide
0450D	Developmental Test and Evaluation, Defense
0460D	Operational Test and Evaluation, Defense
2050A	Military Construction, Army
1205N	Military Construction, Navy
3300F	Military Construction, Air Force
0500D	Military Construction, Defense-Wide
2085A	Military Construction, Army National Guard
3830F	Military Construction, Air National Guard
2086A	Military Construction, Army Reserve
1235N	Military Construction, Navy Reserve
3730F	Military Construction, Air Force Reserve
0103D	Base Realignment and Closure Account, Part I
0510A	Base Realignment and Closure, Army
0510N	Base Realignment and Closure, Navy
0510F	Base Realignment and Closure, Air Force
0510D	Base Realignment and Closure, Defense
7020A	Family Housing, Construction, Army
7030N	Family Housing, Construction, Navy
7040F	Family Housing, Construction, Air Force
7060D	Family Housing, Construction, Defense-Wide

Budget activities/subactivities F11020, F14020, F17020, F21020, and F24020 may be used only in the obligation plan for these accounts. Conversely, F17010 and F21910 may be used only in the Budget Plan. Where budget activity Rxx, Reimbursable Program, applies to both Budget Plan and Obligation Plan, separate data entries must be coded with a "1" in column 1 for Budget Plan, and a "2" in column 1 for Obligation Plan. All other financing budget activities not listed above apply to both budget plan and obligation plan, and therefore will be coded only once.

e. Concept Obligations will be coded budget activity C1x for Direct, C2x for Reimbursable, or C3x for the Special Fund accounts as follows:

Direct - BA C1x

8008N	<i>Naval Historical Center Fund</i>
8063A	Ainsworth Library Trust Fund
8064A	Fisher House Trust Fund, Army
8165D	Foreign National Employee Separation Pay Trust Fund
8168D	National Security Education Trust Fund
8169N	<i>Fisher House Trust Fund, Navy</i>
8170F	<i>Fisher House Trust Fund, Air Force</i>
8174A	National Science Center Gift Fund
8335D	Voluntary Separation Trust Fund
8337D	Host Nation Support for U.S. Relocation Activities, Defense
8716N	Navy General Gift Fund
8723N	Ships Stores Profits, Navy
8730N	USN Academy Museum Fund
8733N	USN Academy General Gift Fund
8927A	Army General Gift Fund
8928F	Air Force General Gift Fund
9082N	Interfund Transactions, Navy
9086D	Interfund Transactions, Defense
9088D	Interfund Transactions Foreign National Employee Separation Fund
9089D	Interfund Transactions for Voluntary Separation Trust Fund
0001A	Offsetting Receipts, Army
0002N	Offsetting Receipts, Navy
0003F	Offsetting Receipts, Air Force
0004D	Offsetting Receipts, Defense Agencies
0006A	Receipts Civil, Army
0007N	Receipts Civil, Navy
0008F	Receipts Civil, Air Force
0021A	Rocky Mountain Arsenal Receipts
0024D	Defense Cooperation Receipts
0025D	Interest on Defense Cooperation Receipts
0029N	<i>Offsetting Receipts, Rossmoor Liquidating Trust Settlement</i>
0036D	<i>Sales of Certain Material in National Defense Stockpile</i>
0041D	<i>Offsetting Receipts, Defense Burdensharing Contributions</i>
0085N	Offsetting Receipts Kaho' Olawe Island Fund
0086A	Fees collected for use of National Science Center
0088D	Offsetting Receipts Disposal of Real Property, Def
0089D	Offsetting Receipts Lease of Real Property, Def
0093D	Offsetting Receipts DoD Overseas Military Facility Recovery, Def
0095D	Proceeds from Transfer or Disposal of Commissary Facilities

Reimbursable - BA C2X

8164D	Surcharge Collections, Sales of Commissary Stores, Defense
8418F	Air Force Cadet Fund
8423N	Midshipmen's Store, USN Academy

Special Fund (Direct) - BA C3X

5098A	Restoration of the Rocky Mountain Arsenal, Army
5185N	Kaho 'Olawe Island Fund, Navy
5188D	Disposal of Real Property
5189D	Lease of Real Property

5193D	DoD Overseas Military Facility Investment Recovery
5195D	Transfer/Disposal Commissary Facilities, Defense
5286A	National Science Center, Army
5441D	Burdebsharing and Other Cooperative Activities, Defense
5492N	<i>Rossmoor Liquidating Trust Settlement Account</i>

E. Object Classification Schedules

1. The traditional object classification numbers which are specified in OMB Circular A-11 and identify the specific object classes are augmented in the automated budget review record by a prefix code which identifies Direct Obligations (Prefix T1x), Reimbursable Obligations (Prefix T2x), Allocation Accounts (Prefix T3x), and Distribution by Component or Agency (Prefix T5x).

2. Object classification schedules with Allocation Accounts will be coded so that the sum of object classes T1xxxx, T2xxxx, and T3xxxx equals the sum of T5xxxx.

3. All revolving and management accounts will be coded in the reimbursable (Prefix T2xxxx) object class series followed by the appropriate object class number.

4. Object class data will be submitted for all accounts listed in the NES File which reflect obligations (including concept obligations) in the Program and Financing data in the PY, CY, BY1 or BY2.

F. Expenditure Tail.

1. The Expenditure Tail section of the Program and Financing Schedule (Exhibits PB-2 and 2a as shown in Section 010902) will be supported by automated records in the detail specified in Section 010506, paragraph H. The amount of this detail has been minimized to the extent possible by computer processing certain basic data. These basic data are identified as "DIRECT INPUT." All other entries are identified as "COMPUTER SUM . . ." and need not be coded by submitting components.

2. Care will be exercised in the handling and coding of arithmetic signs.

3. For revolving funds with TOA, payments in all years which are attributable to appropriations will be entered against the current year (F90110). With this exception, all remaining revolving and management fund data entries for both payments and collections will be made against the prior year and not the current year, and will be entered against F90111.

4. Components should not submit expenditure tail data for Defense (TI 97) accounts with a component code of D; this data will be prepared by the Directorate for Program and Financial Control, OUSD(C)(P/B).

G. Stub entries for BRS Program and Financing (excluding Expenditure Tail)

* DI means Direct Input; the number following is the required code in column 1 (1 is Budget Plan; 2 is Obligation Plan)

H. P&F Schedule Computational Checks Diagnostic Report Entries

1. Three BRS reports have been developed to provide diagnostic and balancing checks for appropriation accounts. A description of these checks and corresponding diagnostic messages follows for each report.

2. Report 22 performs a series of balancing checks between types/groups of data within an account and, in certain cases, within a Defense Agency. There are currently 20 checks:

Number

1. Budget plan budget authority vs. obligation plan budget authority.
2. Obligation plan budget authority vs. financing budget authority.
3. Budget plan budget authority vs. financing budget authority.
4. Total direct program vs. total direct object classification.
5. Total reimbursable program vs. total reimbursable object classification.
6. Line 10.00, total program vs. line 99, total object classification.
7. Line 10.00, total program plus total orders vs. obligations incurred, net.
8. Recovery of prior year obligations (-) vs. adjustments in unexpired accounts (-).
9. Current year budget authority vs. current year outlays.
10. Budget plan total reimbursable program vs. budget plan offsetting collections (orders(-))
11. Unobligated balance, end of year vs. unobligated balance, start of year one year forward.
12. Obligated balance, end of year vs. obligated balance, start of year one year forward.
13. Contract authority obligated balance, end of year vs. contract authority obligated balance, start of year one year forward.
14. Contract authority obligated balance, end of year vs. contract authority obligated balance, start of year plus adjustments.
15. Obligated balances, end of year (net) vs. obligated balances, start of year (net) plus adjustments minus outlays.
16. Revolving fund TOA vs. financing budget authority, excluding contract authority and BA transfers.
17. Revolving fund TOA vs. TOA offset (R00).
18. Receipt budget authority vs. receipt current year outlays.
19. Deficiency balance, start of year vs. deficiency balance, end of year in the previous year.
20. Deficiency balance, end of year vs. deficiency balance, start of year plus adjustments.

3. The number of checks actually performed for an account will vary depending on the type of account:

- Annual (single year)
- Multi-year
- Revolving fund with TOA
- Other revolving & management fund
- Trust fund
- Civil trust fund
- Trust revolving fund
- Offsetting receipts, military
- Offsetting receipts, civil

For example, diagnostic 6 compares Program & Financing line 10.00, total program to Object Classification line 99, total object classification. For an annual account, total program is the sum of budget plan direct (TOA) and reimbursable budget activities; for a multi-year account, the sum of obligation plan direct and reimbursable budget activities; and for a trust fund, the sum of budget plan concept obligations budget activities.

4. Each diagnostic will display at a minimum a message detailing the data used, the diagnostic error message, the amounts accumulated for the check and the difference(s) found.

5. The tables that follow list the diagnostics performed for each type of account. For each diagnostic, the data used and error message(s) are displayed. The data used will be specified as budget activity (BA) or budget activity/subactivity (BASA). Error messages will describe the data type/group being tested and the test condition that fails.

I. Report 23 performs three basic types of obligation plan tests for multi-year accounts.

1. The first test checks the prior year (PY), current year (CY), and the two biennial year (BY1, BY2) columns for each obligation plan budget activity (BA) within an account, searching for negative amounts. If one or more negative amounts are found within a BA, a diagnostic message is generated. This test is performed at the agency level for Defense Agency accounts.

2. The second test checks the obligation rate for the PY, CY, BY1, and BY2 fiscal year programs (FYP) for each budget activity and in total. The formulas used for this test are as follows:

Two year accounts:

$$\text{Budget Plan PY} = \frac{\text{Obligation Plan}}{\text{PY} + \text{CY}}$$

$$\text{CY} = \text{CY} + \text{BY1}$$

$$\text{BY1} = \text{BY1} + \text{BY2}$$

$$\text{BY2} \geq \text{BY2}$$

Three year accounts:

$$\text{Budget Plan PY} = \frac{\text{Obligation Plan}}{\text{PY} + \text{CY} + \text{BY1}}$$

$$\text{CY} = \text{CY} + \text{BY1} + \text{BY2}$$

$$\text{BY1} \geq \text{BY1} + \text{BY2}$$

$$\text{BY2} \geq \text{BY2}$$

Five year accounts:

$$\text{Budget Plan PY} \geq \frac{\text{Obligation Plan}}{\text{PY} + \text{CY} + \text{BY1} + \text{BY2}}$$

$$\text{CY} \geq \text{CY} + \text{BY1} + \text{BY2}$$

$$\text{BY1} \geq \text{BY1} + \text{BY2}$$

$$\text{BY2} \geq \text{BY2}$$

3. These checks are performed at the agency and account level for Defense Agency accounts.

4. A final check is made to ensure that an obligation plan exists when budget plan amounts are present in a multi-year account. For each fiscal year program from the prior year thru the second biennial year, if budget plan program is present (a non-zero amount), then obligation plan program must also be present. This check is made at the account total level.

J. Report 24 performs the following series of miscellaneous diagnostic tests:

Number

1. For most accounts, unobligated balance, end of year entries (F24xxx) must be positive. Entries for the exceptions must be negative.
2. For most accounts, unobligated balance, start of year entries (F21xxx) must be negative. Entries for the exceptions must be positive.
3. Undistributed object classification entries (T19201, T29201, T39201) must not be present.
4. For most accounts, object classification entries must not be negative. Entries for the exceptions must be negative.

5. For multi-year accounts, the F17020 entry (Recovery of prior year obligations) cannot have a Fiscal Year Program (FYP) value greater than that of the prior year FYP value.
6. The F32490 and F69150 entries in an account must be positive.
7. Appropriation rescission proposal, enacted rescission, and GRH reduction entries (currently F40350, F40355, F40360, F40365, F40800, and F40850) must be negative.
8. Except for revolving funds with TOA and Military Personnel NFIP and NFIP offset entries, undistributed budget activity (020) entries must not be present.
9. For most accounts, Direct Program (TOA), Reimbursable Program, and Concept Obligations must be positive at the budget activity level. In most cases the exceptions must be negative.
10. Except for revolving and management fund and trust revolving fund accounts, obligated balance, start of year (F72xxx) and obligated balance, end of year (F74xxx) entries must be positive.
11. The TOA offset entry (R00000) for revolving funds with TOA must be negative.
12. With certain exceptions, the Fiscal Year Program (FYP) value for current appropriation entries (F40xxx) in multi-year accounts cannot be less than that of the prior year FYP value.
13. In the obligation plan for multi-year accounts, an unobligated balance, end of year, should not be present in the last year of availability.

If one or more of the above tests fail for an account, an appropriate diagnostic message will be generated. Except for the obligated balance test (number 10), all tests are performed at the agency level for Defense Agency accounts.

K. Financial Accounting Record Reconciliation to the President's Budget Submission Data

1. Primary checkpoints as defined in the following tables will be accomplished to insure internal consistency between the financial accounting position and the submission of Prior Year (PY) actuals that will be shown in the President's Budget submission.

2. Section 32.9 of OMB Circular A-11 requires actual data for past periods. A special update of the PY column, providing the PY actual values consistent with the official departmental accounting reports (*SF133*, DD Comp 1002, and DD Comp 725), will be made. The date of submission to OUSD(C) via machine-readable input of these changes will be determined and provided by OUSD(C). The data will be input to the OUSD(C) Budget Review System (BRS). Verification will be performed by OUSD(C)(P/B) using BRS and accounting reports. The impact of these prior year changes on the current and biennial year 1 and 2 columns shall relate to financing. Therefore, application to these columns will be limited to the financing section of the program and financing schedules containing the budget estimates. In the event that a change to any budget plan is indicated, it will be made by PBDs issued subsequent to this PY update.

3. The following table displays the relationship between the restructure Program and Financing (P&F) Schedule in OMB Circular No. A-11 dated June 1997 and DoD's Budget Review System database. The table also displays the source of the actual data reconciled with yearend DoD Budget Execution Reports (*SF133* and DD1002/725 reports). The P&F Schedule for each DoD account is printed annually in the Appendix of the U.S. Government as part of the President's Budget.

Note: This table pertains to budgetary data which DoD must submit to OMB. Separate instructions are provided annually to the Services and Defense Agencies for updating prior year actuals in DoD's Budget Review System (BRS) database. Below footnotes pertain to FY 1998 actuals as of 30 Sep 98 in the FY 2000/2001 Budget.

Footnotes:

- *a Unexpired accounts
- *b Direct program obligations of unexpired accounts plus recoveries
- *c Equals F70000 (A-11 code 70.00), for computation see new budget authority (gross), detail
- *d Unobligated bal transfers from (-) or to (+) other accounts, use FY 1998 Transfer Status Report (FAD 743-98-1), see Budget Account Title (NES) listing for F22XXX codes for Unob bal transfers
- *e Refers to those accounts whose obligation life ends 30 Sep 98
- *f Based on G-R-H sequestration of unobligated balances

Footnotes (Continued)

- *g Sum of *F17...*, *F21...*, *F22...*, *F23...*, *F25010*, *F31...*, *F32...*, and *F70000*. (A-11 codes 21.99 to 23.85)
- *h Equals net of F23900 and F23950 (A-11 codes 23.90 and 23.95), must equal Lines 9 & 10 of accounts not expiring on 30 Sep 98
- *i *Enter the amount of appropriations, as specified in an appropriation act(s), becoming available on October 1 of the fiscal year; include rescissions of current year amounts. For special/trust fund indefinite appropriations, enter the amount of the receipts credited to the fund. The appropriated amount in PY should be adjusted by undistributed reductions on SF133, Line 6E*
- *j Transfers F41000 & F42000 (A-11 codes 41.00 & 42.00) use *FY 1998 Transfer Status Report (FAD 743-98-1)*
- *k Equals sum of F40000 to F42000 (A-11 codes 40.00 to 42.00)
- *l Applies to all years as shown on *Line 15B, Total Column, SF133*
- *m Change in orders from start of year to end of year, equals *SF133, Lines 3A2+3B2, Total Column*
- *n Equals minus (Line 3 for expired accounts and canceled account amount(s) on *Line 14A and 14B1, SF133*)
- *o Must equal Line 3, *SF133*, unexpired accounts
- *p *Obligated balance (net), start of year, equals Line 12 all years. Use SF 133, 30 Sep 97, Lines 14A + 14B1, to compute orders on hand which carryover to start of next fiscal year. Orders are negative(-) in BRS.*
- *q Total gross outlays equal *Line 15A, Total Column, SF133*
- *r Equals *Line 8 less Line 4A, SF133*, of expired accounts
- *s Minus (*Line 4A, SF133*, unexpired accounts) (equals recoveries for multi-year, no-year, and revolving fund accts)
- *t *Obligated balance (net), end of year, equals Line 14 all years. Unpaid obligations, F74110, and orders on hand, F74105, Equal Lines (14C + 14D) and Lines (14A + 14B1), respectively. Orders are negative (-) in BRS.*
- *u Net outlays equal *Line 15, SF133, Total Column* and must agree with Treasury's Annual Report
- *v Gross budget authority equals sum of A-11 codes 43.00 for general fund accts (63.00 for trust and special fund accounts) plus A-11 code 68.90
- *w Net budget authority equals A-11 codes 70.00 minus amounts for codes (88.90 to 88.96)
- *x Non-Federal collections result from orders received from outside the Government that are accompanied by cash advances and are included as part of Line 1, Column H, DD 725, all years; Federal collections equal total of Column H for all years less non-Federal amounts
- *y BRS codes used above are not all inclusive. See Budget Account Title Listing (NES File) for latest codes

N. Object Classification Balancing. The Budget Review System (BRS) balances direct obligations (prefix “T1”), reimbursable obligations (prefix “T2”), and, in special cases, prefix “T3” and prefix “T4” in the Object Classification schedule to direct program and reimbursable program, respectively, in the budget plan for single year accounts, and in the obligation plan for multi-year accounts. Differences between “plan” and object classification direct program and reimbursable program are added to/subtracted from default direct obligation and reimbursable obligation object classification lines, respectively. The following table lists these default lines for each account.

Object Classification Default Lines Table

BRS Default Object Class Code	BRS Account by Component							
	Army		Navy		Air Force		Defense

<i>Tx2601 – Supplies and Materials</i>	Default for all other BRS accounts							

Notes:

- (1) 'x' value of 1 = Direct obligations, 2 = Reimbursable obligations, 3 = Allocation obligations, 4 = Offsetting receipts, and 5 = Distributed obligations
- (2) Exceptions to above table for reimbursable default object class codes: (a) for accounts 2065a and 2080a the reimbursable default code is T22601, and (b) for accounts 1806n and 3840f the reimbursable default code is T22321

O. Budget Accounts Title File Listing The “Budget Accounts Title File Listing” documents the official Defense budget account structure for submission of budget estimates in machine-readable form. An extract of this listing is included on the following pages. The extract contains the following listings: (1) appropriation accounts, (2) a sampling of Budget Plan and Obligation Plan Name Codes, (3) listing of valid Financing, Budget Authority, Expenditure Tail codes, and (4) Object Classification entries. The complete “Budget Accounts Title File Listing” will be distributed separately to the Military Departments and Defense Agencies prior to the September budget submission by OUSD(C) (P/B) Program and Financial Control Directorate.

0106 UNIFORM BUDGET AND FISCAL ACCOUNTING CLASSIFICATIONS**010601 General**

A. This Section establishes the functional title classifications and subdivisions thereof by which appropriation and fund accounts of the Department of Defense are required to be arranged, grouped, or classified in budgetary and fiscal presentations. These classifications are designed to permit consolidation of budget and fiscal data for the several components of the Department of Defense into over-all Departmental summaries. This Section also delineates the Defense-Wide/Defense Agencies related account structures.

B. These instructions cover all appropriation and fund accounts for military functions of the Department of Defense.

010602 Functional Titles and Subdivisions

The following functional titles and subdivisions thereof are prescribed for use in appropriate budgetary and fiscal presentations:

Military Personnel

- Active Forces
- Reserve Forces

Operation and Maintenance

- Operating Forces
- Mobilization
- Training and Recruiting
- Administration and Service-Wide Activities

Procurement

- Aircraft
- Missiles
- Weapons and Tracked Combat Vehicles
- Procurement of Ammunition
- Other Procurement
- Chemical Agents Munitions Destruction
- Weapons
- Shipbuilding & Conversion
- Procurement, Marine Corps
- Procurement, Defense-Wide
- National Guard & Reserve Equipment

Research, Development, Test, and Evaluation

- Basic Research
- Applied Research
- Advanced Technology Development
- Demonstration/Validation
- Engineering and Manufacturing Development
- RDT&E Management Support
- Operational System Development

Military Construction

Family Housing

Revolving and Management Funds

Defense-Wide Contingencies

Offsetting Receipts

Trust and Trust Revolving Funds

Interfund Transactions

010603 Definitions of Functional Titles and Subdivisions

This Section provides definitions of functional titles and subdivisions thereof by enumerating the appropriations, budget activities, programs and projects which are classified thereunder. These definitions are provided on the following pages.

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS

FUNCTIONAL TITLE - MILITARY PERSONNEL

1. The functional title "Military Personnel" for military functions is defined as comprising the appropriations listed below. Since each appropriation, in its entirety, is classified within a single first level subdivision of the functional title, the appropriations are grouped by the subdivisions.

Active Forces

21_2010 Military Personnel, Army
17_1453 Military Personnel, Navy
17_1105 Military Personnel, Marine Corps
57_3500 Military Personnel, Air Force

Reserve Forces

21_2070 Reserve Personnel, Army
17_1405 Reserve Personnel, Navy
17_1108 Reserve Personnel, Marine Corps
57_3700 Reserve Personnel, Air Force
21_2060 National Guard Personnel, Army
57_3850 National Guard Personnel, Air Force

2. Lower level subdivisions susceptible to consolidation are available under the uniform budget and accounting structure prescribed for these appropriations in Chapter 2.

FUNCTIONAL TITLE - OPERATION AND MAINTENANCE

1. The functional title "Operation and Maintenance" for military functions is defined as comprising the appropriations listed below:

21_2020 Operation and Maintenance, Army
17_1804 Operation and Maintenance, Navy
17_1106 Operation and Maintenance, Marine Corps
57_3400 Operation and Maintenance, Air Force

FUNCTIONAL TITLE - OPERATION AND MAINTENANCE (CONTINUED)

97_0100	Operation and Maintenance, Defense-Wide
97/_0107	Office of the Inspector General

57_/_7040	Family Housing, Construction, Air Force
57_7045	Family Housing, Operations and Debt, Air Force
97_/_7060	Family Housing, Construction, Defense-Wide
97_7065	Family Housing, Operations and Debt, Defense-Wide
97X4090	Homeowners' Assistance Fund, Defense
97X4166	DoD Family Housing Improvement Fund, Direct oan Financing Account
97X4167	DoD Family Housing Improvement Fund, Guaranteed Loan Financing Account
97X4196	<i>Unaccompanied Housing Direct Loan Financing Account</i>
97X4197	<i>Unaccompanied Housing Guaranteed Loan Financing Account</i>
17X5429	<i>Rossmoor Liquidating Trust Settlement Account</i>

FUNCTIONAL TITLE - REVOLVING AND MANAGEMENT FUNDS

The functional title "Revolving and Management Funds" for military functions is defined as comprising the accounts listed below. Since each account, in its entirety, is classified within a single first level subdivision of the functional title, the accounts are grouped by the subdivisions.

Public Enterprise Funds

97X4555	National Defense Stockpile Transaction Fund
97X4093	William Langer Jewel Bearing Plant Fund
97X4950	Pentagon Reservation Maintenance Fund
17X4557	National Defense Sealift Fund

Intragovernmental Funds

17X4930	<i>Defense Working Capital Funds, Navy</i>
21X4930	<i>Defense Working Capital Funds, Army</i>
57X4930	<i>Defense Working Capital Funds, Air Force</i>
97X4930	<i>Defense Working Capital Funds, Defense</i>
97_3910	ADP Equipment Management Fund
17X3980	Navy Management Fund
97X4179	<i>Reserve Mobilization Income Insurance Fund</i>
21X4528	Army Conventional Ammunition Working Capital Fund*
97X4931	Buildings Maintenance Fund

* Not a revolving fund after FY 1998. Closing after existing orders are completed

FUNCTIONAL TITLE - DEFENSE-WIDE CONTINGENCIES

The functional title "Defense-Wide Contingencies" for military functions is defined as comprising the accounts listed below:

97 9912	Other Legislation (including Management Improvements)
97 9918	General Transfer Authority Outlay Allowance

FUNCTIONAL TITLE - OFFSETTING RECEIPTS

The functional title "Offsetting Receipts" for military functions is defined as comprising the accounts listed below:

21 0001	Offsetting Receipts, Army
17 0002	Offsetting Receipts, Navy
57 0003	Offsetting Receipts, Air Force
97 0004	Offsetting Receipts, Defense Agencies
21 0021	Rocky Mountain Arsenal Offsetting Receipts
97 0024	Defense Cooperation Receipts
97 0025	Interest on Defense Cooperation Receipts
17 0029	<i>Offsetting Receipts, Rossmoor Liquidating Trust Settlement</i>
97 0036	<i>Sales of Certain Materials in National Defense Stockpile</i>
97 0041	Contributions for Burdensharing and Other Cooperative Activities, Defense
17 0085	Offsetting Receipts, Kaho' Olawe Island Fund
21 0086	National Science Center Receipts, Army
97 0088	Offsetting Receipts, Disposal of DoD Real Property
97 0089	Offsetting Receipts, Lease of DoD Real Property
97 0093	Offsetting Receipts, DoD Overseas Military Facility Investment Recovery

FUNCTIONAL TITLE - OFFSETTING RECEIPTS (CONTINUED)

97 0095	Proceeds from Transfer/Disposal Commissary Facilities
97 5336	<i>Offsetting Receipts, Defense Export Loan Guarantees, Negative Subsidies</i>

NOTE: Offsetting receipt accounts 002_, 004_, 008_ and 009_ listed above are for Special Fund accounts. The account numbering for receipt accounts are bogus (*except for 97 5336*) and are unique to the Budget Review System because the database will not accept a Treasury code with a decimal suffix.

FUNCTIONAL TITLE - TRUST AND TRUST REVOLVING FUNDS

The functional title "Trust Funds" for military functions is defined as comprising the accounts listed below:

21X8063	Ainsworth Library (Trust)
97X8335	Voluntary Separation Incentive Fund
21X8927	Army General Gift Fund
17X8733	USN Academy General Gift Fund
17X8730	USN Academy Museum Fund
17X8716	Navy General Gift Fund
17X8723	Ships Stores Profit, Navy
17X8008	<i>Naval Historical Center Fund</i>
57X8928	Air Force General Gift Fund
17X8423	Midshipmen's Store, USN Academy (Trust Revolving)
57X8418	Air Force Cadet Fund (Trust Revolving)
97X8164	Surcharge Collections, Sales of Commissary Stores, Defense (Trust Revolving)
97X8165	Foreign National Employees Separation Pay, Defense
97X8168	National Security Education Trust Fund, Defense
21X8064	Fisher House Trust Fund, Army
17X8169	<i>Fisher House Trust Fund, Navy</i>
57X8170	<i>Fisher House Trust Fund, Air Force</i>
21X8174	National Science Center Gift Fund, Army
97X8337	<i>Host Nation Support for U.S. Relocation Activities, Defense</i>

FUNCTIONAL TITLE - INTERFUND TRANSACTIONS

The functional title "Interfund Transactions" for military functions is defined as comprising the accounts listed below:

17 9082	Interfund Transactions, Navy
97 9086	Interfund Transactions, Defense
97 9088	Interfund Transactions, Foreign National Employee Separation Pay
97 9089	Interfund Transactions, Voluntary Separation Incentive

NOTE: Interfund Transaction receipt accounts listed above are for Trust Fund accounts. The account numbering for these Interfund Transactions are bogus and are unique to the Budget Review System because the database will not accept a Treasury code with a decimal suffix.

0107 AUTOMATED FUTURE YEARS DEFENSE PROGRAM (FYDP) DATABASES**010701 FYDP Update System (FUSE)****A. Purpose and Objectives**

This Section provides for the maintenance of the FYDP. The FYDP is a database with associated reports that records and displays resource decisions made during the biennial Planning, Programming, and Budgeting (PPB) cycle. The FYDP contains defense resources—people, forces (equipment and organizations), and dollars—categorized by programs and related to the budget's appropriation structure. The FYDP provides a record of past decisions that assists senior leaders in deciding on future issues such as operations tempo, force structure size and composition, and investment strategies.

Data are entered into the FYDP through the FUSE system. FUSE allows all DoD organizations to submit FYDP data electronically, receiving real-time feedback on their inputs. FUSE is a web-based application hosted on the Secret Internet Protocol Router Network (SIPRNet). It allows users to update, correct, and view their organization's portion of the FYDP.

B. Applicability and Scope

The provisions of this Section apply to the Office of the Secretary of Defense (OSD), the Military Departments, and the Defense Agencies (hereafter referred to as "DoD Components") that contribute data to the FYDP. Updating and general management of the FYDP is administered by the OUSD(Comptroller), Office of the Director (Program Analysis and Evaluation) (hereafter referred to as "OD(PA&E)"). Access to FUSE, for the purpose of providing data, is controlled by OD(PA&E).

C. Reporting Requirements

Updates to the FYDP are required coincident with submission of the (1) Program Objective Memoranda (POM), (2) Budget Estimate Submission (BES), and (3) President's Budget (PB), and (4) for major restructures of the FYDP itself when directed by the OD(PA&E). Specific guidance relative to approved changes, due dates, and special requirements is provided in a memorandum from the OUSD(Comptroller) announcing each update. In the POM and BES FYDP submissions, acceptable update years are limited to the budget years and programming years (generally six years for TOA and manpower, and nine years for forces). In the PB FYDP submission, acceptable update years include the most recent prior year of the budget cycle to the end of the programming cycle (generally eight years for TOA and manpower, and 11 years for forces). Since some appropriations—procurement, RDT&E, and military construction—are authorized for obligation over multiple years, it is periodically necessary to update historical years (the years prior to the first year of a PB FYDP update). Historical changes will be accepted once during the PPB cycle—usually during the President's Budget FYDP update. These updates enable the FYDP to reflect transfers, rescissions, supplemental appropriations, reappropriations, and other authorized adjustments to total obligational authority, which might occur in multiyear appropriations, as well as to reflect actual accounting obligations. Particular instructions for conducting historical-year updates will be issued by OUSD(Comptroller) as required.

D. Publication of FYDP Related-Information

Section 221 of Title 10 of the United States Code (USC) requires that:

"The Secretary of Defense shall submit to Congress each year, at or about the time that the President's budget is submitted to Congress that year under section 1105(a) of title 31, a future-years defense program (including associated annexes [now called "programs"]) reflecting the estimated expenditures and proposed appropriations included in that budget."

In accordance with the USC, OD(PA&E) will prepare the President's Budget FYDP Summary and Program Element Detail for transmission to the Congress. In addition, OD(PA&E) will provide FYDP-related information at all other updates for within DoD. Historical updates, if collected at the time of the President's Budget FYDP update, will be issued with the subsequent PPB cycle.

E. Other Databases Related to the FYDP

Consistent with the FYDP are separate but related databases and documents constituting the Procurement Program and RDT&E Program. These databases produce the Procurement Programs Report (P-1) and the RDT&E Programs Report (R-1). Detailed information regarding these databases is provided in section 0105. The FYDP Structure Management (FSM) database maintains information about the program elements and other related attributes critical to the production of the FYDP. Detailed information regarding this database is provided in Section 010702.

F. Instructions for Updating the FYDP on FUSE

1. General

a. FYDP data shall be submitted by DoD Components to the Programming and Fiscal Economics Division, OD(PA&E), over the SIPRNet, as directed.

All data will be input directly into the FUSE system on the SIPRNet.

- Standard ASCII text, flat file.*
- Character fixed record length (length of record: 28 characters for the FYDP data transactions). See section 0109.*

b. All resource changes to the data file shall be on a net change basis; that is, data currently in the file shall be revised (plus or minus) by an incremental amount to reflect the new approved position.

c. Program element codes and titles, resource identification codes, and DoD Component identifier codes are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook dated March 1998 and available on DefenseLINK at <http://web7.whs.osd.mil/corres.htm>, under "Publications" or <http://web7.whs.osd.mil/pdf/dod7045.pdf>) and in approved decision documents posted to the FYDP Structure Management (FSM) web site (see Section 010702) but not yet reflected in DoD 7045.7-H.

2. Submission of Changes

Changes submitted for net change/add record resource data (FYDP Data Format as prescribed in Section 010701F1) must provide specific identification of quantitative resource information by program element, resource identification code, and fiscal year.

3. Military Pay Rates

Submission of each FYDP update should include average annual military pay rates and permanent change of station (PCS) data, rounded to the nearest dollar for each fiscal year for each military personal end-strength category identified in the FYDP. Pay rates are used in updating the FYDP, and are also a FYDP data end-product in their own right. It is the intent of OD(PA&E) to reflect the most accurate pay rates available in each update to the FYDP.

010702 FYDP Structure Management (FSM) System**A. Purpose and Objectives**

This section provides for the maintenance of the automated database of the FYDP's structure, and describes the procedures used for requesting changes to the FYDP's structure, such as establishing new program element codes and definitions or changing program element titles and definitions. The primary information resource in the DoD for FYDP structure is the FYDP Structure Management (FSM) web site <http://www.ra.pae.osd.mil/fsm>.

B. Applicability and Scope

The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments and the Defense Agencies (hereafter referred to as "DoD Components") that contribute data to the FYDP. Updating and general management of the FYDP structure is administered by OD(PA&E).

C. Reporting Requirements

New program elements must be created when PPB decisions shift resources among DoD Components or fund new programs. It is the responsibility of the DoD Components and the OUSD(Comptroller), Program/Budget to recommend changes to the FYDP structure via the FSM web site as the need arises. In addition, OUSD(Comptroller), Program/Budget will work with OD(PA&E) in the establishment of new TOA Resource Identification Codes (RICs) to coincide with new Treasury Codes created by the Office of Management and Budget, or as otherwise required by PPB decisions.

D. Update and Publication of FYDP Structure Management Handbook, DoD 7045.7-H

DoD 7045.7-H will be revised periodically (typically three times per year or with each update to the FYDP), as specified in DoDI 7045.7, Implementation of the Planning, Programming, and Budgeting System (PPBS), May 23, 1984. The FSM web site will contain the most recent revision to DoD 7045.7-H, updated to reflect the POM, BES, and President's Budget phases of the PPBS cycle. FYDP Structure Coordination Documents (which are approved and circulated periodically, and placed on the FSM web site) should be used to supplement the most recent version of DoD 7045.7-H; they should reflect the latest approved changes to the FYDP's structure. Each year, the revision of DoD 7045.7-H for the new President's Budget FYDP will be released to the public via DefenseLink.

E. Other Databases Related to FSM

The FYDP database, which is administered by OD(PA&E) and updated by the components via the FUSE system, is referenced in Section 010701. The RDT&E Program is referenced in Section 0105.

F. Instructions for Making Changes to the FYDP Structure on FSM

Requests for changes to the FYDP's program structure, such as establishing new program element codes and definitions or changing program element titles and definitions, shall be submitted to OD(PA&E) for coordination with the DoD Components. The primary instrument for submitting change requests is the FSM web site. The FSM web site provides instructions for formatting and submitting change requests. Each DoD Component has a designated representative authorized to submit change requests. Coordination cycles run continually throughout the year. Approved changes are reported periodically in the FYDP Structure Coordination Documents. These documents are posted on the FSM web site, and the approved structure changes are incorporated in the FSM database.

**0108 AUTOMATED COMMUNICATIONS, COMMAND AND CONTROL, INTELLIGENCE,
SURVEILLANCE AND RECONNAISSANCE (C³ISR) DATABASE**

The C³ISR database maintained by OASD (C³I) is the only complete, automated source of resource data for C³I related activities for use by the Office of the Secretary of defense and the Joint Staff. The C³ISR database is essential to the preparation of the Intelligence and C³ justification books. It facilitates functional analyses for OSD and the Joint Staff, and is fully compatible with the NFIP resources database used by the Director of Central Intelligence. It is also fully consistent with data contained in the FYDP, R&D and Procurement Programs, and budget databases. The C³ISR database is electronically matched to relevant data in these databases prior to use. Specific instructions for the update of the C³ISR database is contained in Chapters 16 and 17 of this volume.

0109 GENERAL GUIDANCE SUBMISSION FORMATS

010901 Purpose

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

INSTRUCTIONS

- Column (1): Stub lines will be the same as those on Exhibit PB-1 on a budget basis. Three lines of data (BA, outlays and military/civilian personnel impacts) are required for each account included in the supplemental proposal.
- Column (2): The dollar amounts in this column for BA and outlays must agree with FY 19CY amounts on Exhibit PB-2/PB-2A for the Budget Estimates Submission. Likewise, civilian FTE and Military E/S data must agree with amounts reported in the component's Budget Estimates Submission.
- Column (3), (4) and (5): Show supplemental requirements (BA, military E/S, and civilian FTE) by program.
- Column (6): Represents the sum of Columns (3), (4) and (5). The BA, outlays and military E/S and civilian FTE amounts in this column represent the total supplemental request impacting FY 19CY.

INSTRUCTIONS FOR PREPARATION
OF EXHIBIT PB-10

The following instructions apply to all appropriations and funds:

Indicate in the heading the name of the submitting component, subject, date, and component submission control number. Leave "USD (Comptroller) Serial No." blank.

Column (1): List the appropriation or fund and the Budget Subactivity Number. For the procurement appropriations, P-1 line items will be shown. For the RDT&E appropriations, program elements will be shown.

Columns (2), (3) and (4): List the TOA changes. If there are also changes in financing adjustments, show these separately and then show the change in budget authority. The military personnel amount to be used here will be the sum of the products of the workyears/\$ rates shown to the right, using the standard rate.

Column (5): List the military or civilian personnel categories affected by the change. Military personnel change will be in end-strength (E/S) and civilian personnel change in full time equivalent (FTE). Use the categories illustrated in Exhibit PB-4.

Columns (6), (7), (9), (10), (12) and (13): List the military end strength and workyear changes, by activity. Likewise, list civilian FTE changes by activity.

Columns (8), (11) and (14): Show the average salary at which these changes were priced.

If there are no personnel changes, Columns (5) through (14) will be left blank.

Show a total for increases and decreases.

The outyear impact of the additional budget submission will be included at the end of Exhibit PB-10. This will show the net change by appropriation budget subactivity number for each of the applicable outyears.

Narrative justification must also accompany Exhibit PB-10.

(Dollars in Thousands)

FY 19XX Pending Request

FY 19XX Proposed Amendment

FY 19XX Revised Request

Budget Activity: Other Missiles

Justification of proposed amendment.

AGM-69B SRAM. Deletes the \$xx,xxx,xxx FY 19XX requirement. Due to the recent evolution of the Air Launch Cruise Missile (ALCM) as an effect weapon system and the continued ability to use the B-52 bomber well into the 1980's, the President directed the B-1 production be halted. With the decision to not deploy the B-1, the Air Force requirement for the SRAM-B which was to be used on the B-1 is no longer valid.

Air Launched Cruise Missile. The Air Launched Cruise Missile (ALCM) is an aerodynamic air-to-ground strategic missile propelled by a turbo-fan engine. It has a high degree of accuracy through the combination of inertial guidance and terrain correlation update. The missile is designed to be carried internally and/or externally on the B-52. The ALCM is to be employed from a stand-off position against a wide variety of pre-selected lightly or undefended ground hard targets. This budget amendment requests an additional \$xx,xxx,xxx to accelerate the ALCM Initial Operating Capability (IOC).

Appeal

Subject: _____

Appropriation(s): _____

Summary:

Briefly describe the congressional action and the apparent reasons behind it.

<u>Item</u>	<u>Request</u>	<u>Budget Authority</u> <u>(Dollars in Millions)</u>		<u>Appeal</u>
		<u>House</u>	<u>Senate</u>	

DoD Position:

Concise description of our rationale for restoration. Continuations and supplements are not necessary and will not be used.

(DoD Component)
FY ____ Defense (Authorization or Appropriation) Bill
Appeal (language/general provision item)

Subject: _____

Language/Provision:

Briefly describe language or general provision and its apparent intent.

DoD Position:

Concise description of our rationale for revision or removal of language/general provision item as proposed.

RECORD OF CONGRESSIONAL TRANSCRIPT REVIEW			
TRANSCRIPT ACTION MONITOR <small>(Name, agency and telephone number)</small>		DATE RECEIVED FROM CONGRESS	
To: (In turn) 1. _____ 2. _____ 3. DIRECTOR, FREEDOM OF INFORMATION AND SECURITY REVIEW		DATE ACTION MUST BE COMPLETED 1. _____ 2. _____ 3. _____	
DESCRIPTION OF DOCUMENT COMMITTEE/SUBCOMMITTEE	HEARING DATE AND SUBJECT		PAGES _____ THRU _____ HEARING: _____ CLASSIFICATION: _____
<p>The attached transcript of testimony is forwarded for editorial and security review in accordance with DoD Directive 5400.4. To meet committee requirements and allow time for final review by the Directorate for Freedom of Information and Security Review, OASD(PA), your action must be completed as indicated. Each element in the review process must give cooperative consideration to the time requirements of all elements in meeting due out dates. An advance copy of this DD Form has been sent to DFOISR, OASD(PA).</p>			
GUIDELINES			
I. SECURITY A. GENERAL. Review must be accomplished by officials competent to judge the security aspects of the subjects involved and to provide a consistent and defensible security position. B. MARKING 1. Use black lead pencil. 2. Enclose with brackets [] information to be deleted. 3. Make deletions as limited as possible, considering whether the total context may contain clues to the information deleted.		II EDITORIAL A. GENERAL. Edit to correct inaccuracies. B. MARKING. 1. Use black lead pencil. 2. Line through all words or figures for which substitute language or figures are entered. Do <i>not</i> use brackets. 3. Print or write all entries legibly. 4. Use standard proofreaders markings. 5. Do not change statements by committee members. Note inaccuracies in the margin.	
REMARKS			
FORWARDING			
TO: Director, Freedom of Information and Security Review		Date: _____	
Portions of the attached transcript which require deletion in the interests of national security before publication have been bracketed. This action represents the considered judgement of this department/agency that the information so marked warrants the protection of security classification.

DD FORM 2232
MAY 1996

TOTALS

DD Form 2232 (\$\$\$) Budget Estimates Recording/Coding Instructions (\$\$\$)

1. Column 1, Budget Plan: Obligation Plan data for Direct and Reimbursable budget activities will be indicated by coding a 2 over the preprinted 1 in Column 1.
2. Columns 2 thru 14, Budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing".
Columns 2 thru 5 will be the Appropriation (Treasury) Code.
Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of Volume 2A of the DoD Financial Management Regulation, DoD 7000.14-R). Values will be entered left justified.
Columns 9 thru 11 will be the Budget Activity Code. Column 9 will be blank for 2 digit Budget Activity Codes listed therein.
Columns 12 thru 14 will be the Budget Subactivity Code.
3. Column 15, Fiscal Year Program: For Procurement, RDT&E, Military Construction, Family Housing, and those Operation and Maintenance accounts with multiple year availability, enter the last digit of the applicable fiscal year program.
4. Column 16, Supplementary Code: Enter a value only when the transaction is associated with a supplemental program. The following are valid supplemental codes:

 Q - Supplemental,
 P - Legislative proposal, not subject to PAYGO,
 L - Appropriation language to be transmitted later,
 S - Legislative proposal, subject to PAYGO,
 R - Rescission Proposal.
5. Columns 32 thru 70: Are used for recording submission estimates for PY, CY, BY1, and BY2.
 Minus signs: When appropriate, will be coded to the left of the most significant digit.

NOTE: Entries in columns 32-70 for Obligation Plan, Expenditure Tail, Object Classification and Budget Plan for all Financing and Budget Authority lines will be at the level of the PB-2 & PB-2A Exhibits shown in Section 010702 of the Financial Management Regulation.

3. Column 23, Alternative Number (OSD Use): When preparing data for the numbered alternatives in a decision, use this field to identify the specific alternative. When the alternative is the service estimate, use the code "S"; otherwise use the alternative number referred to in the decision document.
4. Columns 32 thru 70: Are used for recording dollar amounts for BY+1, BY+2, BY+3, and BY+4.
Entries will be coded right justified with leading spaces in these columns, for each amount.
Minus signs: When appropriate, will be coded to the left of the most significant digit.

DD Form 2235 Personnel Budget Submission Recording/Coding Instructions

1. Columns 2 thru 14, Budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing."
Columns 2 thru 5 will be the Appropriation (Treasury Code).
Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of the DoD Financial Management Regulation, DoD 7000.14-R) for civilian full-time equivalents (FTEs). For military end strengths code the military component value in combination with the valid defense agency Suffix Code. Values will be entered left justified.
Column 9 will be blank.
Columns 10 and 11 will be "20".
Columns 12 thru 14 will be the Budget Subactivity Code.
2. Columns 15 and 16, Civilian FTE Personnel Category Codes are as follows:

01 Civ, US DH	03 Civ, Fgn DH	05 Civ, Fgn Ind
------------------	-------------------	--------------------
3. Columns 15 and 16, Military End Strength Personnel Category Codes are as follows:

21 Off, A	23 Enl, A	25 Cadets, A
31 Off, N	33 Enl, N	35 Cadets, N
41 Off, MC	43 Enl, MC	55 Cadets, AF
51 Off, AF	53 Enl, AF	
4. Columns 15 and 16, Selected Reserve Personnel Category Codes are as follows:

61 Off, Trained in Units	71 Off, Training Pipeline
62 Enl, Trained in Units	72 Enl, Training Pipeline
63 Off, IMAs	81 Off, Full-time Active Duty
64 Enl, IMAs	82 Enl, Full-time Active Duty

These codes are valid for all Reserve appropriation accounts, and with the exception of 63 and 64, are also valid for all National Guard appropriation accounts.
5. Columns 32 thru 70: Are used for recording initial FTE estimates for Civilian Personnel and initial end strength estimates Military and Selected Reserve Personnel for PY, CY, BY1, and BY2. Entries will be coded right justified with leading spaces in these columns, for each amount.

Minus signs: When appropriate, will be coded to the left of the most significant digit.

DD Form 2236 Personnel Decision Recording/Coding Instructions

1. Columns 2 thru 14, Budget Name/Code File: Enter the code exactly as it appears in the "Budget Account Title File Listing".
 Columns 2 thru 5 will be the Appropriation (Treasury) Code.
 Columns 6 thru 8 will be the DoD Component/Suffix Codes (Section 010506 of the DoD Financial Management Regulation, DoD 7000.14-R) for civilian full-time equivalent (FTE) personnel data. For military end strengths, code the military component value in combination with the valid defense agency Suffix Code. Values will be entered left justified.
 Column 9 will be blank.
 Columns 10 and 11 will be "20".
 Columns 12 thru 14 will be the Budget Subactivity Code.

2. Columns 15 and 16, Civilian FTE Personnel Category Codes are as follows:

01 Civ, US DH	03 Civ, Fgn DH	05 Civ, Fgn Ind
------------------	-------------------	--------------------

3. Columns 15 and 16, Military End Strength Personnel Category Codes are as follows:

21 Off, A	23 Enl, A	25 Cadets, A
31 Off, N	33 Enl, N	35 Cadets, N
41 Off, MC	43 Enl, MC	55 Cadets, AF
51 Off, AF	53 Enl, AF	

4. Columns 15 and 16, Selected Reserve Personnel Category Codes are as follows:

61 Off, Trained in Units	71 Off, Training Pipeline
62 Enl, Trained in Units	72 Enl, Training Pipeline
63 Off, IMAs	81 Off, Full-time Active Duty
64 Enl, IMAs	82 Enl, Full-time Active Duty

These codes are valid for all Reserve appropriation accounts, and with the exception of 63 and 64, are also valid for all National Guard appropriation accounts.

5. Columns 17 thru 22 (OSD Use): Decision Number is the number identifying Secretarial decisions.

<u>DCN No. Illust.</u>	<u>17</u>	<u>18</u>	<u>19</u>	<u>20</u>	<u>21</u>	<u>22</u>

3. **Columns 22 thru 23: Program Fiscal Year** - Enter the last two digits of the applicable fiscal year.
4. **Columns 24 thru 25: Reserved** - Leave these positions blank.
5. **Column 26: Cost Type** - Cost Type codes authorized for use are:

<u>Cost Type Code</u>	<u>Cost Type</u>
A	Program Cost (Adds to appropriation as well as authorization totals.)
M	Memo Non Add (Included in authorization totals but <u>not</u> included in appropriation totals.)

6. **Columns 27 thru 28: Action Document Code** - Enter one of the following codes:

01	Program Change Decision
02	Program Budget Decision
04	Program Decision Memorandum
16	Congressional Action

7. **Columns 29 thru 34: Document Decision Number** - Enter the decision number as follows: (The initial budget data must show the PBD wherein the resources for this project will be addressed, and position 32 must contain an "S".)

<u>PBD No. Illust.</u>	<u>Decision Number</u>					
	<u>29</u>	<u>30</u>	<u>31</u>	<u>32</u>	<u>33</u>	<u>34</u>
PBD	3	0	1			
PBD, Change (1st)	3	0	1	C		
PBD, Change (2nd)	3	0	1	C	2	
Other SecDef Decision	P	0	1			

8. **Columns 35 thru 40: Approval Date** - Enter the date of the document decision in the format - year month day, i.e. 860823. (For the initial budget submission, use the date of the Program decision Memorandum.)
9. **Columns 41 thru 48: Program Cost** - Enter the amount (total or delta to previous figure) in thousands of dollars, right justified. If the value to be entered is negative, enter a minus sign in the column to the immediate left of the dollar value (e.g. -4328).

CHAPTER 2

MILITARY PERSONNEL APPROPRIATIONS

0201 GENERAL

020101 Purpose

A. This Chapter prescribes the justification materials required for the Military Personnel appropriations for both the Active and the Reserve Forces to support the budget estimates submission and the presentation of the President's budget submission to the Congress.

B. The following appropriations and accounts are covered:

Section

020201

- Active Military Personnel, Army, Navy, Marine Corps, Air Force

020301

- Reserve Military Personnel
- Army, Navy, Marine Corps, Air Force
- National Guard Military Personnel, Army, Air Force

020401

- Military Personnel Retirement Requirements

020502

- Military Retirement Fund/Education Benefits Fund

C. Fund requirements for the Military Personnel appropriations will be presented using the budget and fiscal accounting classifications as set forth in sections 0202 and 0203. Budget estimates will be based upon approved military personnel/strength programs as contained in the exhibits required in this Chapter, and in accordance with such special instructions as may be issued by the Office of the Under Secretary of Defense (P&R) as part of the call for the services' military strength programs. **All exhibits will be on a gross basis; i.e., include both direct and reimbursable personnel.**

D. Computation of Subsistence-in-kind Rates. For the September 15 submission, subsistence-in-kind average daily food allowances will be developed by using the Food Cost Index to compute the August Basic Daily Food Allowance (BDFA). The rates should be increased by one-half of the FY 19CY military personnel non-pay price escalation to determine the CY budget rates for subsistence-in-kind. Any costs that exceed the amount projected in the FY 19CY President's budget will be included in the estimates within current availability.

E. Budgeting for Inflation. Anticipated inflation will be included in the September 15 estimates for clothing, subsistence-in-kind, the commercial portions of permanent change of station travel, and temporary lodging allowances overseas. The inflation rates to be used will be based upon approved price escalation indices provided as an enclosure to the annual FY 19CY revised and FY 20BY1/BY2 Budget Estimates Guidance memorandum. *To ensure adequate funding for the basic allowance for housing, anticipated housing cost inflation will be added.*

F. Military End Strength Guidance for the Budget Estimates Submission. The requirements for military manpower end strength for the Office of the Secretary of Defense, and the DoD Field Activities under the purview of the Washington Headquarters Service (WHS), will be developed and assigned by the Director for Administration and Management. WHS will provide the Services with end strength numbers for the WHS agencies approximately 45 days prior to the submission of the machine readable input to the Budget Review System (BRS) and will identify the data by fiscal year, military service, and officer/enlisted designation. The end strength provided by WHS represents controls that will be met by the Services in their machine readable BRS submission. The following organizations are currently subject to this guidance:

Office of the Secretary of Defense (OSD)
Washington Headquarters Services (WHS)
Defense Legal Services Agency (DLSA)
Office of Economic Adjustment (OEA)
American Forces Information Service (AFIS)
Defense Technology Security Administration (DTSA) (*FY 1998 and prior*)
Defense Prisoner of War/Missing In Action Office (DPMO)

0202 ACTIVE MILITARY PERSONNEL APPROPRIATIONS**020201 General**

A. The purpose of this section is to provide general information applicable to the Active Military Personnel appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the Other Special Analysis chapter (Chapter 19).

B. This section provides the budget and fiscal accounting classifications for the military personnel appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification, which shall be used on a uniform basis for the military personnel appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Military Personnel appropriations.

020202 Uniform Budget and Fiscal Accounting Classification

A. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in section 020101. Variations in the activity and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described below.

B. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

C. Chart of Accounts - The chart of accounts that follows represents a summary of the accounting and reporting structure under the Active Military Personnel appropriations. For purposes of presentation of budget estimates, however, as distinguished from monthly reporting, additional statistical breakdown will be required as shown in Section 020203.

Budget Activity (BA) and Budget Subactivity (BSA) ^{a/}BA/BSA1 Pay and Allowances of Officers

- 1-A Basic Pay
- 1-B Retired Pay Accrual
- 1-C Incentive Pay for Hazardous Duty
- 1-D Special Pay
- 1-E Basic Allowance for Quarters (*FY 1998 and prior years only, not valid after January 1, 1998*)
- 1-E-1 Basic Allowance for Housing (*Effective January 1, 1998, FY 1998 and subsequent years only*)
- 1-F Variable Housing Allowance (*FY 1998 and prior years only, not valid after January 1, 1998*)
- 1-G Basic Allowance for Subsistence
- 1-H Station Allowances, Overseas
- 1-I CONUS COLA
- 1-J Clothing Allowances
- 1-K Family Separation Allowances
- 1-L Separation Payments
- 1-M Social Security Tax - Employer's Contribution

2 Pay and Allowances of Enlisted Personnel

- 2-A Basic Pay
- 2-B Retired Pay Accrual
- 2-C Incentive Pay for Hazardous Duty
- 2-D Special Pay
- 2-E Special Duty Assignment Pay
- 2-F Reenlistment Bonus
- 2-G Enlistment Bonus
- 2-H Basic Allowance for Quarters (*FY 1998 and prior years only, not valid after January 1, 1998*)
- 2-H-1 Basic Allowance for Housing (*Effective January 1, 1998, FY 1998 and subsequent years only*)
- 2-I Variable Housing Allowance (*FY 1998 and prior years only, not valid after January 1, 1998*)
- 2-J Station Allowances, Overseas
- 2-K CONUS COLA
- 2-L Clothing Allowances
- 2-M Family Separation Allowances
- 2-N Separation Payments
- 2-O Social Security Tax - Employer's Contribution

3 Pay and Allowances of Cadets and Midshipmen

- 3-A Academy Cadets and Midshipmen

4 Subsistence of Enlisted Personnel

- 4-A Basic Allowance for Subsistence
- 4-B Subsistence in Kind

5 Permanent Change of Station Travel

- 5-A Accession Travel
- 5-B Training Travel
- 5-C Operational Travel Between Duty Stations (within CONUS and within Overseas)
- 5-D Rotational Travel to and from Overseas
- 5-E Separation Travel
- 5-F Travel of Organized Units

6 Other Military Personnel Costs

- 6-A Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners
- 6-B Interest on Uniformed Services Savings Deposits
- 6-C Death Gratuities
- 6-D Unemployment Benefits
- 6-E Survivor Benefits
- 6-F Education Benefits
- 6-G Adoption Expenses

a/ Proper coding will be assigned to each Military Department in accordance with fiscal codes for all appropriation activities.

D. Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions are provided on the following pages.

E. Object Classification - The object classifications that follow the Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

BA/BSA

- 1. Pay and Allowances of Officers** - For the pay and allowances authorized by law to be paid to officers, including commissioned and warrant of the Regular Forces and officers of the Reserve Components on extended active duty:

1-A. Basic Pay: For basic compensation of officers, including length of service increments, under provisions of 37 U.S.C. 201, 203 and 205.

1-B. Retired Pay
Accrual: For the Department of Defense's Contribution to its Military Retirement Fund under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay. Retired pay accrual does not apply to academy cadets or midshipmen.

1-C. Incentive Pay for Hazardous

Duty: For pay of officers for performance of hazardous duty required by competent authority under provisions of 37 U.S.C. 301, 301a, 301b and 301c. Includes:

- a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.
- b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
- c. For the frequent and regular performance of operational or proficiency flying duty required by orders.
- d. For the written agreement to remain on active duty in aviation service for at least one year in an aviation specialty designated as critical.
- e. Duty while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.
- f. Duty involving parachute jumping as an essential part of military duty.
- g. Duty involving the demolition of explosives as a primary duty, including training for such duty.
- h. Duty inside a high or low pressure chamber.
- i. Duty as a human acceleration or deceleration experimental subject.
- j. Duty as human test subject in thermal stress experiments.
- k. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

- l. Duty involving service as an air weapons controller.
- m. Duty involving use of toxic fuel or waste.
- n. Duty involving highly toxic pesticides or live, hazardous organisms.

1-D. Special Pay:

For special pay to officers on active duty as physicians, dentists, optometrists, veterinarians, nurses and psychologists under the provisions of 37 U.S.C. 302, 302a, 302b, 302c, 302d, 302e and 303; certain designated officers in positions of unusual responsibility which are of a critical nature to the service concerned under provisions of 37 U.S.C. 306; officers on duty subject to hostile fire or imminent danger under provisions of 37 U.S.C. 310; personal money allowance to certain Generals and Admirals under provisions of 37 U.S.C. 414; for diving duty pay under the provisions of 37 U.S.C. 304; for sea duty pay under the provisions of 37 U.S.C. 305a; for nuclear officer incentive pay under the provisions of 37 U.S.C. 312, 312b and 312c.; for engineering and scientific duty performed by officers under the provisions of 37 U.S.C. 315; and for foreign language proficiency under the provisions of 37 U.S.C. 316.

1-E. Basic Allowance for Quarters:

For quarters allowances payable to officers under the provisions of 37 U.S.C. 403. *Effective January 1, 1998, the Basic Allowance for Quarters is replaced by the Basic Allowance for Housing.*

1-E-1 Basic Allowance for Housing:

The FY 1998 National Defense Authorization Act combined BAQ and VHA into one housing allowance called the Basic Allowance for Housing (BAH) beginning January 1, 1998.

1-F Variable Housing Allowance:

For variable housing allowances payable to officers under the provisions of 37 U.S.C. 403a. *Effective January 1, 1998, the Variable Housing Allowance is replaced by the Basic Allowance for Housing.*

1-G. Basic Allowance for Subsistence:

For subsistence allowances payable to officers under the provisions of 37 U.S.C. 402.

1-H. Station Allowances, Overseas:

For payment to officers outside the United States or in Hawaii or Alaska of per diem allowances based on cost of living and housing allowances for members stationed outside the United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 405.

1-I. CONUS Cost of Living Allowance:

For payments to eligible officers assigned to high cost areas under the provisions of 37 U.S.C 403b.

1-J. Clothing Allowances:

For payments to officers for purchase of required uniform under the provisions of 37 U.S.C. 415 - 419

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION**1-K. Family Separation****Allowances:**

For family separation allowances payable to officers under the provision of 37 U.S.C. 427.

1-L. Separation Payments:

- a. For payments to officers for accumulated annual leave under the provisions of 37 U.S.C. 501.
- b. For severance pay to officers, including elimination severance pay to officers not eligible for retirement under any provision of law on the date of elimination by promotion list passover, under the provisions of 10 U.S.C. 1174; elimination severance pay for cause under the provisions of 10 U.S.C. 1181; disability severance pay under the provisions of 10 U.S.C. 1212.
- c. For lump sum readjustment payments to Reserve officers under the provisions of 10 U.S.C. 12312.
- d. Voluntary Separation Incentive (VSI) - For payment of an annuity to officers voluntarily separating from active duty during the drawdown under the provisions of 10 U.S.C. 1175.
- e. Special Separation Benefit (SSB) - For a lump sum payment to officers separating from active duty during the drawdown under the provisions of 10 U.S.C. 1174a.
- f. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty members who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Authorized by Section 4403 of the FY 1993 National Defense Authorization Act (P.L. 102-484).

1-M. Social Security Tax Employer's**Contribution:**

For payment of tax of employer to Social Security Administration as provided by Federal Insurance Contributions Act (including wage credits).

- 2. Pay and Allowances of Enlisted Personnel** - For the pay and allowances authorized by law to be paid to enlisted personnel of the Regular forces and enlisted members of the Reserve components on extended active duty.

2-A. Basic Pay:

For basic compensation of enlisted personnel, including length of service increments, under the provisions of 37 U.S.C. 201, 203 and 205.

2-B. Retired Pay**Accrual:**

For the Department of Defense's Contribution to its Military Retirement Fund, under provisions of 10 U.S.C. 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

2-C. Incentive Pay for Hazardous**Duty:**

For pay of enlisted personnel for performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 and 301c. Includes:

- a. Duty as a crew member as determined by the Secretary concerned, involving frequent and regular participation in aerial flight.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

- b. Duty involving frequent and regular participation in aerial flights not as a crew member pursuant to paragraph a, above.
- c. Duty while attached under competent orders to a submarine, while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle), while undergoing training preliminary to assignment to a nuclear-powered submarine, while undergoing rehabilitation after assignment to a nuclear-powered submarine, or, in the case of a member qualified in submarines, while attached as a member of a submarine operational command staff whose duties require serving on a submarine during underway operations.
- d. Duty involving parachute jumping as an essential part of military duty.
- e. Duty involving the demolition of explosives as a primary duty, including training for such duty.
- f. Duty inside a high or low pressure chamber.
- g. Duty as a human acceleration or deceleration experimental subject.
- h. Duty as human test subject in thermal stress experiments.
- i. Duty involving frequent and regular participation in flight operations on the flight deck of an aircraft carrier or of a ship other than an aircraft carrier from which aircraft are launched.
- j. Duty involving service as an air weapons controller.
- k. Duty involving use of toxic fuel or waste.
- l. Duty involving highly toxic pesticides or live, hazardous organisms.

2-D. Special Pay:

For pay to enlisted personnel while on sea duty or duty outside the contiguous 48 States and the District of Columbia at places designated by the Secretary of Defense under the provisions of 37 U.S.C. 305 and 305a; for diving duty pay under the provisions of 37 U.S.C. 304; for duty subject to hostile fire or imminent danger under the provisions of 37 U.S.C. 310; for nuclear-trained and qualified, and for nuclear career accession and annual incentive bonuses under the provisions of 37 U.S.C. 312a; for qualified enlisted members extending duty at designated locations overseas under the provisions of 37 U.S.C. 314 and for foreign language proficiency under the provisions of 37 U.S.C. 316.

2-E. Special Duty Assignment**Pay:**

For pay to enlisted personnel for possessing special proficiency in a military skill, under the provisions of 37 U.S.C. 307.

2-F. Reenlistment**Bonus:**

For payment to enlisted personnel of a bonus for reenlistment, under the provisions of 37 U.S.C. 308.

2-G. Enlistment**Bonus:**

For payment to enlisted personnel of a bonus for enlistment (or extension) in a skill designated as critical, in accordance with the provisions of 37 U.S.C. 308a and 308f.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

**2-H. Basic Allowance
for Quarters:**

For quarters allowances payable to enlisted personnel under the provisions of 37 USC 403. *Effective January 1, 1998, the Basic Allowance for Quarters is replaced by the Basic Allowance for Housing.*

2-H-1 Basic Allowance for Housing:

The FY 1998 National Defense Authorization Act combined BAQ and VHA into one housing allowance called the Basic Allowance for Housing (BAH) beginning January 1, 1998.

**2-I. Variable Housing
Allowance:**

For quarters and variable housing allowances payable to enlisted personnel or to dependents under the provisions of 37 U.S.C. 403a. *Effective January 1, 1998, the Variable Housing Allowance is replaced by the Basic Allowance for Housing.*

**2-J. Station Allowances,
Overseas:**

For payment to enlisted personnel outside the United States or in Hawaii or Alaska of per diem allowances based on cost of living and housing allowances for members stationed outside the United States as prescribed by Joint Federal Travel Regulations and authorized under the provisions of 37 U.S.C. 405.

**2-K. CONUS Cost of Living
Allowance:**

For payments to eligible members assigned to high cost areas under the provisions of 37 U.S.C. 403b.

**2-L. Clothing
Allowances:**

For payment to enlisted personnel of cash allowance for purchase of prescribed clothing, for cost of clothing issued in kind, and for cash payment of maintenance allowances for clothing under the provisions of 37 U.S.C. 418. (Excludes replacement of clothing lost, damaged, or destroyed.)

**2-M. Family Separation
Allowances:**

For family separation allowances payable to enlisted personnel under the provisions of 37 U.S.C. 427.

2-N. Separation Payments:

- a. For payments to enlisted personnel for accumulated unused annual leave under the provisions of 37 U.S.C. 501.
- b. For severance pay to enlisted personnel for disability under the provisions of 10 U.S.C. 1212.
- c. For authorized donations for discharge under certain conditions under the provisions of 10 U.S.C. 1048.
- d. Voluntary Separation Incentive (VSI) - For payment of an annuity to enlisted members voluntarily separating from active duty under the provisions of 10 U.S.C. 1175.
- e. Special Separation Benefit (SSB) - For a lump sum payment to enlisted members separating from active duty under the provisions of 10 U.S.C. 1174a.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

f. Temporary Early Retirement Authority (TERA) - For payment of retired pay to selected active duty members who retire with between 15 and 20 years of service under the provisions of 10 U.S.C. 1293, 3911, 3914, 6323, 6330, 8911 and 8914. Authorized by Section 4403 of the FY 1993 National Defense Authorization Act (P.L. 102-484).

2-O. Social Security Tax - Employer's

Contribution: For payment of tax on employer to Social Security Administration as provided by Federal Insurance Contributions Act (including wage credits).

3. Pay and Allowances of Cadets and Midshipmen - For the pay and allowances of cadets and midshipmen at the United States Military Academy, United States Naval Academy, and the United States Air Force Academy.

a. For basic pay, commuted ration allowance, and employer's share of FICA tax for cadets appointed to the United States Military Academy, United States Naval Academy, and United States Air Force Academy, under the provisions of 37 U.S.C., 203 and 422.

b. For payment of nuclear accession bonus under the provisions of 37 U.S.C. 312b.

c. For the difference between the value of the commuted ration allowance and the cost of operational rations.

4. Subsistence of Enlisted Personnel - For the payment of authorized basic allowances for subsistence to enlisted personnel and for the cost of procuring food and beverage supplies for issue as rations to enlisted personnel on extended active duty, including emergency and operational rations; also includes the payment of meals furnished under contract (when approved by competent authority) at commercial facilities where the payment of commuted rations would create an individual hardship and/or the costs for establishment of a Government mess facility are prohibitive or the contract feeding of enlisted personnel is determined to be more economical or advantageous.

4-A. Basic Allowance for

Subsistence: For subsistence allowances payable to enlisted personnel under the provisions of 37 U.S.C. 402.

4-B. Subsistence in

Kind: For cost of subsistence issued as rations to enlisted personnel, including emergency and operational rations, and for payment of meals furnished under contract by commercial facilities under the provisions of 10 U.S.C. 4561, 6081 and 9561.

5. Permanent Change of Station (PCS) Travel - For expenses incident to permanent change of station travel of military personnel, individually or as part of organized units. The PCS travel costs include mileage; monetary allowance in lieu of transportation; transportation by common carrier (rail, bus, air, or water, including Air Mobility Command and Military Sealift Command); per diem allowances, actual and necessary expenses and cost of subsistence while in a PCS travel status; issue of meal tickets in lieu of subsistence; temporary lodging expense; travel of dependents and transportation of baggage and household goods, port handling charges for personnel, their household goods, baggage and privately owned automobiles passing through CONUS MTMC terminals; payments of dislocation allowances; authorized transportation of dependents and personal and household effects of deceased military personnel; costs of contract packing, crating, handling and temporary storage of household goods; cost of nontemporary storage of household goods; cost of trailer allowances; travel incident to organizational movements on permanent change of station whether for training or non-training purposes; expenses incident to PCS movement of any military group traveling under one order from the same point of origin to the same destination; minor supplies and services incident to troop or organizational PCS

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

movements; expenses and allowances incident to separation travel, discharge or release. Also included is all authorized Temporary Duty Travel directly related to and an integral part of PCS movement of individuals or organizational units. Excludes Temporary Duty Travel other than that directly related to and an integral part of PCS movements. All authorized PCS travel expenses provided for under this budget program account shall be charged to the same subprogram account cited in PCS travel order of the military member. The term "CONUS" (Continental United States) referred to herein applies to the United States Territory, "including the adjacent territorial waters located within the North American Continent between Canada and Mexico."

5-A. Accession Travel:**Officers.**

Covers PCS movements of (1) officers appointed to a commissioned grade from civil life, military academies or ROTC/NROTC, Reserve and National Guard officers called or recalled to extended active duty from home or a point where orders were received to first permanent duty station or training school of 20 weeks or more duration and (2) officers or warrant officers appointed or recalled from enlisted status from station where they served as enlisted to new permanent duty station or training school of 20 weeks or more duration. (Includes officers appointed from enlisted status upon graduation from OCS, OTS, or basic flying training.) (Marine Corps basic military training for officers will be a part of an accession move; this is the only exception to the 20-week rule.)

Enlisted.

Covers PCS movements of (1) enlistees, reenlistees, and prior service personnel from recruiting station or place of enlistment to first permanent duty station or training school of 20 weeks or more duration and (2) recalled enlisted reservists from home to first permanent duty station or training school of 20 weeks or more.

Cadets and Midshipmen.

Covers PCS movements of (1) individuals selected as academy cadets or midshipmen upon entry into the academies and (2) individuals who travel to the academies but fail to pass the entrance physical examinations and are required to return home.

5-B. Training Travel:**Officers.**

Covers PCS movements of (1) officers and warrant officers from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction of 20 weeks duration or more; and (2) officer and warrant officer school graduates and eliminates from school to their next permanent CONUS duty station. (Excludes academy graduates, OCS or OTC graduates, flying training graduates, ROTC graduates and others chargeable to Accession Travel.)

Enlisted.

Covers PCS movements of (1) enlisted personnel from previous CONUS permanent duty station to formal service or civilian schools, including technical schools, flying training schools, factory training, and other approved courses of instruction, of 20 weeks duration or more; (2) enlisted school graduates and eliminates from school to their next CONUS permanent duty station; and (3) enlisted personnel ordered to training leading to a commission if such training period is of 20 weeks duration or more.

5-C. Operational Travel:

Between Duty Stations (within CONUS and within Overseas):

Officers.

Covers PCS movements of (1) officers, and warrant officers to and from permanent duty stations located within the United States; (2) officers and warrant officers to

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing, or captured when no transoceanic travel is involved.

Enlisted.

Covers PCS movements of (1) enlisted personnel to and from permanent duty stations located within the United States; (2) enlisted personnel to and from permanent duty stations located within an overseas area when no transoceanic travel is involved; and (3) dependents, household goods, personal effects and privately owned vehicles of enlisted personnel who are interned, missing, or captured when no transoceanic travel is involved.

5-D. Rotational Travel to and from Overseas:**Officers.**

Covers PCS movements of (1) officers and warrant officers from permanent duty stations in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) officers and warrant officers from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) officers and warrant officers from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects and privately owned vehicles of officers and warrant officers who are interned, missing or captured when transoceanic travel is involved.

Enlisted.

Covers PCS movements of (1) enlisted personnel from permanent duty stations in CONUS, or training of 20 weeks or more duration, to permanent duty stations overseas; (2) enlisted personnel from permanent duty stations overseas to permanent duty stations in CONUS, or training of 20 weeks or more duration; (3) enlisted personnel from permanent duty stations in one overseas area to permanent duty stations in another overseas area when transoceanic travel is involved; and (4) dependents, household goods, personal effects, and privately owned vehicles of enlisted personnel who are interned, missing, or captured when transoceanic travel is involved.

5-E. Separation Travel:**Officers.**

Covers PCS movements of (1) officers and warrant officers upon release or separation from the Service from last permanent duty station to home of record or point of entry into service, or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of officers and warrant officers who are deceased.

Enlisted.

Covers PCS movements of (1) enlisted personnel upon release or separation from the Service from last permanent duty station to home of record or point of entry into service or to home of selection when authorized by law; and (2) dependents, household goods, trailer allowances, and personal effects of enlisted personnel who are deceased.

Cadets and Midshipmen.

Covers PCS movements of eliminated academy cadets/midshipmen to home of record or point of entry into service.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

5-F. Travel of Organized Units:

Officers. Covers PCS movements of (1) officers and warrant officers directed to move as members of an organized unit movement; and (2) officer and warrant officer fillers and replacements directed to move as part of the unit move.

Enlisted. Covers PCS movements of (1) enlisted personnel directed to move as members of an organized unit movement; and (2) enlisted fillers and replacements directed to move as part of the unit move.

6. Other Military Personnel Costs - For costs incident to the apprehension of military deserters, absentees, and escaped prisoners; interest on uniformed services savings deposits; death gratuities; unemployment benefits; and survivor benefits.

6-A. Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners:

For the expenses of apprehension and delivery of military deserters, absentees, and escaped military prisoners, including the payment for travel of guards; payment of rewards or reimbursement of reasonable and actual expenses to persons or agencies apprehending and detaining or delivering absentees or deserters to military control.

6-B. Interest on Uniformed Services Savings

Deposits: For the payment of interest at a rate not to exceed ten percent per annum on any sum of not less than \$5 deposited by members of the uniformed services under the provisions of 10 U.S.C. 1035.

6-C. Death

Gratuities: For the payment of death gratuities to beneficiaries of military personnel under the provisions of 10 U.S.C. 1475-80.

6-D. Unemployment Benefits:

For the payment of unemployment benefits to ex-service members who are discharged or released under honorable conditions under the provisions of 5 U.S.C. 8521.

6-E. Survivor Benefits:

For payment of funds for restored social security benefits to widows and orphans under the provisions of 10 U.S.C. 1450-1451 and P.L. 98-94, Sec. 943.

6-F. Education Benefits:

For payment to the DoD Education Benefits Fund, a trust fund, as prescribed by 10 U.S.C. 2006. This program is governed by 38 U.S.C., Chapter 30 and is budgeted on an accrual basis by the Department of Defense.

6-G Adoption Expenses:

To provide reimbursement for qualifying adoption expenses under the provisions of 10 U.S.C. 1052.

OBJECT CLASSIFICATION
ACTIVE MILITARY PERSONNEL APPROPRIATIONS

<u>Budget Subactivity</u>	<u>Object Class</u>
Accrued Retirement Benefits	12.2
Adoption Expenses	12.2
Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners: Rewards and Expenses	11.8
Travel of Guards	21.0
<i>Basic Allowance for Housing</i>	<i>11.7</i>
Basic Allowance for Quarters	11.7
Basic Allowance for Subsistence	11.7
Basic Pay	11.7
CONUS Cost of Living Allowance	11.7
Death Gratuities	42.0
Education Benefits	12.2
Enlistment Bonuses	12.2
Family Separation Allowances	12.2
Incentive Pay	11.7
Interest on Uniformed Services Savings Deposits	43.0
Permanent Change of Station, Travel:	
Dislocation Allowance	12.2
Non-temporary Storage	25.0
Port Handling Charges	25.0
Trailer Allowances	22.0
Transportation of Household Goods	22.0
Transportation of POVs	22.0
Travel of Military Members and Dependents	21.0
Temporary Lodging Expense	12.2
Monetary Allowance in Lieu of Transportation	21.0
Reenlistment Bonuses	12.2
Separation Payments: Lump Sum Terminal Leave Payments	11.7
All Others	12.2
Social Security Tax-Employer's Contribution	12.2
Special Duty Assignment Pay	11.7
Special Pay: Medical, Dental, Nurse, Optometrists and Veterinarians Pay, Nuclear Officer Incentive Pay, Nuclear Accession Bonus, Aviation Retention Bonus, Scientific/Engineering Bonus, and Personal Money Allowances for General/Flag Officers	12.2
Special Pay: All Others	11.7
Station Allowances, Overseas	12.2
Subsistence: In Kind	11.7
Monetary Allowances	11.7
Survivor Benefits	13.0
Unemployment Compensation	13.0
Uniform and Clothing Allowances: In Kind	26.0
Monetary Allowances	12.2
Variable Housing Allowance	11.7

020203 Budget Presentation Structure Requirements

A. For purposes of preparing certain material for presentation and justification of budget estimates, the following budget activities will be used:

1. Pay and Allowances of Officers
2. Pay and Allowances of Enlisted
3. Pay and Allowances of Cadets and Midshipmen
4. Subsistence of Enlisted Personnel
5. Permanent Change of Station Travel
6. Other Military Personnel Costs

B. The following additional breakdown of each budget activity is required to be shown in the applicable justification exhibits:

BA/BSA**1. Pay and Allowances of Officers:**

- a. Basic Pay
- b. Retired Pay Accrual
- c. Incentive Pay for Hazardous Duty
 - (1) Flying Duty
 - (a) Crew
 - (b) Noncrew
 - (c) Aviation Continuation Pay
 - (d) Crew (Nonrated)
 - (2) Submarine Duty
 - (3) Parachute Jumping
 - (a) Parachute Jumping (regular)
 - (b) Parachute Jumping (High Altitude/Low Opening)
 - (c) Other Incentive Pay
 - (4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress experiments
 - (5) Demolition Duty
 - (6) Flight Deck Duty
 - (7) Air Weapons Controller Duty
 - (8) Duty Involving Toxic Fuel/Waste
 - (9) Duty Involving Live/Hazardous Biological Organisms
- d. Special Pay
 - (1) Medical Pay
 - (a) Variable Special Pay
 - (b) Additional Special Pay
 - (c) Board Certified Pay
 - (d) Medical Incentive Pay
 - (e) Multi-Year Special Pay
 - (2) Dental Pay
 - (a) Variable Special Pay
 - (b) Additional Special Pay
 - (d) Board Certified Pay
 - (e) Accession Bonus
 - (f) Multi-Year Retention Bonus
 - (3) Nurse Pay
 - (a) Accession Bonus

- (b) Anesthetist Pay
- (4) Special Pay for Optometrists
- (5) Special Pay for Veterinarians
- (6) Board Certified Pay for Non-Physician Health Care Providers
- (7) Personal Money Allowances - General/Flag Officers
- (8) Responsibility Pay
- (9) Diving Duty
 - (a) Basic Scuba
 - (b) Pararescue
- (10) Special Pay - Nuclear Officer Incentive Pay
- (11) Scientific/Engineering Bonus
- (12) Sea Duty Pay
 - (a) Career Sea Pay
 - (b) Premium Sea Pay
- (13) Foreign Language Proficiency Pay
- (14) Hostile Fire Pay
- (15) Other Special Pay
- e. Basic Allowance for Quarters (*FY 1998 and prior only*)
 - (1) With Dependents
 - (2) Without Dependents
 - (3) Partial Allowance - Bachelor
 - (4) Substandard Housing
- e.1 Basic Allowance for Housing (*Effective January 1, 1998*)
 - (1) With Dependents
 - (2) Without Dependents
 - (3) Partial Allowance - Bachelor
 - (4) Substandard Housing
- f. Variable Housing Allowance (*FY 1998 and prior only*)
- g. Basic Allowance for Subsistence
- h. Station Allowances, Overseas
 - (1) Cost of Living
 - (2) Housing
 - (3) Temporary Lodging
- i. CONUS Cost of Living Allowances
- j. Clothing Allowances
 - (1) Initial Military Allowance
 - (2) Additional Military Allowance
 - (3) Civilian Clothing Allowance
- k. Family Separation Allowances
 - (1) On permanent change of station with dependents not authorized, Government quarters not available.
 - (2) On permanent change of station with dependents not authorized.
 - (3) On board ship for more than 30 days.
 - (4) On temporary duty for more than 30 days with dependents not residing near temporary duty station.
- l. Separation Payments
 - (1) Lump sum terminal leave payments.
 - (2) Lump sum readjustment payments.
 - (3) Lump sum payments to reservists
 - (4) Severance pay, failure of promotion.
 - (5) Severance pay, disability.
 - (6) Severance pay, non-disability
 - (6) Voluntary Separation Incentive (VSI)
 - (7) Special Separation Benefit (SSB)
 - (8) 15 Year Temporary Early Retirement Authority

- m. Social Security Tax - Employer's Contribution
 - (1) Employers contribution of tax on basic pay
 - (2) Wage Credits
- 2. Pay and Allowances of Enlisted Personnel:
 - a. Basic Pay
 - b. Retired Pay Accrual
 - c. Incentive Pay for Hazardous Duty
 - (1) Flying Duty
 - (a) Crew
 - (b) Noncrew
 - (2) Submarine Duty
 - (3) Parachute Jumping
 - (a) Parachute Jumping (regular)
 - (b) Parachute Jumping (High Altitude/Low Opening)
 - (c) Other Incentive Pay
 - (4) Duty inside a high or low pressure chamber inside observer, human acceleration or deceleration, experimental subject and test subject in thermal stress experiments
 - (5) Demolition Duty
 - (6) Flight Deck Duty
 - (7) Air Weapons Controller Duty
 - (8) Duty Involving Toxic Fuel/Waste
 - (9) Duty Involving Live/Hazardous Biological Organisms
 - d. Special Pay
 - (1) Diving Duty
 - (a) Basic Scuba
 - (b) Pararescue
 - (2) Sea Duty Pay
 - (a) Career Sea Pay
 - (b) Premium Sea Pay
 - (3) Duty at Certain Places
 - (4) Overseas Extension Pay
 - (5) Nuclear Accession Bonus
 - (6) Foreign Language Proficiency Pay
 - (7) Hostile Fire Pay
 - (8) Other Special Pay
 - e. Special Duty Assignment Pay
 - f. Reenlistment Bonus
 - g. Enlistment Bonus
 - (1) New Payments
 - (2) Residual New
 - (3) Anniversary
 - h. Basic Allowance for Quarters (*FY 1998 and prior only*)
 - (1) With Dependents
 - (2) Without Dependents
 - (3) Partial Allowance - Bachelor
 - (4) Substandard Housing
 - h-1 Basic Allowance for Housing (*Effective January 1, 1998*)
 - (1) With Dependents
 - (2) Without Dependents
 - (3) Partial Allowance - Bachelor
 - (4) Substandard Housing
 - i. Variable Housing Allowance (*FY 1998 and prior only*)
 - j. Station Allowances, Overseas

- (1) Cost of Living
 - (2) Housing
 - (4) Temporary Lodging
 - k. CONUS Cost of Living Allowances
 - l. Clothing Allowances
 - (1) Initial
 - (a) Military
 - (b) Civilian
 - (2) Maintenance Allowances
 - (a) Basic Allowance
 - (b) Standard Allowance
 - (c) Special Allowance
 - (3) Supplementary Allowances
 - (4) Other Allowances
 - m. Family Separation Allowances
 - (1) On permanent change of station with dependents not authorized, Government quarters not available.
 - (2) On permanent change of station with dependents not authorized.
 - (3) On board ship for more than 30 days.
 - (4) On temporary duty for more than 30 days with dependents not residing near temporary duty station.
 - n. Separation Payments
 - (1) Lump sum terminal leave payments.
 - (2) Severance pay, disability
 - (3) Severance pay, non-disability
 - (4) Authorized donations
 - (5) Voluntary Separation Incentive (VSI)
 - (6) Special Separation Benefit (SSB)
 - (7) 15 Year Temporary Early Retirement Authority
 - o. Social Security Tax - Employer's Contribution
 - (1) Employers contribution of tax on basic pay
 - (2) Wage Credits
- 3. Pay and Allowances of Cadets and Midshipmen:
Academy Cadets and Midshipmen
 - (1) Basic Pay
 - (2) Subsistence - Commuted Ration
 - (3) Operational rations
 - (4) Social Security Tax - Employer's Contribution
 - (5) Nuclear Accession Bonus
- 4. Subsistence of Enlisted Personnel:
 - a. Basic Allowance for Subsistence
 - (1) When Authorized to Mess Separately
 - (2) Leave Rations
 - (3) When Rations in Kind Not Available
 - (4) Augmentation of Commuted Ration Allowance for Meals Taken Separately
 - (5) Partial BAS
 - b. Subsistence in Kind
 - (1) Subsistence in Messes
 - (a) CONUS
 - (b) Overseas
 - (2) Operational Rations
 - (3) Augmentation Rations

5. Permanent Change of Station Travel:
- a. Summary of Move Requirements. For each type of move reflected in c through h below, show the number of moves and the dollar amount for the PY, CY, BY1, and BY2 at the aggregate level (combine officers, enlisted and officer candidates).
 - b. Summary of Requirements by Types of Costs. Show the number and amount of the following entries for the PY, CY, BY1, and BY2, regardless of the type of move.
 - (1) Travel of Military Members (include cadets and midshipmen)
 - Mileage and Per Diem 1/
 - AMC 2/
 - Commercial Air 3/
 - (2) Travel of Dependents (family)
 - Mileage 4/
 - AMC 5/
 - Commercial Air 6/
 - (3) Transportation of Household Goods
 - M Tons - MSC
 - S Tons - AMC
 - Other Shipments
 - (4) Dislocation Allowance
 - (5) Trailer Allowance
 - (6) Transportation of POV's
 - (7) Port Handling Charges
 - (8) Nontemporary storage
 - (9) Temporary Lodging Expense
 - (10) Total Obligations
 - (11) Less Reimbursements
 - (12) Total Direct Obligations
 - c. Accession Travel 7/
 - (1) Officers
 - (2) Enlisted
 - (3) Officer Candidates
 - d. Training Travel 7/
 - (1) Officers
 - (2) Enlisted
 - e. Operational Travel Between Duty Station 7/
 - (1) Officers
 - (2) Enlisted
 - f. Rotational Travel to and from Overseas 7/
 - (1) Officers
 - (2) Enlisted
 - g. Separation Travel 7/
 - (1) Officers
 - (2) Enlisted
 - (3) Officer Candidates
 - h. Travel of Organized Units 7/
 - (1) Officers
 - (2) Enlisted

1/ Mileage and Per Diem - The costs of travel relating to use of privately owned vehicle or commercial modes other than air or sea. Includes per diem paid to the individual member. It excludes movement of mobile trailers even if the trailer is moved by the member. The unit of measurement is number of member moves.

2/ Air Mobility Command (AMC) - The costs of travel for movement of an individual member reimbursed to AMC. The unit of measurement is number of member moves.

- 3/ Commercial Air - The costs for movement of an individual member paid directly to a commercial company. (Excludes any costs paid to AMC.) The unit of measurement is number of member moves.
- 4/ Mileage - The costs of travel relating to the use of privately owned vehicles or commercial modes other than air or sea for the dependents of an individual member. Includes per diem paid to dependents. The unit of measurement is number of family moves.
- 5/ Air Mobility Command (AMC) - The costs of travel for movement of dependents reimbursed to AMC. The unit of measurement is number of dependents.
- 6/ Commercial Air - The costs for movement of dependents paid directly to a commercial company (excludes any costs paid to AMC). The unit of measurement is number of dependents.
- 7/ For each permanent change of station travel account, the following data will be shown, as applicable, for officers, enlisted and cadets:
 - (1) Member Travel - Costs related to the movement of each member of a military service making a permanent change of station move.
 - (2) Dependent Travel - Costs related to the movement of dependents when authorized as part of a permanent change of station of a member of a military service. The number of dependent moves should reflect the number of families moved as a unit of measure.
 - (3) Transportation of Household Goods - Costs related to movement of household goods as authorized by Joint Federal Travel Regulations including shipment of unaccompanied baggage.
 - (a) Land Shipments, CONUS and Overseas - The costs of shipment of goods for the portion in CONUS and overseas of shipments other than International Through Government Bill of Lading (ITGBL). The unit of measurement is member move.
 - (b) ITGBL - The costs of shipment from point of origin to destination on ITGBL. Includes both land and overwater portion of the movement. The unit of measurement is member move.
 - (c) Overseas - The costs of shipments, including unaccompanied and excess baggage, either reimbursed to the Military Sealift Command (MSC), Air Mobility Command (AMC), or paid directly to a commercial company.
 - (4) Dislocation Allowance - The costs of dislocation allowance as authorized in the JTR. The unit of measurement is number of members paid.
 - (5) Trailer Allowance - The costs of movement of mobile trailers whether moved by commercial contract or moved by the individual member. The unit of measurement is number of trailer moves.
 - (6) Privately Owned Vehicles (POV) - The costs to the Government of transporting a POV to or from overseas.
 - (a) Military Sealift Command (MSC) - The cost of shipping POVs reimbursed to MSC. The unit of measurement is number of POVs shipped. If number of POVs shipped is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.
 - (b) Port Handling (Military Traffic Management Command) - The cost of port processing of vehicles reimbursed to MTMC. The unit of measurement is number of POVs processed. If number of POVs processed is not available, use 11.2 measurement tons per vehicle to convert measurement tons to vehicles.
 - (7) Port Handling Costs (HHGs) - The port handling costs for household goods and unaccompanied baggage reimbursed to MTMC. The unit of measure is measurement tons.
 - (8) Nontemporary Storage - The costs to the government of placing goods in storage or moving them to another specified destination under the provisions of 37 U.S.C. 406 when a member entitled to a PCS move is ordered to a duty station to which the shipment of household goods is not authorized. No unit of measure will be shown for nontemporary storage, only costs.
 - (9) Temporary Lodging Expense (TLE) - The cost of reimbursing the member for expenses incurred as a result of a PCS move, not to exceed \$110 per day for up to 10 days under the provisions of 37 U.S.C. 404a. TLE requirements should reflect members paid as the unit of measure.
6. Other Military Personnel Costs:
 - a. Apprehension of Military Deserters, Absentees, and Escaped Military Prisoners
 - b. Interest on Uniformed Services Savings Deposits
 - c. Death Gratuities
 - (1) Officers

- (2) Enlisted
 - (3) Cadets and Midshipmen
- d. Unemployment Benefits
- e. Survivor Benefits
- f. Education Benefits
 - (1) Four Year Obligation
 - (2) Three Year Obligation
 - (3) Two Year Obligation
 - (4) Two Years Active/Four Years Selected Reserve
- g. Adoption Expenses

020204 Budget Estimates Submission

A. This section prescribes the justification materials required for the Active Military Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in sections 020202 and 020203.

B. Exhibits in Support of Budget Estimates - The following justification exhibits will be prepared and submitted in support of budget estimates submission for the OSD/OMB budget review (usually September 15). These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in Section 020602. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of Contents

Section 1 - Summary of Requirements by Budget Program (PB-30A)

Section 2 - Introduction (The statement should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses and promotion and assignments policies. It also should address strength changes in programmatic terms such as force structure and other matters of an overall nature as considered appropriate by the Service.)

Section 3 - Summary Tables (examples provided Section 020602)

- Personnel Summaries (PB-30B through PB-30F-2)
- Summary of Entitlements by Subactivity (PB-30J)
- Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
- Schedule of Increases and Decreases (PB- 30Q)

Section 4 - Detail of Military Personnel Entitlements

Justification materials will be provided for each entitlement as prescribed in Sections 020202 and 020203 for each of the following six budget activities for military personnel:

1. Pay and Allowances of Officers
2. Pay and Allowances of Enlisted Personnel
3. Pay and Allowances of Cadets
4. Subsistence of Enlisted Personnel
5. Permanent Change of Station Travel
6. Other Military Personnel Costs

Each of the military personnel budget activities above will be introduced by a schedule of increases and decreases (PB-30P). See Section 020602 for format.

Section 5 - Special Analyses (examples provided in Section 020602)

- Schedule of Military Assigned Outside DoD (PB-30Q)
- Reimbursable Programs (PB-30R)

C. Justification material for each subactivity will contain a purpose and scope section as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for (i.e., statutory, program enhancements, solving deficiencies, etc.). Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year (PY), current year (CY), and both budget years (BY1 and BY2).

D. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in Section 020602:

- MP-1 Reconciliation of Fund Changes with Prior Year
- MP-2 Dependents, Housing, and BAQ Estimates
- MP-3 Summary of Outyear Data
- MP-4 Military Personnel by Region and Country
- MP-5 Active Duty Military Personnel Stationed Ashore By Regional Area
- MP-6 Education Benefits - Additional Basic Benefits (Title 38 USC, Chapter 30).
- MP-7 Aviation Retention Bonus
- MP-9 Summary of Basic Pay and Retired Pay Accrual Costs
- MP-10 Summary of Military Personnel Separation Payments
- PB-18 Foreign Currency Exchange Data (See Chapter 19 for format)

E. Chapter 1, Section 010302, identifies copies required of the above.

F. A submission of machine-readable data, or “automated data”, is required in conjunction with the paper copy submission. It is conducted in conjunction with and in support of the OSD Budget Estimates Submission and the President’s budget submission for the four active military personnel appropriations. All questions surrounding the submission of the automated data should be referred to:

OUSDC(C), Directorate for Ops & Pers
Attn. MilPers Associate Director
1100 Defense, Pentagon, Room 3D868
Washington, DC 20301-1100
Telephone (703) 697-3101 ext. 30

1. The automated data shall be generated by the computer software provided. The data may be entered into the software manually or loaded from an external file. Directions for its use, as well as the information presented here, are included in the software.

2. When loading external data, it must conform to prescribed criteria.

a. The records must be in the following format.

Columns 1-1: Service Code (1-Army, 2-Navy, 3-Marines, 4-AF)

Columns 2-3: Fiscal Year (last two digits)

Columns 4-5: Budget Year (last two digits) (for a biennial budget submission use BY1 as the budget, e.g. FY 2000/2001 Biennial Budget use 00)

Columns 6-11: Identification Code (six digit code)

Columns 12-21: Average number, moves, or entitlements

Columns 22-36: Unit price showing price in dollars and cents including decimal point and minus sign, if appropriate.

b. Data entered will be right justified within the data field. Adjusting entries to convert total program dollars to direct program dollars should be entered with a negative sign immediately preceding the unit price.

c. In addition to the above:

- Decimal points should appear where required.
- Negative entries should be identified with a minus sign adjacent to the left most digit.
- No commas in numbers over 999.
- Zero padding is unnecessary.
- Records that have all zero data fields are unnecessary.

3. The submitted data must be either delivered on a standard, DOS-formatted diskette (3.5" or 5.25") or mailed electronically. If delivered on a diskette, the diskette must identify the office of origin, the responsible personnel, and a telephone number.

4. The software provides reports which duplicate the PB-30J exhibit, as well as other reports of the Military Personnel Justification Book. These reports must be reviewed, compared against the submitted justification book, and corrections and adjustments made before submitting the data. THE REPORTS GENERATED BY THE SOFTWARE MUST MATCH, AMOUNT FOR AMOUNT, THE DATA INCLUDED IN THE REPORTS IN THE JUSTIFICATION BOOK.

5. Identification codes are provided in the software. Any new codes which are required will be assigned by the OUSD(C), Director for Operations & Personnel (Associate Director) upon request.

020205 Congressional Justification/Presentation

- A. Justification books will be organized by Service military personnel account.
- B. Justification Book, other exhibit requirements, and submission of machine readable data in support of the congressional submission are identical to what is shown in Section 020204, Budget Estimate Submission.

C. M-1 Exhibit. Section 8104 of the FY 1998 DoD Appropriations Act (P.L. 105-56) requires the submission of an M-1 exhibit in support of the FY 1999 President's budget. The OUSD(Comptroller) Operations and Personnel Directorate will prepare and submit the required exhibit using the automated submission required by section 020204 above.

0203 RESERVE MILITARY PERSONNEL APPROPRIATIONS**020301 General**

A. The purpose of this chapter is to provide general information applicable to the Reserve Military Personnel appropriations including funding policies, classifications, and definitions unique to these accounts. Generic policies and requirements are addressed in Chapter 1. The Military Components should consult all of the other chapters for exhibit requirements that are not specifically addressed in this chapter including the Other Special Analysis chapter (Chapter 19).

B. This section provides the budget and fiscal accounting classifications for the Reserve and National Guard Personnel appropriations for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 U.S.C. 115. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for the Reserve Component personnel appropriations throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds for the Reserve and National Guard Personnel appropriations.

020302 Uniform Budget and Fiscal Accounting Classification

A. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in this section. Variations in the budget program, activity, and subactivity classification and titles shall not be made, except that additional accounts consistent with this budget and accounting classification may be established in order to meet administration requirements of the various elements of the Military Departments. The scope of each account is described below.

B. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

C. Chart of Accounts - The chart of accounts represents a summary of the accounting and reporting structure under the Reserve Components Personnel appropriations. Obligations and disbursements for individual clothing and uniform gratuities, and for subsistence of enlisted personnel may be allocated by activity on a statistical basis if not reported by the different types of training. Subactivities may be combined in reporting on the status of funds, providing subactivity is maintained for budget review and presentation purposes:

Budget Activity (BA) and Budget Subactivity (BSA)

Budget Activity and Subactivity**1. UNIT AND INDIVIDUAL TRAINING****1-A Training - Pay Group A**

- 1-A-1 Basic pay, active duty for training, officers
- 1-A-2 Other pay and allowances, active duty for training, officers
- 1-A-3 Basic pay, active duty for training, enlisted
- 1-A-4 Other pay and allowances, active duty for training, enlisted
- 1-A-5 Basic pay, inactive duty training, officers
- 1-A-6 Basic pay, inactive duty training, enlisted
- 1-A-7 Individual clothing and uniform gratuities, officers

- 1-A-8 Individual clothing and uniform gratuities, enlisted
- 1-A-9 Subsistence of enlisted personnel
- 1-A-10 Travel, active duty for training, officers
- 1-A-11 Travel, active duty for training, enlisted
- 1-A-12 Retired pay accrual, officers
- 1-A-13 Retired pay accrual, enlisted

1-B Training - Pay Group B

- 1-B-1 Basic pay, active duty for training, officers
- 1-B-2 Other pay and allowances, active duty for training, officers
- 1-B-3 Basic pay, active duty for training, enlisted
- 1-B-4 Other pay and allowances, active duty for training, enlisted
- 1-B-5 Basic pay, inactive duty training, officers
- 1-B-6 Basic pay, inactive duty training, enlisted
- 1-B-7 Individual clothing and uniform gratuities, officers
- 1-B-8 Individual clothing and uniform gratuities, enlisted
- 1-B-9 Subsistence of enlisted personnel
- 1-B-10 Travel, active duty for training, officers
- 1-B-11 Travel, active duty for training, enlisted
- 1-B-12 Retired pay accrual, officers
- 1-B-13 Retired pay accrual, enlisted

1-F Training - Pay Group F

- 1-F-1 Basic pay, active duty for training, enlisted
- 1-F-2 Other pay and allowances, active duty for training, enlisted
- 1-F-3 Individual clothing and uniform gratuities, enlisted
- 1-F-4 Subsistence of enlisted personnel
- 1-F-5 Travel, active duty for training, enlisted
- 1-F-6 Retired pay accrual, enlisted

1-P Training - Pay Group P

- 1-P-1 Basic pay, inactive duty training, enlisted
- 1-P-2 Individual clothing and uniform gratuities, enlisted
- 1-P-3 Subsistence of enlisted personnel
- 1-P-4 Retired pay accrual, enlisted

2. OTHER TRAINING AND SUPPORT

2-E Mobilization Training

- 2-E-1 Basic pay, active duty for training, officers
- 2-E-2 Other pay and allowances, active duty for training, officers
- 2-E-3 Basic pay, active duty for training, enlisted
- 2-E-4 Other pay and allowances, active duty for training, enlisted
- 2-E-5 Individual clothing and uniform gratuities, officers
- 2-E-6 Individual clothing and uniform gratuities, enlisted
- 2-E-7 Subsistence of enlisted personnel
- 2-E-8 Travel, active duty for training, officers
- 2-E-9 Travel, active duty for training, enlisted
- 2-E-10 Retired pay accrual, officers
- 2-E-11 Retired pay accrual, enlisted

- 2-E-12 Muster pay stipend, officers
- 2-E-13 Muster pay stipend, enlisted

2-R School Training

- 2-R-1 Basic pay, active duty for training, officers
- 2-R-2 Other pay and allowances, active duty for training, officers
- 2-R-3 Basic pay, active duty for training, enlisted
- 2-R-4 Other pay and allowances, active duty for training, enlisted
- 2-R-5 Individual clothing and uniform gratuities, officers
- 2-R-6 Individual clothing and uniform gratuities, enlisted
- 2-R-7 Subsistence of enlisted personnel
- 2-R-8 Travel, active duty for training, officers
- 2-R-9 Travel, active duty for training, enlisted
- 2-R-10 Retired pay accrual, officers
- 2-R-11 Retired pay accrual, enlisted

2-S Special Training

- 2-S-1 Basic pay, active duty for training, officers
- 2-S-2 Other pay and allowances, active duty for training, officers
- 2-S-3 Basic pay, active duty for training, enlisted
- 2-S-4 Other pay and allowances, active duty for training, enlisted
- 2-S-5 Individual clothing and uniform gratuities, officers
- 2-S-6 Individual clothing and uniform gratuities, enlisted
- 2-S-7 Subsistence of enlisted personnel
- 2-S-8 Travel, active duty for training, officers
- 2-S-9 Travel, active duty for training, enlisted
- 2-S-10 Retired pay accrual, officers
- 2-S-11 Retired pay accrual, enlisted

2-T Administration and Support

- 2-T-1 Basic pay of officers
- 2-T-2 Other pay and allowances of officers
- 2-T-3 Basic pay of enlisted
- 2-T-4 Other pay and allowances of enlisted
- 2-T-5 Subsistence of enlisted personnel
- 2-T-6 Permanent change of station travel
- 2-T-7 Death gratuities, officers
- 2-T-8 Death gratuities, enlisted
- 2-T-9 Disability and hospitalization benefits, officers
- 2-T-10 Disability and hospitalization benefits, enlisted
- 2-T-11 Reenlistment Bonus
- 2-T-12 Enlistment Bonus
- 2-T-13 Educational Assistance (Other than Montgomery G.I. Bill)
- 2-T-14 Loan Repayment
- 2-T-15 NROTC Nuclear Bonus
- 2-T-16 Affiliation Bonus
- 2-T-17 Individual Ready Reserve Enlistment/Reenlistment Bonus (PS)
- 2-T-18 Individual Ready Reserve Enlistment Program Bonus (NPS)
- 2-T-19 Health Professionals Stipend (SELRES)
- 2-T-20 Health Professionals Stipend (IRR)
- 2-T-21 Health Professionals Loan Repayment

- 2-T-22 Retired Pay accrual, officers
- 2-T-23 Retired Pay accrual, enlisted
- 2-T-24 Adoption Expenses

2-U Education Benefits

- 2-U-1 Officer Personnel
- 2-U-2 Enlisted Personnel

2-A Senior R.O.T.C.

- 2-A-1 Subsistence allowance
- 2-A-2 Uniforms -- issue in kind
- 2-A-3 Uniforms -- commutation
- 2-A-4 Pay and allowance (Summer training camp)
- 2-A-5 Subsistence of reserve officer candidates
- 2-A-6 Travel of reserve officer candidates

2-B Scholarship R.O.T.C.

- 2-B-1 Subsistence allowance
- 2-B-2 Uniforms -- issue in kind
- 2-B-3 Uniforms -- commutation
- 2-B-4 Pay and allowances (Summer training camp)
- 2-B-5 Subsistence of reserve officer candidates
- 2-B-6 Travel of reserve officer candidates

2-C Platoon Leaders' Class or Reserve Officer Candidates

- 2-C-1 Uniforms -- issue in kind
- 2-C-2 Basic pay (Summer training camp)
- 2-C-3 Other pay and allowances (Summer training camp)
- 2-C-4 Subsistence of reserve officer candidates
- 2-C-5 Travel of reserve officer candidates
- 2-C-6 Retired pay accrual

2-D Branch Officer Basic Course

- 2-D-1 Basic pay, active duty for training
- 2-D-2 Other pay and allowances, active duty for training
- 2-D-3 Uniform allowances
- 2-D-4 Travel and per diem
- 2-D-5 Retired pay accrual

2-I Armed Forces Health Professions Scholarship/Financial Assistance Program

- 2-I-1 Stipend
- 2-I-2 Individual clothing and uniform gratuities, officers
- 2-I-3 Basic pay, active duty for training, officers
- 2-I-4 Other pay and allowances, active duty for training, officers
- 2-I-5 Travel, active duty for training, officers
- 2-I-6 Retired pay accrual, officers
- 2-I-7 Financial Assistance Grant

2-G Junior R.O.T.C.

2-G-1 Uniforms -- issue in kind

2-H Chaplain Candidate Program

2-H-1 Basic pay, active duty for training

2-H-2 Other pay and allowances, active duty for training

2-H-3 Uniform allowances

2-H-4 Travel

2-H-5 Retired pay accrual

D. Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions are provided on the following pages.

E. Object Classification - The object classifications that follow the Chart of Accounts Budget Activities and Subactivities Definitions/Descriptions shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION**A. Budget Program**

There will be a separate budget program for each Reserve Component of the Department of Defense and for each military service having those programs listed in paragraph 020302 as appropriate.

B. Budget Activities

The budget activities are established to present all of the military type costs associated with a particular type of training within the unit and individual training or other training and support programs. The following descriptions are for the chart of accounts listed in paragraph 020302.

1. Unit and Individual Training

Training, Pay Groups A, B, F and P. The Pay Group activities contained in paragraph 020302 are for costs, including retired pay, accrual associated with the uniform training/pay categories within the National Guard and Reserve Personnel programs as defined in DoD Directive 1215.6, "Uniform Reserve Categories and Training and/or Retirement Categories Within the Reserve Components."

2. Other Training and Support

The activities within this program are defined as follows:

a. Mobilization Training

Costs, including retired pay accrual, associated with the professional development mobilization specialty training. Also included are costs associated with the allowance for annual muster duty as provided by 37 U.S.C. 433.

b. School Training

Include tours of paid active duty for training as students at regular, associate, refresher and technical courses of service schools, area schools, unit schools, officer candidate schools, and other installations that provide training applicable to the individual's assignment. Retired pay accrual costs are included.

c. Special Training

Include all authorized paid active duty for training, other than those covered by pay groups and school training. These include the staff and faculty for schools; special field, fleet and joint exercises; indoctrination training; promoting or policy boards; administrative support of training programs; and tours of not more than 45 days for failure to perform reserve training duty satisfactorily. Retired pay accrual costs are included.

d. Administration and Support

Include the costs, including retired pay accrual, of active duty military personnel authorized to be funded in the Reserve Component personnel appropriations, all death and disability gratuities for officer and enlisted Reserve Component personnel, reserve incentives, and bonus programs.

e. Senior R.O.T.C.

All the military personnel-type costs associated with the Senior Reserve Officers' Training Corps (except the scholarship program) of an armed force, provided for in 10 U.S.C. 2101-2111. Retired pay accrual does not apply to R.O.T.C. personnel.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

f. Scholarship R.O.T.C.

All the military personnel costs associated with the financial assistance program for specially selected members of the Senior R.O.T.C. program. This program is intended to offer regular commissions to cadets and midshipmen successfully completing the academic and military requirements of the 4-year program. Authority for the program is contained in 10 U.S.C. 2107. Retired pay accrual does not apply to R.O.T.C. personnel.

g. Platoon Leaders' Class or Reserve Officer Candidates

All military personnel costs, including retired pay accrual, associated with the Marine Corps Reserve or the Naval Reserve. This activity also will include the military personnel costs of other similar types, such as all of the relatively small programs such as the Navy Officer Candidate WAVE College Junior program and the Marine Corps Woman Officers Candidates class.

h. Branch Officers Basic Course

Will include funds, including retired pay accrual, for R.O.T.C. Officers Basic Course of the active components.

i. Armed Forces Health Profession Scholarship and Financial Assistance Program

All the military personnel costs, including retired pay accrual, associated with the financial assistance program to obtain adequate numbers of officers for the active forces who are qualified in various health professions. Qualifications are that the candidate be a citizen of the United States, be accepted for or be enrolled in an accredited institution in a course of study designated for a health profession, and meet moral and physical qualifications for an officer. Such recipients are commissioned as a Second Lieutenant and remain in that grade for the duration of the scholarship program. Authority for the program is contained in 10 U.S.C. 2120-2127. In addition to the stipend, also provides for the annual grant authorized under 10 U.S.C. 2121.

j. Junior R.O.T.C.

All the military personnel costs associated with the Junior R.O.T.C. units at public and private secondary educational institutions provided for in 10 U.S.C. 2031. Retired pay accrual does not apply to J.R.O.T.C. personnel.

k. Chaplain Candidate Program

Includes funds, including retired pay accrual, for the Chaplain Officer Basic Course of the active components.

l. Education Benefits (New G.I. Bill)

Includes funds for payment to the DoD Education Benefits Fund, a trust fund, as prescribed by 10 U.S.C. 2006. The program is governed by 10 U.S.C., Chapter 106 and is budgeted on an accrual basis. Also includes payments for vocational/technical training under the Reserve Compensation G.I. Bill as provided by 10 U.S.C. 2131.

C. Budget Subactivities

The budget subactivities are grouped to present all of the military personnel-type costs for the particular activity. Rather than repeat the same definitions for each activity, the descriptions of the subactivities are shown below by their various titles:

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION**1. Pay and Allowances, Active Duty for Training, Officers**

For the pay and allowances of commissioned and warrant officers of the Reserve Components on active duty for training. These include:

a. Basic Pay

For basic compensation, including length of service increments, under the provision of 37 U.S.C. 201 and 203-205.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301 and 301a.

d. Special Pay

For special pay to officers on duty as physicians, dentists, or veterinarians under the provisions of 37 U.S.C. 302, 302b and 303.

e. Basic Allowance for Quarters, Variable Housing Allowance, and *Basic Allowance for Housing*

Payable under the provisions of 37 U.S.C. 403 and 403a. *Effective January 1, 1998, the Basic Allowance for Quarters and the Variable Housing Allowance were merged to become the Basic Allowance for Housing.*

f. Family Separation Allowances

Payable under the provisions of 37 U.S.C. 427.

g. Basic Allowance for Subsistence

Payable under the provisions of 37 U.S.C. 402.

h. Separation Payments

Payments for accumulated annual leave under the provisions of 37 U.S.C. 501.

i. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION**2. Pay and Allowances, Active Duty for Training, Enlisted**

For the pay and allowances of enlisted personnel of the Reserve Components on active duty for training. These include:

a. Basic Pay

For basic compensation, including length of service increments, under the provision of 37 U.S.C. 203-205.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301.

d. Special Pay

For pay while on sea and foreign duty and for diving duty pay under the provisions of 37 U.S.C. 304, 305 and 305a.

e. Basic Allowance for Quarters, Variable Housing Allowance and *Basic Allowance for Housing*

Payable under the provisions of 37 U.S.C. 403 and 403a. *Effective January 1, 1998, the Basic Allowance for Quarters and the Variable Housing Allowance were merged to become the Basic Allowance for Housing.*

f. Family Separation Allowances

Payable under the provisions of 37 U.S.C. 427.

g. Separation Payments

For accumulated unused annual leave under the provisions of 37 U.S.C. 501.

3. Pay, Inactive Duty Training, Officers**a. Basic Pay**

For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 201-203,205, and 206.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTIONc. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301.

d. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

4. Pay, Inactive Duty Training, Enlisteda. Basic Pay

For basic compensation, including length of service increments, under the provisions of 37 U.S.C. 203 and 206.

b. Retired Pay Accrual

For the Department of Defense contribution to its Military Retirement Fund, under the provisions of 10 U.S.C 1466. Retired pay accrual amounts will be precisely the specified percent of basic pay.

c. Incentive Pay for Hazardous Duty

For performance of hazardous duty required by competent authority under the provisions of 37 U.S.C. 301.

d. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

5. Individual Clothing and Uniform Gratuities, Officers

Payments of allowances for the purchase of required uniforms under the provisions of 37 U.S.C. 415-417.

6. Individual Clothing and Uniform Gratuities, Enlisted

For the costs of uniform clothing authorized to be issued in kind to enlisted personnel under the provisions of 37 U.S.C. 418.

7. Subsistence of Enlisted Personnel

For the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations under the provisions of 37 U.S.C. 402.

8. Travel, Active Duty Training, Officers, and Travel, Active Duty for Training, Enlisted

For expenses incident to training travel of Reserve Component officer or enlisted member, individually or as an organized unit. Travel costs include mileage; per diem; transportation by common carrier (rail, bus, air, water including Air Mobility Command and Military Sealift Command); actual and necessary expenses and costs of subsistence while in a travel status; issue of meal tickets; transportation of baggage; port

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

handling charges; and expenses incident to movement of any military group traveling under one order from the same point of origin to the same destination.

9. Pay and Allowances of Officers, Enlisted and Permanent Change of Station Travel for Active/Guard and Reserve (AGR)

These subactivities are to provide for the AGR military personnel expenses financed from the Reserve Components personnel appropriations. The descriptions of these subactivities are identical to those shown for the activities with the same titles in section 020202.

10. Death Gratuities, Officers, and Death Gratuities, Enlisted

For the payment of death gratuities to beneficiaries of Reserve Component personnel under the provisions of 10 U.S.C. 1475-1480.

11. Disability and Hospitalization Benefits, Officers, and Disability and Hospitalization Benefits, Enlisted

For payment of disability and hospitalization benefits for Reserve Component personnel, except for costs covered by orders to active duty for training or inactive duty training under the provisions of 37 USC 204 and 206.

12. Reserve Incentives

Provides reenlistment, enlistment, educational, loan repayment, NROTC Nuclear Officer Accession Bonus (NOAB), affiliation bonuses and health professions stipend to qualified individuals.

13. Other

Items that are not accounted for in numbers 1 through 12.

D. Reserve Officer Candidates Program - The subactivities for this activity are as follows:

1. Subsistence Allowance

For the subsistence allowance per month authorized by 37 U.S.C. 209.

2. Uniforms -- Issue in Kind, and Uniforms -- Commutation

For the costs of uniform clothing authorized by 10 U.S.C. 2109-2110.

3. Pay and Allowances (Summer Camp Training)

For the pay and allowances authorized by 37 U.S.C. 209.

4. Subsistence of Reserve Officer Candidates

For the cost of subsistence issued as rations to enlisted personnel including emergency and operational rations authorized by 10 U.S.C. 2109-2110.

5. Travel of Reserve Officer Candidates

For expenses incident to travel authorized by 10 U.S.C. 2109-2110.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTION

E. Health Professions Scholarship Program - The subactivities for this activity are as follows:

1. Stipend

For the allowances of commissioned officers while attending school under the Armed Forces Health Professions Scholarship Program under the provisions of 10 USC 2120-2122. These include:

a. Stipend. For the monthly allowance as authorized by 10 U.S.C. 2121.

b. Social Security (FICA Tax) -- Employers' Share

For payment of tax of employer to the Social Security Administration as provided by the Federal Insurance Contributions Act.

2. Individual Clothing and Uniform Gratuities, Officers

Payments of allowances for the purchase of required uniforms under the provisions of 37 U.S.C. 415-417.

3. Pay and Allowances, Active Duty for Training, Officers

For the pay and allowances of commissioned officers of the Reserve Components on active duty for training.

4. Travel, Active Duty Training, Officers

For expenses incident to travel of Reserve Component officers.

**OBJECT CLASSIFICATION
RESERVE PERSONNEL APPROPRIATIONS**

In addition to the object classifications prescribed in Section 020202, the object classifications prescribed herein shall be the official classifications for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable appropriation accounts:

Object Class

Disability and Hospitalization Benefits (See the various components of this pay, i.e. basic pay, BAH, BAS, etc.)	-
Education Benefits (Montgomery G.I. Bill)	12.2
Financial Assistance Grant	41.0
Inactive Duty Pay (Exclusive of Incentive and Special Pays)	11.7
Reserve Incentives (Reenlistments, Enlistment, and Educational Bonuses)	12.2
Stipend (Health Professions Scholarship Program)	11.7
Subsistence Allowance (ROTC, PLC, Etc.)	11.7
Uniform, Commutations	26.0

020303 Budget Estimates Submission

A. This section prescribes the justification materials required for the Reserve Components' Military Personnel appropriations to support budget estimates. Fund requirements for these appropriations will be presented using those budget and accounting classifications set forth in Section 020302.

B. Exhibits in Support of Budget Estimates - The following justification exhibits will be prepared and submitted in support of budget estimates submission for the OSD/OMB budget review (usually September 15). These exhibits will be organized by Service military personnel account. Examples of the required exhibits are provided in Section 020602 and 020603. The required justification material will be organized in a single unclassified volume with the unclassified data displayed in the sequence shown below:

Table of ContentsSection 1 - Summary of Requirements by Budget Program (PB-30A)

Section 2 - Introduction (The statement should provide the highlights of the budget submission and a general discussion of the relationship of the resources requested to the proposed military strength program. This should include a discussion of the military strength characteristics in terms of gains and losses, and promotion and assignment policies. It also should address strength changes in programmatic terms such as force structure and other matters of an overall nature as considered appropriate by the Service.)

Section 3 - Summary Tables (examples provided Section 020602/3)

- Personnel Summaries (PB-30G, PB-30H, PB-30I, PB-30F)
- Summary of Entitlements by Subactivity (PB-30J)
- Analysis of Appropriation Changes and Supplemental Requirements (PB-30K)
- Summary of Basic Pay and Retired Pay Accrual Costs (Reserve Components Only) (PB-30L)
- Summary of Basic Allowance for Housing (BAH) Costs (Reserve Components Only) (PB-30M)
- Summary of Travel Costs (Reserve Components Only) (PB-30N)
- Schedule of Increases and Decreases (PB-30Q)

Section 4 - Detail of Reserve Personnel Entitlements

Justification materials will be provided in support of entitlements for each of the following applicable Reserve Component activities:

Training - Pay Group A
Training - Pay Group B
Training - Pay Group F
Training - Pay Group P
Mobilization Training
School Training
Special Training
Administration and Support

- AGR/TAR Personnel
- Death and disability gratuities

- Reserve incentives and bonuses
- Education Benefits
- Senior ROTC
- Scholarship ROTC
- Platoon Leaders Class
- Reserve Officer Candidates
- Branch Officers Basic Course
- Health Professions Scholarship
- Junior ROTC
- Chaplain Candidate Program

Justification material for each activity will contain a purpose and scope section, a schedule of increases and decreases (PB-30P), as well as data in support of the funds requested. Generally, this data will include appropriate narrative comments relative to program/pricing as well as supporting computational data. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for, i.e., statutory change, program enhancements, solving deficiencies, etc. and should also explain decreases programmatically. Also provide a general explanation for each type of entitlement. Data should be shown for the prior year (PY), current year (CY), and budget years (BY1 and BY2). School, Special and Mobilization Training data will be grouped by similar types of training and will be fully explained and justified. At the end of each section for School, Special and Mobilization Training provide a total that summarizes the training categories. Within the Administration and Support subactivity, subtotals are required for AGR/TAR personnel and for total incentives and bonuses. See Section 020603 for format.

Section 5 - Special Analyses (examples provided in Section 020602 and 020603)

- Reimbursable Programs (PB-30R)
- Reserve Officer Candidates (ROTC Enrollment) (PB-30S)
- Reserve Officer Candidates (ROTC Program) (PB-30T)
- Reserve Officer Candidates (PB-30U)
- Selective Reenlistment Bonuses (PB-30V) Use this form for other applicable bonus programs.
- Full-Time Support Personnel (PB-30W)

C. Justification material for each subactivity will contain a purpose and scope section as well as a justification of funds requested. The requirements for each entitlement under each military personnel category will be justified on a gross basis to include total obligations for both direct and reimbursable personnel. For each subactivity/entitlement, include an explanation to justify the requested change. The explanation should be specific with regard to what the increases will provide for, i.e., statutory, program enhancements, solving deficiencies, etc. and should also explain decreases programmatically. Also provide a general explanation for each type of entitlement. The computation for each entitlement will display data for the prior year (PY), current year (CY), and both budget years (BY1 and BY2).

D. The following exhibits will be provided in a separate backup justification book in support of the budget estimate. Examples of these exhibits are provided in Section 020603:

MPR-1 Initial Active Duty for Training Program

MPR-2 Additional Training Assemblies

MPR-3 Reconciliation of Fund Changes with Prior Year

MPR-4 Education Benefits (Title 10 USC, Chapter 106)

MPR-5 Retired Pay Accrual Costs

MPR-6 Active/Guard Reserve (AGR)/TAR Costs

E. Chapter 1, Section 010302, identifies required copies of the above material.

020304 Congressional Justification/Presentation

A. Justification books will be organized by Service military personnel account.

B. Justification Book, and other exhibit requirements in support of the congressional submission are identical to those shown in Section 020302 and 020303, Budget Estimate Submission.

C. M-1 Exhibit. Section 8104 of the FY 1998 DoD Appropriations Act (P.L. 105-56) requires the submission of an M-1 exhibit in support of the FY 1999 President's budget. The OUSD(Comptroller) Operations and Personnel Directorate will prepare and submit the required exhibit using the budget justification material.

0204 DOD MILITARY PERSONNEL RETIREMENT REQUIREMENTS**020401 Uniform Budget and Fiscal Accounting Classifications**

A. This Section prescribes the budget and fiscal accounting classifications for the Military Retirement Fund for uniform application by the Military Departments and the Office of the Secretary of Defense, pursuant to the provisions of 10 USC 1461-1467.

B. The objective is to establish the basis for uniform budget presentations and a standard budget and fiscal accounting classification which shall be used on a uniform basis for military retired pay throughout the Department of Defense in submitting budget estimates and in accounting and reporting on the status of funds under this Trust Fund as required by the FMR Volume 4 and DoD Instruction 7720.20, "Status of Funds and Other Data for Retired Pay."

C. The budget and accounting classification prescribed herein shall be the official classification for use in preparing budget estimates, accounting for budgetary and financial transactions, and in submitting reports on the applicable accounts. Individual budget activity and subactivity accounts shall be established as required for the accounts listed in paragraph E below. Variations in the activity and subactivity classification and titles shall not be made except that additional accounts consistent with this budget and accounting classification may be established in order to meet administrative requirements of the various elements of the Military Departments. The scope of each account is described in later in this section.

D. Symbol numbers shall be assigned to each of the budget activities and subactivities listed below in the same manner and in the same sequence as will be consistent with the fiscal codes for all appropriations and funds, as published in the respective Military Department fiscal code manuals.

E. The chart of accounts represents a summary of the accounting and reporting structure under the Military Retirement Fund arranged in the order and in the detail for which reporting in accordance with DoD 7000.14R, Financial Management Regulation is required.

Budget Activity and Subactivity**1. Nondisability**

- 1-A - Regular Officers
- 1-B - Regular Enlisted
- 1-C - Nonregular Officers
- 1-D - Nonregular Enlisted

2. Temporary Disability

- 2-A - Regular Officers
- 2-B - Regular Enlisted
- 2-C - Nonregular Officers
- 2-D - Nonregular Enlisted

3. Permanent Disability

- 3-A - Regular Officers
- 3-B - Regular Enlisted
- 3-C - Nonregular Officers
- 3-D - Nonregular Enlisted

4. Fleet Reserve

4-A - Regular Enlisted

4-B - Nonregular Enlisted

5. Survivors' Benefits

5-A - Old Plan (RSFPP)

5-B - New Plan (SBP)

5-C - Guaranteed Minimum
Income

5-D - DIC Supplemental
Payments

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTIONS

A. Budget Activities. The budget activities are established to present the retirement benefits associated with a particular type of retirement. The following descriptions are for the chart of accounts as listed above.

1. Nondisability retirements, under applicable statutes, are given on the following basis:

- a. Voluntarily on or after completion of the required length of service.
- b. Involuntarily because of attainment of statutory age or completion of the maximum length of service authorized by law for the several grades.
- c. Automatically upon completion of 30 years of combined active service and service in the Fleet Reserve.

2. Temporary Disability retirements, under Title IV of the Career Compensation Act of 1949 (10 USC 1201-1221), are given on the following basis:

A. Interim classification in cases where there is doubt as to the degree or permanence of disability. Persons on temporary disability rolls are given periodic physical examinations at least once every 18 months and may be:

- 1) Restored to active duty.
- 2) Separated from the service with severance pay.
- 3) Transferred to permanent disability retired list.
- 4) Continued on temporary list for another 18-month period.

B. Final determination is required within five years of initial classification and temporary disability retirement.

3. Permanent Disability retirements, under Title IV of the Career Compensation Act of 1949 (10 USC 1201-1221), are given when:

- a. There is no doubt as to the degree or permanence of the disability at the time of initial retirement.
- b. By periodic examination of temporary disability and Fleet Reserve rolls, it is determined that permanent disability exists.

4. Fleet Reserve status, under Title II of the Naval Reserve Act of 1938, as amended (10 USC 6330, 6331), is given when:

Enlisted personnel of the Navy and Marine Corps having 20 but less than 30 years' service may be transferred to the inactive Fleet Reserve with retainer pay at rates prescribed by law. They remain in the Fleet Reserve until their status is changed by reason of:

- a. Completion of 30 years' service.
- b. Recall to active duty.
- c. Physical unfitness for further military service.
- d. Death.

CHART OF ACCOUNTS DEFINITIONS/DESCRIPTIONS

5. Survivors' Benefits payments, under the old Retired Serviceman's Family Protection Plan, and the new Survivor Benefit Plan, are provided on the following basis:

a. Two of the benefits are contributory: the old Serviceman's Family Protection Plan and the new Survivor Benefit Plan (SBP). Under both of the contributory benefits, a member of the uniformed services may elect to receive a reduced amount of any retired pay that may be awarded him/her in order to provide one or more annuities to his/her survivors, as specified by law. The basic options include the choice of annuities to provide for (1) surviving spouse, (2) surviving children, (3) surviving family, including both spouse and children, or (4) other persons with insurable interest (under the new plan only).

b. The other two benefits are noncontributory, both the Guaranteed Minimum Income and the Dependency and Indemnity Compensation (DIC) Supplemental Payments. The Guaranteed Minimum Income has a special provision benefiting women who are now widows of deceased members of the Uniformed Services who were receiving, or were entitled to receive, retired pay. The provision guarantees these widow's annual incomes will not fall below a certain amount. The DIC Supplemental Payments provide supplemental payments to widows of retirement-eligible members who die on active duty if DIC payments (by VA) are less than the maximum payments the widow would have received if the member had been retired. SBP payments covering the difference between the two will be paid.

B. Budget Subactivities. The budget subactivities are established to show the retirement benefits associated with a particular personnel classification. Subactivities for Regular Officers, Regular Enlisted, Nonregular Officers, and Nonregular Enlisted are used for Budget Activities 1, 2 and 3; Budget Activity 4 has only the two enlisted classifications; and Budget Activity 5 now has four subactivities showing survivors covered under (1) the Old Plan (RSFPP), (2) the New Plan (SBP), (3) Guaranteed Minimum Income (to current widows), and (4) DIC Supplemental Payments (to future widows).

0205 DOD MILITARY PERSONNEL - CIVIL FUNCTIONS**020501 Purpose**

This Section prescribes the justification material required for the Military Personnel civil function trust fund accounts.

020502 Military Retirement Fund/Education Benefits Fund

A. Appropriate exhibits and schedules will be prepared by OUSD(C) P/B, Operations and Personnel Directorate unless specified otherwise in the annual OUSD(C) guidance memorandum.

B. Unless otherwise specified, exhibit requirements will only include the Program and Financing Schedule and a Status of Fund for the Military Retirement Fund and the Education Benefit Fund.

0206 MILITARY PERSONNEL APPROPRIATION SUBMISSION FORMATS**020601 Purpose**

The formats provided on the following pages reflect guidance presented in previous sections of this chapter. Unless modified in a submission budget call, these formats should be adhered to.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 19CY President's Budget - Show costs as included in the original FY 19CY President's Budget. The total of all such costs should equal the FY 19CY appropriation request.

Congressional Action - Show the delta(s) associated with final congressional action on the FY 19CY appropriation request.

Appropriation – *Show the final funding level appropriated by Congress for the FYCY. This value should tie explicitly by budget activity and total to the values reported on the DD 1414 Base for Reprogramming.*

Internal Realignment/Reprogramming - Include those adjustments, exclusive of pay raise absorption, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 19CY column of the FY 20BY1/BY2 President's budget exclusive of pay raise and other price/program changes described below. To the extent that such adjustments result in an asset that is available for application against either the pay raise or program supplemental, such costs should be displayed as a negative total for this column.

Subtotal - Amounts shown in this column should exclude any costs associated with either the pay raise or other price/program changes described below; and should be equal to amounts as shown as internal realignments/reprogrammings. This amount should also be equal to FY 19CY column of the FY 20BY1/BY2 President's budget, less all pay raise and other price changes.

Pay Increase Costs - Show the full costs of the FY 19CY military pay raise. Total direct obligations should agree with the full costs of the pay raise. To the extent that realignments/reprogramming adjustments result in the availability of assets to be applied against the pay raise, such assets should be included on the line "Amounts Applied to Finance Increased Costs."

Other Price/Program Changes - Amounts shown in this column would include inflation and related cost increases, supplemental legislation not included in the "Appropriation" column, appropriation transfers, etc. To the extent realignments or reprogramming adjustments result in the availability of funds to offset these inflation costs, such amounts should be included on the line, "Amounts Applied to Finance Increased Costs."

FY 19CY Column of FY 20BY1/BY2 President's Budget - Show amounts as included in the FY 19CY President's Budget. These amounts should be equal to the sum of the amounts shown in the preceding three columns.

NOTE: An explanation should be provided for each adjustment in excess of one million dollars included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the OUSD(C) (P/B) Operations and Personnel Directorate, Room 3D868, Pentagon.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT MP-2

1. Enter Army, Navy, Marine Corps, or Air Force, as applicable.
2. Enter the appropriate fiscal year. Data should be shown for PY, CY, BY1, and BY2.
3. Data should be provided for each officer and enlisted grade. Appropriate subtotals should be shown for officers and enlisted.
4. Exclude from "receiving BAH" those personnel occupying inadequate quarters and receiving BAH at the reduced rate.
5. Enter the total number of survivors of officer and enlisted personnel entitled to BAH or family housing under the provisions of P.L. 99-227. Data should be provided in a separate memo entry for officer and enlisted personnel.
6. Enter the total number of personnel with dependents occupying adequate and inadequate quarters.
7. Enter the number of personnel with dependents occupying units of other Service or agencies.
8. Enter the number of personnel, military and civilian, occupying family housing units who are members of another Service or agency.
9. Enter the number of inactive family housing units.
10. Enter the number of unoccupied family housing units.
11. Enter the total number of owned, leased, and contracted units. This should be equal to the sum of (6) through (10) and agree with family housing data provided in support of the Family Housing account.

Page 1 NOTES:

1. Anniversary payments should reflect contracts entered into during preceding years.
2. Number of bonus recipients (initial or anniversary payments) must be entered in any year funds are entered.
3. Add additional BY columns as required for the total bonus contract period.
4. Initial payments are not to be shown in the outyears.
5. Exhibit to be included in budget submission to support Aviation Retention Bonus (ARB).
6. Navy should submit a separate MP-7 for pilot and non-flying officer (NFO) requirements.
7. Identify data for FY 20BY2+1 thru FY 20BY+4 in separate columns

Page 2 NOTES:

1. Provide explanation as to the content of numbers. For example: total requirements including funded and unfunded manpower authorizations, funded manpower authorizations, etc.
2. In support of Aviation Retention Bonus, Navy should provide break by pilot and NFO totals.
3. Projected to be newly eligible in fiscal year.
4. To reflect the numbers of individuals accepting bonuses during the fiscal year.
5. Identify data for FY 20BY2+1 thru FY 20BY+4 in separate columns

GRAND TOTAL

1/ Show average length of training for the budget years (BY1 and BY2).

2/ Combine all IMAs into training category B. Components should reflect weighted average of drills performed by all IMAs under "No. of Drills" that support the funds requested.

3/ Show average number of drills for the budget years (BY1 and BY2).

NOTE: Data is required for direct and reimbursable funded end strength. **End strength data must agree with the end strength data submitted to support the Five Year Defense Plan (FYDP).** Averages are computed by doubling the end strengths of the first 11 months of the fiscal year, adding the last month strengths of the previous year and the year under consideration, and dividing the total by 24.

INSTRUCTIONS FOR COMPLETION OF EXHIBIT
ANALYSIS OF APPROPRIATION CHANGES AND SUPPLEMENTAL REQUIREMENTS

FY 19CY President's Budget - Show costs as included in the original FY 19CY President's Budget. The total of all such costs should equal the FY 19CY appropriation request.

Congressional Action - Show the delta(s) associated with final congressional action on the FY 19CY appropriation request.

Appropriation – *Show the final funding level appropriated by Congress for the FYCY. This value should tie explicitly by budget activity and total to the values reported on the DD 1414 Base for Reprogramming.*

Internal Realignment/Reprogramming - Include those adjustments, exclusive of pay raise absorption, which are necessary to align the amounts shown in the appropriation column of this exhibit with the FY 19CY column of the FY 20BY President's budget exclusive of pay raise and other price/program changes described below. To the extent that such adjustments result in an asset that is available for application against either the pay raise or program supplemental, such costs should be displayed as a negative total for this column.

Subtotal - Amounts shown in this column should exclude any costs associated with either the pay raise or other price/program changes described below; and should be equal to amounts as shown as internal realignments/reprogramings. This amount should also be equal to FY 19CY column of the FY 20BY1/BY2 President's budget, less all pay raise and other price changes.

Pay Increase Costs - Show the full costs of the FY 19CY military pay raise. Total direct obligations should agree with the full costs of the pay raise. To the extent that realignments/reprogramming adjustments result in the availability of assets to be applied against the pay raise, such assets should be included on the line "Amounts Applied to Finance Increased Costs."

Other Price/Program Changes - Amounts shown in this column would include inflation and related cost increases, supplemental legislation not included in the "Appropriation" column, appropriation transfers, etc. To the extent realignments or reprogramming adjustments result in the availability of funds to offset these inflation costs, such amounts should be included on the line, "Amounts Applied to Finance Increased Costs."

FY 19CY Column of FY 20BY1/BY2 President's Budget - Show amounts as included in the FY 19CY President's Budget. These amounts should be equal to the sum of the amounts shown in the preceding three columns.

NOTE: An explanation should be provided for each adjustment in excess of one million dollars included in the column showing realignments and reprogramming. Such explanation should not be included as part of this exhibit, but rather should be submitted separately to the OUSD(C) (P/B) Operations and Personnel Directorate, Room 3D868, Pentagon.

NOTE: For ease in reading, a blank space of one or more lines should be left between each line where data is shown on a monthly basis.

^{1/} Include only initial enlistments.

Instructions for the Completion of Exhibit MPR-1

1. Separate exhibits should be prepared for the Prior Year (PY), Current Year (CY), Biennial Year 1 (BY1), and Biennial Year 2 (BY2).
2. Prior Year or Current Year Exhibits, as appropriate, should be footnoted to indicate the month through which actual data is shown.
3. If separate exhibits are prepared for male, female, etc. for any year, an additional exhibit which summarizes and combines the data from these separate exhibits will also be prepared for that year.
4. Accounting adjustments necessary to allow begin strength plus gains less losses to equal end strength for those months where actual data is shown should be included in the loss column(s). The exhibit should be footnoted to indicate that such an adjustment is included in the loss column and the amount of the adjustment for that fiscal year.
5. Monthly strengths shown for personnel "awaiting IADT" in a "P" status and "in IADT End of Month ("F" status) will agree with monthly strengths for Training Categories/Pay Groups "P" and "F", respectively, as shown in the Services' justification book.
6. Average number of trainees will be determined by dividing the average strength by the result of the average length of IADT in days divided by 360 days, i.e.:

Average Strength

Average Length of IADT in days
360 days

CHAPTER 3

★July 1998

OPERATION AND MAINTENANCE APPROPRIATIONS**0301 GENERAL****030101 Purpose**

A. This Chapter covers the budget formulation and congressional justification requirements for operation and maintenance appropriations.

B. The following appropriations and accounts are covered:

Section

030201

- Operation and Maintenance, Army
- Operation and Maintenance, Army Reserve
- Operation and Maintenance, Army National Guard
- Operation and Maintenance, Navy
- Operation and Maintenance Navy Reserve
- Operation and Maintenance, Marine Corps
- Operation and Maintenance, Marine Corps Reserve
- Operation and Maintenance, Air Force
- Operation and Maintenance, Air Force Reserve
- Operation and Maintenance, Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
- Overseas Contingency Fund
- Overseas Humanitarian, Disaster, and Civic Aid
- Support of International Sporting Competition, Defense

030202

- United States Court of Military Appeals for the Armed Forces

030203

- Civil Functions

030102 Submission Requirements

General guidance with regard to submission requirements is presented in Chapter 1. Chapter 3 covers specific back-up material requirements for the above accounts. The Components should also consult all of the other chapters for exhibit requirements for the above appropriations/accounts that are not specifically addressed in this chapter including Chapter 19 - Other Special Analyses.

030103 Preparation of Material

General guidance with regard to format and preparation of material is presented in Chapter 1. Chapters 8 (Real Property Maintenance/Minor Construction), 12 (Defense Health Program), and 19 provide additional specific guidance with regard to the back-up material required in this section of the manual.

030104 References

Section 010212 provides policies and definitions concerning costs that are to be financed by the O&M appropriations as opposed to other appropriations in the Research, Development, Test and Evaluation (RDT&E) area. Section 010201 provides policies and definitions regarding the application of expenses and investment criteria for budgetary purposes.

0302 BUDGET ESTIMATES SUBMISSION**030201 Operations Accounts**

A. Purpose. This Section prescribes justification materials required to support the budget estimates for the following operations accounts.

- Operation and Maintenance, Army; Army Reserve; and Army National Guard
- Operation and Maintenance, Navy and Navy Reserve
- Operation and Maintenance, Marine Corps and Marine Corps Reserve
- Operation and Maintenance, Air Force; Air Force Reserve; and Air National Guard
- Operation and Maintenance, Defense-Wide
- Office of the Inspector General
- Defense Health Program
- Former Soviet Union Threat Reduction
- Support for International Sporting Competitions, Defense
- U.S. Court of Appeals for the Armed Forces

B. Submission Requirements. All Operation and Maintenance appropriations are required to submit the back-up exhibits listed in the following table, if appropriate. Examples of these exhibits, along with instructions for their preparation, are provided in Section 0304. The Components should also consult all of the other chapters for exhibit requirements which are not specifically addressed in this chapter including Chapter 19 - Other Special Analyses.

OPERATIONS ACCOUNTS EXHIBITS

Exhibit Number	Exhibit Title	Components Required to Submit

OP-28	Summary of Major Repair Projects (Chapter 8)	All
OP-30	<i>Depot Maintenance Program</i>	All
OP-31	Funding for Defense Working Capital Funded Depot Level Repairables (DLRs)	All
OP-32	<i>Summary of Price and Program Changes</i>	All
OP-33	Reconciliation of Average Strength/FTEs in NATO European Countries	All
OP-34	<i>Appropriated Fund Support for Morale, Welfare, & Recreation (MWR) Activities</i>	All
OP-40	Ship Fuel and Operating Tempo Data	Navy
OP-41	Ship Operating Cost Data	Navy
OP-44	Military Personnel Assigned to Ship and Aircraft Squadrons	Navy
OP-50	Operation and Maintenance, Air Force – Units by Program Element	Air Force
OP-58	Operation and Maintenance, Air Force – Analysis of Air Force POL	Air Force
OP-71	Organizational Clothing and Equipment	Army Reserve/Guard
OP-73	Repair Parts	Army Reserve/Guard
OP-78	<i>Force Structure Data</i>	Air Force
OP-80	<i>Aircraft Repair/Modification and Engine Overhaul</i>	Air Force
PB-31D	<i>Summary of Increases and Decreases</i>	All

* Also required to be submitted by applicable RDT&E, Military Construction, Family Housing, Defense Working Capital Fund, etc., accounts.

** Include BY2 on this exhibit as information is required for the public law.

C. Preparation of Material. The following instructions pertain to the back-up material required by this Section.

1. The information will cover the prior year (PY), current year (CY), biennial budget year 1 (BY1), and biennial budget year 2 (BY2), unless otherwise indicated.

2. Operation and Maintenance data will be submitted in terms of obligations.

3. Additional data may be provided by expanding the prescribed formats and exhibits, or by cross-referencing to additional exhibits, where prescribed material is considered inadequate to justify requested programs or estimates. No prescribed material may be omitted unless inapplicable or unless the omission is specifically approved by the OUSD(C) P/B. The inapplicable stubs and column headings may be omitted but will not be redesignated when completing standard exhibits.

4. The purpose of the back-up exhibits is to describe the program and justify the estimates. If the data collection systems or management systems utilized provide for cost accounts or program units or workload indicators different from those specified in this section, Components should request OUSD(C) P/B to change the provisions of this regulation.

5. The use of annex exhibits to reduce bulk is encouraged providing the required material is fully covered and presented in a logical manner. Machine printouts of required data will be accepted but should be designed to minimize bulk. Narrative data related to machine printouts should be assembled with the most appropriate page of the printout in a consistent manner.

D. OMB Circular No. A-11.

The Components must submit any additional exhibits required by OMB Circular No. A-11. Consult OMB Circular No. A-11 for instructions pertaining to the completion of the required exhibits.

E. Real Property Maintenance and Minor Construction.

All Components (i.e., Active Forces, Defense-Wide, National Guard and Reserve Forces) shall submit justification data and exhibits to support budget estimates for real property maintenance and minor construction, in a separate bound attachment, as prescribed in Chapter 8. Two additional copies of this attachment will be delivered to: Director for Military Construction, OUSD(C) P/B, Room 3D840, Pentagon, on the same date as all other submissions required under this chapter. Examples of these exhibits, along with instructions for their preparation, are provided in Chapter 8. Additionally, each Component must ensure that the OP-5 (Part 2) attachment 5 (Real Property Maintenance and Minor Construction) in Section 030402 of this regulation is submitted to the Military Construction Directorate (Room 3D840).

OP-27 Real Property Maintenance Activities (Each O&M Appropriation)

OP-27P Real Property Maintenance and Minor Construction Projects (All Appropriations – Projects Costing More than \$500,000)

OP-28 Summary of Major Repair Projects (Each O&M Appropriation)

F. Copies of back-up material in support of budget estimates will be submitted as identified in Section 010302. Two additional copies of the OP-5 exhibits for Information Security Programs will be delivered to Director for Military Construction, OUSD(C) P/B, Rm 3D840, Pentagon, on the same date as all other submissions required under this Chapter.

G. Automated Submissions.

1. Automated submissions are required for the following exhibits for both the OSD/OMB Budget Estimate Submission and the President's budget request:

OP-8 Civilian Personnel Costs
OP-26 POL Consumption and Costs
OP-32 Price and Program Growth

All questions about the automated submission should be referred to:

OUSD(C), Operations and Personnel Directorate
Attn. O&M Production Assistant
1100 Defense, Pentagon, Room 3D868
Washington, D.C., 20301-1100
Telephone (703) 697-3101, Ext 18

2. In addition to the appropriations and accounts listed in Section 030201, an OP-32, Price and Program Growth, Exhibit for both the OSD/OMB submission and the President's budget request will be submitted for the following appropriations and accounts:

- Environmental Restoration, Army
- Environmental Restoration, Navy
- Environmental Restoration, Air Force
- Environmental Restoration, Defense
- Environmental Restoration, Formerly Used Sites
- Defense Against Weapons of Mass Destruction
- Emergency Response Fund, Defense
- OPPLAN 34 A-35 P.O.W.
- Overseas Contingency Operations Transfer Fund, Defense
- Special Olympics World Games
- Quality of Life Enhancements, Defense

3. The automated data should be generated by the *Comptroller* computer software provided by *downloading it from the Internet Website*. If this cannot be done, alternative arrangements must be made beforehand. The data may be entered into the software manually or *imported* from an external file. Directions for its use, as well as the information presented here, are included in the software.

4. When *importing* external data, it must conform to prescribed criteria. The precise format of the data varies between the exhibits. Specific information is provided in the software. For ASCII data files, the following general guidelines apply:

Negative entries should be identified with a minus sign adjacent to the left most digit.

Data entered will be right justified within the data field.

No commas in numbers over 999.

Zero padding is unnecessary.

Records that have all zero data fields are unnecessary.

5. The submitted data must be either delivered on a standard, DOS-formatted diskette (3.5" or 5.25") or mailed electronically. If delivered on a diskette, the diskette must identify the office of origin and the name and telephone number for who is capable of answering questions about the automated submission.

6. The software provides reports, which duplicate the related exhibits, as well as other reports. *The responsible personnel must review and compare the automated data against the submitted official paper copy*

exhibits and make corrections and adjustments prior to submitting the data to the Comptroller POC. THE REPORTS GENERATED BY THE SOFTWARE MUST MATCH THE SUBMITTED OFFICIAL PAPER COPY SUBMISSION EXHIBITS. Any deviations must be approved in advance. Data with deviations that is submitted without prior approval will be returned to the responsible personnel to be corrected and resubmitted.

7. Identification codes are provided in the software. Any new codes, which are required, will be assigned by the Director for Operations and Personnel, OUSD(C) upon request.

030202 U.S. Court of Military Appeals for the Armed Forces

A. Purpose. This Chapter prescribes budget justification backup requirements for the appropriation “United States Court of Appeals for the Armed Forces.”

B. Submission Requirements.

1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following:

- Appropriation Language. Submit justification for proposed changes.
- Purpose and Scope. Describe the missions and functions of the Court of Military Appeals.
- Summary of Obligations by Object Classification.
- Summary of Personnel by Grades. Show the number of civilian positions in each grade, the number of statutory positions, total permanent positions, lapse, and workyears.
- Summary of Price and Program Changes.
- Explanation of Estimate. Explain changes in costs and provide a statement of case workload and opinions rendered.
- Also include applicable exhibits required by Section 030201 and any of the other chapters of this regulation including Chapter 19 – Other Special Analyses.

2. Chapter 1 identifies copies of the above material required.

030203 Civil Functions-Operation and Maintenance

A. Purpose. This Chapter prescribes budget justification backup requirements for the civil functions appropriations.

B. Cemeterial Expenses (Department of the Army).

1. See Chapter 1 for general guidance concerning submission requirements. Submit separate exhibits for each of the following. All data will be provided for the past, current, biennial budget year 1, and biennial budget year 2 fiscal years.

- Appropriation Language. Submit justification for proposed changes.
- Multiyear Financial Plans. Show budget authority and outlays by budget project and in total for the past, current, biennial budget year 1, and biennial budget year 2 fiscal years and for four subsequent fiscal years. Also show planned end-of-year employment (permanent positions and other positions) by budget project and in total for the same years.

- Analysis of Budget Authority (BA) and Outlays. Show BA and outlays by budget project and in total. Also show the difference between the biennial budget year 1 and the current year and the outlays in the biennial budget year 1 resulting from BA in the biennial budget year 1. Also show the difference between the biennial budget year 2 and the biennial budget year 1 and the outlays in the biennial budget year 2 resulting from BA in the biennial budget year 2.

- Program and Performance. Describe the major workload considerations and activity factors on which the estimates for each budget project have been based.

- Summary of Obligations by Object Classification.

- Statement Relating Past Year, Current Year, Biennial Budget Year 1, and Biennial Budget Year 2 Programs. List the increases and decreases necessary to reconcile the obligations incurred in each year with an analysis by budget project showing the obligations for each year and the related increases and decreases between each year.

- Project 0861 - Operation and Maintenance. Provide narrative justification and amounts for each project classification within the project. Separately identify yearend employment and workyears for supervisory, interment and maintenance categories.

- Project 0864 - Administration. Provide narrative justification and amounts for each object classification within the project. Separately identify year end employment and workyear for National Cemetery activities, headstone activities, and administrative services and staff planning.

- Project 0865 - Special Construction, Arlington National Cemetery.

a. Provide amounts by each object classification within the project. Separately identify yearend employment and workyears.

b. List and provide a narrative justification and amount for each planned construction or development project.

- Report of Motor Vehicle Data. Provide the following summary:

a. Fleet as of October 1.

b. Acquisitions:

(1) New orders placed

(2) By forfeiture

(3) By transfer

c. Number disposed of (deduct):

(1) Disposals accomplished (carryover)

(2) Disposals accomplished (newly scheduled)

d. Vehicles replaced (newly scheduled).

e. Active fleet, September 30 (a + b + c).

f. Vehicles unused on a term basis (add).

g. Total vehicles available full-time (e + f).

h. Obligations for vehicles ordered.

- Personnel Justification. Submit Exhibit OP-8, which is described in Section 030201 and an example of which is found in Section 0304

2. Chapter 1 identifies copies required of the above material.

C. Wildlife Conservation, Etc., Military Reservations.

1. In addition to the Program and Financing Schedule and Personnel Summary, submit an Exhibit OP-5 prescribed in Section 030201 and an example of which is provided in Section 0304.

2. Chapter 1 identifies copies required of the above material.

0303 CONGRESSIONAL JUSTIFICATION/PRESENTATION**030301 Purpose**

This Section presents the justification book organization and the exhibit requirements for submission to Congress. Examples of budget exhibits can be found in Section 0304.

030302 Organization of Justification Books

A. Justification Books will be organized into separate books for each appropriation. The only exceptions to organizing justification books into separate books for each appropriation are for the United States Court of Military Appeals for the Armed Forces, Office of the Inspector General, and the Environmental Restoration appropriations. These should be included in the same book as the Defense-Wide. The Defense Health Program (DHP) will be a separate justification book. The procurement and RDT&E DHP budget activities will follow the organization prescribed for the procurement and RDT&E appropriations in Chapters 4 and 5, respectively.

B. *Justification books for the Active Component of each Military Service should be organized into two volumes (in separate books) as follows:*

Volume I - "Justification of Estimates for Fiscal Years BY1 and BY2"

Volume II - "Data Book"

Reserve and National Guard Components should combine the above volumes into one book for each Component.

C. *The justification books for the Operation and Maintenance, Defense-Wide appropriation will include a classified volume in addition to the two volumes required for the active components.*

D. Volume I - Justification of O&M Estimates for Fiscal Years BY1 and BY2. The Operation and Maintenance (O&M) Justification Books will be submitted on an operations basis to include active military force personnel strength, Reserve and National Guard personnel strength, and civilian personnel. (Related dollars financed from the active and Reserve military personnel appropriations, however, should not be included.) The content and arrangement of exhibits for the operations accounts are indicated at the end of this section. Applicable exhibits for the Reserve and Guard Component operations accounts will be consistent with the active operations accounts. Exhibit formats are provided in Section 0304. Separate volumes for active and reserve component operation appropriations will be submitted. Funds for the National Foreign Intelligence Program (NFIP), Tactical Intelligence Related Activities (TIARA), or Joint Military Intelligence Program (JMIP) will be specifically identified. Justification classification will not exceed that required for other operations funds.

E. Volume II - Data Book. *The Data Book will include summary and special interest exhibits as well as the Real Property and Minor Construction exhibits. The content and arrangement of exhibits for the operations accounts are included at the end of this section.*

Two copies of exhibits required for the Real Property Maintenance and Minor Construction section of Volume II, including the Reserve and National Guard Component exhibits, will be submitted for review and approval to the Directorate for Construction, OUSD(C) P/B, Pentagon, Room 3D840. In addition, the OP-28, Summary of Major Repair Projects (Chapter 8) will be provided with the review copies of Volume II.

F. Additional Accompanying Exhibits. Although not to be included in any of the Justification Books submitted to Congress, the exhibits at the end of this section are required to be submitted to the OUSD(C) P/B Directorate for Operations and Personnel, Pentagon, Room 3D868, simultaneously with the submission of the other budget justification material. These exhibits are not to be included in Justification Books submitted to the Congress.

Examples are provided in Section 0304 (O&M), Chapter 13 (Defense Environmental Restoration Program), or Chapter 19 (Other Special Analyses).

G. O&M Overview. The Operation and Maintenance Overview exhibits (PBA-xx) are required for submission to the OUSD(C) P/B Directorate for Operations and Personnel, Pentagon, Room 3D868. Specific suspense dates will be furnished in the annual budget justification call memorandum supporting the President's budget request. The parent service is responsible for ensuring that all required data including Reserve Component appropriations are submitted.

Exhibit formats are provided in Section 0304. Each exhibit must provide narrative data to explain price and program changes between all fiscal years displayed. *In addition, Components are responsible for cross checking data among the exhibits to ensure data provided is consistent among all PBA exhibits and all other exhibits supporting the President's budget request, including the backup exhibits.*

Two copies of each exhibit are required and will identify the Component, exhibit number and title, *date prepared*, and name/telephone number of the responsible point of contact for the exhibit. The exhibits will be consolidated at the Operation & Maintenance title level for printing and submission to the Congress. The Defense Agencies should provide as a minimum the PBA-19 and the PBA-20 *exhibits* and address resource requirements in one or more of the major mission categories as appropriate.

ORGANIZATION/EXHIBIT REQUIREMENTS**VOLUME I - JUSTIFICATION OF O&M ESTIMATES FOR FISCAL YEARS BY1 AND BY2**Table of Contents

Section I	Introductory Statement (use the PBA 19 exhibit - Appropriation Highlights)

Exhibit O-1
(Page 1 of 2)

Instructions for O-1

All O&M Components except Defense Agencies must submit a hard copy O-1 for both the OSD/OMB and congressional submissions. In addition, the O-1 must be submitted in automated format for the congressional submission. This should be done in Excel or Lotus format, according to the instructions below:

Lotus Format:

- 3 1/2 inch high density disk with a blank O-1 in Excel or Lotus format will be provided to Components to enter funding amounts by subactivity.
- Enter funding data in thousands of dollars.
- Subtotals will automatically calculate for Budget Activity and Appropriation; do not enter any subtotals.
- The existing numerical line item identifiers must be maintained for each subactivity. Only if a particular subactivity no longer applies for the current submission should the line be deleted.
- New subactivities may be entered by inserting a line with an additional line item identifier, following the existing line item sequence. Enter the title of the new subactivity in all capital letters. The funding entered for each new line will be included in the subtotals and totals.

INSTRUCTIONS FOR PREPARATION OF OP-5

1. The OP-5 is a multi-purpose summary document. The Operation and Maintenance account is generally stratified into three levels: Level 1, Budget Activity (BA); Level 2, Budget Activity Group (BAG); and Level 3, Subactivity Group (SAG). The OP-5 is to be submitted at the SAG level by Service for each of the Operation and Maintenance appropriations for both the Budget Estimates Submission (BES) and the President's budget submission. The Defense Agencies/Activities are required to submit this exhibit at the lowest level of their budget structure. The purpose of the OP-5 is to provide a summary of and justification for changes in the level of resources required for each SAG.

2. Each of the O&M appropriations listed below, will be supported by OP-5 Exhibits.

Operation & Maintenance, Army, Army Reserve, and Army National Guard
Operation & Maintenance, Navy and Navy Reserve
Operation & Maintenance, Marine Corps and Marine Corps Reserve
Operation & Maintenance, Air Force, Air Force Reserve, and Air National Guard
Operation & Maintenance, Defense-Wide
Defense Health Program
Former Soviet Union Threat Reduction
Office of the Inspector General
United States Court of Military Appeals for the Armed Forces
Wildlife Conservation, Etc., Military Reservations
Overseas Humanitarian, Disaster, and Civic Aid
Support of International Sporting Competition, Defense

3. The OP-5 provides essential information for justification of the OSD and President budget estimates. The "Reconciliation of Increases and Decreases" portions of Section III should identify what changes are occurring and explain why the changes are occurring and why they are necessary.

4. The FY PY estimate column of the OSD submit should reflect actual data through the first three quarters plus a realistic projection for the remaining quarter. For the PB submit, the FY PY column will reflect actuals and agree with the data reflected in the certified DD Comp 1002 report for September.

5. The "Reconciliation of Increases and Decreases" section will be included in the OP-5 for both the OSD budget submission and the President's budget submission. Reconciliations will show all changes from fiscal year to fiscal year and, for the current year, a track from the estimate requested in the previous President's budget. Specifically display:

- The FY BY estimate in the previous President's budget submission to the current FY CY estimate included in this submission,
- The current FY CY estimate to FY BY1 estimate reflected in this submission,
- The FY BY1 estimate to the FY BY2 estimate included in this budget submission.

6. Performance criteria are required on the OP-5 *and should support the dollar amounts being requested*. Performance criteria for some subactivity groups are specified in the attachments to the OP-5.

7. Personnel summaries are required for each subactivity group and for each Defense Agency.

8. Classified information will be eliminated from all O&M justification books except for Defense Agencies.

COMPONENT NAME 1/
Operation and Maintenance, _____
Budget Activity _____
Activity Group _____
Detail by Subactivity Group _____

I. Description of Operations Financed: Provide a narrative explanation characterizing the mission and major functions funded in the subactivity group. Include a separate explanation for each subactivity shown in Section IIIA. below. These explanations should address significant program initiatives/actions included in the budget.

II. Force Structure Summary: Provide a narrative explanation and identification of force structure supported by funding in this subactivity group.

III. Financial Summary (O&M: \$ See note): 2/

		<u>FY CY</u>				
		<u>FY PY</u>	<u>Budget</u>	<u>Current</u>	<u>FY BY1</u>	<u>FY BY2</u>
		<u>Request</u>	<u>Appropriation</u>	<u>Estimate</u>	<u>Estimate</u>	<u>Estimate</u>

Baseline Funding						
Congressional Adjustments		NA	NA			
Supplemental Request						
Price Change						
Functional Transfer						
Program Changes						
Current Estimate						

Instructions: For the changes in the Current Fiscal Year (FY CY), provide information from the President's budget request for that fiscal year to the current estimate in this submission for that same fiscal year. For the changes from the FY CY to the FY BY1 and from the FY BY1 to the FY BY2, use the current estimate.

1/ The O&M budget is generally stratified into three levels: Level 1, Budget Activity (BA); Level 2, Budget Activity Group (BAG); and Level 3, Subactivity Group (SAG). The O&M budget structure for some Defense Agencies/Activities stops at the BA or BAG level. The Defense Agencies/Activities are required to submit this exhibit at the lowest level of their budget structure.

2/ Services: \$ in Tenths of Millions; **Defense Agencies/Activities:** \$ in Thousands.

C. Reconciliation of Increases and Decreases: Provide a trail of changes from the previous President's budget request for the current FY CY in this submission to the appropriated amount for the current FY CY in this submission to the current estimate for FY CY in this submission; from the FY CY current estimate to the FY BY1 estimate; and from the FY BY1 estimate to the FY BY2 estimate. Provide a single entry in each year for price changes. Itemize and justify the major program changes in each year (**provide the baseline in dollars to which the increase or decrease applies**). Such justification should clearly explain programmatic changes in resource levels including why increases are required or decreases occur. Additionally, the narrative justification should relate cost to force structure changes, performance criteria, work load and manpower data, as well as identify the impact if requested changes are not funded. Also see the general instructions for the OP 5 Exhibit. **The Services should report in tenths of millions; Defense Agencies/Activities in thousands.** Use the following format:

1. **FY CY President's Budget Request** (Amended, if applicable)
2. Congressional Adjustment (List items)

IV. Performance Criteria and Evaluation Summary: Provide meaningful performance and work load data by SAG for each year FY PY, FY CY, FY BY1, and FY BY2 where appropriate. Performance criteria and evaluation summary data should be provided by subactivity where applicable. The following subactivity groups have specific performance criteria required (See attachments 1-5 to the OP-5 in the FMR):

JCS Exercise Program (Attachment 1)
Base Operations Support (Attachment 2)
Transportation (Attachment 3)
Real Property Maintenance(Attachment 4)
Training (includes multiple subactivity groups) (Attachment 5)

For depot maintenance, show data as required by page 1 of the OP-30 exhibit.

For other subactivity groups, display comparable/appropriate data.

COMPONENT NAME 1/
Operation and Maintenance, _____

Detail by Subactivity Group _____

V. <u>Personnel Summary:</u>	<u>FY PY</u>	<u>FY CY</u>	<u>FY BY1</u>	<u>FY BY2</u>	<u>Change FY CY/FY BY1</u>	<u>Change FY BY1/FY BY2</u>
<u>Active Military End Strength (E/S) (Total)</u>						
Officer						
Enlisted						
<u>Reserve Drill Strength (E/S) (Total)</u>						
Officer						
Enlisted						
(Military Technician Included Above (Memo))						
<u>Reservists on Full Time Active Duty (E/S) (Total)</u>						
Officer						
Enlisted						
<u>Civilian End Strength (Total)</u>						
U.S. Direct Hire						
Foreign National Direct Hire						
Total Direct Hire						
Foreign National Indirect Hire						
(Military Technician Included Above (Memo))						
(Reimbursable Civilians Included Above (Memo))						
Additional Military Technicians Assigned to USSOCOM						
<u>Active Military Average Strength (A/S) (Total)</u>						
Officer						
Enlisted						
<u>Reserve Drill Strength (A/S) (Total)</u>						
Officer						
Enlisted						
(Military Technician Included Above (Memo))						

Civilian end strength and Full Time Equivalent (FTE) data will agree with the direct and reimbursable funded data reflected on lines 1 through 5 of the OP-8 entitled, "Civilian Personnel Costs." The reimbursable civilian end strength and FTE data will agree with the data reflected on line 6 of the OP-8 exhibit.

These military technicians are included in the civilian end strength and average strength to USSOCOM.

- Do not include the percentage of price growth.

OPERATION AND MAINTENANCE, (SERVICE/COMPONENT)

JCS EXERCISE PROGRAM - O&M COSTS
(FY PY, FY CY, FY BY1 and BY2)

IV. Performance Criteria and Evaluation

(*Defense Agencies in thousands/Military departments in millions)

<u>Exercise Name & Location</u> ^{1/}	<u>Time Period of Exercise</u>	<u>Work Load Measure</u> ^{2/}	<u>Cost (\$ *)</u>		
			<u>Transportation</u>	<u>Other</u>	<u>Total</u> ^{3/}
<u>Directed Exercises</u>					
(List by exercise)	1/	Identify each initiative by category, CINC, and exercise name.			
Total	2/	<u>Airlift</u> : Reflect C-130, C-141, C-17, or C-5 hours, as appropriate, for transportation costs. Separately identify C-130, C-141, C-17, or C-5 hour requirements, as appropriate, for commercial augmentation effort. Indicate in footnote JCS Exercise rate used for pricing.			
		<u>Sealift</u> : Express work measurement tons (differentiate between break bulk and containers) to be transported via MSC and MSC per diem ship days as applicable. In footnote indicate rates used for each.			
		<u>Land Transportation</u> : Express program values, in measurement tons to be transported overland. Indicate rates used in footnote.			
<u>Coordinated Exercises</u>					
(List by exercise)		<u>Port Operations</u> :			
Total		<u>CONUS</u> : Express work load in terms of measurement tons to be transported through CONUS Ports. Indicate rates used in footnote.			
		<u>Overseas</u> : Express work load in terms of measurement tons to be transported through Overseas Ports. Indicate rates used in footnote.			
<u>Total Directed and Coordinated Exercises</u>	3/	For FY PY and FY CY: Show by footnote both the amount appropriated for FY PY and the amount requested for the FY CY in the FY CY President's budget. For FY CY, explain the difference between the amount requested in the President's budget and the current estimate.			
		For FY BY1 and FY BY2: Briefly describe changes in the program from that of the previous year. To the extent that specific exercises have not been approved at the time of the budget submission, estimate total program levels. Estimated amounts should be distributed between transportation and other costs, as applicable, and should be related to estimated work load. Explanations of changes in both costs and work load are required between the FY CY and FY BY1 and between the FY BY1 and FY BY2. This information should be provided in sufficient detail to justify the budget estimate.

ADDITIONAL INSTRUCTIONS

This schedule should exclude those funds supporting maintenance and repair of real property and minor construction.

Additional performance criteria and work load indicators may be included for any of the above functional categories as applicable. Additional criteria/indicators are especially encouraged for "Other Base Services" and "Other Personnel Support" categories as they relate to more important or unique support functions.

Include direct Operation and Maintenance funds only (Exclude amounts funded from Military Personnel appropriations.)

This format should be followed in preparing an OP-5 Exhibits for Base Support.

FY CY
Units (\$ in 000)

FY BY1
Units (\$ in 000)

FY BY2
Units (\$ in 000)

First Destination Transportation (FDT) (by Mode of Shipment):

This should include only FDT supporting O&M purchases.

Military Traffic Management Command:
Port Handling (MT)

NOTE: Abbreviate units of measure as follows:
Short Tons= ST
Measurement Tons = MT
Missions = MSN
Ship Days = SD

Military Sealift Command:
Regular Routes (MT)
Per Diem (SD)

Military Airlift Command:
Regular Channel (ST)
SAAM (MSN)

Provide subtotals for all modes of shipment (MTMC, MSC, MAC & Commercial)

Commercial:
Air (ST)
Surface (ST)

Amounts should be consistent with amounts shown in applicable OP-5 Exhibits in each Service's/Components budget justification books and agree with amounts provided in PBA-13, Transportation.

7. DIRECT FUNDED CIVILIAN PERSONNEL
(Rate)

Exhibit OP-8 Civilian Personnel Costs
(Page 2 of 7)

CIVILIAN PERSONNEL COSTS

OP-8 Instructions

Separate OP-8 exhibits must be prepared for PY, CY, BY1, BY2 for each Military Department in total and for each appropriation/fund in which civilian personnel are funded. Each Defense Agency, including those Defense Agencies that have only RDT&E funded civilian personnel, and the Court of Military Appeals must also provide a separate exhibit. If a Defense Agency has civilian personnel financed in more than one appropriation/fund then a total for the Defense Agency must be provided.

Rate data on the OP-8 should be shown parenthetically. To calculate the required rate data, use the formulas displayed on the OP-8 exhibit. Show the average salary for Basic Compensation, overall salary for Total Compensation, and workyear cost for Compensation and Benefits. Show the other rate data, as a percentage in decimals to five places, for total variables and benefits.

End strength onboard as of September 30 vice end strength authorizations will be displayed for all beginning and ending end strengths. The beginning end strength must agree with previous FY's September 30 end strength.

In accordance with OMB Circular A-11, full-time equivalent (FTE) employment is the total number of hours (worked or to be worked) divided by the number of compensable hours applicable to each fiscal year. FTE is synonymous with workyear.

Data formerly reported for General Merit Pay category will be merged in the General Schedule line.

In accordance with the Federal Employees Part-time Career Employment Act of 1978 (Public Law 95-437), part-time permanent employees are counted on a full time equivalent basis, i.e., an individual working 30 hours a week becomes .75 of an end strength. There is no adjustment for other part-time or intermittent employees - these employees would be counted on an individual basis not on a fractional basis.

Consult either DoDI 7330.18 or the Office of Personnel Management's Federal Personnel Manual (FPM) for definitions of full-time employees with permanent appointments (FTP). FTP (Full-Time Permanent), according to OMB Circular A-11, is the number of full-time employees with permanent appointments that are on-board, or planned to be on-board, as of the end of each fiscal year. Such entries will exclude anticipated vacancies. Do not display FTP for Indirect Hire Foreign Nationals. Consult the DoDI or FPM to determine if your Foreign National Direct Hire employees are considered FTP employees.

Voluntary separation incentives must be reported in Benefits for Former Employees (Object Class 13).

Do not include overtime workyears in *FTE* totals. The *FTEs* on the OP-8 are straight time workyears only.

FTEs (direct and reimbursable) in the OP-8 exhibits must agree with the *FTEs* reported in the OMB galley used for the printed budget. (OMB Circular A-11.)

Exhibit OP-8 Civilian Personnel Costs
(Page 3 of 7)

CIVILIAN PERSONNEL COSTS

OP-8 Instructions

(continued)

For the PY supporting the FY BY President's budget request, the end strength data must agree with the SF-113A, Monthly Report of Federal Civilian Employment, provided to OPM to report military functions employment levels as of September 30.

- Direct hire end strength data on the OP-8 must agree with data provided on the September 30th supplement to the SF-113A report. This supplement is entitled, Report of Part-Time Permanent Employees on a Fractional Basis.
- Indirect hire end strength data must agree with the Indirect Hire supplement to the September 30th SF-113A report.
- The FTP end strength data must agree with data provided on line 30, Full-Time with Permanent Appointments, of the September 30th SF-113A.

Civilian Personnel Direct Funding (#7) will be total Civilian Personnel (#5) less reimbursable funding (#6). Provide end strength, workyear and funding reimbursable data for all of the columns. Appropriations/funds (e.g., Defense Working Capital Fund, etc.) that are not funded with budget authority show all of the data as reimbursable so that "0" will be displayed in every column on the "Civilian Personnel Direct Funding" (#7) line.

On a separate page, provide reimbursable sources by appropriation, and by Component/Agency.

An automated submission for the OP-8 Exhibit is also required. See section 030201 for both the OSD/OMB budget submission and the FY BY1/BY2 President's budget request.

Department of Defense Education Activity (DoDEA) will submit separate OP-8 exhibits for: Department of Defense Dependents Schools (DoDDS) and DoD Domestic Dependent Elementary and secondary Schools (DDESS), in addition to consolidated OP-8 exhibits for the total DoDEA program. For the required automated submission, DoDEA is only required to submit the consolidated OP-8 exhibit, not individual exhibits for DoDDS and DDESS.

Reimbursable Civilian Personnel Costs, Part 2

Instructions for Preparation of the OP-8 Part 2 Reimbursable Pay

This is mandatory for the Military Departments and the Defense Agencies. If a Service shows that civilian pay is to be reimbursed from a Defense Agency that does not submit this form, then the agency coordination must be shown on this form. This is required only for the Budget Estimates Submission (BES).

Each appropriation account in the prior year, current year, biennial budget year (BY1), and biennial budget year (BY2) for which civilian pay is reimbursed, must identify the following in thousand of dollars:

On line 1, total civilian pay *.

On line 2, total reimbursable pay *.

On line 3, the amount of line 2 that is reimbursed within the account.

On line 4, the amount by account of line 2 that is reimbursed from accounts within the Service or Defense Agency. The sum of all accounts must equal the total intra service.

On line 5, the amount by account of line 2 that is reimbursed from other Services or Defense Agency accounts. The sum of all accounts must equal the total inter service.

On line 6, the amount of line 2 that is reimbursed from all other sources. The sum from all Defense Agencies must equal the total all other.

On line 7, the total civilian pay that is reimbursed to other Services or Defense Agencies **.

Notes:

* Lines 1 and 2 **MUST** agree with the totals reported by the Service of Defense Agency on the OP-8 and the sum of lines 3 through 6 of this must equal line 2.

** Any amounts identified on line 5 **MUST** appear on line 7 of the reimbursing Service or Defense Agency submission of this exhibit.

Reimbursable Civilian Personnel Costs, Part 2

SAMPLE

Fiscal Year: FY 1999

Appropriation Account: Operation & Maintenance, Army

(Page 4 of 5)

ANALYSIS OF CHANGES IN *FULL-TIME EQUIVALENT (FTE)* COST
INSTRUCTIONS

1. The intent of the OP-9 is to identify the factors that have an impact on changes in average salary and average FTE cost from fiscal year to fiscal year.
2. Prepare separately for each appropriation and Fund account for U.S. direct hire, classified and wage system, and Foreign National Direct Hire (FNDH). Complete amounts and rates for WS, etc., as in SES/GS column.
3. All end strength will be displayed as actual or planned to be onboard as of September 30. Do not use end strength authorizations.
4. Cost, FTEs, and end strength should be consistent with those shown on OP-8, Analysis of Civilian Personnel Costs.
5. Show each classified pay raise in separate stub.
6. Data is to be reflected at appropriation or account.
7. The “Average Basic Annual Salary” for a FY is computed by dividing the “Basic Compensation” total by the number of straight time workyears.
8. The “Overall Average Annual Salary” for a FY is computed by dividing the “Total Compensation” (Object Class 11) by the number of straight time workyears.
9. The “Average FTE Cost” for a FY is computed by dividing “Total Compensation and Benefits” (Object Class 11 and 12) by the number of straight time FTEs.
10. The OP-9 will be prepared for both the Budget Submission and the President’s budget. However, for the latter the OP-9 will be submitted separately to OSD and will not be included in the congressional justification material.

Footnotes

- 1/ Reflect as % rate of basic compensation.
- 2/ Express as decimal to five places. Develop effective pay raise as ratio of No. applicable days to total compensable days in year times pay raise percentage. Identify computation in footnote.
- 3/ Show computation - derivation of rate.
- 4/ Provide an explanation if the rate is different from the previous fiscal year rate, e.g. changes in overtime rate, changes in health benefits, FERS, etc.

PREP SCHOOL LOAD												
PREP SCHOOL GRADS ATTRIT AS FOURTH CLASSMEN												

NOTE: Carryover is to be calculated as of graduation (unless another time is specified uniformly for an academy).

"Graduation Load" is the sum of carryover for each class plus graduates.

"Autumn Load" is the sum of carryover for each class plus net new entrants at the beginning of the autumn term.

Reconcile and explain in footnotes differences between Autumn Load and "Cadet/Midshipman End Strength" reflected here and in the FYDP update.

"Prep School Load" is to be a forecast of average onboard students on a "best estimate" basis (specify formula).

If this table is presented on an academic year basis, so state.

Instructions for Completion of Preceding

1. Enter Army, Navy, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior, Current, and Biennial (BY1 and BY2) Budget fiscal years).
3. Enter the average number (many year average) of officers, enlisted personnel, civilians, and combined total, respectively, assigned to ROTC units and ROTC command level staffs, respectively. ROTC command level staff should include all personnel up to the departmental level who are associated with the ROTC program but are not assigned to a ROTC unit.
4. Enter the total costs of pay and allowances/salary of military and civilian personnel, as applicable, plus any related O&M support costs. Pay and allowances/salaries will be determined through the use of standard rates for military and civilian personnel, respectively.
5. Enter the average staff and the average cost of the staff per unit. Average staff will be determined by dividing the applicable total staff (unit or command level) by the number of units shown in C (see paragraph 6, below). The average cost of staff per unit will be arrived at by dividing the applicable total costs for the unit and command level staffs, respectively, by the number of units shown in C.
6. Enter the applicable number of operating units.
7. Enter the total ROTC costs, other than those shown in A or B, included in the Service's O&M appropriation(s). (This should be equal to the sum of D.1.a and b discussed below in paragraphs 8 and 9.)
8. Show in parenthesis () the total applicable costs of ROTC scholarships (include only tuition, fees, books, and other related student expenses).
9. Show in parenthesis () the applicable O&M administrative costs, by categories shown, related to the ROTC program.

INDIVIDUAL TRAINING DATA FOR FY __ BUDGET (SERVICE)

PART D: ROTC PROGRAM DATA (PE 847230)
(Continued)

10. Enter the total ROTC costs included in the Service's applicable Reserve Component appropriations. This should be equal to the sum of D.2.a, b, and c, as discussed in paragraphs. 11, 12, and 13 below.
11. Enter in parenthesis () the total costs relative to the monthly subsistence allowance paid to college freshmen and sophomores who are recipients of ROTC scholarships.
12. Enter in parenthesis () the aggregate sum included in the Service's applicable Reserve Component appropriations for ROTC Pay and Allowance (Summer Training), Subsistence of Reserve Officer Candidates (Summer Training), and Travel of Reserve Officer Candidates (Summer Training).
13. Enter in parenthesis () all costs of the ROTC program, other than those discussed in paragraphs. 11 and 12, above, included in the Service's Reserve Component appropriations.
14. Enter and detail by appropriation, and explain by footnote, any costs attributable to the ROTC program which have not been included in either A, B, or D (1 and 2).
15. Enter the total cost data shown in D.1, 2, and 3.
16. Enter in parenthesis () the number of candidates participating in and total costs of Flight Instruction Program and the Aviation Indoctrination Program, respectively, included in the above data.
17. Enter by the scholarship and non-scholarship programs, respectively, the average number of candidates participating in MS I, II, III, IV, and applicable totals, respectively. Leave dollar columns blank.
18. Enter the total costs of the ROTC program. Total costs should be equal to the aggregate sum of A, B, and D, above.

INDIVIDUAL TRAINING DATA FOR FY __ BUDGET (SERVICE)

PART E: JUNIOR ROTC PROGRAM DATA (PE 897210)

(1) JUNIOR ROTC (HIGH SCHOOL) PROGRAM

	<u>FY PY</u>	<u>FY CY</u>	<u>FY BY1</u>	<u>FY BY2</u>

C. <u>Total Program Cost</u>		(5)		
D. <u>Average Cost/Unit</u>		(6)		

Instructions for Completion of Preceding

1. Enter Army, Navy, Marine Corps, or Air Force, as applicable.
2. Enter the appropriate fiscal year (data should be shown for the Prior-1, Prior, Current, and Budget years).
3. Enter the average enrollment during the year by year (of high school) and in total.
4. Enter the number of JROTC units.
5. Enter by appropriation, and in the total, the costs to DoD of the JROTC program.
6. Enter the average costs per JROTC unit. (Total costs in 5 divided by units in 4.)

	OP-20C										

INSTRUCTIONS

Separate exhibits will be submitted for the active and the reserve flying hour programs. The OP-20 exhibit is supported by three schedules, each one of which is designed to display the principal elements affecting the development of requirements. All data are required for the prior year, current year, biennial budget year 1 (BY1), and biennial budget year 2 (BY2).

- (a) Exhibit OP-20A relates to those requirements which are computed principally on the basis of numbers of tactical aircraft, crew ratios and the hours per crew required to maintain combat readiness.
- (b) Exhibit OP-20B relates to those requirements which are computed principally on the basis of the production of trained pilots. In addition to Undergraduate Pilot Training requirements, this schedule should also include requirements to support CCTS, CRAW, and RTU's.
- (c) Exhibit OP-20C covers all other fleet support requirement.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical/ASW section of the OP-20). At the end of the OP-20 exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

NARRATIVE EXPLANATION OF CHANGE: Provide a succinct description of changes in resources and program requirements between years and deviation between actual and program data. Particular emphasis should be placed upon actual data.

Instructions. Exhibit OP-20D is for Army use only. Exhibits OP-20, 20A, 20B, and 20C are not required for Army. A separate exhibit will be submitted for the Active Army, Army Reserve, and Army National Guard. Provide for prior year, current year, biennial budget year 1, and biennial budget year 2.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the appropriate section of the flying hour report. At the end of the OP-20D exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

Prior Year -1 is to reflect actual execution data and should include the crew ratio, no. of crews, hours per crew per month as well as the hours actually flown and the actual cost per hour.

Total prior year flying hour data is to be expanded to separately identify programmed (a/o the last Presidents budget submit) and actual execution data.

Expand the exhibit to include outyear data for the annual program only (not required by quarter).

Include CREW RATIOS, NUMBERS OF CREWS, HOURS PER CREW/MONTH, and REQUIRED vs. BUDGETED F/Hs.

Data will be arrayed by BA/Program Element/WSC with a Total array identified for each Program Element and Budget Activity.

The exhibit will identify O&M activities exclusive of Foreign Government Owned (FGO) and Special Operations Forces (SOF) aircraft.

FGO and MFP-10 data will be identified in separate arrays.

A Grand Total section will aggregate the O&M, FGO, and SOF information for each fiscal year by quarter.

Separate sections (with the same data array) will also identify the AFR and ANG programs.

This exhibit will be submitted for both the OSD submission and the President's budget submission.

Include the flying hours actually flown or programmed to be flown in support of the drug interdiction program in the proper section of the flying hour report (i.e. tactical flying hours in support of the drug program are to be reflected in the tactical section of the OP-20E). At the end of the OP-20E exhibit, include a memo entry reflecting the number of flying hours and the dollars by Type/Model/Series that are funded in the centralized drug account.

Provide for each of the following appropriations/funds and when more than one appropriation/fund provide a total for the Component.

1. Subtotals
 - a. Operation and Maintenance Appropriations
 - b. Research, Development, Test and Evaluation Appropriations
 - c. Family Housing Appropriations
 - d. Defense Working Capital Fund (Provide a breakout for each industrial fund activity group and a total for the Industrial Fund.)
 - (1) Depot Maintenance
 - (2) MSC
 - (3) Other Industrial Fund Activities (Separately identify each Defense Working Capital Fund activity group.)
2. Total Military Service or Defense Agency

The OP-26a exhibit will also be submitted by each Military Department and Defense Agency concurrently with the submission of congressional justification materials. The OP-26 exhibit will not be included in justification material forwarded to the Congress. Each Component is also required to submit an electronic version of the OP-26. See section 0302 for specific instructions.

Exhibit OP-30 Depot Maintenance Summary
(Page 10 of 12)

DEPOT MAINTENANCE PROGRAM

Instructions and Definitions

A separate exhibit should be completed for *the following* Operation and Maintenance appropriations: *Army, Navy, Marine Corps, Air Force, Defense-wide (SOCOM), Army Reserve, Navy Reserve, Marine Corps Reserve, Air Force Reserve, Army National Guard, and Air National Guard.*

Include depot maintenance programs only. In accordance with 10 USC 2460, *depot maintenance and repair is defined as material maintenance or repair requiring the overhaul, upgrade, or rebuilding of parts, assemblies, or subassemblies, and the testing and reclamation of equipment as necessary. Depot maintenance includes the installation of parts for the purpose of safety modifications, all aspects of software maintenance, and interim contractor support or contractor logistics support. Depot maintenance may include the installation of modifications (when done concurrent with other depot maintenance task) all aspects of software maintenance and the depot maintenance portion of interim contractor support (ICS) and contractor logistics support (CLS). Depot maintenance does not include procurement of major modifications or upgrades of weapon systems that are designed to improve program performance, the procurement of parts for safety modification, or the nuclear refueling of an aircraft carrier. Do not include maintenance support programs, second destination transportation amounts, or depot maintenance funded in appropriations other than Operation and Maintenance in this exhibit.*

Depot maintenance amounts *displayed in this exhibit* should be consistent with amounts shown in applicable OP-5 Exhibits in each Component's budget justification book and agree with amounts provided in Exhibit PBA-5, Depot Maintenance, Chapter 3.

All O&M depot maintenance requirements are to be displayed in one of the following categories:

- 1. Funded requirements – depot maintenance requirements for which funds are assigned.*
- 2. Unfunded executable requirements – depot maintenance requirements that are deferred due only to funding constraints.*
- 3. Unexecutable requirements – depot maintenance requirements that cannot be accomplished for reasons other than funding constraints to include operational commitments and lack of capacity. Unexecutable requirements are to be explained on page three of this exhibit.*

Total O&M depot maintenance requirement is the sum of the three categories listed above. Total executable requirement is the sum of the funded and the unfunded executable depot maintenance requirements.

Depot maintenance funded and *unfunded executable requirements* for the FY PY, FY CY, FY 20 BY1 and FY 20 BY2 should also be included in the Workload and Performance Criteria section of applicable OP-5 Exhibits for those Activity Groups which include depot maintenance programs. (The Workload and Performance Criteria section of the OP-5 should utilize the OP-30 format.)

Exhibit OP-30 Depot Maintenance Summary
(Page 11 of 12)

DEPOT MAINTENANCE PROGRAM

Instructions and Definitions (continued)

For the following reporting categories/subcategories only weapon system depot maintenance should be reported (i.e., requirements specifically for work on the end item that is the weapon system). Do not include work on related equipment, assemblies or subassemblies (such requirements should be reflected in the appropriate “other” category).

- Aircraft
- Combat vehicle
- Ships
- Missiles
- Ammunition
- Other

Depot Level Reparable Maintenance will only include non-stock funded items.

Include FY PY-1 data for the OSD budget submission only.

For the President’s budget submission, only submit pages 1 through 3 and pages 6 and 7 of the OP-30 Exhibit.

Exhibit OP-32 Summary of Price and Program Change
(Page 3 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32

- (1) Enter the applicable component, i.e., Army, Navy, Marine Corps Reserve, Air National Guard, etc.
- (2) Enter the fiscal year for which this exhibit is being prepared.

NOTE: A separate exhibit should be submitted for each O&M appropriation for the current year, for biennial budget year 1, and for biennial budget year 2. This exhibit should be prepared at the appropriation level for the President's budget.

- (3) Enter the prior year (PY), current year (CY), biennial budget year 1 (BY1), or biennial budget year 2 (BY2), as applicable.
- (4) For the CY exhibit, amounts entered in this column should agree with the prior year actual costs as shown in the prior year column of the applicable budget submission. For the BY1 exhibit, these amounts should agree with the far right hand column of the CY exhibit. For the BY2 exhibit, these amounts should agree with the far right hand column of the BY1 exhibit.
- (5) The amount shown for each appropriate line (exclusive of line 991) in the Foreign Currency Rate Difference column will reflect the difference in the budgeted foreign currency exchange rates between the two years. For the prior and current years, the budgeted foreign currency exchange rates are the exchange rates that have been approved for recording obligations during execution. If the current year execution rates have not yet been established by the Congress in time for the budget submission, the foreign currency exchange rates reflected in that fiscal year's President's budget request will be used. For the biennial budget years, the budgeted foreign currency exchange rates are the exchange rates reflected in the OUSD (C) budget call memorandum for the budget submission or in the PBD issued during the budget review in the formulation of the President's budget request. (Note: Variances from the budgeted rates will be reflected only on line 991. These variances do not enter into the calculation on any of the other lines.) The column total, including line 991, will reflect (1) for the PY to the CY: the difference between prior year actuals and the current year budgeted rates, (2) for the CY to the BY1: the difference between budgeted rates in each year, and (3) for the BY1 to the BY2: the difference between budgeted rates in each year. If transfers are approved for the current year, the column total will reflect (1) for the PY to the CY: the difference between PY actuals and CY anticipated expenditures and (2) for the CY to the BY1: the difference between the CY anticipated expenditures and the BY1 budgeted rates. No foreign currency rate difference will be shown for Defense Working Capital Fund Purchases and Travel or Transportation for MAC, MSC or MTMC. Only in unusual circumstances should an amount for foreign currency rate difference be shown for other travel and/or transportation costs. (See end notes for further discussion of foreign currency entries.)
- (6) This column should show the rate (percent) of price growth for various items. The general price escalation indices prescribed by OSD (as provided by OMB) should be used for items 416, 417, 507, 679, 725, 771, 913-915, 920-925, 927-989, and 998. Other price growth rates may be used for these items when actual experience supports a rate of increase different from that prescribed For the OSD/OMB submit. In those instances, supporting documentation for the rate used should be provided. If the rate is approved during the budget review, the revised rate may be used in the President's budget. To the extent that a separate rate of increase is used for any portion of a line item, Equipment Maintenance by Contract for example, the applicable item should be subdivided into appropriate subcategories for each separate rate of increase used. The rate of price change for lines 401, 402, 411-415, 502-506, 601-673, and 701-721 should agree with applicable rates approved by OSD. Applicable rates of price growth, as prescribed by OSD, or as estimated and justified, as appropriate, should be shown for all items where there is a price change. The rate of price growth included in the President's budget will in all instances reflect the rate of increase approved during the OSD budget review.

Exhibit OP-32 Summary of Price and Program Change
(Page 4 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (7) The price growth column should show the amount of price growth for various items. **Where a percent increase by line item is shown in column 6, the amount included in column 7 will be the sum/difference of the previous fiscal year's program amount (column 4) and the foreign currency rate difference amount (column 5) times the percent shown in column 6.** The amount of the price growth will be consistent with the rate of change prescribed by OSD. The price increase for all items should be the additional/reduced funds, as a result of price changes, that would be required to accomplish the previous year's program at applicable fiscal year rates.
- (8) Enter the amount of program growth for each item. Program growth is to be priced in current year dollars for the current year exhibit, biennial budget year 1 dollars for the biennial budget year 1 exhibit, and biennial budget year 2 dollars for the biennial budget year 2 exhibit.
- (9) Enter the sum of (4), (5), (7) and (8) for each item.
- (10) Subtotals should be included in (4), (5), (7), (8) and (9) for Civilian Personnel, Travel, Defense Working Capital Fund Supplies and Materials Purchases, Defense Working Capital Fund Equipment Purchases, Other Defense Working Capital Fund Purchases, Transportation, and Other Purchases, as applicable.
- (11) Program amounts for Civilian Personnel compensation should be consistent with amounts shown in both the object class distribution reflected in the Program and Financing Schedules for Object Classes 11, 12 and 13 (Direct Obligations only) and in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3 of the Financial Management Regulation for the applicable fiscal year. Payments made to the Department of Labor for expenses associated with employee's disability compensation are included in Object Class 12. Change in the number of compensable days per fiscal year will be reflected as program growth not price growth. The annualization of the prior year's pricing changes (i.e., the previous fiscal year's pay raise), merit pay, bonuses, FERS participation, etc. will be reflected as changes in price growth.
- (12) Program amounts for travel should be consistent with amounts shown in Object Class 21 (including subclasses), for the applicable fiscal year.
- (13) AMC, MSC, and MTMC costs displayed for items 624, 653, 701, 702, 703, 711, 721, 725, and 771 should include all purchases from these transportation funds. These amounts should exclude all non-Defense Working Capital Fund purchases such as reimbursement to MTMC of non-Defense Working Capital Fund (overseas) port operations.
- (14) Line 703 JCS Exercises includes only those services in support of JCS exercises and paid only by The Joint Staff (TJS).
- (15) The total of the program amounts for DFSC Fuel, Defense Working Capital Fund Fuel, and Locally Procured Fuel (Non-Fund) line items must agree with the amounts shown on the OP-26 Exhibit, POL Consumption and Costs, Chapter 3, Financial Management Regulation.
- (16) Include Object Class 26 supplies and materials purchased from each DoD Defense Working Capital Fund, including DLA.
- (17) Include Object Class 26 supplies and materials purchased from GSA.
- (18) Include all equipment (including furniture) purchased from Defense Working Capital Fund, including DLA.
- (19) Include all equipment (including furniture) purchased from GSA.

Exhibit OP-32 Summary of Price and Program Change

(Page 5 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (20) Include amounts to be paid for motor vehicles leased from both commercial services and the General Services Administration (GSA) Interagency Fleet Management System (IFMS). These amounts are to be consistent with the estimates provided on the "Commercial Leases" and the "IFMS Leases from GSA" lines of the Motor Vehicle Operations (PB-41) exhibit.
- (21) Includes centrally managed items procured by Defense Working Capital Fund from sources other than Defense Working Capital Fund or non-Defense Stock Funds.
- (22) Include purchases of MTMC services for non-Fund services such as overseas port terminal operations.
- (23) Program amounts should be consistent with Fund purchases included in Object Class 25.3.
- (24) Biennial budget years' (BY1/BY2) program amounts should reflect stabilized rates as requested by the Service (OSD submission) or as approved by OSD (President's Budget), as applicable, to include the impact of biennial budget years' pay raises. Cost reimbursable purchases should be included on line 679. Separate elements of expense for each Defense Working Capital Fund activity group are shown on page 3. Include only those elements of expense for Defense Working Capital Fund activity groups from which purchases were made or are planned, as applicable.
- (25) Includes the Aerospace Maintenance & Regeneration Center (AMARC).
- (26) Line 653, Airlift Services, Other AMC Purchases, includes Medical Evacuation Operations, Training, Search and Rescue, and other AMC costs not provided for in lines 701, or 702.
- (27) Includes all Defense Working Capital Fund purchases made on a cost reimbursable (rather than stabilized rate) basis.
- (28) Includes contractual charges for transportation of things via commercial air, sea, or surface mode and payments for commercial port operations and other transportation services exclusive of payments to the Defense Working Capital Fund.
- (29) Program amounts should be consistent with direct obligation amounts shown in the OP-8 Exhibit, Civilian Personnel Costs, Chapter 3.
- (30) Charges for rental of space and related services assessed by GSA as SLUC charges. Program amounts will be consistent with the amount shown in Object Class 23.1.
- (31) Program amounts included for items 913-915 and 917 will be consistent with the amounts shown in Object Class 23.3.
- (32) Purchases from non-Defense Working Capital Fund sources heat, light, power, water, gas, electricity and other utility services, exclusive of transportation and communication services.
- (33) Purchases of communication services from non-Defense Working Capital Fund sources.
- (34) Payments for possession and use of land, structures, and equipment (other than transportation equipment) owned by another, except for SLUC charges assessed by GSA.

Exhibit OP-32 Summary of Price and Program Change

(Page 6 of 8)

INSTRUCTIONS FOR COMPLETION OF OP-32 (CONTINUED)

- (35) Purchases from the U.S. Postal Service including postage (other than Parcel Post), rental of post office boxes, postage meter machines and mailing machines. Also includes payments made to the U.S. Postal Service for handling of officially franked mail (i.e., Indicia Mail).
- (36) Includes supplies and materials purchased from other than Defense and non-Defense Working Capital Fund.
- (37) Program amounts should be consistent with the amounts shown in Object Class 24.
- (38) Covers contractual equipment maintenance other than depot level (e.g., ADP/office equipment, etc.)
- (39) Includes costs for repairs and maintenance to buildings, facilities, pavement, airfields and like items when done by contracts with the private sector.
- (40) Equipment purchased from the private sector, including equipment included in Federal Supply Group 71, Furniture. Program amounts should be consistent with amounts reported under Object Class 31.07.
- (41) Covers overseas contractor operated installation costs when covered in a single contractual agreement or when service is provided by a single contractor (excludes separate contracts for specific, limited services such as contract ADP services).
- (42) Covers contracted service cost of Air Force Air Defense Systems (e.g., BMEWS, DEW Line, Spacetrack, Thule AFB base maintenance contracts, DSP) and Space Support programs.
- (43) Includes the cost of ship related repair and the performance of regularly scheduled ship overhauls at commercial shipyards.
- (44) Includes the cost to Depot Maintenance to purchase aircraft maintenance from commercial sources.
- (45) Includes payments for all other non-Defense Working Capital Fund depot maintenance costs whether performed in-house or by contract which have not been reported under lines 928 or 929.
- (46) Program amounts should be consistent with Exhibit PB-15, (Advisory and Assistance Services), Chapter 19 of the Financial Management Regulation). The amounts reflected should agree with Object Class 25.1.
- (47) Program amounts should be consistent with the amounts shown in Object Class 41.
- (48) Charges for contractual services not otherwise reported elsewhere.
- (49) Amounts on line 991 will reflect variances from budgeted rates, as prescribed by OUSD(C) guidance, which have actually occurred in the prior year or which have been approved (by DD-1415 or PBD) for the current year. There will be no amounts reflected on line 991 in the price and program growth columns. For the President's budget, the amount in the prior year column will be the realized variance on the 30 Sep DD Comp(M) 1506 report. Under no circumstances will there be an entry on line 991 in the biennial budget year. (For a further discussion, see Foreign Currency notes at the end of these instructions).
- (50) Total program amounts, in (4) and (9), will be equal to the total direct program for prior year, current year, biennial budget year 1, and biennial budget year 2, as applicable.
- (51) Includes fuel purchased from sources other than the Defense Working Capital Fund.
- (52) Includes amounts for items not otherwise reported elsewhere.

Exhibit OP-32 Summary of Price and Program Change
(Page 7 of 8)

Foreign Currency Notes

- A. The Total for Foreign Currency Rate Difference (Column 2) must reflect the difference between:
1. PY to CY: Prior year actuals and current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the Current Year. (For the latter, individual line items in column 2 (except for line 991) will reflect the difference in budgeted rates and line 991 in column 2 will reflect the transfer amount.)
 2. CY to BY1: Current year budgeted rates or anticipated expenditures in the current year if transfers have also been approved for the current year, and biennial budget year 1 budgeted rates.
 3. BY1 to BY2: Change in budgeted exchange rates from biennial budget year 1 to biennial budget year 2.
- B. Individual line items in Column 2 (except for line 991) must reflect the difference in program costs that are caused only by a difference in budgeted foreign currency exchange rates between fiscal years.
- C. Line 991 - Foreign Currency Variance
1. Prior Year (PY) to Current Year (CY)
 - a. PY column = Realized variance (DD Comp(M) 1506 Report 30 Sep).
Column 2 = Reverse the realized variance amount in the PY column.
CY column = zero
 - b. If transfers have been approved in the CY,
PY column = Realized variance (DD Comp(M) 1506 Report 30 Sep).
Column 2 = Reverse the realized variance amount in the PY column and add the transfer amount approved for the CY to determine the total.
CY column = the transfer amount approved for the CY.
 2. Current Year (CY) to Biennial Budget Year 1 (BY1)
 - a. If the budgeted rates change between the CY and the BY1 and transfers from the Foreign Currency Fluctuations, Defense (FCF,D) appropriation are not reflected in the budget, then the CY column, Column 2 , and the BY1 column for line 991 are all zero.
 - b. If budgeted rates change between the CY and the BY1 and the FCF,D transfers have been reflected in the budget for the CY, then the CY column for line 991 will reflect the value of the transfers and Column 2 for line 991 will reflect the reversal of the transfers. The BY1 column for line 991 will be zero.

APPROPRIATED FUND SUPPORT FOR MORALE, WELFARE AND RECREATION ACTIVITIES (MWR)

(Dollars in Thousands)

INSTRUCTIONS:

1. In preparing the OP-34 exhibit, the Services/Defense Agencies should use the program definitions contained in the DoD Directive 1015.10, subject: Programs for Military Morale, Welfare, and Recreation (MWR), DoDI 1015.12, subject: Lodging Program Resource Management; and DoDD 1015.8, subject: DoD Civilian Employee Morale, Welfare, and Recreation (MWR) and Supporting Nonappropriated Fund Instrumentalities (NAFIs).

2. *APF support should include both direct and indirect APF support provided to MWR activities and should include the cost categories reported on the Appropriated and Nonappropriated Fund Expense Summary required by DoDI 7000.12. Direct costs include those costs that can be directly attributable to the activity and include civilian and military pay and benefits, travel, training, supplies and equipment, contracts, and Family Child Care subsidy. Indirect costs include costs that are attributed to more than one activity and include rents, utilities, communications, minor construction, repair and maintenance, contracts, engineering support, etc.*

3. APF Common Support - That appropriated fund support, identified as APF support used in the management, administration and operation of more than one MWR program, however, that support or cost is not easily nor readily identifiable to a specific MWR program.

Some examples of APF common support would include: *managerial operational functions and positions at an installation, major command or Service, executive and upper management supervision that is functionally located above the operating program manager level and having responsibility for several MWR programs; an installation's civilian personnel functions; and central accounting office functions.*

4. The OP-34 Exhibits should be submitted for the OSD/OMB budget submission each year. The OP-34 exhibit should also be included in the congressional justification books each year.

1/ Identify applicable Reserve Component. Separate OP-71 exhibits required for Army National Guard and Army Reserve Components.

Exhibit OP-71 Organizational Clothing and Equipment - Army Reserve Components
(Page 1 of 2)

INSTRUCTIONS FOR COMPLETION OF OP-71

1. **Backlog Carried Over from Prior Year** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of Obsolete Equipment** - backlog associated with equipment no longer being issued to the Service. (e.g., if the Army Guard decided to replace steel helmets with kevlar helmets and has budgeted for the kevlar helmets as a force modernization initiative. The value for steel helmets included in the backlog would be reflected in this category.)
3. **Inflation** - backlog carried over from previous year less backlog associated with equipment no longer being issued to the Service times the OSD rate for “general purchases inflation-O&M” or the appropriate Defense Working Capital Fund rate, whichever is applicable.
4. **Adjusted Prior Year Backlog** - backlog carried over from previous year less backlog associated with equipment no longer being issued to the Service plus inflation (1-2+3).
5. **Average Strength Change Adjustment**- change in OCE requirements resulting from increases or decreases in total workyears.
6. **Replacement of Previous Issues** - inventory purchased to replace equipment that is consumed during the year through normal wear and tear (including inventory losses).
7. **Force Modernization Initiatives** - OCE requirements related to equipment modernization. This might include such items as new cold weather clothes or chemical protective clothing.
8. **Other - only those requirements that do not fit the above categories.** This would include increases and decreases resulting from changes in authorized numbers of units or individual equipment authorizations.
9. **Annual Requirement** - the sum of the “end strength change adjustment,” “replacement of previous issues,” “force modernization initiatives,” and “other.” (5+6+7+8)
10. **Total Fund Required** - the “adjusted prior year backlog” plus the “annual requirement.” (4+9)
11. **Funds Budgeted for OCE** - amount planned for OCE each year.
12. **Backlog, End of Year** – “total funding required” less “funds budgeted” for OCE.

9. Backlog, end of year								

Exhibit OP-73 Repair Parts, Army Reserve Components
(Page 1 of 2)

INSTRUCTIONS FOR COMPLETION OF OP-73

1. **Backlog carried forward from prior years** - unfunded requirements at the end of the previous fiscal year.
2. **Backlog of obsolete parts** - backlog of repair parts associated with equipment that is being retired from the Reserve Forces.
3. **Inflation** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces times the OSD rate for “general purchases inflation--O&M” or the Defense Working Capital Fund, whichever is applicable.
4. **Adjusted prior year backlog** - backlog carried over from prior years less backlog associated with equipment being retired from the Reserve Forces plus inflation (1-2+3)
5. **Recurring requirements** - annual repair parts requirements to support equipment fielded in previous years.
 - a. **Annual consumption** - those parts consumed annually to support weapons systems fielded in previous years.
 - b. **Change in equipment inventories** - increases or decreases in annual consumption requirements necessary to reflect changes in equipment inventory levels (e.g., retirement of equipment).
 - c. **Change in stockage levels** - increases or decreases in requirements due to changes in the level of repair parts support required annually for a particular equipment.
6. **Nonrecurring requirements** - one time requirements associated with introduction of new equipment to the Reserve Force.
 - a. **Force modernization initiatives** - initial inventory of repair parts associated with fielding of force modernization systems.
 - b. **Introduction of other new equipment** - introduction of other equipment not previously provided to the Reserve Force.
7. **Total funding required** - adjusted prior year backlog plus recurring requirements and nonrecurring requirements.
8. **Funds budgeted for repair parts** - amount budgeted for repair parts each year.
9. **Backlog, end of year** - “total funding required” less “funds budgeted for repair parts”.

INSTRUCTIONS

Report force structure for each model/design/series (MDS) aircraft within each program element. Also identify the command to which the equipment is assigned and the purpose code for the equipment. The force structure should be reported at end of year for the prior year and the outyears and at the end of each quarter for the current year and the budget years (BY1 and BY2). Totals should be provided for MDS and each PE.

Separate exhibits are required for Active Air Force, Air Force Reserve, and Air National Guard.

Instructions

Reflect program data under “Description of Operations Financed” and “Program Data” sections.

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the Current Year and Biennial Budget Year 1 and between Biennial Budget Year 1 and Biennial Budget Year 2 by relating it to program changes (force structure, end strength, etc.) for the period. Also, identify any applicable major pricing changes between years. Explanation of price and program changes should be provided separately for the Active Fleet as well as the Reserve Fleet.

Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits. Data entered on this exhibit must match the corresponding data entered on the Reserve Components (PBA-11), Appropriation Highlights (PBA-19), Key Activity Indicators (PBA-21), and Special Operations Forces (PBA-26) Exhibits. In addition, the data contained in the O&M Overview should match the data reported in other budget justification material such as the OP-5 (performance criteria), Ship Fuel Data and OPTEMPO Data (OP-40), Ship Operating Cost Data (OP-4), Funding for Depot Level Reparables (OP-31), and Special Operations Forces (OP-52).

Identify on the bottom of the exhibit *the preparation date and* a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

TRAINING AND EDUCATION
COMPONENT TITLE

1/ Workload should agree with the Military Manpower Training Report (MMTR) and reflect direct and reimbursable workload associated with the dollars reported under training and education.

2/ Specialized skill includes initial skill, skill progression, and functional training for both officer and enlisted.

3/ Officer Acquisition includes Service academies, platoon leaders course, Officer Candidate/Training Schools, and other enlisted commissioning programs. Also includes USUHS and the Health Professional Scholarship Program..

Narrative Explanation of Changes: Provide a succinct narrative explanation of total resource changes (for \$ provide in nearest tenth of a million) between the current year and biennial budget year 1 and between biennial budget year 1 and biennial budget year 2 by relating it to program changes (force structure, end strength, etc.) and pricing changes for the period. Also, identify any applicable major pricing changes between years. *Price and Program changes should agree with those displayed on the Summary of Price and Program Changes (OP-32) and the Detail by Budget Activity and Activity Group (OP-5). Show functional transfers as program changes consistent with the OP-32 and the OP-5 exhibits and with the corresponding data entered on the Appropriation Highlights (PBA-19), Backlog of Maintenance and Repair (OP-27), and the Maintenance of Real Property (OP-28) exhibits.* Identify on the bottom of the exhibit *the preparation date and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.*

Description of Operations Financed: This exhibit will provide manpower, payroll, and cost data directly related to the management headquarters mission. Data will be displayed for all organizations listed in the DoD Directive 5100.73, "Department of Defense Management Headquarters Activities." Additionally, this exhibit will separately identify the manpower and costs data by Combatant and Non-Combatant Management Headquarters Activities. Resources for international military headquarters are not to be reported in this exhibit; these costs are to be reported on the PB-55. A narrative explanation is required for all increases and decreases. Non-labor costs that are not directly related to the management headquarters mission such as pentagon renovation should not be reported in this exhibit. Components should footnote the items that are excluded. Organizations will be displayed according to the following categorization of Management Headquarters Activities.

Instructions: Identify specific increases/decreases to the Component's military end strength levels by major program (e.g. B-1B, TRIDENT, MICOM, etc.). Do **not** provide changes by Defense Planning and Programming Category (DPPC). The total for each column will be the difference between fiscal years. **Stub entries such as "OSD/OMB reduction" are not acceptable.** Identify on the bottom of the exhibit *the preparation date and* a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

Footnotes/Additional Guidance:

1/ Show the total number of ships (at the end of the fiscal year) for this category and the total amount of per diem payments made to the National Defense Sealift Fund (NDSF) or the U.S. Transportation Command. The Defense Logistics Agency (DLA) should report the cost of afloat prepositioned tankers used by the Defense Fuel Supply Center.

2/ Show the number of planned exercises and the total amount budgeted. Do not include JCS funded exercises in the Service submissions. JCS exercises and funding will be reported as Defense-Wide.

3/ Show Service-funded costs not included as part of the per diem payment to the NDSF but which are directly related to the sealift program. This would include enhancements and modifications to on-board systems.

Identify on the bottom of the exhibit *the preparation date* and a point of contact who is knowledgeable about the content of the data reflected on the exhibit as well as a telephone number for the individual.

FOREWORD

Volume 2 of the Department of Defense "Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures" which governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It identifies financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it identifies statutory and regulatory financial reporting requirements.

This volume of the Regulation establishes procedures for DoD Components to use in budget presentation and formulation and applies to the Office of the Secretary of Defense, the Military Departments, the Joint Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

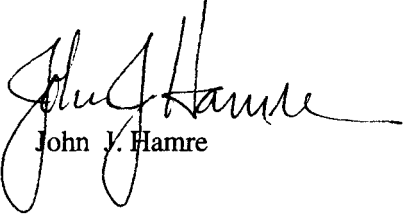

This update is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

This Volume of the "Financial Management Regulation" is not stocked in the defense publications system. DoD Components as defined above will be provided copies of Volume 2 through Component central points of contact, generally within the Components' comptroller organization. Changes in Component Volume 2 distribution requirements or points of contact names should be provided directly to the Office of the Under Secretary of Defense (Comptroller), Plans and Systems Directorate, 1100 Defense Pentagon, Washington D.C. 20301-1100 (DSN 227-3345, Com. (703)697-3345). Other federal agencies and the public may obtain copies of this Volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; telephone (703)487-4650.

John J. Hamre

Chapter detail Table of Contents are at the beginning of each chapter. Each chapter is identified with a tab. Chapter page numbers are preceded by the number of the chapter (e.g. 9-2 and 19-50.)

SUMMARY OF VOLUME 2 CHANGES

Section Number	Changes
010107	Budget Terminology/Definitions updated.
010108	Reemphasizes the proper use of classification cover sheets on justification material.
010200	Procurement Glossary added with additional terms and definitions.
010201	Adds dollar thresholds for expense/investment criteria.
010202	Expands full funding definition and policy. Allows use of advance procurement exception to the full funding policy to fund EOQ procurements outside multiyear contracts. Adds additional rationale (sustain a production line, to support low rate initial production, etc.) as reasons for EOQ. Allows use of Advance Economic Order Quantity (EOQ) Procurement in Advance Procurement requests where warranted.
010203	Adds section for multiyear procurement and moves related information from Section 04 to Section 01. Renumbers remaining paragraphs.
010209	Adds clarification for Non-Developmental Item (NDI) procurement funding.
010210	Moves and expands the definition and discussion regarding direct and reimbursable plans from Chapter 4 to Chapter 1.
010211	Moves information regarding Direct and Reimbursable Budget Plans from Chapter 4.
010212	Adds a section regarding funding LRIP test articles with RDT&E.
010215	Unutilized capacity added.
010217	Updates guidance for pricing military personnel at DBOF activities.
010219	Revises capital budget threshold. Includes changes to 10 U.S.C. 2805(c) for minor construction projects at activities designated under the DoD Laboratory Demonstration Program. Includes changes to 10 U.S.C. 2805(c) for minor construction projects intended solely to correct a deficiency that is life-threatening, health-threatening, or safety threatening. Adds minor construction policy guidance concerning project planning and design costs for DBOF activities.
010220	Provides guidance for base support services provided to and funded by DBOF activities.
010221	Provides funding guidance for dual funded organizations.

Section Number	Changes
010222	Provides guidance for customer funding of DBOF costs associated with canceled or reduced scope work order caused by customer mandated schedules.
010301	Printing requirements by Title expanded and clarified. Includes the use of screw posts in lieu of Acco fasteners when assembling budget books.
010302	Distribution updated to reflect account and exhibit changes. Emphasizes that <u>copies of Op-32, R-32, and P-32 are to be provided to the Revolving Funds Directorate.</u>
010303	Freedom of Information Act (FOIA) reference added.
010304	Pay Increases - Section Deleted. Related to pay supplemental.
010305	PB-5 Requirement deleted.
010306	Budget supplemental guidance rewritten. Pay supplemental no longer included.
010308	Major Budget Issue (MBI) section added (format in Section 0107). Old section 010308 renumbered to 010309.
010309	Budget estimate submissions require civilian full time equivalent (FTE) data in lieu of civilian end strengths.
010401	Reemphasizes the proper use of classification cover sheets on justification material. Printing requirements by Title expanded and clarified. Includes the use of screw posts in lieu of Acco fasteners when assembling budget books. FOIA reference added. Reference to Congressional Data Sheets (CDS) deleted.
010403	Distribution updated to reflect account and exhibit changes.
010406	Appeals process - electronic format changed. Clarifies input requirement - Single position to be taken by inputting Component.
010502	Cost Type codes added/revised for submittal of Procurement (P-1) programs.
010504	Expands applicability of Construction Program database to the DoD Family Housing Improvement Fund.
010505	Record layouts for civilian full time equivalents (FTEs) will be as formatted on DD Forms 2235, 2236 and 2236-1, as applicable. Updates list of accounts which require an Obligation Plan as part of the budget estimate submission.

**Section
Number****Changes**

Provides table displaying relationship between OMB's restructured Program and Financing (P&F) Schedule in OMB Circular A-11 and DoD's Budget Review System.

ARPA changed to DARPA.

Provides updated Object Classification Default Table and updated extracts from the "Budget Accounts Title File Listing."

010602 Applied Research replaces Exploratory Development as a subdivision (budget activity) of RDT&E programs.

010603 Updates appropriations and budget activities by functional title for military functions.

010702 PB-4 Schedule of Civilian and Military Personnel. Changed to reflect Full-time Equivalents (FTE) for civilian strength.

PB-5 Format deleted.

PB-1, PB-8 and PB-10 exhibit guidance revised.

010703 PB-37D through PB-37P Formats deleted.

010704 Instructions added to DD Forms 2232 and 2233 for coding supplemental requests.

Instruction for DD Forms 2235, 2236, and 2236-1 revised for civilian FTEs to replace civilian end-strengths.

Instructions for SD Form 463 updated for added/revised Cost Type codes.

020101 Subsistence-in-kind (SIK) - Both Active and Reserve Components are to budget for SIK within the Military Personnel or Reserve Personnel appropriations. This reflects a shift of costs for the Active Components back to the Military Personnel accounts.

020101 Added paragraph (F) "Military end strength Guidance for the BES".

020204 Exhibit MP-8 "Medical Officer Retention Bonus" requirement deleted.

Paragraph F covering machine readable data rewritten.

020602 Deleted requirement for MP-8 "Medical Officer Retention Bonus".

030100 Military and civilian end strengths changed to WYs and FTEs respectively, except in those instances where both E/S and WYs/FTEs are shown on exhibits.

030201 Exhibit OP-21(A-D) exhibit requirements deleted.

Automated submission language in paragraph G revised.

030202 Promotion of Rifle Practice section deleted. Renumbered subsequent sections.

Section Number	Changes
030402	Exhibit OP-17 Audit and Criminal Investigative Services deleted. Exhibit OP-19 O&M DBOF Contracts > \$50M deleted. Exhibit OP-32 Elements of Expense revised. Exhibit OP-45 New Programs deleted.
030403	Deleted first page of O-1 exhibit requirement. Exhibit PBA-6 Environmental deleted. Exhibit PBA-18 Other deleted.
040103	Biennial Budgeting/Direct and Reimbursable Budget Plans - Moved sections from Chapter 4 to Chapter 1. MDAP PE Crosswalk requirement section added.
040105	Updates the requirements regarding submission of multiyear procurement exhibits.
040200	Moves the list of procurement exhibits from Section 040402 to Section 0402.
040300	Renumbers previous Section 0402 to 0403. Identifies a dollar threshold for preparation of budget exhibits. Updates what exhibits each backup book will include and in what order. Includes requirement for a report to compare data between submissions. Requires that all P-20 Requirement Study exhibits be consolidated into a single backup book by Service, or by appropriation.
040301	Deletes requirement for congressional data sheets and modification obligation data.
040302	Requires that the budget justification material be unclassified and that any classified material be submitted separately.
040401	Deletes Exhibit PB-32D Congressional Data Sheet.
040403	Adds section regarding classification of budget exhibits.
040404	Adds section regarding comparison report requirements.
040500	Adds paragraph regarding dollar threshold for preparation of budget exhibits.
040502	Exhibit P-1 Includes amplifying instructions for advance procurement entries. Requires that the appropriate quantity code is included.

**Section
Number**

Changes

Exhibit P-1C	Adds new exhibit to compare data between submissions.
Exhibit P-1M	Procurement Program - Modification Summary added.
Exhibit P-5	Requires the Exhibit P-5 to show costs for prior years, CY-2, CY-1, CY, BY1, BY2, BY2+1, BY2+2, BY2+3, BY2+4, To Complete, and Total, consistent with the P-40 requirement for all ACAT I programs. Requires that the P-5 exhibit reflect support cost estimates formulated by the developing Service when that Service retains management responsibility for those ammunition items that are procured through the Conventional Ammunition Working Capital Fund (CAWCF). Requires that these support costs be separately identified.
Exhibit P-5a.	Requires that the P-5 entries include information for all prior years through budget year 2. Amplifies information requirements. Requires that the ammunition information for prior years be updated to reflect actual contract data and/or the most recent estimated forecasted contract price.
Exhibit P-10/P-10a	Deletes P-10a. Revises the P-10 advance procurement requirements.
Exhibit P-11	Adds new exhibit to summarize Electronic Warfare funding.
Exhibits P-14/P-20/P-23b	Combines P-20, P-14, and P-23b Requirements Study into one P-20 exhibit. Requires memo entries to show the inventory objectives that were approved in the POM process by PA&E. Revamps P-20 to show changing asset position by fiscal year, making it easier to read and understand. The revision allows comparison of the end of year asset position to the Inventory Objective.
Exhibits P-15/P-25	Deletes P-15 exhibit for production facilities projects and includes the requirement in the P-25 provision of industrial facilities project exhibit.
Exhibit P-21	Amplifies the requirement to show the actual projected deliveries rather than the procurement quantity divided by 12. Defines line item entry requirements.
Exhibit P-21a	Adds new exhibit to show a production schedule for “all types” ammunition items by major end item (5.56mm, 7.62mm, .50 cal, etc.).

Section Number	Changes
Exhibit P-21b	Adds new exhibit to show a GOGO/GOCO facility's production for all items produced at that facility.
Exhibit P-22	Ammunition Inventory exhibit added.
Exhibit P-26	Adds new exhibit to reflect costs to support the maintenance of inactive facilities.
Exhibit P-40	Revises the P-40 exhibit to add quantities being procured in RDT&E and to show related PEs. Deletes the requirement for the Inventory Gain/Loss/Consumption statement for ammunition items from the P-40. Includes requirement to show the identification code. Provides amplifying instructions for advance procurement entries. Requires that an additional P-40 exhibit be provided listing all items being procured in an aggregated or rolled ammunition P-1 line item. Requires that the P-40 list all Service and Other Small Craft Items (SCN only).
Exhibit P-40a	Adds exhibit to list items included in a rolled P-1 line item.
Exhibit P-43	Revises exhibit to delete information contained in other exhibits.
Exhibits MYP	Deletes Exhibit MYP-2 and combines its information on MYP-1. Renumbers MYP-3, 4 and 5.
Various Exhibits	P-1S, P-1N, P-3N, P-6, P-19, P-23b, P-8, P-20a, P-15, and PB-32C deleted
MDAP	PE Crosswalk added.
050102	Other Chapter Requirements Identifies requirements for exhibits required by Chapter 19- Special Analyses, Chapter 3 - Operation and Maintenance and by OMB Circular A-11, Preparation and Submission of Budget Estimates.
050103	MDAP Crosswalk requirement explained.
	MDAP Adds requirement for a Major Defense Acquisition Program (MDAP) Automated Submission.
050201	Budget Activity Titles - Reflects revised titles of budget activities.
050302	BES Submission Requirements:

Section Number	Changes
	<p>Requires that the budget justification material be unclassified and that any classified material be submitted separately.</p> <p>Requires R&D Project Listings to include totals by (1) Program Element, (2) Budget Activity, and (3) Appropriation.</p> <p>Requires a comparison report of the current OSD/OMB budget estimates submission to the previous President's budget submission that identifies the changes for each RDT&E appropriation by R-1 line item and by project.</p> <p>Requires the table of contents to include the program element number, program element title, R-1 line item number and the appropriate page number.</p> <p>Identifies the preferred method to print RDT&E material for those Components that have a large number of PEs for which printing the RDT&E material all in one volume is impractical.</p> <p>Requires that each PE package begin on the front side of a new page.</p> <p>Requires an Exhibit R-32, Purchases from DBOF.</p> <p>Deletes requirement for Exhibit 44-C because OMB Circular No. A-11 incorporated the requirements for this RDT&E exhibit into the automated MAX schedule C. Subsequent instruction will be provided by the Director for Investment, OUSD(C), regarding the specific requirements for this submission to OMB's MAX system.</p> <p>Requires Project comparison reports and diskettes.</p>
050402	<p>Organization of RDT&E Congressional Justification Books:</p> <p>Requires that each of the RDT&E table of contents listings include the program element number, program element title, R-1 line item number and the appropriate page number.</p> <p>Requires that a copy of the OSD-generated R-1 report be included.</p> <p>Requires that each PE package must begin on the front side of a new page.</p> <p>Requires RDT&E material be unclassified and that any classified material be submitted separately..</p> <p>Provides printing instructions and requirement for 40 advance copies to be distributed to congressional committees.</p>
050403	<p>Adds new section for comparison report requirements.</p>
050404	<p>Adds new section for Defense Technical Information Center requirements.</p>
050501	<p>Formats Allows the DoD Components to use formats currently being used in lieu of the formats contained in Section 050502 as long as all of the</p>

	information required by the exhibits in Section 050502 is provided.
050502	<p>Exhibit R-2 Revised to add quantities being procured in both RDT&E and procurement.</p> <p>Changed to include a requirement to identify the forecasted beginning and ending timeframe that the funds will be obligated at the end of the bulletized narratives.</p> <p>Changed to include the quantity of RDT&E articles being procured each year. The cost, by fiscal year, associated with the procurement of the end items should be available upon request.</p> <p>Program's milestone chart can be submitted in lieu of the Exhibit R-2 schedule section as long as the information required by this section is included.</p> <p>MDAP PE crosswalk instructions added.</p>
060101	<p>NATO Infrastructure account name changed to NATO Security Investment Program.</p> <p>Family Housing Improvement Fund added. Budget formulation and justification instructions to be issued under separate cover.</p>
060105	Reference to financing of indebtedness deleted.
060106	Disposition of proceeds from disposal of family housing updated.
060201	Minor Construction limits raised for projects correcting life, health or safety-threatening deficiencies.
060202	<p>Solar Energy Demonstration reference deleted - no longer applicable.</p> <p>Capehart Mortgages and Wherry Housing subordinate accounts deleted -no longer applicable.</p>
060301	<p>Large hospital construction project exemption from full funding deleted to comply with OMB Circular A-11</p> <p>New requirement for outyear project level detail in accordance with DEPSECDEF direction added.</p> <p>Requirement to identify construction projects as new or current mission added</p> <p>Resolution Trust Corporation determination requirement deleted - RTC was disestablished</p>
060302	<p>Family Housing Summary of Price and Program Changes (OP-32) exhibit deleted.</p> <p>Requirement to identify family housing construction projects as new or current mission</p>

Section Number	Changes
	added
	Requirement to prepare Tri-Service Family Housing Cost Models using metric units of measure added.
	Capehart and Wherry mortgages data tables deleted.
	Component responsibilities for budgeting Homeowners Assistance Program costs added.
	Section 801 exhibit no longer required, exhibits renumbered.
060304	NATO Security Investment Program project level detail now required for budget submissions.
060401	Resolution Trust Corporation certification reference deleted.
	Requirement to prepare Military Construction and Family Housing budget submissions using metric units of measure added.
	Requirement to include name and phone number of project civil engineer on DD Forms 1391 added.
	Justification material printing/assembling instructions revised.
060502	New outyear project level exhibit added
	Tri-Service Family Housing Cost Model revised to reflect metric units of measure.
070201	Comptroller prior approval requirement for increases to BRAC environmental effort amounts added.
070301	Best projection of BRAC saving estimates based on what savings will actually accrue required
	35 percent design complete or parametric estimate required for BRAC projects included in budget submission.
	State list of BRAC construction projects required.
070502	Homeowners Assistance Program added to Exhibit BC-02.
080105	Minor Construction threshold updated.
080201	Minor Construction threshold updated.
090102	Clarifies guidance for establishment of DBOF activities.
	Provides codification of DBOF in Chapter 131 of Title 10 U.S.C.

Section Number	Changes
	of this Chapter.
	Adds Buildings Maintenance Fund to the requirements of this Chapter.
100102	Provides definition of unavailable collections for trust funds and O&M special funds which are required to be reported by Federal agencies in each annual budget submission to OMB in accordance with OMB Circular A-11, Sec 36.6.
100103	Deletes reference to Department of the Navy General Gift Fund, Profits from Sale of Ships Stores, Navy, U.S. Naval Academy Museum Fund and General Gift Fund, and Department of the Army General Gift Fund.
100202	Includes exhibit requirements for the Buildings Maintenance Fund.
	Includes exhibit requirements for the National Defense Sealift Fund, Procurement/Slip Acquisition, and National Defense Features.
	Deletes the PR-3 exhibit.
	Includes new exhibits for the National Defense Sealift Fund Ready Reserve Force (RRF-1, RRF-2 and RRF-3).
	Provides guidance for submission of all National Defense Sealift Fund Exhibits.
100301	Updates exhibit/schedule requirements for the Congressional justification/presentation.
150302	Exhibit OP-53(A) "Overseas Dependent Data" requirement and exhibit format deleted in section 1504
160301	JMIP added
160302	JMIP Congressional justification books will be prepared in accordance with supplemental instructions by C ³ I.
180104	Update references to reflect revised Life Cycle Management policy and procedures for information technology. The March 1996 edition of DoDD 5000.1 and DoD Regulation 5000.2-R are the new references.
180202	Paragraph C, Narrative Statement, is revised to reflect prior guidance/clarification.
180203	Automated Information System definition is updated.
	Current Services definition is revised for clarification.
	Depreciation Expense definition is revised to reflect prior guidance changes. Special instructions for the Defense Information Systems Agency are added to display metacenter capital asset depreciation.
	Information Technology Resources definition and Information Technology Resources

Section Number	Changes
	Reporting Exemptions definition are revised to cover prior guidance on allowable inclusions/exclusions.
	LCM Milestones definition is revised per DoDD 5000.1 and 5000.2-R.
	LCM Phases definition is revised per DoDD 5000.1 and 5000.2-R.
	Major AIS definition is revised per DoDD 5000.1 and 5000.2-R.
	Non Major AIS definition is revised to reflect prior guidance on having the reporting threshold for the BES equal the POM.
	All Other definition is revised to reflect prior guidance/clarification.
180204	Revised to reflect prior guidance/clarification.
180205	Section, CIM Infrastructure and Functional Areas, is rewritten to reflect prior guidance/clarification. The POM Core Infrastructure CIM functional areas were added to track with the POM data.
180206	A new Section on Financial Management Activities or Systems is added to highlight the need to reconcile data to Volume 2, Chapter 19.
180303	Section on Submission Requirements is updated to reflect the current office/organizational name changes.
180304	Section on Input for Summary IT Justification Books is updated for current office/organizational name changes, clarification, and to reflect prior guidance on the review /approval and distribution of exhibits including use of the of the electronic format and data base.
180402	Exhibit 43ES Instructions: Paragraph 3, Entries, is revised to reflect prior guidance/clarification on providing better explanation and summaries.
	Exhibit 43 Item 6, Personnel and summary item Workyears are expanded to reflect prior guidance.
	Exhibit 43 Instructions: Delete last sentence of paragraph 5.d, Software, so that software maintenance is reported under paragraph 5. e, Services or 5. f, Support Services. Item 5.h., Personnel, is expanded to breakout software, equipment maintenance, processing, communications, and other to reflect prior guidance. Reporting is not only for AIS resources but to all related IT resources such as base level management staffs, operations, engineering and maintenance. Item 5.i, Workyears, is expanded into Non-DBOF and DBOF to reflect prior guidance.
	Exhibit 43(IT-1) Last item XX on exhibit is revised to reflect prior guidance to display the appropriation and fund for development/modernization and

Section Number	Changes
	current services.
Exhibit 43(IT-1)	Instructions (par.2., par. 3.c., par 3.d., par 3.e., and par. 3.g.) are revised to reflect prior guidance/clarification.
Exhibit 43(IT-2)	Paragraph C is revised to eliminate the reporting of “Current Estimate” and adds clarification to paragraph F on displaying LCM Milestones.
Exhibit 43(IT-2)	Instructions: Paragraphs 1. Purpose and 2. Submission are revised for clarification, Paragraphs 3.b. and 3.c.(5.) are revised for clarification. Paragraph 3.c. is revised to eliminate the reporting of “current estimate” for both life cycle and program cost since it is not being used. Also, changes are made to reflect prior guidance/clarification on better explanations.
Exhibit 43(IT-2)	Instructions Paragraphs 3.e., System Description, and 3.f., Program Accomplishments and Plans are revised to reflect prior guidance/clarification. Paragraph 3.h, Changes, is revised to reflect prior guidance/clarification. Both areas need better explanations of changes.
Exhibit 43(IT-4)	Exhibit and Instructions Workyears is added to each CDA subtotal to reflect prior guidance. Also adds clarification on reporting total cost, both contractor and in-house.
190101	Revised to reflect Chapter 19 content changes.
190200	Security Activities - Section deleted.
190400	Exhibit T&E-1 Added requirement for 2 copies of Exhibit T&E-1 for DTSE&E, DOT&E, and OUSD(C) P/B.
190501	Revised for changed Comptroller responsible office and data requirement changes.
190502	Credit management and Debt Collection Activities section deleted - not required by OMB A-11.
190600	GPRA Guidance added.
190700	Civilian Civil Rights Programs - Section deleted.
190802	Revises guidance and provides additional definitions on Federal credit programs.
190902	Exhibit requirements and titles revised.
191001	Intelligence and Communications Program Elements updated
191202	Security Activities exhibits (SA-1 thru 11) deleted.

Section Number	Changes
191203	Old section renumbered as 191202
191204	Old section renumbered as 191203
191204	New section 191204 with the following changes: Exhibit PB-15 title changed from “Consulting Services” to “Advisory and Assistance Services”. Exhibit PB-19 Intermediate Range Nuclear Force deleted. Exhibit PB-20 External Public Affairs deleted. Exhibit PB 28 Environmental revised. Exhibit PB-50 Child Development Programs revised and retitled to Child Development, Family Centers, and Family Advocacy Programs.
191205	Old section: Civilian Civil Rights exhibits (53 series) deleted.
191206	Renumbered as 191204
191207	Renumbered as 191205

CHAPTER 1

GENERAL INFORMATION

0101 GENERAL POLICIES

010101 Purpose

A. Volume 2 of the Financial Management Regulation (FMR) provides general guidance on the formulation and submission of the budget requests to the Office of the Secretary of Defense for the fall budget review and the presentation and justification of the budget requests to the Congress. This volume is established under the authority of DoD Instruction 7000.14.

B. Volume 2 of the FMR is intended as a comprehensive reference book on budget matters of the Department of Defense. Budget policy memoranda issued throughout the year will provide any necessary changes or revisions to this standing document, as well as special instructions and nonrecurring requirements unique to that year's budget cycle.

C. The provisions of Volume 2 apply to all military and civil functions of the Department of Defense including military assistance.

D. An introduction to the total Financial Management Regulation, DoD 7000.14-R can be found in Volume 1 of the Regulation.

010102 Organization

A. Volume 2 is organized into 19 chapters that provide specific guidance, required budget exhibits and formats along with instructions for their preparation, and automated submission requirements.

010103 Changes to Volume 2

A. Changes to Volume 2 will be issued biennially, prior to the fall budget review of the initial biennial budget cycle. Pen and ink changes will not be used.

B. Generally, significant changes on a page will be indicated by the paragraph or section containing a change being printed in *ITALICS*.

010104 Reports Control Symbol

Data requirements established by this volume are exempt from the requirement for assignment of a Report Control Symbol.

010105 Requests for Exceptions to OMB Circular A-11

A. Each year the Office of Management and Budget (OMB) issues Circular No. A-11 which addresses the preparation and submission of budget estimates for all Federal Agencies.

B. Federal agencies are allowed to request exceptions to the requirements of Circular A-11 by submitting in writing to OMB all required exceptions by August 1. Exceptions approved by OMB are valid only for 1 year.

C. Each year the USD(Comptroller) requests certain exceptions to OMB Circular A-11. Generally, these exceptions concern special situations that are unique to the Department of Defense.

1. Subsequent to the issuance of Circular A-11 by OMB each year, any DoD Component requiring an exception to the requirements of Circular A-11 should submit in writing the specific section for which an exception is required and provide adequate rationale to justify the exception. The memorandum addressing the requested exceptions should be submitted directly to the Office of the USD(Comptroller), Program/Budget, Plans and Systems Directorate (Room 3A862, telephone (703) 697-9171) no later than July 15 of each year.

2. If the requested exception is acceptable to the USD(Comptroller), these proposals will be consolidated and forwarded to OMB for approval. Components will be advised of any exceptions approved by OMB.

3. All DoD Components are required to comply with any requested exceptions not approved and to properly reflect the information in the budget submissions.

010106 Proposed Changes in Budget Structure and Appropriation Language

A. Under the provisions of OMB Circular A-11, the following types of changes must be cleared with OMB:

1. Changes in the appropriation pattern, including proposed new accounts and changes in the titles and sequence of existing accounts.
2. Changes in the methods of funding a program.
3. Changes in program or budget activity classifications for the program and financing schedules for all appropriation accounts and funds.

B. Any proposed changes on the items listed above must be submitted in a memorandum to the Office of the USD(Comptroller), that explains the proposal and the rationale for the changes. If acceptable to the USD(Comptroller), these proposals will be forwarded to OMB for approval.

C. Proposed changes in the wording of appropriation language should be submitted to the Office of the Deputy General Counsel (Fiscal) (Room 3D961, telephone (703)695-5864) as soon as possible after the passage of the current year's appropriation act. ODGC(Fiscal) will accomplish coordination with OMB.

010107 Budget Terminology/Definitions

A. Standard Government-wide definitions of budget terminology are provided in the Office of Management and Budget issuance's, most notably Circulars A-11 (*Section 14.1*) and A-34 (Chapter 2).

B. For the Department of Defense, some of the more common budget concepts applicable to budget formulation follow:

1. Accrual Basis of Accounting:
A method of accounting in which revenues are recognized in the period earned and costs are recognized in the period incurred, regardless of when payment is received or made. There have been many initiatives over the years to convert the

Federal Budget to an accrual accounting basis. Although the budget is on a cash basis, DoD accounting is on the accrual basis.

2. Advance Procurement:
Authority provided in an appropriations act to obligate and disburse during a fiscal year before that in which the related end item is procured. The funds are added to the budget authority for the fiscal year and deducted from the budget authority of the succeeding fiscal year. Used in major acquisition programs for advance procurement of components whose long-lead-time require purchase early in order to reduce the overall procurement lead-time of the major end item. Advance procurement of long lead components is an exception to the DoD "full funding" policy and must be part of the President's budget request.

3. Appeal: A request for reconsideration of an action taken to adjust, reduce, or delete funding for an item during the congressional review of the defense budget (authorization and appropriation). This process is discussed in Section 010406.

4. Apportionment: A distribution by the Office of Management and Budget of amounts available for obligation in appropriation or fund accounts of the Executive Branch. The distribution makes amounts available on the basis of specified time periods, programs, activities, projects, objects, or combinations thereof. The apportionment system is intended to achieve an effective and orderly use of funds. The amounts so apportioned limit the obligations that may be incurred.

5. Appropriations: A provision of legal authority by an act of the Congress that permits Federal agencies to incur obligations and to make payments out of the Treasury for specified purposes. An appropriation usually follows enactment of authorizing legislation. An appropriation act is the most common means of providing budget authority (see Budget Authority). Appropriations do not represent cash actually set aside in the Treasury for purposes specified in the appropriation act; they represent limitations of amounts which agencies may obligate during the time period specified in the respective appropriation acts.

6. Authorization (Authorizing Legislation): Basic substantive legislation enacted by the Congress which sets up or continues the legal operation of a Federal program or agency either indefinitely or for a specific period of time or sanctions a particular type of obligation or expenditure within a program. Such legislation is normally a prerequisite for subsequent appropriations or other kinds of budget authority to be contained in appropriation acts. It may limit the amount of budget authority to be provided subsequently or may authorize the appropriation of "such sums as may be necessary."

7. Biennial Budget: The FY1986 Department of Defense Authorization Act required the submission of two-year budgets for the Department of Defense and related agencies beginning with FY 1988/FY 1989. The Department has fully institutionalized a biennial cycle for the Planning, Programming, and Budgeting System (PPBS), including the Defense Guidance (DG), the Program Objective Memorandum (POM), Volume 2 of the Financial Management Regulation (FMR) and budget formulation memoranda. A biennial budget, as currently structured, represents program budget estimates for a two-year period in which fiscal year requirements remain separate and distinct.

8. Budget Activity: Categories within each appropriation and fund account which identify the purposes, projects, or types of activities financed by the appropriation or fund.

9. Budget Amendment: A formal request submitted to the Congress by the President, after his formal budget transmittal but prior to completion of appropriation action by the Congress, that revises previous requests, such as the amount of budget authority.

10. Budget Authority: The authority becoming available during the year to enter into obligations that result in immediate or future outlays of Government funds.

11. Budget Deficit: The amount by which the Government's budget outlays exceed its budget receipts for any given period. Deficits are financed primarily by Treasury borrowing from the public.

12. Budget Receipts: Amounts received by the Federal Government from the public that arise from the exercise of governmental or sovereign power (primarily tax revenues, but also receipts from premiums of compulsory social insurance programs, court fines, license fees, etc.); premiums from voluntary participants in Federal social insurance programs; and gifts and contributions. Excluded from budget receipts are collections resulting from business-type transactions and payments between government accounts as a result of intragovernmental transactions.

13. Closed (Canceled) Accounts: An appropriation that is no longer available for the adjustment or payment of obligations. Appropriations are closed (canceled) after being in the expired status for five years. Once these appropriations are closed (canceled), no payments or adjustments maybe made. (See Expired Appropriation.)

14. Concurrent Resolution: A resolution passed by both Houses of Congress, but not requiring the signature of the President, setting forth, reaffirming, or revising the congressional budget for the United States Government for a fiscal year. A concurrent resolution on the budget, due by April 15, must be adopted before legislation providing new budget authority, new spending authority, new credit authority or changes in revenues or the public debt limit is considered. Other concurrent resolutions for a fiscal year may be adopted at any time following the first required concurrent resolution for that fiscal year.

15. Constant Dollars: A dollar value adjusted for changes in prices. Constant dollar series are derived by dividing current dollar estimates by appropriate price indices, a process generally known as deflating. The result is a time series as it would presumably exist if prices were the same throughout as in the base year -in other words, as if the dollar had constant purchasing power. Any changes in such a series would reflect only changes in the real (physical) volume of output. Constant dollar figures are commonly used for gross national product and its components.

16. Continuing Resolution: Legislation enacted by the Congress to provide

budget authority for specific ongoing activities in cases where the regular fiscal year appropriation for such activities has not been enacted by the beginning of the fiscal year. The continuing resolution usually specifies a maximum rate at which the agency may incur obligations, based on the rate of the prior year, the President's budget request, or an appropriation bill passed by either or both Houses of the Congress.

17. Controllability: The ability under existing law to control budget authority or outlays during a given fiscal year. "Relatively uncontrollable" usually refers to spending that cannot be increased or decreased without changes in existing substantive law. At the Federal budget level, the largest part of such spending is the result of open-ended programs and fixed costs, such as social security and veterans' benefits. For defense, controllability is limited by the payments due under obligations incurred during prior years.

18. Current Services Estimates: Estimated budget authority and outlays for the upcoming fiscal year based on continuation of existing levels of service, i.e., assuming that all programs and activities will be carried on at the same level as in the fiscal year in progress and without policy changes in such programs and activities. These estimates of budget authority and outlays, accompanied by the underlying economic and programmatic assumptions upon which they are based (such as the rate of inflation, the rate of real economic growth, pay increases, etc.), are required to be transmitted by the President to the Congress.

19. Deferral of Budget Authority: Any action or inaction by any officer or employee of the United States that withholds, delays, or effectively precludes the obligation or expenditure of budgetary resources, including the establishment of reserves under the Antideficiency Act, as amended by the Impoundment and Control Act. Section 1013 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting a proposed deferral of budget authority. Deferrals may not extend beyond the end of the fiscal year in which the message reporting the deferral is transmitted and may be overturned by the passage of an impoundment resolution by either House of Congress.

20. Disbursements: In budgetary usage, gross disbursements represent the amount of checks issued, cash, or other payments made, less refunds received. Net disbursements represent gross disbursements less income collected and credited to the appropriation or fund account, such as amounts received for goods and services provided.

21. Expenditures/ Disbursements: A term generally used interchangeably with outlays.

22. Expired Appropriation: An appropriation whose period of availability for incurring new obligations has expired but the appropriation is not closed (canceled). During this period, the appropriation is available for adjustment to, or payment of, existing obligations. Appropriations remain in an expired status for five years as shown in the table below. At the end of the five-year expiration period, the appropriation is closed (canceled) and is no longer available for the payment of unliquidated obligations. (See Closed (Canceled) Accounts.)

Life Cycle of Appropriations:

	New Obliga- tions	Years For	
		Obligation Adjust. & Disburse.	Closed End of Year
<u>Approp</u>	<u>Unexpired</u>	<u>Expired</u>	<u>Canceled</u>
MilPers	1	2-6	6
O&M.	1	2-6	6
RPM,D	2	3-7	7
RDT&E	2	3-7	7
Proc.	3	4-8	8
SCN	5	6-10	10
Mil. Con.	5	6-10	10

23. Federal Debt: Federal debt consists of public debt and agency debt. Public debt is that portion of the Federal debt incurred when the Treasury Department or Federal Financing Bank (FFB) borrows funds directly from the public or another fund or account. Agency debt is that portion of the Federal debt incurred when a Federal agency authorized by law, other than Treasury or the Federal Financing Bank, borrows funds directly from the public or another fund or account.

24. Fiscal Year: Any yearly accounting period without regard to its relationship to a calendar year. The fiscal year for the Federal Government begins on October 1 and ends on September 30. The fiscal year is designated by the calendar year in which it ends. Fiscal years are further designated as follows:

Past Year-1: Also referred to as Prior Year-1, the fiscal year immediately preceding the past year.

Past Year (PY): Also referred to as Prior Year, the fiscal year immediately preceding the current year; the last completed fiscal year.

Current Year (CY): The fiscal year in progress. Immediately precedes the budget year.

Budget Year (BY): *The next fiscal year for which estimates are submitted if not a biennial budget.*

Budget Year 1 (BY1): *In a biennial budget submission (Department of Defense), the first fiscal year of a two-year period for which the budget is being considered.*

Budget Year 2 (BY2): *In a biennial budget submission (Department of Defense), the second fiscal year of a two-year period for which the budget is being considered*

Budget Year(s)+1 (BY(s)+1): *The fiscal year immediately following the budget year(s). This format continues through Budget Year +5 (BY+5), the fifth fiscal year following the budget year(s).*

25. Full Funding Policy: The practice of funding the total cost of major procurement and construction projects in the fiscal year in which they will be initiated. See Section 010202 for further information.

26. Full-time Equivalent (FTE). *Reflects the total number of regular straight-time hours (i.e., not including overtime or holiday hours) worked by employees divided by the number of compensable hours applicable to each fiscal year. Annual leave, sick leave and compensatory time of and other approved leave categories are considered to be "hours worked" for purposes of defining full-time equivalent employment.*

27. Future Years Defense Program (FYDP): The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data and force structure over a six-year period (force structure for an additional 3 years), portraying this data by major force program for internal DoD review and by appropriation for congressional review.

28. Impoundment: Any action or inaction by an officer or employee of the United States that precludes the obligation or expenditure of budget authority provided by the Congress,

29. Impoundment Resolution: A resolution of the House of Representatives or the Senate disapproving a deferral of budget authority set forth in a special message ordinarily transmitted by the President under section 1013 of the Impoundment Control Act of 1974. Passage of an impoundment resolution by either House of Congress has the effect of overturning the deferral and requires that such budget authority be made available for obligation.

30. Incremental Funding: The phasing of total funding of programs or projects over two or more fiscal years based upon levels and timing of obligational requirements for the funds. Differs from full funding concept where total funds for an end item, program or project are provided in the fiscal year of program or project initiation, regardless of the obligational requirement for the funds.

31. Multiyear Procurement: Procurement of a particular end item or system under a multiyear contract approved by specific provision of law. For the Department of Defense, multiyear procurement contracting of military hardware or systems must be specifically, and individually, approved by the Congress.

32. Object Classification: A uniform classification identifying the transactions of the Federal Government by the nature of the goods or services purchased without regard to the agency involved or the purpose of the programs for which they are used.

33. Obligations: Amounts of orders placed, contracts awarded, services received, or similar transactions made by Federal

agencies during a given period, which will require outlays during the same or some future period.

34. Outlays: The amount of checks issued or other payments made (including advances to others), net of refunds and reimbursements. Outlays are net of amounts that are adjustments to obligational authority. The terms “expenditure” and “net disbursement” are frequently used interchangeably with the term “outlay”. Gross outlays are disbursements and net outlays are disbursements (net of refunds) minus reimbursements collected.

35. President’s Budget: The budget for a particular fiscal year transmitted to the Congress by the President in accordance with the Budget and Accounting Act of 1921, as amended. Some elements of the budget, such as the estimates for the legislative branch and the judiciary, are required to be included without review by the Office of Management and Budget or approval by the President.

36. Program Budget Decision (PBD): A budget decision document issued during the joint review of Service budget submissions by analysts of the Office of the Secretary of Defense (OSD) and the Office of Management and Budget (OMB). PBDs reflect the decisions of the Secretary of Defense as to appropriate program and funding to be included in the annual defense budget request which, in turn, is included in the President’s Budget.

37. Program Decision Memorandum (PDM): A document containing the decisions by the Secretary of Defense on the program and resource levels identified in the Program Objectives Memorandum.

38. Program Objectives Memorandum (POM): The final product of the programming process within the Department of Defense, the Program Objectives Memorandum (POM) displays the resource allocation decisions of the Military Departments in response to and in accordance with Defense Guidance.

39. Program Year: The fiscal year in which authorization was provided and in which funds were appropriated for a particular program, regardless of the fiscal year in which funds for that program might be obligated.

40. Reapportionment: A revision by the Office of Management and Budget of a previous apportionment of budgetary resources for an appropriation or fund account. A revision would ordinarily cover the same period, project, or activity covered in the original apportionment.

41. Reappropriation: Congressional action to restore the obligational availability, whether for the same or different purposes, of all or part of the unobligated portion of budget authority that has expired or would otherwise expire in an annual or multi-year account. Obligational authority in a current account may also be extended by a subsequent appropriation act.

42. Reconciliation Process: A process used by the Congress to reconcile amounts determined by tax, spending, and debt legislation for a given fiscal year with the ceilings enacted in the second and required ‘concurrent resolution on the budget for that year. Section 310 of the Congressional Budget and Impoundment Control Act of 1974 provides that the second required concurrent resolution on the budget, which sets binding totals for the budget, may direct committees to determine and recommend changes to laws, bills, and resolutions, as required to conform with the binding totals for budget authority, revenues, and the public debt.

43. Recovery of Prior Year Obligations: Amounts made available in no year and unexpired multi-year accounts through downward adjustment of prior year obligations.

44. Reimbursements: Sums received by the Government for commodities sold or services furnished either to the public or to another Government account that are authorized by law to be credited directly to specific appropriation and fund accounts. These amounts are deducted from the total obligations incurred (and outlays) in determining net obligations (and outlays) for such accounts.

45. Reprogramming: Utilization of funds in an appropriation account for purposes other than those contemplated at the time of appropriation. Reprogramming is generally accomplished pursuant to consultation with and approval by appropriate congressional

committees. Instructions will be contained in Volume 3 of this regulation.

46. Rescission: The consequence of enacted legislation which cancels budgetary resources previously provided by the Congress prior to the time when the authority would otherwise lapse. Section 1012 of the Impoundment Control Act of 1974 requires a special message from the President to the Congress reporting any proposed rescission of budgetary resources. These proposals may be accepted in whole or in part through the passage of a rescission bill by both Houses of the Congress.

47. Rescission Bill: A bill or joint resolution that provides for cancellation, in whole or in part, of budgetary resources previously granted by the Congress. Under Section 1012 of the Impoundment Control Act of 1974, unless Congress approves a rescission bill within 45 days of continuous session after receipt of the proposal, the budgetary resources must be made available for obligation.

48. Revolving Fund: A fund established to finance a cycle of operations through amounts received by the fund. Within the Department of Defense, such funds include the Defense Business Operations Fund, as well as other working capital funds.

49. Sequestration: The reduction or cancellation of new budget authority; unobligated balances, new loan guarantee commitments or limitations; new direct loan obligations, commitments, or limitations; spending authority; and obligation limitations. OMB Circular A-11, section 14.2(e) provides additional guidance on sequestration rules of the Budget Enforcement Act of 1990 (BEA).

50. Supplemental Appropriation: An act appropriating funds in addition to those in an annual appropriation act. Supplemental appropriations provide additional budget authority beyond original estimates for programs or activities (including new programs authorized after the date of the original appropriation act) for which the need for funds is too urgent to be postponed until enactment of the next regular appropriation act.

51. Total Obligational Authority (TOA) Availability: The sum of (1) all budget authority granted (or requested) from the Congress in a given year, (2) amounts authorized to be credited to a specific fund, and (3) unobligated balances of budget authority from previous years which remain available for obligation. In practice, this term is used primarily in discussing the Department of Defense budget, and most often refers to TOA as "program" which equates to only (1) and (2) above.

52. Transfer Authority: Authority provided by the Congress to transfer budget authority from one appropriation or fund account to another.

010108 Security Classifications

A. General

1. Instructions concerning premature disclosure of budget information prior to presentation to the Congress are contained in OMB Circular A-11.

2. Instructions concerning security classification of the budget estimates submissions to OSD are contained in Section 010305.

3. Instructions concerning security classification of congressional justification material are contained in Section 010401.

B. Classification of Procurement Exhibit P-1 line items, RDT&E Exhibit R-1 line items, and the Construction Programs (C-1):

1. Procurement Exhibit P-1 line items: P-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program's Security Classification Guide so dictates and when conditions in paragraph C.1. (below) apply.

2. RDT&E Exhibit R-1 line items: R-1 line items will be unclassified to the maximum extent possible. Classify only those line items for which the program's Security Classification Guide so dictates and when conditions in paragraph C.1. (below) apply.

3. The Construction Programs (C-1) is designed to be an unclassified document. See Section 010504 for instructions.

C. Security Classification of National Foreign Intelligence Program (NFIP) Budget Resource Information:

1. Unless other specific NFIP program guidance in effect requires a higher classification

a. Information which, standing alone or in aggregate, reveals any Program Element total of the funding or manpower requirements of any program in the NFIP will be classified SECRET.

b. Information which permits the disclosure of any Program Element total of the funding or manpower requirements of any program in the NFIP, for example, through a subtractive process, will be classified SECRET.

c. Information which, standing alone or in aggregate, reveals overall DoD Component funding or manpower levels of the NFIP or its programs will be classified SECRET.

d. Whenever NFIP funding and manpower resource detail is combined with other unclassified programs in such a way as to effectively mask the NFIP resource Program Element total, such combined resource Program Element total may be treated as unclassified.

2. Documents containing NFIP resource detail that is classified on the basis of this guidance shall be marked, for example:

CLASSIFIED BY DCI memo on 22 Dec 96
DECLASSIFY ON OADR

3. The above guidance applies only to the program and budget preparatory process.

4. Requests for clarification of the foregoing classification guidance should be forwarded to ASD(C³I), Director of Information Security. Questions of application will be coordinated with the Intelligence Community

Management Staff and responses will be disseminated to all interested DoD components.

5. *Classified justification material must use the appropriate classified cover sheet for all copies.*

0102 FUNDING POLICIES

010201 Criteria for Determining Expense and Investment Costs

A. Appropriation or fund accounts form the structure for the President's budget request and are the basis for congressional action. The appropriations are further organized into budget titles of appropriations with programs, projects or activities of similar purposes. To support management of the Department of Defense's programs, projects or activities, resource requirements should be organized and categorized consistently within the appropriation and budget title structure. The following sections provide guidance for categorizing resource requirements into the various appropriations.

B. Basic Distinctions Between Expense and Investment Costs. The following guidance is provided to determine whether a cost is either an expense or an investment. All costs are classified as either an expense or an investment.

1. Expenses are the costs incurred to operate and maintain the organization, such as personal services, supplies and utilities.

2. Investments are the costs that result in the acquisition of, or an addition to, end items. These costs benefit future periods and generally are of a long-term character such as real property and personal property.

The criteria for cost definitions consider the intrinsic or innate qualities of the item such as durability in the case of an investment cost or consumability in the case of an operating cost and the conditional circumstances under which an item is used or the way it is managed. In all cases where the definitions appear to conflict, the conditional circumstances will prevail.

C. Policy for Expense and Investment Costs.

1. DoD policy requires cost definition criteria that can be used in determining the content of the programs and activities that comprise the Defense budget. The primary reasons for these distinctions are to allow for more informed resource allocation decisions and to

establish criteria for determining which costs are appropriate to the various defense appropriations.

2. The cost definition criteria contained in this policy are only applicable to the determination of the appropriation to be used for budgeting and execution. Cost definitions for accounting purposes are contained in Volume I of this regulation.

3. Costs budgeted in the Operation and Maintenance (O&M) and Military Personnel appropriations are considered expenses. Costs budgeted in the Procurement and Military Construction appropriations are considered investments. Costs budgeted in the Research, Development, Test and Evaluation (RDT&E), Base Realignment and Closure (BRAC), and Family Housing appropriations include both expenses and investments. Definitions for costs within the Defense Business Operations Fund are provided in Chapter 9 and Section 010212.

4. Items procured from the Defense Business Operations Fund will be treated as expenses in all cases except when intended for use in weapon system outfitting, government furnished material (GFM) on new procurement contracts, or for installation as part of a weapon system modification, major reactivation or service life extension.

D. Procedures for Determining Expenses Versus Investments. The following criteria will be used to distinguish those types of costs to be classified as expenses from those to be classified as investments for budgeting purposes:

1. Expenses. Expenses are costs of resources consumed in operating and maintaining the Department of Defense. When costs generally considered as expenses are included in the production or construction of an investment item, they shall be classified as investment costs. Military personnel costs are an exception to this rule. The following guidelines shall be used to determine expense costs:

- Labor of civilian, military, or contractor personnel.
- Rental charges for equipment and facilities.

- Food, clothing, and fuel.
 - Supplies and materials designated for supply management of the Defense Business Operations Fund.
 - Maintenance, repair, overhaul, and rework of equipment, with the exception of investment funded parts.
 - Assemblies, spares and repair parts, and other items of equipment that are not designated for centralized item management and asset control and which have a system unit cost less than the currently approved dollar threshold of \$25,000 for FY 1994 (Section 8092 of the FY 1994 DoD Appropriations Act), \$50,000 for FY 1995 (Section 8076 of the FY 1995 DoD Appropriations Act) and \$100,000 for FY 1996 (Section 8065 of the FY 1996 DoD Appropriations Act) for expense and investment determinations. *Beginning in FY 1997, subject to congressional approval, there is no dollar threshold.* This criterion is applied on the basis of the unit cost of a complete system rather than on individual items of equipment or components that, when aggregated, become a system. The concept of a system must be considered in evaluating the procurement of an individual end item. A system shall be considered to exist if a number of components are part of and function within the context of a whole to satisfy a documented requirement; in this case, system unit cost applies to the aggregate cost of all equipment items being acquired as a new system.
 - Real property maintenance, including facility maintenance and repair and Operation and Maintenance funded minor construction projects,
2. Investments. Investments are acquisition costs of capital assets of the Department of Defense such as real property and equipment. The following criteria shall be used to determine those costs to be classified as investments:
- All items of equipment, including assemblies, ammunition and explosives, modification kits, spares and repair parts not managed by the Defense Business Operations Fund, that are subject to centralized item management and asset control to satisfy Servicewide, Defense Agency, Defense Field Activity requirements.
 - All equipment items that are not subject to centralized item management and asset control and that have a system unit cost equal to or greater than the currently approved expense and investment dollar threshold of \$25,000 for FY 1994 (Section 8092 of the FY 1994 DoD Appropriations Act), \$50,000 for FY 1995 (Section 8076 of the FY 1995 DoD Appropriations Act) and \$100,000 for FY 1996 (Section 8065 of the FY 1996 DoD Appropriations Act). *Beginning in FY 1997, subject to congressional approval, there is no dollar threshold.* The validated requirement may not be fragmented or acquired in a piecemeal fashion in order to circumvent the expense and investment criterion's policy.
 - Construction, including the cost of land and rights therein (other than leasehold). Construction includes real property equipment installed and made an integral part of such facilities, related site preparation, and other land improvements. (See paragraph F below for special guidance concerning real property facilities.)
 - The costs of kits, assemblies, equipment, and material for modernization programs, ship conversions, major reactivation, major remanufacture programs, major service life extension programs, and the labor associated with incorporating these efforts into or as part of the end item is considered investments. All items included in the modification kit are considered investment even though some of the individual items may otherwise be considered as an expense. The cost of labor, incidental material and items required by the installing activity for the installation of modification kits and assemblies is an investment.
 - Supply management items of the Defense Business Operations Fund designated for weapon system outfitting, government-furnished material on new procurement contracts, or for installation as part of a weapon system modification or modernization, major reactivation or service life extension.
 - Also considered as investments are support elements such as data, factory training, support equipment and interim contractor support (ICS), which are required to support the procurement of a new weapon system, modification, overhaul, etc.

3. Conditional Cases. The following are conditional cases that take precedence over the criteria contained in paragraphs 1 and 2 above:

- Initial outfitting of an end item of investment equipment, such as a ship or aircraft, with the furnishings, fixtures, and equipment necessary to make it complete and ready to operate is a part of the initial investment cost. Material procured through the Defense Business Operations Fund for initial outfitting will be financed by procurement appropriations when drawn from the supply system. This concept includes changes to the allowance lists of ships, vehicles, and other equipment. Changes to allowance lists will be budgeted as investment costs.
- Initial outfitting of a facility construction project financed by a Military Construction appropriation is financed as either expense or investment based on the general criteria. Collateral equipment and furnishings are not considered construction costs since these items are movable and are not installed as an integral part of the facility.
- When family housing is initially outfitted with kitchen equipment to include refrigerator, shades, carpeting, etc., these items are considered part of the construction costs.
- Construction program costs, associated with construction management in general, as distinguished from supervision of specific construction projects, are expenses. Costs incident to the acquisition (i.e., design, direct engineering, technical specifications) and construction of a specific project are investments. The cost of administering the real property maintenance program is an expense at all levels.
- Costs of minor construction projects, not financed by Military Construction appropriations, meeting the current criterion for funding from appropriations available for operation and maintenance are considered expenses. However, this definition does not abrogate the prohibition against the planned acquisition of, or improvements to, a real property facility through a series of minor construction projects (i.e., incremental construction).

- The cost of civilian personnel compensation and other direct expenses (i.e., travel, office equipment leasing, maintenance, printing and reproduction) incurred in support of procurement and/or production programs by departmental headquarters staff, contracting offices, contract audit offices, system project offices, and acquisition managers are expenses. Procurement and/or production direct support costs such as production testing, quality assurance, production engineering, and equipment assembly, whether performed under contract or by in-house personnel funded on a reimbursable basis are investments.
- When investment equipment is to be installed in a real property facility, the costs of both the equipment and its installation are considered investments.

E. Special Guidance Concerning General Purpose Communications and ADPE Procurement.

The following is guidance to apply the expense and investment criteria to general purpose communications and automatic data processing equipment procurement.

1. New Equipment and System Procurement. The aggregate cost of new equipment and systems, including peripherals and system unique software, procured to address a validated requirement as stated in an approved requirement document will be used to determine whether it should be treated as an expense or investment cost. The determination of expense or investment cost will be applied on the basis of each system in the requirements document, if the document includes more than one system.

2. Additional or Replacement Equipment and System Procurement. When new requirements necessitate adding, replacing or modifying equipment or software that is a component of, or supports the functioning of an existing system, only the additional equipment and software procurement costs will be used to determine whether it should be treated as an expense or investment cost. Upgrades to an existing system involving multiple equipment component and software changes that are

combined to address validated system deficiencies or to improve system performance will be treated as new equipment or system procurement in determining the applicability of the expense and investment criteria.

3. Requirements Determinations.

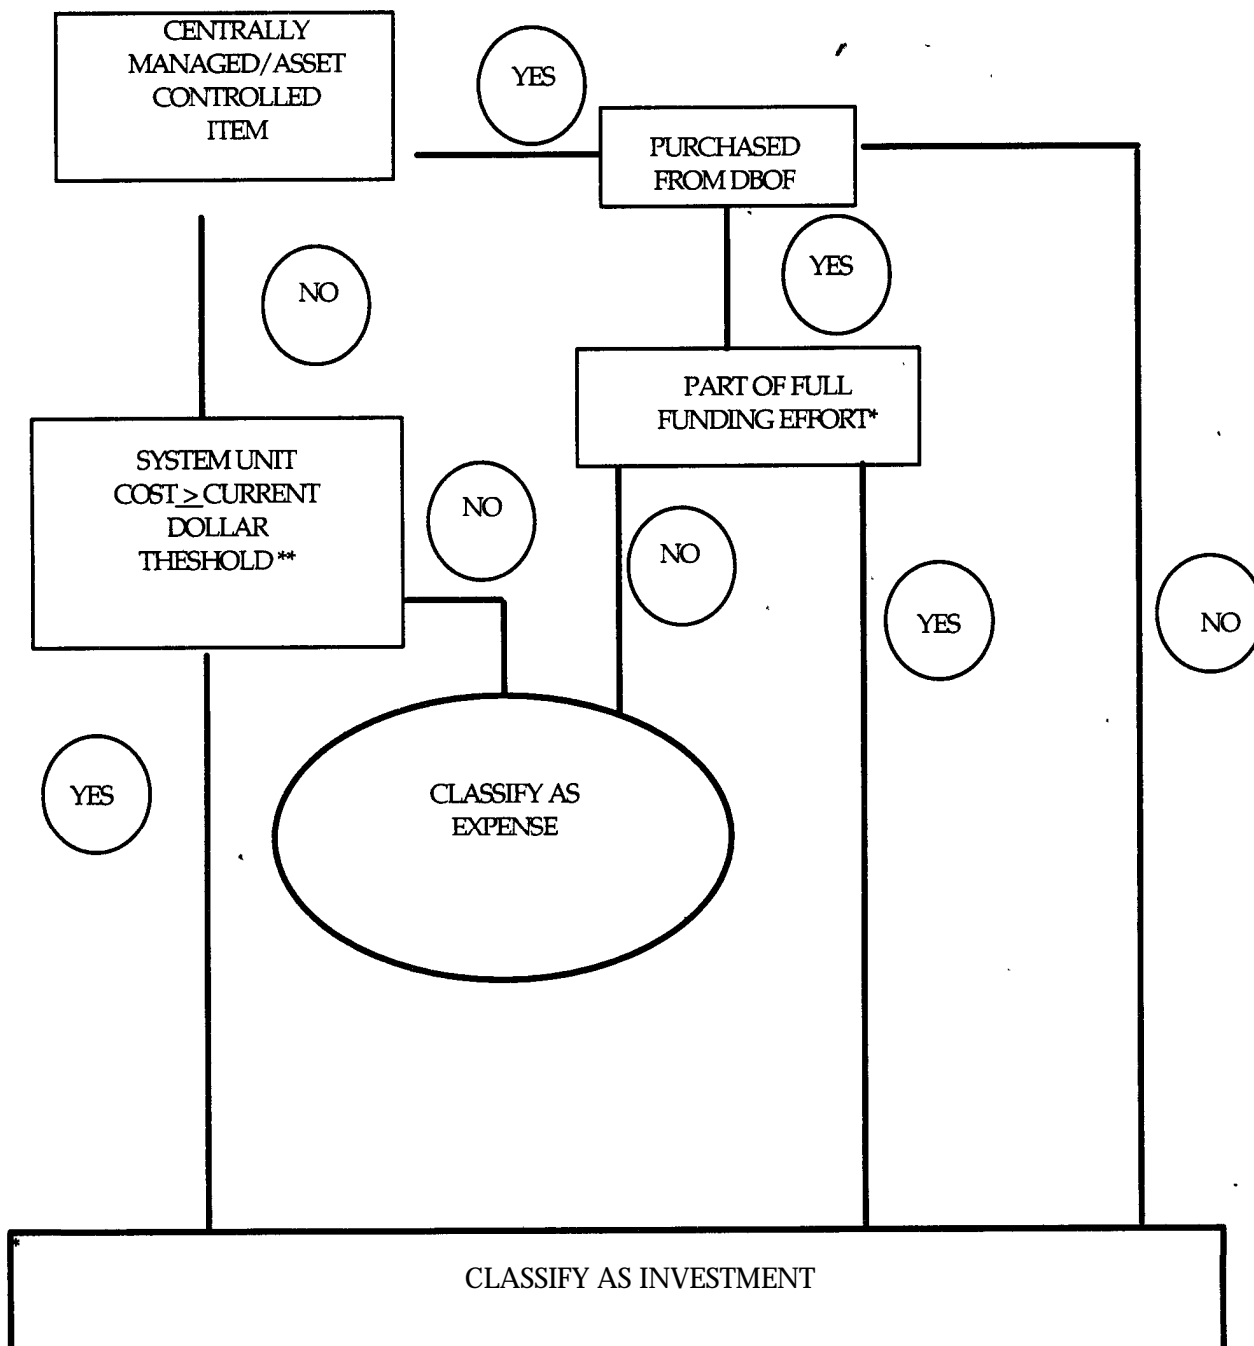

The validated requirement for, or upgrade to, a communications or automatic data processing system may not be fragmented or acquired in a piecemeal fashion in order to circumvent the expense and investment criteria policy.

F. Special Guidance Concerning Real Property Facilities

1. Construction includes real property equipment (often called installed equipment) which is affixed and built into a facility as an integral part of a facility. The cost of this equipment and its installation is part of the construction cost.

2. Items of equipment that are movable in nature and not affixed as an integral part of a facility are not normally considered construction costs, except for initial outfitting of family housing, as detailed in Paragraph 3.c. above. This equipment includes all types of production, processing, technical, ADPE, communications, training, servicing and RDT&E equipment. The cost of this equipment is an expense or an investment according to the policy criteria above. In addition, modifications to an existing facility required to support the installation of movable equipment, such as the installation of false floors or platforms, prefabricated clean rooms, or utilities, will be considered an integral part of the equipment costs and, as such, either expense or investment, as long as the modifications do not include structural changes to the building. If the modifications include structural changes, they will be considered investment costs and budgeted as construction.

INVESTMENT COST DECISION

* When intended for use in weapon system outfitting government furnished material on new procumbent contracts or for installation as part of a weapon as part of a weapon system modification, major deactivation of service life extension.

** The threshold is \$25,000 for FY 1994 Section 8092 of the FY 1994 DoD Appropriations Act), \$50,000 for FY 1995 (Section 8076 of the FY 1995 DoD Appropriations Act), and \$100,000 for FY 1996 (Section 8065 of the FY 1996 DoD Appropriations Act). Beginning in FY 1997, subject to congressional approval, there is no dollar threshold.

010202 Full Funding of Procurement Programs

A. Policy for Full Funding.

It is the policy of the Department of Defense to fully fund procurements that are covered within the procurement title of the annual DoD Appropriations Act. There are 2 basic policies concerning full funding.

1. The first is to provide funds at the outset for the total estimated cost of a given program so that the Congress and the public can be fully aware of the dimensions and cost when the program is first presented in the budget.

2. *The second is to provide funding each fiscal year to procure a complete, usable end item. In other words, an end item budgeted in a fiscal year cannot depend upon a future year's funding to complete the procurement. However, efficient production of major defense systems has necessitated two general exceptions to this policy--advance procurement for long lead-time items and advance economical order quantity (EOQ) procurement. EOQ is normally associated with multiyear procurements but can be requested for annualized procurements on an exception basis for unusual circumstances. Both efforts must be identified in an Exhibit P-10, Advance Procurement, when the Budget Estimates Submission is submitted to OSD and when President's budget request is submitted to Congress.*

B. Procedures for Full Funding

1. Cost Estimates. Full funding applies to an initial estimate and can exist only at a point in time because estimates change. However, the Future Years Defense Program (FYDP) shall be a consistently reliable foundation for stating the total cost of acquiring defense systems. Thus, the FYDP shall reflect a DoD Component's best estimate of the end cost of a program. The estimate should reflect the most likely cost of a procurement. Program estimates shall be kept current and fully financed through the Planning, Programming, and Budgeting System (PPBS) process and established reprogramming procedures.

2. Time-Phased Procurement. Within defense system acquisition programs, nonrecurring costs and costs of certain production items related to, but not integral to, the end item of equipment are considered part of the overall acquisition cost. DoD Components shall plan and

budget in a manner to ensure completion of the nonrecurring effort or delivery of such production items consistent with the planned delivery of the associated end items. That is, the programming and budgeting shall be on a time-phased "leadtime away" or "need to commit" basis. The Funded Delivery Period is part of the process to determine the quantities required to be budgeted in a particular fiscal year. DoD Components may not budget funds for obligation for items such as support, trainers, or data before the design or specifications of such items are essentially complete. These items shall be budgeted on an "ability to contract" basis as well as on a "leadtime away" basis.

3. Advance Procurement (Long Leadtime Items). Advance procurement requests for long leadtime items shall be limited to the end items in major procurement appropriations. Long leadtime procurements shall be for components, parts, and material whose leadtimes are greater than the life of the appropriation (3-5 years). In some circumstances, Advance Procurement is also warranted when items have significantly longer leadtimes than other components, parts, and material of the same end item or when effort must be funded in an advance procurement timeframe in order to maintain a planned production schedule. For new development programs, the planned production schedule should be based on a full funding basis. The cost of components, material, parts, and effort budgeted for advance procurement shall be relatively low compared to the remaining portion of the cost of the end item. Each budget request for advance procurement shall represent, at a minimum, the termination liability associated with the total cost of the long leadtime components, material, parts, and effort for which the advance procurement request is being made. The termination liability should not cover the cost of the end item budgeted in the following fiscal year(s). The full cost of components, material, parts, and effort included in the advance procurement request should be budgeted in the FYDP consistent with full funding procedures. The budget requests will properly debit and credit advance procurement budget requests as defined in Exhibits P-1, P-5, P-10 and P-40 instructions.

4. Advance Economic Order Quantity (EOQ) Procurement. The Deputy Secretary of Defense Memorandum dated May 1, 1981, and this volume address the general program criteria for multiyear procurement. It is the general policy of the Department of Defense not to create unfunded contract liabilities for EOQ procurements.

Rather, funding for EOQ procurements shall be included in advance procurement budget requests unless an exception to the general policy is granted by the USD(Comptroller). The EOQ procurement may satisfy procurement requirements for no more than 5 program years. The advance procurement budget for an EOQ procurement shall cover the estimated termination liability of the EOQ procurement unless it would be more effective to fully fund the EOQ or the USD(Comptroller) has granted an exception to the general policy to allow inclusion of EOQ costs in an unfunded cancellation clause.

5. Relationship of Budgeting and Contracting. An end item is fully funded only when funds are budgeted, programmed and available to cover the total estimated cost of the item at the time the procurement action is begun. Contracting, on the other hand, is a part of the execution phase or acquisition process within the framework of a program. The number of contracts required to procure a defense system, the type of contract awarded, and the timing of the award have no bearing upon whether or not an item is fully funded. In executing a program, no procurement of material or equipment, or work or services therefor, shall be directed or implemented unless the full program amount is available, except for authorized economical order quantity (EOQ) and advance procurement. For multiyear contracts, the test of full funding does not include the cancellation ceiling associated with items in the FYDP to be procured in fiscal years not yet funded (that is, beyond the budget year). When multiyear contracts are being considered that would exceed the approved FYDP funding in the outyears, the DoD Component concerned shall notify the USD(Comptroller) of this fact before awarding the contract. This notification shall include identification of specifically programed outyear funding offsets in an amount equal to that by which the multiyear contract exceeds the FYDP funding.

010203 Multiyear Procurement.

A. Multiyear procurement (MYP) is a generic term describing the process, planning, and contract under which the government may contract for the purchase of property or services for more than one, but not more than 5, program years. Such a contract may provide that performance during the second and subsequent years of the contract is contingent upon the appropriation of funds and may provide for a cancellation

payment to be made to the contractor if such appropriations are not made. Multiyear procurements are budgeted and funded annually.

B. Requirements for MYP Approval. MYP approval is predicated on:

- Substantial savings.*
- The requirement is expected to remain substantially unchanged in terms of production rate, procurement rate, and total quantities.*
- Funding will be included in the President's budget request to avoid contract cancellation;*
- A stable design and low technical risks.*
- Realistic estimates of both the MYP contract cost and the anticipated cost avoidance.*
- The use of MYP contract will promote the national security of the United States.*

C. Congressional Requirements. Section 8010 of Public Law 104-61, the FY 1996 DoD Appropriations Act requires that:

- An MYP contract cannot be initiated if it employs economical order quantity procurement in excess of \$20.0 million in any one year of the contractor that includes an unfunded contingent liability in excess of \$20.0 million.*
- Congressional defense committees must be notified at least 30 days in advance of a proposed contract award for advance procurement leading to an MYP contract that employs economical order quantity procurement in excess of \$20.0 million in any one year.*
- An MYP contract cannot be initiated for which the economical order quantity advance procurement is not funded at least to the limits of the government's liability.*
- MYP contracts cannot be initiated for any systems or component thereof if the value of the MYP contract would exceed \$500.0 million unless specifically provided for in an Appropriations Act.*
- MYP contracts cannot be terminated without a 10-day prior notification to the congressional defense committees.*

- A present value analysis must be used to determine lowest cost compared to an annual procurement.

D. Defense Acquisitions Specifically

Authorized by Law. As specified in 10 U.S.C. 2306b, if for any fiscal year a multiyear contract to be entered into under this section is authorized by law for a particular procurement program and that authorization is subject to certain conditions established by law (including a condition as to cost savings to be achieved under the multiyear contract in comparison to specified other contracts) and if it appears (after negotiations with contractors) that such savings cannot be achieved, but that substantial savings could nevertheless be achieved through the use of a multiyear contract rather than specified other contracts, the President may submit to Congress a request for relief from the specified cost savings that must be achieved through multiyear contracting for that program.

E. MYP Contract Cancellations. As specified in 10 U.S.C. 2306b, MYP contracts may provide for cancellation provisions to the extent that such provisions are necessary and in the best interests of the United States. The cancellation provisions may include consideration of both recurring and nonrecurring costs of the contractor associated with the production of the items to be delivered under the contract.

F. Multiyear Contract Cancellation Ceilings Exceeding \$100.0 million. Under 10 U.S.C. 2306b, before any MYP contract that contains a clause setting forth a cancellation ceiling in excess of \$100.0 million may be awarded, written notification of the proposed contract and of the proposed cancellation ceiling for that contract must be provided to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives. The contract may not be awarded until the end of a 30-day waiting period beginning on the date of such notification.

010204 Transportation

A. First Destination Transportation (FDT) is that transportation required to deliver production items from the manufacturer's plant or source of procurement to the first point of delivery where the Military Service or Defense Agency takes possession and/or ownership of that item. The procurement source, as used herein, is any supplier outside the DoD supply system or any DoD industrial activity that fabricates new materiel. The

procurement source or the first point of delivery may be in the Continental United States (CONUS) or overseas. FDT is not applicable to components or items reworked by an industrial activity. In the case where the Government accepts the production item at the manufacturer's plant or source of production and legally owns the item, FDT extends to the first point of delivery for either use or storage by the Military Service or Defense Agency. For shipments destined to overseas locations that will enter the Defense Transportation System, FDT terminates at the port of embarkation (CONUS or overseas).

B. Second Destination Transportation (SDT) is any transportation other than FDT.

C. Budgeting Responsibilities for Transportation

1. Transportation of Supply Management Materiel of the Defense Business Operations Fund. Transportation among the 50 states is financed by the supply management business area responsible for the shipment. Transportation of supply management standard items overseas is financed by the appropriation or fund ordering the materiel if within the definition of FDT, otherwise it is financed as SDT. Transportation of DBOF nonstandard items overseas is financed in the same manner as transportation of standard items overseas except for items that are shipped on a free-on-board (FOB) destination basis. In this case, the overseas shipment transportation cost is included in the cost of the nonstandard item and no additional transportation charges should be incurred for the overseas shipment.

2. Transportation of Items Procured by Other Than Procurement and Operation and Maintenance (O&M) Appropriations, or Defense Business Operations Fund. In general, FDT is financed by the appropriation which financed acquisition of the item, i.e., Research, Development, Test and Evaluation (RDT&E) appropriations for RDT&E materiel and Military Construction appropriations for items that are shipped to support such construction projects. All over-ocean shipment of subsistence items financed by the Military Personnel appropriations is considered as an exception and is financed as SDT.

3. Transportation of Items Procured by Procurement Appropriations. FDT is

normally financed by the Procurement appropriation which financed acquisition of the item. SDT is normally financed by the Operation & Maintenance (O&M) appropriations. The following additional guidance applies:

- a. Transportation costs integral to production contract price such as FOB destination charges are considered part of the end item contract price and are financed by the procurement appropriation which financed acquisition of the item.
- (b) All transportation of government furnished equipment (GFE) and government furnished materiel (GFM) prior to installation into an end item is considered FDT and is financed by the procurement appropriation which financed acquisition of the item.
- (c) For items that are not owned by DoD such as nuclear materials and warheads which DOE provides to DoD but retains owner-ship, the transportation of such items to the Military Service or Defense Agency is considered FDT and is financed by the procurement appropriation which financed the acquisition of the end item into which the item will be incorporated.

4. Transportation of Items

Procured by O&M Appropriations. Transportation is financed by the O&M appropriation according to the FDT and SDT definitions.

010205 Intrusion Detection Systems

Intrusion Detection Systems should be budgeted and funded only in the Other Procurement appropriations or, as applicable, in the Capital Budget of the DBOF business area.

010206 Factory Training

Factory training course costs for initial cadre training are considered investment costs and should be budgeted and funded in the investment appropriation and the specific program used to procure the development, acquisition, or modification of the related end item. Temporary Duty (TDY) travel costs of military or civilian personnel attending factory training courses are funded in the Operation and Maintenance appropriations. Factory training courses acquired for end items no longer in production are to be

funded in the Operation and Maintenance appropriations.

010207 Interim Contractor Support

Interim contractor support (ICS) is the maintenance and support of new weapon systems provided by a commercial vendor pending transition to organic support. Because ICS is a major component of the initial logistics support of a newly fielded system and integral to program acquisition, ICS funding requirements should be budgeted in the Procurement appropriations. However, ICS is intended to provide support for the brief period between initial item deployment and the permanent organic support. All acquisition strategies should attempt to minimize ICS requirements and duration. ICS will only be funded in Procurement appropriations until the organic support date specified in the acquisition program baseline is achieved. Continued funding of ICS after the baseline support transition date will be approved on an exception basis.

010208 Defense Acquisition Pilot Programs

Programs included in or nominated for the Defense Acquisition Pilot Program are required to submit all budget justification material.

010209 Non-Developmental Item Procurement

A. Items purchased directly from a commercial source that can be utilized without alteration or modification are classified as non-developmental items (NDI). All non-developmental items, including the first article and associated first article acceptance testing should be funded in the Procurement appropriations. *If an end item requires design and development in order to accept the NDI item, then the entire effort is not NDI and funding for that effort should be budgeted in RDT&E.*

B. Commercially available items that must be modified to satisfy user requirements are classified as "modified NDI" articles. In this instance, the first article, modification of the first article, and first article testing should be budgeted in RDT&E. Follow-on purchases should be budgeted in the Procurement appropriations. The number of first articles procured will not exceed the quantity needed to conduct the acceptance tests.

010210 Spares and Repair Parts

A. This Section provides instructions applicable to funding requests for spares and repair parts procured with direct appropriations in the Procurement Title.

1. Initial Spares and Repair Parts.

Initial spares and repair parts will include those repairable components, assemblies, and subassemblies required as initial stockage at all levels including the pipeline to permit fielding of new end items. Whole spare engines will be classified as initial spares through the life of system. Funding will be budgeted based on a first year obligation rate of 92 percent.

2. Replenishment Spares and Repair Parts. Replenishment spares and repair parts will include those repairable components, assemblies, and subassemblies required to re-supply initial stockage or increased stockage for reasons other than support of newly fielded end items. Replenishment would include additional stockage due to increases such as usage, readiness initiatives and redeployment of end items. Funding will be budgeted based on a first year obligation rate of 92 percent.

3. War Reserve Spares and Repair Parts. War reserve material (WRM) spares and repair parts for initial stockage will be budgeted in replenishment except for whole spare engines in accordance with the above definitions and DoD Instruction 4140.47. See Section 010215, Defense Business Operations Fund - War Reserve Materiel, for additional budgeting WRM policies.

B. Spares budgeting can be aggregated by weapon systems except for Selected Acquisition Report (SAR) Systems.

010211 Direct and Reimbursable Budget Plans.

A. Direct Budget Plan. This plan includes those items of materiel to be purchased for delivery to service inventory and those procurement programs that support the acquisition of materiel for US forces. Financing for the direct budget plan is derived from: new budget authority provided by the Congress, the transfer of resources from other appropriations, and reimbursements. When dealing with reimbursements involving the sale of materiel, three situations can arise:

- Replacement in Kind. In this situation an item of materiel is sold which will require replacement with an item of the identical type, model, and series or "mod" designation (i.e., the sale of C-130E aircraft and purchase of C-130E aircraft). In this situation the reimbursement from the sale will be included in reimbursable financing and the buy-back of the item in the reimbursable program. There will be no reflection of this transaction in the Direct Budget Plan. For an ammunition item, the replacement in kind policy permits replacement of a round with any round that provides the same warfighting mission capability, providing the round to be purchased has been previously approved by the Congress for procurement, and the inventory objective presented to the Congress would not be exceeded.

- Replacement. In this situation an item of materiel is sold which will require replacement to compensate DoD inventories for the resultant loss of capability or readiness. However, because of one or more of a number of circumstances, the replacement item will not be identical to the item sold. It must, however, be a later series or "mod" designation of the same basic model (e.g., sale of a C-130A aircraft and purchase of a C-130E) or an acceptable substitute item used against the same inventory objective or authorized acquisition objective in requirements computations (e.g. sale of an M-48 tank and purchase of an M-60 tank). In this situation the reimbursement from the sale will be included under reimbursable financing but the buy-back of the replacement item must be shown under the Direct Budget Plan and must comply with reprogramming requirements.

-- Items sold from inventory with a unit cost less than \$5,000 will be treated as a replacement-in-kind if an improved model of the same end item is being procured, it provides the same warfighting capability, and the inventory objective presented to Congress is not exceeded.

-- If an item is eligible for replacement or replacement in kind and is not replaced, the reimbursement should be treated as a "free asset."

- Free Assets. In this situation an item of materiel is sold which will not require replacement. All free assets from FMS transactions are required to be deposited into the Miscellaneous Receipts of the US Treasury in accordance with 10 U.S.C. 114(c)(2) except for assets that can be retained in the Special Defense Acquisition Fund.

B. Reimbursable Budget Plan. This plan includes those items of materiel to be purchased for delivery to and

use by customers. These items will be included on the Exhibit P-45, Reimbursable Budget Plan. Financing for the reimbursable budget plan is derived from:

- Anticipated reimbursement based upon customer orders received for items (not stocked by or purchased for procuring service use) to be purchased for direct delivery to a customer. (Direct citation of customer funds for procurement against this type of order is encouraged where common components and/or common assembly with service production of similar items are not involved.)
- Anticipated reimbursement based upon customer orders received or to be received for items common to the procuring service and customer, for direct delivery to the customer.
- Where the materiel item is to be made available from on-order quantities under an existing contract of a Military Department, the sales transactions will be entirely reflected as reimbursable transactions. The quantities and dollar costs of the replacement procurement will be included as a part of the reimbursable program.
- Where the materiel item is to be made available directly from a contract awarded subsequent to the date of the sales agreement and within which the particular quantity of the item has been included in order to fulfill the sales agreement, the transaction will be reflected as a direct cite transaction.
- In "Replacement in Kind" situations, the proceeds from the sale will be included under reimbursable financing and the buy-back program will be included in the Reimbursable Budget Plan.
- In "Replacement" situations, the proceeds from the sale will be included under reimbursable financing but the buy-back program will be included under the Direct Budget Plan (not the Reimbursable Budget Plan).
- Reimbursements from customer orders for secondary items, because of the nature of such commodities and the way they must be managed, will always be treated as a generic category requiring, by definition, "replacement in kind." Accordingly the proceeds from such transactions will be included under reimbursable financing and the buy-back of an equivalent value of such commodities will be included in the Reimbursable Budget Plan.

GLOSSARY OF TERMS - PROCUREMENT

<u>Term</u>	<u>Meaning/Funding Connotation</u>
<i>Advance Procurement (Long Lead Items)</i>	<i>A pre-approved exception to the full funding policy that allows procurement of long leadtime components, material, parts, and effort in a fiscal year before that in which the related end item is to be procured.</i>
<i>Full Funding</i>	<i>At the time of contract award, funds are available to cover the total estimated cost to deliver the contract quantity of complete, militarily usable end items. If a future year's appropriation is required for delivery of the end items, the end items are not fully funded.</i>
<i>Economic Order Qty (EOQ) Procurement</i>	<i>An exception to the full funding policy that allows the use of advance procurement to purchase more than 1 fiscal year's program increment of components, materials, and parts in order to obtain the economical advantages, sustain a production line, to support low rate initial production, etc.</i>
<i>Nonrecurring Costs</i>	<i>Those production costs generally incurred on a one-time basis including such costs as plant or equipment relocation; plant rearrangement; special tooling and special test equipment; preproduction engineering; initial spoilage and rework; pilot runs; allocable portions of the costs of facilities to be acquired or established for the conduct of the work; costs incurred for the assembly, training, and transportation of a specialized work force to and from the job site; and unrealized labor learning.</i>
<i>Recurring Costs</i>	<i>Production costs that vary with the quantity being produced, such as labor and materials.</i>
<i>Termination</i>	<i>A procedure that may apply to any government contract, including multiyear contracts. Unlike cancellation, which is commonly effected between fiscal years and must apply to all subsequent fiscal years' quantities of items, termination maybe effected at any time during the life of a contract and may apply to the total quantity or to a partial quantity of items.</i>
<i>Termination Liability</i>	<i>The maximum cost the government would incur if a contract is terminated.</i>
<i>Termination Liability Funding</i>	<i>A budgeting technique that would provide funds on a contract to cover the maximum value of outlays that could be incurred for work accomplished by the end of the budget year plus the maximum cost to the government associated with termination of the contract at the end of the budget year.</i>
<i>Centralized Item Management and Asset Control</i>	<i>The management in the central supply system or a DoD-wide or Service-wide acquisition and control system in which the manager has the authority for management and procurement of items of equipment. This includes such functions as requirement determination, distribution management, procurement direction, configuration control and disposal direction. Asset control includes the authority to monitor equipment availability and take such actions as necessary to restock to approved stockage levels.</i>
<i>Modification</i>	<i>The alteration, conversion, or modernization of an end item of investment equipment which changes or improves the original purpose or operational capacity in relation to effectiveness, efficiency, reliability or safety of that item.</i>
<i>Maintenance</i>	<i>The routine, recurring effort conducted to maintain an end item of investment equipment at its intended capability or designed performance level.</i>

Construction	The erection, installation, or assembly of a new facility; the addition, expansion, extension, alteration, conversion, or replacement of an existing facility; the acquisition of a facility; or the relocation of a facility from one installation to another.
Real Property Maintenance	The various functions for the maintenance and repair of facilities and the accomplishment of minor construction financed by an Operation and Maintenance appropriation.
Facility Maintenance	The recurrent, day-to-day, periodic or scheduled work required to preserve real property in such condition that it may be used for its designated purpose.
Facility Repair	The restoration of real property to such condition that it may be used for its designated purpose.
System	The combination of a number of components that are functioning with the context of a whole to satisfy a documented requirement.
Production Rates	<u>Minimum Sustaining Rate.</u> This is the quantity that will preclude a production break while maintaining a base of responsive vendors and suppliers; the quantity that will preclude start-up costs in the case of a production break; or the quantity that the contractor is willing to accept and produce at a reasonable cost. <u>1-8-5/2-8-5/3-8-5.</u> This refers to the number of shifts per day, the number of hours per shift, and the number of days per week that the manufacturer will use to deliver the items according to the deliveries reflected on the Exhibit P-21 Production Schedule. <u>Economical Production Rate.</u> This is the most economical rate that the contractor can produce using 1-8-5 shifts. <u>Maximum Production Rate.</u> This is the maximum capacity rate that a contractor can produce with extant or prior year funded tooling. Include the number of shifts.
Leadtimes	<u>Administrative Leadtime (ALT).</u> This is the amount of time required to complete the administrative actions leading to contract award. Since these actions do not require funding, the ALT can be separately identified into prior to October 1 and after October 1. The ALT is used to forecast contract awards. Longer leadtimes require that a larger quantity be purchased to support yearly requirements. Leadtimes should therefore reflect an accurate assessment of the time required to process the administrative actions. <u>Production Leadtime (PLT).</u> Leadtimes should be based on a realistic projection of a contractor's capability to produce an item once a contract is awarded. This is the amount of time required by a contractor to produce the first item after contract award until deliveries begin. <u>Procurement Leadtime.</u> This is the total of ALT (post October 1) and PLT.
Funded Delivery Period (FDP)	A funded delivery period encompasses a 12-month period that begins when the contractor delivers the first item of a fiscal year procurement. Confusion exists regarding this time period because, in many instances, accurate administrative and production leadtimes (ALT/PLT) have not been included in the calculation. The calculation should begin with October 1. From this point in time, the ALT and PLT should be added. This amount of time plus the next 12 months are included in the funded delivery period. When excessive leadtimes are included in the calculation, additional quantities are procured that could have been funded in the following fiscal year with no change in the delivery schedule.
010212 Research, Development, Test and Evaluation (RDT&E) - Definitions and Criteria	agency or by private individuals or organizations under a contractual or grant arrangement with the government. It includes R&D in all fields, including the physical sciences, engineering, etc.
A. <u>Definitions.</u> The term "research and development (R&D)" is intended broadly to include the work performed by a government	

1. "Research" is systematic study directed toward fuller scientific knowledge or understanding of the subject studied.

2. "Development" is systematic use of the knowledge and understanding gained from research, for the production of useful materials, devices, systems, or methods, including the design and development of prototypes and processes.

B. Policy. R&D programs are funded based on the principle that all RDT&E related efforts should be funded in the RDT&E appropriations so that the program can be assessed from a priority standpoint with other similar programs. When, after consideration of the following criteria, there is doubt as to the proper assignment of costs between appropriations, the issue should be resolved in favor of using RDT&E funding.

C. General Criteria. In general, the types of costs to be financed by RDT&E and related appropriations are:

1. RDT&E Appropriations

a. The costs of research, development, test and evaluation efforts performed by contractors and government installations, including procurement of end items, weapons, equipment, components, materials and services required for development of equipment, material, or computer application software; its Development Test and Evaluation (DT&E); and its Initial Operational Test and Evaluation (IOT&E) as provided for in paragraph D.5. (Test Articles and Test Support) below.

b. The operation of R&D installations and activities engaged in the conduct of R&D programs, including direct and indirect efforts, expense and investment costs.

c. The acquisition or construction of industrial facilities costing less than \$300,000 at government owned, government operated (GOGO) facilities under the criteria of DoD Directive 4275.5 as provided for under 10 U.S.C. 2805 (unspecified minor construction). Use of RDT&E funds for acquisition and construction at contractor owned or contractor operated government facilities is authorized under

10 U.S.C. 2353, Contracts; Acquisition, Construction, or Furnishings of Test Facilities and Equipment.

2. Related Appropriations

a. All construction at R&D installations and activities other than that covered above will be funded in the Military Construction appropriations.

b. Equipment and material approved for production and intended for operational use or inventory upon delivery, and product improvement within the current performance envelope on systems in production, will be funded in the Procurement appropriations.

c. Family housing construction, operation and maintenance at R&D installations and activities will be funded in the Family Housing appropriations.

d. Expenses of Headquarters R&D management, organizational management analyses, Follow-on Operational and Test and Evaluation (FOT&E) personnel and command support, and product improvement within the current performance envelope for systems out of production will be funded in the Operation and Maintenance (O&M) appropriations.

e. Research projects qualifying for financing as specific undertakings under the procedures and within the criteria established for the Special Foreign Currency Program will be funded in the Special Foreign Currency appropriation.

D. Specific Determinations. Additional details on the determination of proper funding for specific items or efforts are provided in the following paragraphs.

1. Organizational Funding

Criteria

a. The RDT&E appropriation will finance expenses and investments for the operation and maintenance of R&D organizations, equipment (including R&D aircraft, ships and ship type vehicles), installations and activities (including those operated by contract).

b. Expenses for the support of tenant activities will be funded in accordance with the following:

(1) Expenses for the support of tenant activities at R&D installations and activities will be RDT&E funded by the host activity, pending the establishment of reimbursable arrangements. Subsequent to the establishment of reimbursable arrangements, expenses for the support of the tenant will be funded by the tenant or as mutually agreed with the host.

(2) Where reimbursable arrangements exist, expenses for the support of R&D activities or organizations that are tenant activities at installations having a primary function other than research, development, test and evaluation will be funded by RDT&E.

(3) Expenses for the support of R&D activities or organization which are tenant activities at installations having a primary function other than R&D will be funded by the host, pending the establishment of reimbursable arrangements.

c. Expenses of R&D management and administrative organizations at major systems commands, headquarters organizations and administrative organizations at DoD component departmental headquarters levels (except for the Defense Advanced Research Projects Agency and the Ballistic Missile Defense Organization) will be financed in the Operation and Maintenance (O&M) appropriations.

d. Expenses and investments for the operation and maintenance of major range and test facilities, as defined under DoD Directive 3200.11, which have as a primary mission, as determined by workload, the conduct of development testing will be financed by the RDT&E appropriation. Major range and test facilities that primarily support follow-on operational testing or training exercises will be financed in the O&M appropriations.

e. Costs of evaluating organizational structure and distribution of function, administrative operating policies, procedures, methods and systems (management

studies) and applications of the management sciences to improve effectiveness in carrying out assigned functions are to be financed in the O&M appropriations.

f. Expenses of operational military forces having a primary mission other than R&D and not specifically assigned to R&D that may, from time to time, be incidentally engaged in or support R&D activities, will be funded in the O&M appropriations.

2. Facilities Construction and Modification. When it is determined that DoD financing of real property projects is required, they shall be programmed, budgeted, and financed as follows:

a. Government-Owned, Government-Operated (GOGO) Facility on Government Land. When GOGO property is to be constructed on government-owned land, such construction will normally be financed as a Military Construction project. Construction of facilities for RDT&E costing \$300,000 or less may be funded with RDT&E appropriations. Such expenditures are authorized under 10 U.S.C. 2805 (unspecified minor construction). All minor construction must result in a complete and usable facility. In no event are two or more construction projects or minor and major construction projects to be contrived to be a usable facility. Construction projects at R&D installations and activities whose costs are greater than \$300,000 will be financed by the Military Construction appropriation in accordance with Chapter 6.

b. Government-Owned, Contractor-Operated (GOCO) Facility

(1) When the GOCO facility is on a military installation (post, camp or station) the primary funding is the Military Construction appropriation. However, under unusual circumstances and if for the convenience of the government, the facilities are contractor operated and the contractor is solely responsible for the complete and total operation and maintenance of the facility complex, construction may be financed under Procurement or RDT&E funds under the criteria of DoD Directive 4275.5 and 10 U.S.C. 2353. Construction or improvements having general utility are not permitted under 10 U.S.C. 2353.

(2) When GOCO facilities are constructed on Government property, other than a military installation, the Procurement or RDT&E appropriation will finance the construction under the criteria of DoD Directive 4275.5.

c. Contractor-Owned, Contractor-Operated Facility. Under 10 U.S.C. 2353, a contract of a Military Department for research or development may provide for the acquisition or construction by, or furnishing to, the contractor of RDT&E facilities and equipment that are necessary for the performance of the contract. New construction or improvements having general utility are not authorized under 10 U.S.C. 2353. Facilities that would not be readily removable or separable without unreasonable expense may not be installed or constructed on property not owned by the government, unless the contract contains:

(1) A provision to reimburse the government for the fair value of the facilities;

(2) An option for the government to acquire the underlying land; or

(3) An alternative provision that protects the interests of the United States in the facilities.

d. All proposed RDT&E real property facilities will be identified to Congress in accordance with Chapter 5, Section 050402.

e. The Family Housing appropriation will provide for Family Housing construction and Family Housing O&M at R&D installations and activities.

3. Equipment. RDT&E appropriations will finance the development, design, purchase, installation, and acceptance testing of equipment or instrumentation required to support RDT&E activities. Costs of specialized equipment and instrumentation required for the support of research, development, test and evaluation contractor effort at government-owned, contractor-operated (GOCO) activities will be financed in RDT&E. DoD Directive 4275.5 applies. Installation costs include directly related

foundations, shielding, environmental control, weather protection, structural adjustments, utilities and assets. Installation costs are excluded from RDT&E financing if the effort is accomplished concurrently with a military construction project, and in these instances, the military construction appropriation finances the installation cost. To the extent that the equipment installation occurs at a government activity and the cost exceeds \$300,000, no new facility or physical outer dimension expansion to an existing facility shall result from an RDT&E-funded equipment installation project.

4. Establishment of Pilot Line and Tooling Requirements

a. The costs associated with establishing an initial pilot line, which are necessary to acquire a limited number of representative items for test purposes, including the test items, will be financed by RDT&E. All items and costs associated with maintaining the initial pilot line beyond the quantity sufficient to test for operational acceptability will be financed from other appropriations.

b. When an end item under development has also been approved for procurement, operational use, and included in the force structure, then hard tooling requirements common to both the development and procurement phases will be financed by Procurement appropriations. When an end item under development has not been approved for procurement, operational use and included in the force structure, then tooling and other preliminary production facilities required to produce realistic development hardware for test and evaluation will be financed by RDT&E, even though such tooling and facilities might later be used in whole or in part for production if and when the item is subsequently approved for procurement, operational use and included in the force structure.

5. Test Articles and Test Support

a. As a general rule, the procurement of test articles and test support, including "Special Support" costs and "Command Support" costs (see Glossary), for all RDT&E tests preceding and leading to acceptance for

operational use (i.e., through IOT&E) will be RDT&E funded.

(1) Development and preproduction prototypes (RDT&E financed) will be used for Development Test and Evaluation (DT&E), including scientific, technical and weapons effects tests. DT&E programs must provide complete and reliable data that can be used to estimate the military utility of new items as a basis for considering decisions to continue engineering development. To this end, it is essential to plan, program, budget and fund for an adequate number of R&D articles for development, test and evaluation that will be fabricated, manufactured or produced in a realistic preliminary production manner and thus provide such data.

(2) Development and preproduction prototypes (RDT&E financed) will be used for IOT&E. When so used, they must be sufficiently representative of the expected production items to provide from IOT&E a valid estimate of production items operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements).

(3) *Low Rate Initial Production (LRIP) assets. LRIP, as defined in DoD Instruction 5000.2, is to provide production configured or representative articles for operation test, to establish an initial production base for the system, and to permit an orderly increase in production rate for the system sufficient to lead to full rate production upon the successful completion of operational test. LRIP quantity will be determined as part of the Engineering and Manufacturing Development (EMD) approval (Milestone II). RDT&E funds will be budgeted to procure the items required for operational test to facilitate the testing of LRIP assets in the EMD phase. LRIP test articles must be specifically identified in the budget documentation. Should LRIP items beyond the test quantity be required, they would need to be included in the Milestone II decision and a determination made at that time with respect to the more appropriate funding source. This policy applies only to the LRIP for Acquisition Category (ACAT) 1 programs. For non-ACAT 1 programs, all pre-operational evaluation testing will be financed in RDT&E.*

b. Conduct of testing that is not associated with RDT&E, such as the examples noted below, will be financed in Procurement and/or Operation and Maintenance (O&M) appropriations, as appropriate.

(1) Acceptance, quality control and surveillance testing of articles obtained for other than RDT&E purposes.

(2) Routine testing in connection with logistic support.

(3) Testing related to the operation and maintenance of equipment and material acquired for use under appropriations other than RDT&E.

(4) Testing required to prove the capability of facilities to produce items which have been approved for production will be funded by procurement as part of the initial acquisition cost.

c. The acquisition of commercial items for testing and operational evaluation that do not require RDT&E engineering, design or integration effort will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria). Personnel and command support costs will be financed by O&M appropriations for testing and operational evaluation of commercial items by field units for doctrine, operational or organizational purposes.

d. Articles (including end items, weapons, equipment, major test vehicles such as ballistic missile boosters or upper stages, components and materials) of types regularly procured to meet established general requirements such as operational training, operational use, or inventory which are assigned or allocated on a priority basis for use in support of approved R&D programs and which are not consumed in testing, may be financed by Procurement or O&M appropriations using the expense and investment criteria. In addition, excess items that can be made available on a priority basis from existing inventory will be reassigned for use in R&D test and evaluation programs without reimbursement. However, all items, expected to be consumed in

R&D test and evaluation will be financed by RDT&E appropriations.

e. Consumable rounds of ammunition or rounds of similar tactical missiles otherwise procured in quantity for inventory under existing procedures, may be issued on a priority basis for use in R&D testing without reimbursement.

f. The acquisition of test articles will be financed by O&M or Procurement appropriations (as determined by the Expense and Investment criteria), and personnel and command support costs will be financed by O&M appropriations for all test and evaluation (T&E) subsequent to acceptance for operational use and T&E to demonstrate the operational employment or develop operational tactics (i.e., subsequent to IOT&E).

6. Modification and Refurbishment of Test Articles.

a. Costs associated with modifying or reconfiguring an existing item for R&D test purposes will be funded in RDT&E. When an item that has been diverted from another use is not consumed in R&D testing, any costs necessary to return the item to serviceable condition or to its pre-existent configuration will be financed by RDT&E.

b. If an article initially acquired with RDT&E is still available at the completion of the test program it may be reassigned for operational use or inventory, in which case the cost to modify such an article for operational use would be borne by the Procurement and O&M appropriations, as appropriate.

7. Product Improvement

a. "Product improvement" of major end items and major components of major end items, except "aircraft engine component improvement" that is addressed in paragraph d. below, currently in production or in the operational inventory, is subject to the, following:

(1) Redesign of an item to increase the then current performance envelope,

including related development, test and evaluation effort, will be financed by RDT&E appropriations.

(2) Engineering services and related efforts by the producing contractor or manufacturing installation, applied to an item currently in production for the purpose of extending the useful military life of such items within the then current performance envelope, should be funded by Procurement appropriations. The phrase "an item currently in production," implies that the item has end item procurement funding in the year the product improvement effort is to take place.

(3) Engineering services and related efforts by a manufacturing or operations type installation, applied to an item no longer in production but still in the operational inventory for the purpose of extending the useful military life of such item within the then current performance envelope, should be financed by O&M appropriations.

b. While existing off-the-shelf equipment may be procured with Procurement funds, items which require engineering design, integration, test, or evaluation effort shall be procured with RDT&E funds in sufficient numbers to support such effort.

c. Costs of procurement of fully developed and tested modification kits and associated installation costs should be financed from Procurement appropriations.

d. Aircraft engine component improvement costs are budgeted in the RDT&E appropriations to provide for continuing improvements in the aircraft engines in the areas of reliability, maintainability, durability, correction of Service-revealed deficiencies, safety of flight, time-between-overhaul, etc. The criterion for "Component Improvement" is established at the point in time when:

(1) There has been a Government acceptance of the first procurement funded engine, and

(2) The engine has successfully completed to the satisfaction of DoD, stringent qualification or verification testing to

demonstrate initial production suitability subject to:

(a) Compliance with contractual specifications, performance guarantees and Military Specifications as applicable to individual Service requirements;

(b) Completion of endurance testing representative of the anticipated Service use to include completion of specified post test inspections, certification, and penalty runs;

(c) Demonstration of prescribed performance capability; and

(d) Accomplishment of prescribed durability, reliability, and environmental testing.

8. Ships and Ship-type Vehicles

a. An experimental test bed type of ship or an experimental ship will be financed by RDT&E appropriations. This will include all such experimental ships required to support an approved R&D program or for the purpose of experimenting with new or radical ship concepts or to demonstrate the military usefulness of new ship designs, configurations or fabrication techniques, when the ship-type test vehicle itself can be predicted to be consumed or expended in testing, or to have little or no operational usefulness in the force structure. Prototype ships, when designated by the Secretary of Defense, are included.

b. A ship of demonstrated, conventional concept and design having a high probability of military usefulness and inclusion in the force structure, even though first of a class, will be constructed using procurement funds. A ship of demonstrated conventional concept and design temporarily or permanently assigned from inventory to support R&D effort will be furnished without reimbursement, but the cost of providing all R&D types of equipment or instrumentation, the cost of “nonstandard modifications of the ship required to make the ship suitable for R&D support, as well as the cost of any related restoration to conventional or operational ship conditions upon release from assignment to R&D, will be financed by RDT&E appropriations.

c. Preliminary or contract design for new ship construction will be financed by RDT&E appropriations, including contractor and “field activity” effort costs. Detail design for ships appropriate for procurement funding will be funded by procurement accounts.

d. Land-based or sea-based combat system test installations will be financed by RDT&E appropriations.

9. Automatic Data Processing Costs

a. RDT&E Funded Facilities:

Funds required for the operation of ADP units at RDT&E funded facilities and for the acquisition of ADP resources, including development, lease or purchase of Automatic Data Processing Equipment (ADPE) by such ADP units should be financed by RDT&E.

b. Other Facilities/Activities:

For all other facilities/activities, the following rules apply:

(1) Development ADPE.

ADPE is categorized as either General Purpose or Special Purpose.

- Normally, General Purpose ADPE is commercially available off-the-shelf, easily adaptable to a variety of applications by configuring existing executive software and programming languages. For purposes of definition, embedded computers in Maintenance, Supply Handling, and Logistics Equipment are considered “General Purpose.” Except as provided in paragraph D.7.b. (Aircraft Engine Component Improvement) above, acquisition of this type of ADPE is not considered developmental and normally will be financed to include the initial set of executive software that meets system operational specifications by Procurement or Operation and Maintenance (O&M) appropriations subject to the expense and investment criteria. Subsequent modifications to executive software and development of applications programs should be financed by Operation and Maintenance appropriations except as indicated in paragraph D.9.a. (RDT&E Funded Facilities) above.

- Development test and evaluation of Special Purpose ADPE, i.e., specially designed to meet a specific military operational requirement or to perform a predetermined set or series of computational functions only, and which maybe required to meet specific physical or environmental conditions, and which are physically or functionally integral to a higher order system will be financed by RDT&E. Purchase for operational use should be funded by Procurement appropriations.

(2) Acquisition of Software.

Software is categorized as either “Executive Software” or “Applications Software.”

(a) Executive Software.

Where there is a standard, existing executive software package available with the purchase of General Purpose ADPE and this package will be used without modification in the intended application, its acquisition with procurement funds is appropriate. If modifications to the executive software are required, the modification effort should be Operation and Maintenance (O&M) financed. (The foregoing assumes that the General Purpose ADPE hardware is properly procurement funded. If the hardware should be RDT&E funded based on paragraphs D.7.b. (Aircraft Engine Component Improvement) above or D.9.a. (RDT&E Funded Facilities) above, then the acquisition of the executive software package and/or any modification of it should also be RDT&E funded.) The preparation or modification of executive software for Special Purpose ADPE should be RDT&E funded.

(b) Applications

Software. Preparation of applications software for General Purpose ADPE will normally be financed by Operation and Maintenance. Where General Purpose ADPE is financed by RDT&E appropriations in accordance with paragraph D.7.b. (Aircraft Engine Component Improvement) above, such applications software development will be RDT&E financed. Preparation of applications software for Special Purpose ADPE will be financed by RDT&E.

(3) Product Improvement of Special Purpose ADPE and its associated software should be funded in accordance with paragraph D.7.a. (Product Improvement).

(4) Proprietary software carries a copyright from the vendor that prohibits duplication or modification. Essentially, the purchaser is buying a license from the vendor to use the software on a particular system. Proprietary software financed on an “upfront payment” basis is an investment, subject to the expense-investment criteria. However, when financed on an “annual fee” basis, it is an expense item properly financed within appropriations available for expenses.

10. Training Devices. A training device is composed of components and software that have been designed, or modified, exclusively for training purposes, involving to some degree, simulation or stimulation in its construction or operation, so as to demonstrate or illustrate a concept or simulate an operational circumstance or environment. The initial or prototype training device and all its support costs through service acceptance will be funded in RDT&E. RDT&E will not fund beyond the initial system unless more than one full system is required to demonstrate the training device performance. The initial or prototype training device that employs new or off-the-shelf computers and system components, but has training system unique software and interface components, will be developed and procured with RDT&E funds. Typically, these training devices have small quantity requirements and the initial or prototype device is used for operational training. Modifications or updates to existing training devices will normally be funded in the applicable Procurement and O&M appropriations. Any necessary development effort for these modifications or updates will be funded in RDT&E.

11. Joint Test and Evaluation

a. Joint Test and Evaluation (JT&E) refers to T&E conducted jointly by two or more DoD components as directed by the Director for Test, Systems, Engineering, and Evaluation (DTSE&E) or the Director of Operational Test and Evaluation (DOTE). JT&E will be conducted to test and evaluate capabilities of developmental and deployed systems in a joint environment, to evaluate joint operations concepts, and to determine requirements and interoperability of systems and forces. Testing will be accomplished in realistic operational conditions when feasible

and essential to the evaluation. Testing will be in accordance with established joint doctrine and will be consistent with the assigned missions of the participating Components. Tests involving alternative concepts, organization, tactics, or procedures will be coordinated with the Components and TJS. As such, JT&E should not be construed to encompass the DT&E - IOT&E - OT&E - FOT&E process for hardware oriented weapon system acquisition. Further, DTSE&E/DOTE-directed JT&E does not include that joint testing initiated by and mutually agreed to by two or more Components for their own purposes.

b. Funding for DTSE&E-directed JT&E is financed in the Developmental Test and Evaluation (DT&E), Defense appropriation (program element 0605804D). DOTE-directed JOT&E is financed in the Operational Test & Evaluation (OT&E) Defense appropriation. The costs incurred are for the direction, supervision, and performance of JT&E and will be for those areas that are unique to the needs of the JT&E. In the accomplishment of Joint Tests, the Components will be reimbursed from these funds for those unique costs as defined in the Glossary of Terms. When directed as Executive Agent for a particular JT&E, the Component will be responsible to the Secretary of Defense for ensuring that all resources necessary for the successful accomplishment of the JT&E are available to the Joint Test Director (JTD). This includes administrative management support and facilities for the JTD. The Components' support costs (O&M, Procurement, and RDT&E) are to be programmed and budgeted for in accordance with established budgetary procedures.

12. Manufacturing Technology. The Department of Defense Manufacturing Technology program, which demonstrates factory application of new or improved technology in producing defense items, will be financed in the RDT&E appropriations.

13. Development Efforts Related to Future Leased Services. When the ultimate product to be secured by the government is a leased service to be budgeted and funded in an Operation and Maintenance (O&M) appropriation, and the provider of that service requires up-front funding in order to design or develop major changes or improvements to meet the

government's requirement, then the costs of such development efforts will be budgeted and funded in the RDT&E appropriation.

14. Subsystem Integration into Weapon Systems. Research and development necessary for the integration of subsystems into weapon systems should be financed from the weapon system program. For example, the R&D cost of integrating an electronic warfare black box into an aircraft should be borne by the aircraft R&D program.

GLOSSARY OF TERMS - RDT&E

<u>Term</u>	<u>Meaning/Funding Connotation</u>
Developmental Test and Evaluation (DT&E)	DT&E is that test and evaluation conducted to assist the engineering design and development process and to verify attainment of technical performance specifications and objectives.
Operational Test and Evaluation (OT&E)	OT&E is that test and evaluation conducted to estimate a system's operational suitability, identify needed modifications, and provide information on tactics, doctrine, organization, and personnel requirements.
Initial Operational Test and Evaluation (IOT&E)	It is DoD policy that there shall be conducted, before commitment of a system to production, at least an initial phase of operational test and evaluation (OT&E) adequate to provide a valid estimate of expected system operational effectiveness and suitability (including compatibility, interoperability, reliability, maintainability, and logistic and training requirements). This early phase (or phases) of the normally longer, overall OT&E program shall be known as IOT&E.
Prototype	This term connotes an item from an R&D program and also connotes RDT&E financing.
Product Improvement	This term embraces all efforts of a research, development, design, or engineering nature that have the objective of improving major end items or major components of major end items.
Aircraft Engine Component Improvement	This term, while logically included within Product Improvement, is a specialized term that applies only to the RDT&E-financed improvement of aircraft engines.
Government Acceptance of the First Procurement-Funded Engine	This term, which is one of the two minimum requirements for initiation of CIP funding, refers to the date of Government signature of DD Form 250 whereby the Government formally accepts delivery of the first engine funded under procurement appropriations.
R&D Installation or Activity	This term refers to those installations or activities whose support and operating costs are financed predominantly with RDT&E funds.
Special Support Costs	This term is used in the context of test and evaluation programs. It refers to those acquisition or hardware costs, other than those associated with the item(s) that is (are) the subject of the test, which are incurred in direct support of the T&E effort. A good example would be special range instrumentation costs.

Command Support Costs	This term also is used in the context of the T&E programs. It refers to the “people-related” costs of the command and operational units providing collateral support to the T&E effort. These are additional costs incurred because of this test support. Examples are per diem pay, travel allowances, overtime, etc.
Preliminary Design Costs	This term refers to those costs incurred in shipbuilding programs in the early stages of the cycle. They should result in a design that, on a performance or requirement basis, approaches the Navy’s goal. These costs are RDT&E-funded.
Contract Design Costs	The contract design phase of shipbuilding programs follows the preliminary design phase. It should result in a design that carries the <u>equipment specifications</u> necessary to meet the Navy requirements. These costs are RDT&E-funded.
Detail Design Costs	The final design effort on ships normally performed in conjunction with lead ship construction, is called “detail design.” This effort is procurement funded (SCN).
Accepted for Service Use	This is the major milestone in a development program that represents the formal acceptance of an item for operational use by the Service forces. In some instances items are approved for Service use with qualifying restrictions or provisions pending completion of specific development deficiencies. In such instances the cost of funding the correction and test must be determined on a case-by-case basis. Typically, all post-Service acceptance effort will be funded in Procurement appropriations.
Unique Joint Test and Evaluation (JT&E) Costs	This refers to costs such as: feasibility determinations of proposed joint tests; the provision for test design and planning support for joint tests selected; the development, procurement, installation, and operation of special instrumentation; transportation, travel, and per diem costs for the Test Director’s staff; the modification of test articles as surrogates and to permit obtaining test data; transportation of equipment from permanent bases to the test site and return; and the provision for data collection/collectors, data reduction, analysis, and test reporting services. Transportation and per diem of participating personnel and maintenance and supply costs are not considered unique.
Performance Envelope	The demonstrated capability of a system, system components, and special purpose software to perform its mission in relation to essential characteristics such as: speed, range, payload, altitude, rate of fire, etc.

010213 RDT&E - Incremental Programming and Budgeting Basis

A. Purpose This Chapter specifies the principles to be followed, and establishes the criteria and definitions to be used, in the preparation of the annual Research, Development, Test and Evaluation (RDT&E) budget estimates on an incrementally funded basis. The incremental budgeting policy provides that only those funds required for work in a given fiscal year shall be included in the RDT&E budget request for that fiscal year for most classes of effort.

B. Policy The annual budget estimates for Research, Development, Test and Evaluation (RDT&E) projects and programs, including Developmental and Operational Test and Evaluation programs, are to be prepared on an incrementally programmed basis (as opposed to the fully funded program basis used in preparing procurement budget estimates).

C. Guidance

1. The budget year estimates of the amounts to be programmed for research and development projects or programs to be performed either by agencies of the government or by contract will be formulated to cover all “costs” expected to be incurred during a 12-month period, including those costs which are necessary to further the project towards its objective during that increment of the total schedule. The term “costs” includes work performed during the period and other liabilities that will accrue to the government, such as long leadtime orders to be placed for project related material and equipment’s and subcontracts awarded, except as described below.

2. If a major weapon system with a development program in excess of \$100 million is being developed over several years utilizing a prime contractor, then first-tier subcontract costs on reimbursable type contracts of \$5 million or more will be limited to a 12-month period not necessarily coincident with the fiscal year in which funds are requested, but not more than 12 months beyond the end of the fiscal year for which funds are authorized (i.e., the subcontractor must be incrementally funded). The amounts of all first-tier subcontracts executed on a fixed-price basis

may be considered as “costs” under the above definition. However, the application of the incremental programming policy for fixed-price first-tier subcontractors is encouraged for all DoD components.

3. The budget request for DoD projects and programs will be developed and presented in accordance with the following principles:

a. Annual estimates of initial financing needed for new major weapon systems and other development programs and projects requiring several years to complete, and which involve multiyear contracts, should be formulated to cover costs expected to be incurred during that fiscal year. Generally this will represent a 9-month or lesser period for the initial, first year increment of the program. The second and succeeding increments will be programmed and financed for the entire fiscal year. However, on an exception basis that must be specifically approved by the Secretary of the Department involved, the period to be financed for major weapons systems may extend up to 3 months beyond the end of the fiscal year for which funds are requested. In this regard, DoD components should make every effort to align subsequent years’ funding requirements on an annual basis coincident with the fiscal year, although it is recognized that there may be circumstances where this will not be feasible.

b. In cases of research and development projects to be performed by private concerns (but not including Research Budget Activity 1 projects to be performed by educational institutions), the budget request may provide for financing of more than 12 months, but will not exceed 18 months. Financing in excess of 12 months may be requested when full completion of the project is expected within a maximum period of 18 months, and when either (1) it is considered that there is no logical way to divide the work and therefore it is in the best interests of the government to finance the project in full; (2) it is expected to be clearly unfeasible to limit the contract to a shorter period; or (3) the planned technical effort makes it clearly evident that no responsible contractor can be found who will accept a contract for a less-than-completion increment.

c. In cases of projects included within the research category which are to be performed by educational institutions or institutes affiliated with educational institutions, where it is considered in the best interest of both the government and the institution to provide necessary stability to attract and retain the required skilled personnel to work on problems of vital interest to the Department of Defense, the budget request may provide for initial financing of such research projects up to a maximum increment of 36 months with annual renewal increments limited to no more than 12 months.

d. In general, the budget request covering the cost of operation and maintenance of government-owned research, development, and test installations will provide for financing of such installations on an annual basis coincident with the fiscal year concerned. However, in the case of research and development tasks and projects issued to governmental installations by Project Order or other authorized Government Work Order, the budget request may provide financing for governmental installation labor, material and support to carry on these tasks for projects for 12 month increments which extend no more than the first 3 months in the year succeeding the budget year.

e. While it is intended that the foregoing guidelines will be applicable to program execution as well as program formulation, it is recognized that there may be circumstances that could delay the start of an annual increment (such as legal, administrative, or technical problems). The 2-year availability of funds authorized for the Research, Development, Test and Evaluation appropriation provides the necessary flexibility for program execution in those circumstances.

4. Special Termination Cost Clause (STCC). DoD FAR Parts 249.50170 and 252.249-7000 permit the use of STCC in fixed-price incentive contracts and incrementally funded cost reimbursement contracts. If contracts containing an STCC are terminated before completion, the special termination charges are covered by the unobligated balance of the applicable appropriation, subject to any congressional approval required for reprogramming. The extent to which the STCC can be used is limited to the ability of the Service or Agency to cover expected termination costs from unobligated balances. A

recordable obligation under the STCC arises when the contract is actually terminated. If a proposed STCC would require an above threshold reprogramming action when a program is terminated, the approval to use the STCC shall be obtained from the USD (Comptroller) before the contract or contract modification is awarded.

D. Detailed Criteria and Definitions.

Under paragraph C., above:

1. The term “amounts to be budgeted” means the estimated Total Obligational Authority (TOA) required for the initiation or renewal in the budget year of the individual R&D project under consideration.

2. The dollar amount of the TOA estimate for an individual project must also always be equal to the dollars planned to be obligated for the project.

3. The described incremental time period also includes any time period that may exist between the date of obligation of funds and the actual commencement of work.

4. The estimate of the financing required in the budget year for continuing development projects must always take into account any changes, such as slippages, that have occurred in current and prior year programs.

5. It is not mandatory to base estimates in every case on the full incremental period options described under paragraph C. Lesser periods may be used. For example, if it appears that (1) the award of the work and first obligation will not occur until the second half of the budget year, and (2) a work statement and development schedule encompassing 6 months or some other period of less than 12 months appears appropriate and logical, then a budget estimate providing for financing of the lesser period is in order. In the case of multiyear research, exploratory development, and advanced development tasks and projects awarded to government installations by Project Order or other authorized government Work Order, the budget estimate will provide financing for government installation labor, material and support to carry on these tasks or projects limited to no more than the first 3 months in the year succeeding the budget year. (Financing for contractual liabilities for

weapons system development effort by government installations will be governed by paragraphs C., C.3.a and C.3.b.).

010214 Defense Business Operations Fund - Operating Budget

The operating budget represents the annual operating costs of an Activity or Component, including depreciation and amortization expenses. Detailed requirements and guidance can be found in Chapter 9.

010215 Defense Business Operations Fund - Mobilization/Surge Costs

A. Separate funding is provided for those costs related to mobilization and wartime surge capacity that would not otherwise be incurred to meet peacetime requirements. The prices of services and products provided to peacetime customers exclude these costs, to more appropriately reflect consistent pricing between competing activities. Similarly, better visibility is provided to decision makers at every level of surge or readiness requirements. These “mobilization” costs, although funded and justified as non-Fund direct appropriation to Component budgets, are elements of business area costs and must be fully justified on the SM-3 and Fund-8 schedule. Detailed requirements and guidance can be found in *Volume 2B*, Chapter 9.

B. *Unutilized capacity that is associated with the ability to satisfy a projected surge capability is considered a mobilization requirement that is to be funded by appropriated funds provided by the DoD Component having management responsibility for the Fund activity. Costs applicable to unutilized plant and equipment, such as depreciation, or maintenance, are not to be charged to the customers of the Fund activity.*

C. The justification for costs related to mobilization and wartime surge capacity must identify the scenario assumptions or other basis for the requirement under which these costs were calculated. Additionally, a description of how these costs will be collected and accounted for in execution must be provided.

D. *Volume 2B, Chapter 9 provides additional guidance and instructions associated with mobilization/surge requirements.*

010216 Defense Business Operations Fund - War Reserve Materiel

War reserves are procured and maintained to meet wartime requirements as determined by the Defense Guidance. These costs will be funded with direct appropriations in the Components’ budgets, not through customer rates. However, since the war reserve materiel will be under the management of supply management businesses, war reserve requirements will also be described and justified on the SM-3 and Fund-8b. Detailed requirements and guidance can be found in *Volume 2B*, Chapter 9.

010217 Defense Business Operations Fund - Military Personnel Costs

A. Military personnel costs have been included in revolving funds since FY 1991. This change was made to ensure that the total costs of the business were being captured. *The cost of military personnel assigned to DBOF activities will be included in the total cost of operations of DBOF activities at civilian equivalent rates and reflected in the stabilized rates charged to customers. This policy is based on the concept of total costing, which is designed to ensure that the total cost of producing products and services is being identified to both DBOF activities and customers.*

B. *The amount expensed for military personnel by DBOF activities and the amount reimbursed to the appropriate military personnel will be the same as the amount budgeted. No adjustments will be made to the DBOF cost of operations to reflect the actual cost of military personnel employed by DBOF activities.*

C. *See Volume 2B, paragraph 090103, for budget formulation, execution, and reimbursement procedures.*

010218 Defense Business Operations Fund - Full Recovery of Costs/Setting Prices

A. All business areas in the Fund are required to set their prices based upon full cost recovery, including all general and administrative support provided by others. Prices are established through the budget process and remain fixed during the year of execution; actual costs are

evaluated against revenue generated by work load at established prices; and the financial condition *of the business* assessed accordingly. Profits or losses will be determined at the end of the year and will be employed as a basis for evaluating operating efficiency.

A. Prices for every Defense

Component business activity are established for each fiscal year. Once established, these prices are held constant (stabilized) through program execution. This stabilized rate policy serves to protect customers from unforeseen inflationary increases and other cost uncertainties and better assures customers that they will not have to reduce programs to pay for potentially higher than anticipated prices. In turn, this policy allows activities to execute the budgeted program level and permits a more effective utilization of Fund resources.

B. Prices for the budget year(s) will be set to recover costs over the long run. This means that prices will be set to achieve an Accumulated Operating Result (AOR) in the budget year(s) of zero. During budget execution, business areas will have either a positive or negative Net Operating Result. Accordingly, prices in the budget year will be set to either make up actual/projected losses or to give back actual/projected gains in the budget year(s).

C. In the supply management businesses, the price setting process will be consistent with the rate changes approved during the budget review.

D. Detailed requirements and guidance can be found in Chapter 9.

010219 Defense Business Operations Fund - Capital Budgeting

A. Budgetary resources for capital investments will be separately identified in an approved capital budget. Any investment in equipment, other than ADPE and telecommunications equipment; ADPE and telecommunications resources; software development; minor construction; and *depot reliability, maintainability, and sustainability (RM&S) program* investments having a value of \$100,000 or more, and having a useful life of two years or

greater, will be funded through the capital budget and its costs will be amortized or depreciated over a predetermined period. The *\$100,000 threshold* is based on congressional actions *and policy*. Depreciation of capital equipment will be fully reflected in the operating costs and rates of Fund businesses.

B. Minor Construction

1. Minor Construction projects costing \$100,000 but less than \$300,000 will be funded through the capital budget and depreciated.

2. *Effective in FY 1996, 10 U.S.C. 2805(c)(1) was amended to increase the threshold for unspecified military construction projects funded by appropriations available for operations (including DBOF) and intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening from \$300,000 to \$1,000,000.*

3. *Effective in FY 1996, 10 U.S.C. 2805(c)(1)(B) was amended to increase the threshold for minor construction projects from \$300,000 to \$1,000,00 for activities designated under the DoD Laboratory Demonstration Program. Fund activities may be designated to participate in the DoD Laboratory Revitalization Demonstration Program. The authority for the Laboratory Revitalization Demonstration Program expires on September 30, 1998.*

4. *Project planning and design costs are considered a capital investment cost that is capitalized by the DBOF activity and financed in the minor construction portion of the capital budget. Planning and design costs are not included as part of the statutory threshold for minor construction projects.*

5. *See Volume 2B, paragraph 090103, for budget formulation and execution procedures.*

C. Depreciation

All capital assets owned by activities in the Fund will be depreciated or amortized by the individual Component business area. Depreciation will be on a straight-line basis and based on the acquisition cost, *less residual value when residual value is expected to be 10 percent or more of the acquisition cost*, including installation

and related costs. The following is the depreciation schedule:

Facilities construction (including minor construction) projects - 20 years

Equipment Purchases, Other than ADPE and Telecommunications Equipment - 10 years

ADPE and Telecommunications Resources - 5 years

General Purpose Vehicles - 5 years
Software Development - 5 years

Reliability, Maintainability, and Sustainability - 10 years

010220 Base Support

Interservice and intragovernmental support, as identified in DODI 4000.19, is reimbursable by the DBOF activity to the extent that the specified support for the DBOF activity increases the host activity's direct costs (i.e., incremental direct cost). Costs associated with common use infrastructure are nonreimbursable, except for support provided solely for the benefit of one or more tenants. Support costs that are charged to a tenant DBOF activity (i.e., reimbursable cost) must be measurable and directly attributable to the DBOF activity. Indirect costs will not be included in reimbursement charges, except those included in stabilized rates charged for DBOF mission products and services. Host activities (suppliers of base support) are permitted to waive reimbursement from tenants who use or benefit from available support without appreciably increasing the host activities' costs (i.e., revenues would be less than the anticipated expense of billing and disbursing funds).

DBOF activities that use any of the common base support functions identified in DoDI 4000.19 (Interservice and Intragovernmental Support) are to reimburse host activities for this support. Reimbursement for DBOF mission products and services (e.g., depot supply, depot maintenance, public works center services, information processing, communications, and software development) shall be based on the approved stabilized rate. Other support incidental to the DBOF activity's primary mission or purpose is to be budgeted and reimbursed based on direct costs measurable and directly attributable to the DBOF activity. Only the incremental change in cost attributable to the DBOF activity (incremental direct

cost) shall be chargeable to the DBOF activity. Indirect costs are not to be included as a cost to the DBOF activity.

Volume 2B, Chapter 9 provides budget formulation and execution procedures.

010221 Dual Funded Organizations

A dual funded organization is an organization that is funded (including reimbursable funding) by both the DBOF and other appropriations or accounts. In those instances where a function is funded with a combination of both DBOF and appropriated funds, the function initially will be funded in its entirety either by the DBOF or by appropriated funds. The determination of whether the particular function initially is to be funded by the DBOF or appropriated funds will be based on the predominance of definable units of measure for the function. Examples of definable units of measure include work load, productive hours, outputs, or ultimate use. The appropriation or account initially funding the function shall be reimbursed by the other account(s) at the same unit of measure as was used to determine the initial funding source. The amount of reimbursement shall be determined based on the relative portion of that unit of measure attributable to each part of the organization (or funding source) involved.

This policy does not change the policy for reimbursement for base support services provided by the DBOF to tenant activities. DoDI 4000.19, Volume 2A, paragraph 0102020 and Volume 2B, paragraph 090103.K provide guidance for funding base support services.

010222 Customer Mandated Schedule

When a job order is canceled or reduced in scope after a DBOF activity has commenced work or incurred costs on the order, the costs incurred, plus the applied overhead (that is indirect and other normally allocated overhead (G&A) costs)), plus costs associated with the cancellation or reduction shall be charged to the customer.

Examples of directly associated cancellation or reduction costs to be charged to customers are advance planning costs, noncreditable direct material, special test equipment, necessary preservation and/or shipment effort, and any additional effort necessitated by the cancellation and/or reduction (e.g., salvaging of material). In addition, costs charged to customers should include the costs of salaries payable to

employees hired specifically to work on the canceled order until the employees are or could have been separated through a reduction in force or other appropriate action (taking into account appropriate administrative lead time), or reassigned to other direct jobs. Costs which are indirectly associated with the cancellation or reduced customer orders, underapplied overhead costs that may result in a DBOF activity as a whole from a reduced work load base shall not be charged to the customer canceling or reducing their order but shall be recorded against the net operating results of the performing DBOF activity.

0103 BUDGET ESTIMATES SUBMISSION

010301 General

A. This section, Budget Estimates Submission, provides guidance for the development and submission of the biennial budget estimates to OSD. Much of the budget guidance material formerly included in the “guidance” and “call” memoranda are now included in this Part of Volume 2. The USD(Comptroller) guidance memorandum, transmitted in June or July of each year, will hereafter include only specialized instructions such as program basis for the estimates, key assumptions to be used, and special supporting material requirements. Likewise, “supplementary instructions” memoranda issued on an “as needed” basis (usually in August) by OUSD(Comptroller) Program/Budget will be limited to specific instructions which amplify guidance included in the OUSD(Comptroller) memorandum and in this volume. The use of other memoranda to transmit budget guidance will be restricted to new or nonrecurring requirements.

B. Budget guidance for the National Foreign Intelligence Program will be issued by the Director of Central Intelligence.

C. The instructions for submitting certain summary schedules are provided in Section 010305. The instructions for back-up material tailored to each appropriation or fund category are provided in subsequent chapters. Materials required by OMB Circular A-11, which are not otherwise required by this manual, will be submitted in accordance with that Circular, unless specific exception is granted by the OMB. This is covered in Section 010105.

D. A budget work schedule will be forwarded by separate memorandum at the beginning of each budget formulation cycle. This schedule will show the dates to be used for planning the various phases involved in the formulation process.

E. Budget Material

1. The material required for the biennial budget estimates submission will be prepared in the formats prescribed in this Part.

Material submitted in accordance with OMB Circular A-11 will follow the format prescribed by that Circular. All material, with the exception of fold-in charts and tables which may be included, will be prepared on 8.5” x 11” paper. Material fulfilling Circular A-11 requirements will be bound on the left side. All exhibit books, except for Military Construction, Family Housing, Base Closure, and Information Technology, will be printed horizontally (landscape) on 11” x 8½” paper. Addressees will reduce all larger pages to the standard 11” x 8.5” size. All pages in each book are to be consistent in size. The following identifies specific requirements:

- (1) Military Personnel - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- (2) Operation and Maintenance (to include the Defense Health Program) - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- (3) Research, Development, Test and Evaluation - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Begin each program element on a facing page. Print horizontally (landscape) on 11”x8.5” paper using a 1” margin on the side to be bound and 1/2” for other edges. All material

will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

- (4) Procurement - Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.
- (5) Military Construction - The justification material for Military Construction will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.
- (6) Family Housing - The justification material for Family Housing will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.
- (7) Base Closure - The justification material for Base Closure will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins.

Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- (8) Revolving Funds - Material submitted for the budget estimate submission for **revolving funds** is to be submitted by business area on 8.5" x 11" paper, with 3 holes punched along the 11 inch side to fit standard three-hole binders. Budget submitting offices should ensure that all narrative type is consistent. Revolving funds justification books prepared by the Components are to be unclassified. Classified exhibits will be submitted under separate cover.
- (9) Information Technology - The justification material for Information Technology will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) and bound on the left side with staple, screw posts or Acco fasteners.

2. Whenever revisions or correction sheets are necessary, the revised pages showing the date of the change will be inserted in each budget book by a staff member of the DoD Component submitting the change. OUSD(Comptroller) Program/Budget staff will instruct the DoD Component's staff member as to the location of the budget books. Corrections should be held to a minimum and are not necessary for minor typographical errors which make no material difference in the analysis and evaluation of the estimates.

010302 Distribution

Distribution of budget estimates submission material will be made in accordance with the charts on the following pages. All required copies will be delivered directly by each Military Department/Defense Agency to the appropriate offices at the room numbers listed on the following page:

010303 Preparation of the Biennial Budget Estimates

A. General Guidance

1. A revision of the current year budget will be submitted by DoD Components concurrently with submission of estimates for the biennial budget years. This revision will permit a complete reassessment of current year financial requirements to be conducted during the review of requirements for the biennial budget years.

2. Estimates for the biennial budget years and outyears will be based upon the force levels, program decisions, and the TOA levels contained in the Program Objective Memorandums (POMs) as modified by the Program Decision Memorandums (PDMs).

3. At various organizational levels throughout the Department of Defense, a systematic cost-benefit analysis of proposed expenditures can be of significant value in program formulation. Investments and expenditures in each appropriation category will normally be supported by an analysis which matches estimated costs with benefits (outputs), subject to the following criteria:

a. Funding is, for the first time, shown as required in the period covered by the fiscal guidance, or

b. Previously established funding requirements in these years are significantly altered by changed program or project plans.

The criteria in DoDI7041.3, "Economic Analysis and Program Evaluation for Resource Management," will apply. Budget submissions will, as a minimum, be accompanied by a statement that (1) the submission is supported by an economic analysis, or (2) an economic analysis is not required, citing the reason. Submission of detailed backup information to OSD will be on "as requested" basis.

4. Transfers of functions between DoD Components will not be reflected in the September 15 submissions unless they have been approved by the Secretary of Defense and the dollar amounts and personnel spaces to be

transferred in the current year are fully decided upon by all DoD Components concerned when the estimates are prepared. Under these circumstances, both the gaining and losing Components will reflect the decisions in their estimates with equal and offsetting manpower and dollar amounts. The gaining DoD Component is responsible to confirm that this is the case. If this cannot be confirmed, then neither Component will reflect the transfer in their budget estimates. Each Component will notify OUSD(Comptroller) Program/Budget of the planned functional transfers not reflected.

5. Adjustments necessary to properly reflect functional transfers agreed upon by the parties, but not included in the September 15 estimates, will be accomplished in the budget review process. Components should ascertain that any pending Program Change Proposals (PCRs) as defined in DoDI7045.7 are folded into the budget review. To assure that the necessary adjustments are made, the gaining Component will report the necessary information to OUSD(Comptroller) Program/Budget. This information will cite the Secretary of Defense prior approval and include identification by fiscal year, appropriation and budget activity of the "to" and "from" amounts and associated personnel spaces to be transferred. Each gaining DoD Component must assure that all such transfers approved through November 15 are reported as soon as possible but not later than November 20, Exhibit PB-10, as prescribed in Section 010307 and provided in Section 0107, will be used for this purpose by being suitably adapted to show separately "to" and "from" changes. Functional transfers approved after November 15 will be financed by reimbursement in the current year and the budget year. Necessary exceptions to this general rule will be authorized on a case-by-case basis.

6. Material should be "Unclassified" "For Official Use Only" unless contents otherwise require a higher classification. *All Budget Estimates Submission material is subject to DoD 5400.7-R, DoD Freedom of Information Act Program, Chapter II, Exemptions and in particular exemption number 5.*

B. Pricing in the Biennial Budget Estimates

1. It is DoD policy to reflect the most likely or expected full costs (including military and civilian personnel pay) for the current year, the biennial budget years, and outyear estimates for all appropriations.

2. Estimated price level changes will be based on data provided by DoD (Comptroller). These indices, which will be updated as economic conditions warrant, will be used to (1) determine the amount of price escalation for a procurement line item, major RDT&E system, or construction item over a given time period, and (2) project inflation in other noncompensation areas of all other appropriations.

3. Military and civilian personnel compensation will be fully funded in the biennial budget estimates using the rates provided by the DoD (Comptroller).

4. Biennial budget estimates for goods and services will in all cases reflect the following considerations:

a. Cost-quantity relationships as they affect unit prices -- e.g., the unit price forecast in the biennial budget estimates will be higher or lower than the unit price current when the estimates are prepared, if differences in the quantities involved are price-significant.

b. The state of development or production and the learning curve.

c. Specific price changes, to take effect at a future date -- e.g., a specific and authoritative rate or tariff schedule to take effect on a definite future date, which may involve higher or lower prices than those in effect at the time estimates are prepared.

d. Predictable cost increases due to risk.

C. Preparation of Biennial Budget Estimates - Multiple Appropriations

1. Section 0107 contains formats for those exhibits applicable to more than one appropriation.

2. In addition to those exhibits identified in Section 0107, there are exhibits required by other chapters and included, in other appendices which require identification of budget estimates/requirements for more than one appropriation. This is particularly true of requirements discussed in Chapter 19. Offices responsible for budget estimates submissions must ensure that all such exhibits reflect total requirements for all appropriations.

D. Preparation of Biennial Budget Estimates - Operations

1. Separate identification and justification (including cost-benefit studies) are required for management actions such as data automation and systems engineering. The development, implementation and expansion of automated data systems will be based on an economic analysis which should show that the proposed management action will produce an early and demonstrably high return on investment or result in substantial increases in mission performance and effectiveness. Savings from previously approved investments and management actions will be separately identified.

2. The Dependents' Education Program in the budget years would be based on the best estimate of student load and planned at the current year program level in accordance with the criteria for the regular school program which will be set forth in a separate USD(P&R) memorandum.

E. Preparation of Biennial Budget Estimates - Procurement

1. In development of requirements for procurement of modern equipment to offset consumption or attrition of older items, all assets of the older items as well as acceptable substitutes, will be applied against gross requirements in determining net procurement requirements.

2. Administrative leadtime requirements in the budget years for any principal item should not exceed the leadtime used in the development of the current year budget program.

3. Production leadtimes utilized in preparation of estimates for the budget years

should be based on the latest contract experience and current conditions, and generally should not be greater than those used for the same item in the development of the current year budget program. Any increases should be clearly identified and accompanied by an explanation of the reason along with an identification of the pacing components/manufacturers causing the increase.

4. Use of long leadtime component procurement will be consistent with the full funding policy expressed in DoD Directive 7200.4. In this regard, long leadtime component procurement will be limited to those few critical components whose leadtimes exceed the obligation availability of the appropriation or are significantly longer than other components of the same end item.

5. For comparability purposes the P-1 Exhibit will show the prior fiscal year program in amounts to reflect reprogramming actions planned to be accomplished through the first quarter of the current year. To the extent that such reprogramming actions are not approved for budget purposes, the changes will be documented by PBD action to adjust the prior year program in the computer record.

6. Budget estimates will reflect economic production rates, unless there is strong justification (other than funding constraints) for the use of other rates.

F. Preparation of Biennial Budget Estimates - Research, Development, Test and Evaluation

1. In the development and review of RDT&E programs, special attention will be devoted to the numbers of civilian and military personnel required for support of those programs.

2. Increased emphasis will be placed on application of standards and austere limitations to housekeeping and support activities including real property maintenance, facilities operations, equipment replacement and maintenance, and supply inventory levels.

G. Preparation of Biennial Budget Estimates - Revolving and Management Funds

1. Revolving and management fund programs and biennial budget estimates will be consistent with, and justified by, related support requirements; that is, program and budget estimates will be based on anticipated customer needs for associated supplies, equipment, and services, loan purchase requirements for production guarantee accounts, scope of operations to be financed through management funds, etc. Biennial budget estimates will be consistent with the anticipated customer needs that can be financed by the related program included in the customers' budget estimates. Increased emphasis should be directed toward assuring that customers are getting maximum value for their appropriated funds.

2. Appropriations funded requirements for the Defense Business Operations Fund will be computed under the same guidance as outlined above for the specific appropriations.

010305 Budget Estimates Summaries and Transmittal

A. Budget Estimates Transmittal

1. The budget estimates will be transmitted by memorandum to the Secretary of Defense from the Secretary of each Military Department, the Director of each Defense Agency, the Assistant Secretary of Defense (Health Affairs), the Deputy Assistant Secretary of Defense (Environment), the Deputy Assistant Secretary of Defense (Administration), the Deputy Assistant Secretary of Defense (Drug Enforcement Policy and Support), and the Director, The Joint Staff. While it is mandatory that the exhibits below be submitted in the precise formats specified, any explanations or highlight information that the submitting official considers appropriate may accompany the transmittal. Exhibits PB-1, PB-4, and PB-8 include budget estimates summary data and will be "Unclassified", "For Official Use Only" unless the contents otherwise require a higher classification.

PB-1. Summary of FY 19PY thru 19BY2 Budget Estimates. [Section 010702]

PB-2. Program and Financing Schedule, Annual Accounts. (FY 19PY thru 19BY2) [Section 010702]

PB-2A Program and Financing Schedule, Other Accounts. (FY 19PY thru 19BY2) [Section 010702]

PB-4. FY 19BY1 and 19BY2 Budget Estimates - Schedule of Civilian and Military Personnel. (FY 19PY thru 19BY2+4) [Section 010702]

PB-8. FY 19CY Supplemental Appropriation Requirements (Described in Section 010306). [Section 010702]

2. The specified exhibits, transmittal memorandum to the Secretary of Defense, and other explanatory or highlight information will be submitted as follows:

a. Secretary of Defense transmittal memorandum, with exhibits PB-1, PB-4, and PB-8 attached. Deliver six copies to OSD Correspondence Control, Room 3A948. Other copy requirements are identified in Section 010302.

b. Secretary of Defense transmittal memorandum, with exhibits PB-1, PB-4, and PB-8 attached. Copy requirements are identified in Section 010302.

c. Overview booklets, such as the Air Force "Highlights," Navy "Blue Book," etc. Copy requirements are identified in Section 010302.

d. Exhibits PB-2 and PB-2A for each appropriation account. Deliver two copies to Office of the USD(Comptroller), Directorate for Program and Financial Control, Room 3B872.

3. Budget estimates for the Defense portion of the National Foreign Intelligence Program will be submitted as prescribed by the Director of Central Intelligence (DCI). In addition to budget exhibits specified by the DCI, the Office of the Secretary of Defense requires certain other materials as outlined in Chapter 16.

4. Machine-readable data will be submitted to support Exhibits PB-2, PB-2A, and PB-4 (see Section 010505). A hard-copy

submission of these exhibits, including FY 19PY, 19CY, 19BY1 and 19BY2 for the PB-2, PB-2A, and PB-4, will also be required. The hard copy submission should be a computer-prepared print-out of the machine data using the exhibit formats specified herein. Extreme care must be exercised to assure that the machine-readable data and the exhibits are identical in data content. As described in Section 010505, the machine data are the basis for the OSD budget review.

B. Program and Financing Schedules

1. Data for the program and financing schedules (Exhibits PB-2 & 2A) are required on the due date established for the budget submission for each appropriation and fund. Section 32.8 of OMB Circular A-11 requires the separate submission of supplementary program supplemental and proposed rescissions.

2. Program data will be presented in the program and financing schedule on an obligation basis consistent with the presentation in the President's Budget of previous years, unless other directions are transmitted by separate memorandum.

3. Actual prior year data will be required when available in accordance with specific update instructions issued separately.

4. Budget subactivities will be shown on program and financing schedules in all cases as they appear in the "Budget Account Title File Listing" of the Name Edit System structure referenced in Section 010506.

5. Special care should be taken to assure that data presented in the object classification schedule (Section 010506) is consistent with information required on special exhibits. For example, object class data provided for advisory and assistance services (BRS Object Class Tx2511) is the basis for Exhibit PB-15 (Chapter 19).

6. The hard-copy and machine-readable submissions of the section entitled "Relation of Obligations to Outlays" (commonly called the "expenditure tail") is required only from the Military Departments. It will show the budget activities/subactivities used as computer input

and will also show the various computed subtotals and totals as described in Section 010506. (Hard-copy and machine-readable input are not required for "Relation of Obligations to Outlays" for Defense accounts with a component identification code of "97" except for the three Defense accounts required by paragraph F of Section 010506.)

010306 Supplemental Appropriation Submission

A. Budget Estimates Transmittal

1. *Supplemental appropriations are normally allowed to meet unforeseen contingencies of a magnitude that cannot be absorbed or accommodated through reprogrammings and transfers. Specific guidance on this will be provided on a case-by-case basis.*

2. OMB Circular A-11 provides additional policy guidance on supplemental estimates.

B. Supplemental appropriation requirements will be submitted on a schedule in the format of Exhibit PB-8, provided in Section 010702. This exhibit will be transmitted in the same manner as the budget estimate summaries (see Section 010305).

C. Material Included for Informational Purposes

1. Under the 41 U.S. Code authorizations (formerly Section 3732 of the revised statute), the law provides that the President may exempt appropriations, funds, and contract authorizations which are available for military functions under the Department of Defense from the antideficiency provisions of 31 U.S. Code 1517 (formerly Section 3679 of the revised statute) whenever he deems such action necessary in the interests of national defense. Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost as an accepted expense. For example, if the President determines that it is necessary to increase the number of military personnel on active duty beyond the number for which funds are provided in the annual appropriation act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel as an accepted

expense. Obligations are then authorized to be incurred in excess of amounts appropriated. After substantially all obligations have been liquidated, an appropriation is requested to liquidate any unfinanced balances.

2. The law provides essentially that, notwithstanding the balances available, revolving funds may incur obligations to provide for making issues through the production lead-time period (10 USC 2210(b)). As a technical matter, this constitutes a form of contract authorization, and is so displayed in the President's Budget.

010307 Additional Budget Submissions

A. General Guidance. Following the initial biennial budget estimates submission (initial submit), normally on September 15, additional budget estimates submissions (additional submits) may be made, where warranted by specific changes in circumstances, within approved TOA control totals established by the USD(Comptroller) and under the following restrictions:

1. Additional budget submissions must be submitted as adjustments to, not substitutes for, the initial submit.

2. Unless otherwise directed by the USD(Comptroller), additional budget submissions must be offset with equal or greater cost tradeoffs, and must clearly indicate the areas of increase and decrease consistent with the justifications submitted as part of the initial submit.

3. Proposed decreases may not consist of reductions already effected or imminently planned to be effected as part of the budget review.

4. Additional budget submissions may not be used to compensate for incomplete or inadequate initial submits.

5. Additional budget submissions may not be used to appeal budget decisions.

6. If an additional budget submission results in an impact on revolving funds, those related requirements must be incorporated in the additional budget submission.

B. Submission Requirements In order to be considered during the budget review, all additional budget submissions must be received no later than September 30 or as specified in the annual guidance. Additional budget estimates for the current year or biennial years 1 and 2 will be accompanied by Exhibit PB-10, provided in Section 010702, plus the necessary justification material. This should take the form of a complete narrative justification and may be included on the transmittal memorandum or as an attachment to Exhibit PB-10. The applicable out-year impact of the additional budget submission will also be shown on Exhibit PB-10. The additional estimates will be transmitted in two copies (plus two additional copies for each appropriation affected) by memorandum to the USD(Comptroller) and signed by the same official who submitted the initial budget estimates or his appointed deputy. All additional budget submissions will be hand carried to the Office of the USD(Comptroller), Directorate for Program and Financial Control, Room 3B872, for OSD processing. The additional budget submission will be addressed in subsequent budget decision document(s).

010308 Major Budget Issues (MBIs)

Near the end of the budget review process, the Secretary of Defense and the Deputy Secretary of Defense may provide for the review of Component major policy or budget issues that have not yet been resolved. Resolution of these issues may displace other programs within the fixed DoD topline. Copy requirements of Component issues will be provided if an MBI review is scheduled. A general format is provided in Section 0107.

010309 Budget Review Procedures

A. Budget Review System. The automated Budget Review System is the official OSD record of the budget estimates as submitted by the DoD Components and adjusted by Secretary of Defense decisions known as Program Budget Decisions (PBDs). The data contained in the Budget Review System is the base for preparation of the Program and Financing Schedules, Relation of Obligations to Outlays, Object Classification Schedules, and the data required for OMB MAX Budget System, as required by OMB Circular No. A-11. These

documents are forwarded to OMB for preparation of the President's Budget. In addition, the automated Budget Review System is used to prepare a comprehensive set of management information summaries used to support the budget press release, statements to the Congress and other information requirements. Financial data, military end strength, and *civilian full time equivalent (FTE)* data are provided. Budget estimate submissions are entered into the system through machine readable inputs from the DoD Components. The formats and requirements are prescribed in Sections 010505 and 010506. During the joint OMB/OSD Budget Review, budget decision documents are recorded into the computer system and the current status of the budget review is available on a recurring basis.

B. Development of Out-year Data During the Budget Review

1. The automated Budget Review also includes a continuing update of the out-year TOA and manpower, adjusted to reflect the extension of CY, BY1, and BY2 decisions made during the budget review.

2. TOA, military end strength and *civilian FTE* data for the initial out-year data base are provided by each of the DoD Components (reference Section 010505). During the budget review, as budget decision documents are approved and recorded into the automated record, the TOA and manpower out-year impact of each decision is addressed on the decision document and is also entered into the automated record. The budget decision document will contain one of the following descriptors of out-year impact:

a. The estimated out-year impact for each year in millions of dollars and end strength.

b. Substantive program direction for the out-years as a basis for DoD Component determination of dollar amounts and manpower involved (to be used if out-years are not specifically addressed in a budget decision document).

c. No known out-year impact.

3. As with the CY, BY1, and BY2 decisions, the out-year adjustments approved in the Secretary of Defense decisions are entered into the automated Budget Review System using record layouts shown in DD Form 2234, Out-year Recording Form (\$\$), and DD Form 2236-1, End Strength Out-year Recording Form. TOA adjustments are recorded at the appropriation account level by budget subactivity, and by program budget decision number. Manpower data is recorded at the appropriation account level by budget subactivity, and by program budget decision number with active military manpower detailed by officer, enlisted and cadets; selected reserve manpower detailed by officer and enlisted personnel category; and civilian *FTE* detailed by U.S. direct hire, foreign national direct hire, and foreign national indirect hire.

4. The automated Budget Review System produces Out-year Impact Status Reports on a recurring basis throughout the budget review. These reports, which are distributed to the applicable DoD Components, show TOA & manpower data by appropriation, budget activity/subactivity and personnel category for the budget submission base and all adjustments to the base resulting from decisions made during the budget review. The final reports at the conclusion of the budget review reflect the out-year numbers (TOA and manpower) which are the control numbers for the President's Budget update of the Future Years Defense Program (FYDP). It is essential that the Out-year Impact Status Reports be reviewed by the DoD Components on a recurring basis during the budget review so the out-year numbers are, under continuous scrutiny and the President's Budget update for the FYDP may proceed in a timely manner.

C. Printing Schedule for Budget Material

1. OMB Circular No. A-11 prescribes the requirements for materials to be included in the President's Budget document. Annually, the ODC(P/B), OUSD(Comptroller) publishes instructions on the procedures to be followed during the budget review. These instructions detail the sequence of events necessary to finalize the budget review and complete the printing phase of the budget. All

actions concerning printing of budget material will be accomplished in accordance with these references and the following paragraphs.

2. OMB will provide ODC(P/B), OUSD(Comptroller) with reprinted galleys based on last year's President's Budget document. These galleys will omit all amounts in the schedules and tables. The submission of marked-up reprinted galley and new material is intended to fill technical budget preparation needs (i.e., determine that all lines, account titles, text, and appropriation language are correct and that all required schedules are in print). Additionally, by representing the best estimate of the current status of programs, the impact of any further changes, as final decisions are made, will be minimized. The reprinted galleys will be marked-up by the ODC(P/B), OUSD(Comptroller) staff, probably in mid-December, to show the current status of the budget after the prior year column has been updated and validated. The data in the current year and both biennial year columns will be blank at this time.

3. There will be no changes to the prior year column of the budget after reprinted galley, except to, correct printer errors. In some cases, new print materials may be required after reprinted galleys, (e.g., new accounts, accounts with supplemental requiring separate schedules, rescission proposals and other material to be presented in the President's Budget document for the first time).

4. OMB will cycle the reprinted galley and provide galley proofs to ODC(P/B), OUSD(Comptroller). Further instructions on processing galley beyond the first step will be contained in the ODC(P/B), OUSD(Comptroller) instructions cited in 1. above or some other appropriate guidance memorandum.

0104 CONGRESSIONAL
JUSTIFICATION/PRESENTATION

010401 General

A. Purpose

1. This section provides instructions for the preparation of justification material for presentation to congressional committees. Justification material should be developed using the guidelines established herein as the minimum requirements to be included in the Justification Books. Any exception to these minimum requirements must be cleared with OUSD(Comptroller) Program/Budget.

2. Justification of proposed supplemental appropriations and budget amendments are covered in OMB Circular A-11 and Section 010402; however, separate instructions will be issued by OUSD(Comptroller) Program/Budget as the need arises.

3. General preparation and submission instructions pertaining to individual appropriations, Intelligence Programs and Communications, Command and Control (C³) Programs are contained in Chapters 2 thru 7,9,10, 16 and 17.

4. *All congressional budget/presentation material is subject to DoD 5400.7-R, DoD Freedom of Information Act(FOIA) Program requirements. Chapter II, Exemptions of this regulation should be reviewed carefully before denial of any FOIA request. Exemptions will generally fall into category 5.a.9 in section 3-200. Use of For Official Use Only (FOUO) must meet the requirements of DoD 5400.7-R Chapter IV.*

B. Preparation of Material

1. Separate Justification Books will be furnished for each Public Law title relating to each Military Department. An O&M Overview book will be developed within OUSD(Comptroller) Program/Budget as well as a consolidated overview of Multiyear Procurement programs based on submissions of the Military Departments. Material prepared by the individual Defense Agencies also will be consolidated by

OUSD(Comptroller) Program/Budget into a single Justification Book for each Public Law title. Material for the Operation and Maintenance, Defense Agencies; U.S. Court of Appeals for the Armed Forces, Defense; Environmental Restoration, Defense; Office of the Inspector General; and Contingencies, Defense; appropriations will be consolidated into a single Justification Book. Additionally, information technology material prepared by the Military Departments and other DoD Components will be consolidated by DASD(C³I) (Information Technology Resources) into a single Justification Book. The Department of the Army will prepare a justification book for Chemical Demilitarization programs and will consolidate material for the Family Housing and Homeowners' Assistance Fund, Defense appropriations into a single Justification Book. Each Department will prepare a Justification Book for each Base Closure Account. In addition, separate Justification Books will be prepared for Intelligence-Related Activities and the Defense portion of the National Foreign Intelligence Program, the latter as prescribed by the Director of Central Intelligence. All other Justification Books will be annotated as appropriate to indicate items and resources supported in Intelligence Program Justification Books. Also, a separate Justification Book will be prepared for C³ programs, with DoD component input as prescribed in Chapter 17.

2. Classified and unclassified data will be included in the single volume or set of volumes for each title with the classified pages bearing the appropriate security classification, except that all materials contained in the Military Personnel and Operation and Maintenance justification books will be unclassified. Classified exhibits will be submitted separately and explanation provided for their being classified. Fiscal data pertaining to explicitly identified portions of the Defense Intelligence Program, e.g., Consolidated Cryptologic Program, shall be classified SECRET.

The highest security classification of data included in Justification Books will be SECRET. Information requiring a higher classification will be discussed with OUSD(Comptroller) Program/Budget on an individual situation basis. Classified data will be bracketed by pencil as thus [] to permit the congressional committees to publish an unclassified version. Data not

bracketed will be assumed to be unclassified. In bracketing classified columnar data, each column will be individually bracketed. Care must be taken to assure that unclassified data are not bracketed. Security classification markings should be centered at the top and bottom of applicable pages using gummed-back markings to assure clarity. The appropriate automatic downgrading notation will be used in accordance with DoD 5200.1-R "Information Security Program Regulation". The *appropriate classification cover sheet must be utilized.*

3. Military Departments will be responsible for clearing the justification material with the Directorate for Freedom of Information and Security Review, OASD(Public Affairs) prior to transmittal to the congressional committees. OUSD(Comptroller) Program/Budget will be responsible for the security clearance of the consolidated Defense Agencies Justification Books, as necessary.

Although Defense resources included in the NFIP and TIARA are justified in specially classified and separately furnished Congressional Justification Books in accordance with Chapter 16, they are also included in the overall Defense appropriation books. NFIP and TIARA entries in conventional justification materials must be clearly annotated to indicate that they are part of intelligence or intelligence-related activities to facilitate Congressional oversight.

4. The Program and Financing, Object Classification and Personnel Summary schedules will reflect the full current year program, including those parts which require, supplemental appropriation action.

5. Computer-prepared print-outs of the Program and Financing and Object Classification Schedules (Budget Review System Report 21) will be available from OUSD(Comptroller) P/B and will be used in the Justification and Backup Books as specified for each appropriation title in the following chapters. Computer print-outs will be reduced to the size specified herein.

6. Printing of Congressional Budget

Material:

- General. Tabs will be used only where specified by OSD; McCall (edge) indexing will be used as appropriate. Justification material should be printed on both sides of the page wherever feasible. Headings for an appropriation or budget activity will appear on the initial page of the subdivision and will not be repeated on subsequent pages, except RDT&E Program Element Listings. The Components will work with DPS to determine the most appropriate and quickest method of printing and fastening each of the books subject to the guidance by appropriation title below.

- Military Personnel. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

- Operation and Maintenance. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

- Research, Development, Test and Evaluation. Material is to be printed horizontally (landscape) on both sides of the page on 11" x 8½" paper using a 1" margin on the side to be bound and 1/2" for other edges. Components will request DPS to reduce all larger pages to the standard 11" x 8½" size so that all of the pages in each book are consistent in size. The material will be printed head to toe with 3 holes punched across the top margin. The following is the fastening preference:: staples, screw posts, ACCO fasteners, etc.. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Books are to be a maximum range of about 600-650 pages where possible (300-325 sheets of paper printed both sides).

Since the justification material is printed double sided, then each PE package must begin on the

front side of a new page. " When the last page of a PE package does not end on the backside of the paper, then a blank page must be inserted with the wording "This page intentionally left blank in bold letters, centered on the page. The reason for this is so that the justification material can be easily broken apart and sorted by PE with all of the pertinent exhibits.

For those Components that have a large number of PEs and printing the material all in one volume is impractical, it is preferred that the justification material be submitted by budget activity with the science and Technology budget activities (BA 1 through BA 3) printed in one volume and the remaining budget activities printed in a separate volume or in individual volumes. Each separate book should include an R-1 listing and a table of content indicating which volume and page the applicable program element can be found.

- Procurement. Material to be printed on both sides of the page with a maximum range of 600-650 pages where possible (300-325 sheets of paper printed on both sides.) Print horizontally (landscape) on 11"x8.5" paper using a 1" margin on the side to be bound and 1/2" for other edges. All material will be printed head to toe with 3 holes punched across the top margin with staples, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling.

- Military Construction. The justification material for Military Construction will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. All exhibits will be printed utilizing white paper. . Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Family Housing. The justification material for Family Housing will be provided on 8.5" x 11" paper, typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. . Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Base Closure. The justification material for Base Closure will be provided on 8.5" x 11" paper,

typed across the short dimension of the paper (portrait) with 3 holes punched on the left margin and bound with screw posts or Acco fasteners. Material is to be printed on both sides of the page using 1" margins. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Revolving Funds. Justification books for revolving funds are to be submitted in one volume with 3 sections: Component Overview; Operating Budget and Capital Budget. Component Overview and Operating Budget sections are to be printed in portrait format (vertically) on 8.5" x 11" paper head to head on 2 sides. Capital budget exhibits are to be printed in landscape format (horizontally) on 11" x 8.5" paper head to toe on 2 sides. Budget submitting offices should ensure that all narrative type is consistent. All justification material will be punched to fit standard three-hole binders. Use of adhesive binding (glue or tape) is not acceptable because it may prevent recycling.

- Information Technology. Justification material will be provided on 8.5" x 11" paper typed across the short dimension of the paper (portrait) and bound on the left side with stapless, screw posts or ACCO fasteners. Use of adhesive binding (glue or tape) is discouraged because it may prevent recycling. Copies to be provided to OUSD (C) for congressional distribution should not be bound but should have 3 holes punched in the left margin for use in standard 3-ring binders.

7. Justification book cover inserts will be 220 index stock using the following colors: Army - green; Navy - buff; Air Force -blue; Defense Agencies (including the U.S. Special Operations Command and the U.S. Transportation Command) - white. Covers will bear the appropriate security markings, title of the volume as specified herein, the phrase "Submitted to Congress February 19...", and the appropriations included.

8. The use of acronyms and abbreviations in the justification material should be held to a minimum. However, where acronyms and abbreviations are used, they must be identified on the page on which they appear.

9. The exhibit numbers used in this section are for reference purposes only and should not be used in the Justification Books.

C. Submission of Justification Books for Review

1. Before the justification material can be released to the Congress, it must be reviewed by the appropriate DoD (Comptroller) directorate to ensure that policies and decisions made by the President and Secretary of Defense are fully reflected. Accordingly, three advance sets of Justification Books will be forwarded to the appropriate DoD(Comptroller) directorate for review. The following is a list of the directorates:

Directorate for Operations,
3D868, 697-9317

Directorate for Investment,
4B916, 695-5507

Directorate for Revolving Funds,
3B866, 697-1880

Directorate for Construction,
3D841, 697-4829

Directorate for Information
Technology Financial Management,
1B650, 693-8344

In addition, 5 sets of the Communications, Command and Control (C³) Programs Justification Books will be delivered to the ASD(C³I), Room 3D228; 3 sets of Information Technology justification material will be delivered to the ASD(C³I), Director, Information Technology Resources, Room 3D200; and 1 set of the Military Personnel Justification Books for the Reserve Components will be delivered to OASD(RA), Room 2D528.

The Military Departments should also send two copies of advance sets of justification books to Directorate for Freedom of Information and Security Review (Room 2C757, Pentagon) for clearance. Clearing material through this Directorate should be accomplished piecemeal to expedite the final review. Clearance by OUSD(Comptroller) P/B will be evidenced by an approval from the applicable Program/Budget Director, initialed on one of the advance copies of each Justification Book and returned to the applicable service. Upon advice from OUSD(Comptroller) P/B and Directorate for Freedom of Information and Security Review that the advance sets of justification books are acceptable, the DoD components will complete preparation and assembly of Justification Books.

Under no circumstances will justification material be released to congressional committees or the public prior to receipt of these clearances.

The Communications, Command and Control (C³) Justification Books will be reviewed by ASD(C³I). Ordinarily, the OUSD(Comptroller) P/B Director will not initial the advances for release until these reviews are accomplished.

2. Except as specified herein, submission dates will be provided in separate correspondence from OUSD(Comptroller) Program/Budget.

010402 Supplemental and Amended
Appropriations Requests

A. Organization of Supplemental Appropriations Requests Justification Books

1. Justification Books in support of supplemental appropriations requests will be prepared by OUSD(Comptroller) P/B, based on material furnished by the DoD Components. Justification materials will be addressed in separate correspondence from OUSD(Comptroller) P/B.

2. The Justification Book will be arranged as follows:

a. Table of Contents and Summaries. These items will be prepared by OUSD(Comptroller) P/B.

b. Section 1 - Title I - Proposed Appropriations for Various Programs. This section will contain appropriate language, narrative justifications, and any special exhibits in support of program supplemental requests. The appropriation language will be extracted by OUSD(Comptroller) P/B from the Budget Appendix. Supplemental appropriation requests related to all program supplemental will be supported by a narrative justification in the format of Exhibit PB-37A, provided in Section 010603.

B. Organization of Amended Appropriations Requests Justification Books

1. A separate abbreviated Justification Book will be prepared by OUSD(Comptroller) each Military Department for each affected appropriation title;

e.g., Operation and Maintenance; Procurement; RDT&E; etc. (Additional justification materials required of Defense Agencies and for Defensewide accounts will be identified in separate correspondence from OUSD(Comptroller). Related Justification Books will be prepared by OUSD(Comptroller) P/B.) Each Book should be stapled but must contain holes punched to fit existing Justification Book binders. (NOTE: Depending on the magnitude of a particular budget amendment; i.e., number of DoD components and appropriation accounts affected, single Justification Books may be prescribed for each DoD component, or a single Justification Book may be prepared by OUSD(Comptroller) P/B with input from the affected DoD components.)

2. Each Justification Book will contain the following, as a minimum:

a. A single Table of Contents

b. By individual appropriation account:

(1) Revised appropriation language (retyped from Budget Appendix to reflect revised request).

(2) Budget Amendment Summary, in the format of Exhibit PB-37R (see Sec 0107), highlighting changes to the pending request.

(3) Program and Financing Schedule (abbreviated) in the format of Exhibit PB-37S (see Section 010603). Both the Budget Plan and Obligation Plan will be shown for multi-year accounts.

(4) Narrative Justification by Budget Activity in the format of Exhibit PB-37T (see Section 010603). Narrative will discuss dollar, quantity, personnel changes, etc., at least at the level of changes indicated on the Budget Amendment Summary (Exhibit PB-37R).

(5) Existing P-1 and R-1 Exhibits will be marked up to indicate changes resulting from the proposed amendment.

(6) Procurement Justification material and R&D Descriptive

Summaries will be retyped, where applicable, to encompass changes resulting from the proposed amendment.

3. Three advance sets of materials will be forwarded to the Directorate for Plans and Systems, OUSD(Comptroller), Room 3A862. Two copies should also be submitted at that time to Directorate for Freedom of Information and Security Review, Room 2C757, for security clearance. Other appropriate provisions of Section 010401 of this Regulation pertain. Military Departments will make the same distribution of above Books as for regular congressional justification materials.

C. References Additional instructions are contained in OMB Circular A-11.

010403 Distribution

A. Copies of OSD-generated justification materials for congressional distribution will be delivered to OUSD(Comptroller), Plans and Systems, Room 3A862.

B. Copies for congressional committees, GAO, Library of Congress, CBO, and OMB, etc. will be delivered directly by each Military Department. OUSD(Comptroller) (P/B) will distribute copies of the consolidated Defense Agencies justification material. The DASD(C3I) (Information Technology Resources) will distribute copies of the Information Technology Justification Book.

C. In addition, copies of the unclassified and/or declassified justification material are to be provided to the Defense Technical Information Center (DTIC) and the National Technical Information Service (NTIS) for their utilization in responding to requests for such material. This excludes Procurement Backup Books and the O&M Data Books. With this procedure, all requests for justification book material that are received under the Freedom of Information Act by DoD components should be referred to DTIC or NTIS. A distribution limitation statement "UNCLASSIFIED, DISTRIBUTION UNLIMITED, APPROVED FOR PUBLIC RELEASE" must accompany copies provided to DTIC. As a reminder, for Freedom of Information requests received prior to DTIC/NTIS

being provided the unclassified or declassified material, it is the responsibility of the DoD component to comply with the request in accordance with DoD 5400.7-R. Distribution of material will be made after the congressional copies have been provided for justifications that initially are unclassified, and as soon as possible after declassification has been completed for those books that are classified. Eleven (11) copies to NTIS and two (2) to DTIC are required.

D. Copies identified in the “Reserve” column of the distribution tables should be retained by components for unanticipated requests for copies that would be inappropriate to send to DTIC or NTIS.

E. Copies for OSD will be delivered directly by each Military Department to the offices listed. Total distribution including the number of copies are also provided on the following tables. *Advance books (40) are required to be produced by the due dates so that immediate distribution may be made to the congressional committees. The remaining quantities will be delivered/distributed 3 to 5 days thereafter.*

010404 Witness Statements

A. Purpose This section provides instructions for preparation of witness statements for testimony at hearings before congressional committees.

B. Preparation

1. Each witness statement should contain a cover page that includes the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing; and an embargo statement "Not for Publication Until Released by the Committee" (or Subcommittee, if applicable).

2. The following line-spacing guidelines should be followed in typing statements:

a. Double space statements prepared for presentation to the committees, for easy reading by the members.

b. Single space statements that will be returned with transcripts or those prepared solely for inserting into the record.

3. The various congressional committees publish instructions for preparation of witness statements for their committee. These instructions, unique to each committee, are available from the following offices:

a. House and Senate National Security/Defense and Military Construction Appropriations Subcommittees - Directorate for Plans and Systems, USD(Comptroller) and Service Budget Liaison offices.

b. House National Security and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

c. Other Congressional committees - Instructions are normally included in the letter requesting the hearing.

4. In order to provide some background on the witness for a committee, a biographical sketch of the witness should be included in the witness statement following the cover page. This is normally not necessary for witnesses such as Service Secretaries unless they are appearing for the first time before the committee.

C. Security Review

1. DoD Directive 5400.4 calls for DoD witnesses to submit their prepared statements to the Office of the Assistant Secretary of Defense (Public Affairs) for clearance as far in advance of the required date of transmittal to a congressional committee as possible, usually 5 or more working days prior to the date clearance is desired. Upon completion of the review process, the originating office should ensure that 75 copies of unclassified statements are delivered to the Directorate for Defense Information, Office of the Assistant to the Secretary of Defense (Public Affairs), Room 2E757, Pentagon, at least 24 hours in advance of the scheduled appearance of the witness before the congressional committee. Be prepared to provide additional copies on short notice.

2. These procedures will allow the Office of the Assistant Secretary of Defense (Public Affairs) to meet news media requirements as soon as statements are released by the congressional committee or subcommittee.

D. Number of Copies

1. A chart identifying the various oversight committees' copy requirements for witness statements and the date that the statements are due to the committee is republished periodically by the Directorate for Plans and Systems, USD(Comptroller), as committee requirements change. Be careful to use the most recent chart.

2. Special care should be exercised to ensure that specified due dates are met. The committees use the witness statement in preparing for the hearing and so suspense dates are important. Committees will routinely predicate cooperation in discussing or releasing possible hearing questions or topics on the timely delivery of these statements.

3. Offices responsible for arranging the attendance of principal and supporting witnesses at a hearing normally prepare a listing of witnesses known as the Witness List. These offices will contact all involved parties to obtain the names and positions of the witnesses for the Witness List.

010405 Transcript Processing

A. Purpose This section provides instructions for processing transcripts of witness testimony at hearings before congressional committees.

B. Initial Receipt

1. The House and Senate Appropriations subcommittees on National Security/Defense, and Military Construction Appropriations provide hearing transcripts directly to Budget Liaison offices of the Services and to the Director for Plans and Systems, Under Secretary of Defense (Comptroller). All other hearing transcripts are provided directly to the Legislative Affairs office of the Services and to the Office of the Assistant Secretary of Defense (Legislative Affairs).

2. The original copy of the transcript is then provided to the office of the principal witness utilizing DD Form 1587, Record of Congressional Transcript Review, as the transmittal document. To meet committee requirements and allow time for final review by the Directorate for Freedom of Information and Security Review, Office of Assistant to the Secretary of Defense (Public Affairs), each element in the review process must give cooperative consideration to the time requirements of all elements in meeting due out dates. DoD Directive 5400.4 provides guidance utilizing DD Form 1587. Instructions are also printed on DD Form 1587.

3. The various committees publish instructions for processing transcripts for their committee hearings. These instructions, unique to each committee, are available from the following offices:

a. House and Senate National Security/Defense and Military

Construction Appropriations Subcommittees - Directorate for Plans and Systems, USD(Comptroller) and Service Budget Liaison offices.

b. House National Security and Senate Armed Services Committees and House and Senate Budget Committees - Office of the Assistant Secretary of Defense (Legislative Affairs) and Service Legislative Affairs offices.

c. Other congressional committees - Instructions are normally included in the letter requesting the hearing.

C. Processing Procedures

1. Upon receipt of the transcript in the office of the primary witness, that office will review and edit the transcript and prepare the necessary inserts including questions for the record. At the same time, those staff offices required to provide input to the transcript should be tasked, in writing, for their specific portion. Page and line number/question number should be referenced when tasking inserts for the record.

2. Offices providing input to transcripts should clear their internal security review office prior to providing their input to the principal witness office. After consolidation of the edit/review of the transcript and inclusion of necessary inserts, the office of the principal witness will then need to obtain the proper security clearance for the transcript and inserts from Directorate for Freedom of Information and Security Review, Office of the Assistant Secretary of Defense (Public Affairs). ADD 1790, Prepared Testimony Review must be used. DoD Directive 5400.4 provides instructions to be followed in processing the transcript through the security review process.

3. Plain bond (5-13/16" x 9-3/4") Insert for the Record, will be utilized for all inserts to congressional testimony and questions/answers for the record. Formats for completing these for the four oversight committees are provided in Section 010703.

4. After completing the security review process and required coordination's, the completed transcript should be returned to the office from which the transcript was received

(Transcript Action Monitor) for final review and delivery to the congressional committee.

5. Special care should be exercised to ensure that transcript processing suspense dates are met. The committees emphasize that the deadline dates imposed by them must be met. As the committees approach mark-up, the importance of meeting deadlines becomes even more critical. Transcripts should not be unduly delayed while gathering information for the record. If a delay is encountered, a note that the data will be furnished at some specified date should accompany the transcript and processing should proceed.

D. Page Proofs/Galleys Often committees allow DoD to review "page proof" / "galleys" of congressional testimony to ensure that changes have been incorporated and that classified data has been deleted from the version that will be made public. Extreme care must be exercised to ensure that all classified data have been excised.

010406 Appeal Process on Congressional Actions

A. Purpose Each year the actions taken by congressional committees during consideration of the DoD authorization and appropriation bills are reviewed by DoD components. This Section provides policy guidance and procedures for appealing such congressional actions.

B. Scope of Material

1. DoD appeals to congressional committees may be in the form of a letter to the appropriate committee chairman (or chairmen in the case of appeals to joint conferees), which sets forth the Department's position on the most significant programs/items impacted by congressional actions. This letter is prepared for the signature of the Secretary of Defense. Only the Secretary will provide the Department's position on appeal items.

2. DoD appeals also may be in the form of an appeal package consisting of as many as 100 or more pages, one for each action being appealed. This package is submitted to the appropriate committee by the USD(Comptroller).

It is not submitted as an enclosure to an appeal letter, but may be referred to in the letter.

3. The submission of appeal material can vary each year and is primarily dependent upon the timing of each committee's actions on the budget request. The preparation of appeal items begins when the actions of the committees become known, usually with release of the committee's report. Normally, appeal material will be modified to reflect final floor action since amendments adopted on the floor can significantly change positions reported out by the committees. In most cases, the process is as follows:

a. To Senate Armed Services Committee. This appeal is based on the actions of the House National Security Committee, as modified by House floor action.

b. To Authorization Conferees. This appeal is based on the actions of both the House National Security and Senate Authorization Committees, as modified by House and Senate floor action.

c. To Senate Appropriations Committee. This appeal is based on the actions of the House Appropriations Committee, as modified by House floor action.

d. To Appropriations Conferees. This appeal is based on the actions of both the House and Senate Appropriations Committees, as modified by House and Senate floor actions.

C. Preparation of Appeals

1. Once the actions of an oversight committee become known, DoD components normally will be requested to provide input for incorporation into the Secretary's appeal letter or appeal package. *Appeal input will be submitted in the general format of Exhibit PB-39A-1 and PB-39A-2 (provided in Section 0107) in both hard copy and on floppy disk in either Microsoft Word or WordPerfect format for DOS (with no graphics).* Components may be asked to assign a priority to the actions they want appealed.

2. All appeal materials must be unclassified. Verification that materials are

entirely unclassified must be obtained by the DoD component from the component's security review prior to submission to OSD. USD(Comptroller) will obtain clearance of the consolidated appeal package from the Directorate for Freedom of Information and Security Review, Room 2C757, the Pentagon.

D. Policy Guidance, Preparation and Coordination of Budget Appeals

1. By memorandum of May 27, 1983, Subject: "Congressional Justification of the President's Annual Defense Budget," the Secretary of Defense charged the Comptroller with the responsibility to coordinate all justification actions for his consideration that may be interpreted as reprogramming, supplementals, amendments, or appeals to the Defense budget. Therefore, in order to ensure that the Department speaks to the Congress in this area with one voice and remains consistent with the Secretary's policy direction, all appeals to congressional committees will be prepared by the USD(Comptroller).

2. The Directorate for Plans and Systems, within the Office of the USD(Comptroller) (Program/Budget), will issue instructions for submission of appeal input. Along with other Comptroller directorates, Plans and Systems will review the input and prepare a draft appeal letter and appeal package. Normally, these drafts will be sent for comments to the appropriate DoD offices. Clearance on all appeal materials will be requested from the Office of Management and Budget.

3. While responsibility for consolidation and coordination of appeal materials resides with the USD(Comptroller), all offices are responsible for ensuring that the materials they submit remain up to date. *Submitting components e.g. The Joint Staff) should provide only one position on each issue submitted.*

0105 AUTOMATION REQUIREMENTS

010501 Automated Future Years Defense Program (FYDP) Data Base

A. Purpose and Objectives. This Section provides for the maintenance of the Future Years Defense Program (FYDP) as an automated database and provides the procedures and technical guidance for the submission of program element change data as required in DoD Instruction 7045.7, "Implementation of the Planning, Programming, and Budgeting System (PPBS)" dated May 23, 1984.

B. Applicability and Scope. The provisions of this Section apply to the Office of the Secretary of Defense (OSD), the Military Departments and the Defense Agencies (hereafter referred to as "DoD Components") that contribute data to the Future Years Defense Program.

C. Reporting Requirements. Updates are required coincident with submission of the (1) Program Objective Memoranda, (2) Budget Estimates, and (3) President's Budget, and, when appropriate, (4) for major restructures of the Future Years Defense Program itself. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the DoD Comptroller amounting each update. Furthermore, Section 221 of Title 10 of the United States Code requires that: "The Secretary of Defense shall submit to Congress each year, at or about the time that the President's budget is submitted to Congress that year under section 1105(a) of title 31, a future-years defense program, (including associated annexes) reflecting the estimated expenditures and proposed appropriations included in that budget."

D. Update and Publication of Future Years Defense Program (Historical). Since the basic Future Years Defense Program Summary and Program Element Detail document reflects only the most recent prior year column of a budget cycle; and since procurement, RDT&E and military construction appropriations are available for obligational authority for multiple years; it is periodically necessary to update and publish a historical version of the Future Years Defense

Program Summary and Program Element Detail. The update and publication of this document enables the FYDP to reflect transfers, rescissions, reappropriations and other authorized adjustments to total obligational authority which might occur in multiyear appropriations, as well as to reflect actual accounting obligations.

E. Related Databases to the Future Years Defense Program. Consistent with the FYDP are separate but related databases and documents comprising the Procurement Annex, RDT&E Annex, and Construction Programs. These related databases produce the Procurement Programs Report (P-1), RDT&E Programs Report (R-1), and Construction Programs Report (C-1). Detailed information regarding these databases is provided in Sections 010502 through 010504.

F. Instructions - Preparation and Processing of Program Data for Updating the Future Years Defense Program Data File

1. General

a. Future Years Defense program data shall be submitted by DoD Components to the Directorate for Program and Financial Control (P&FC), Office of the Deputy Comptroller (Program/Budget), Room 3B872, on floppy disk as directed. The submission of code sheets (FYDP Data Format in Section 010704) will not be accepted unless specifically authorized by the Director for P&FC. If approved, the code sheets must be legible and be accompanied by Total Obligational Authority (TOA), *Defense Business Operations Fund Costs*, and Manpower Controls Format provided in Section 010704.

Floppy Disk Format:

- ASCII file.
- Character fixed record length --(length of record on code sheet -- i.e. 28 for the FYDP data transactions)
- Formatted PC DOS -- Releases 2.0 or higher.
- 5¼ Floppy disk or 3 1/2" diskette Double Sided/Double Density
or

Double Sided and High Density.

- Indicate on the front of the disk the file name, the number of transactions the file contains and level of security classification.

b. All resource changes to the data file shall be on a net change basis; that is, data currently in the file shall be revised (plus or minus) by an incremental amount to reflect the new approved position.

c. Program element codes and titles, resource identification codes, and DoD Component identifier codes are as prescribed by DoD 7045.7-H (FYDP Program Structure Handbook *dated January 1996*) and in approved decision documents not yet reflected in the handbook.

2. Submission of Changes

a. Record changes to (a) establish a new program element or (b) revise the title of an existing program element or resource identification code shall be recorded by P&FC staff.

b. Changes submitted for net change/add record resource data (FYDP Data Format as prescribed in Section 010704) need only provide specific identification of quantitative resource information by program element, resource identification code, and fiscal year.

3. TOA and Manpower Controls.

To ensure that the values of all net change data submitted by the DoD Components result in the correct revised totals when updated in the OSD data base, a hard-copy summary of controls (format in Section 010704) is required.

4. Military Pay Rates. Hard-copy average annual military pay rates and Permanent Change of Station (PCS) data, rounded to the nearest dollar for each fiscal year, is required from each Military Department with submission of each Future Years Defense Program update. A sample format is shown in Section 010704.

A. Purpose and Objectives. This section provides for the maintenance of the Future Years Defense Program (FYDP) Procurement Annex as an automated database which will be the primary structure for quantity and program cost at line item level of detail for a number of related procurement program documents. The Procurement Annex supports and should be consistent with the following documents: (1) Procurement Programs (P-1) Report and all supporting budget backup exhibits, (2) Congressional Data Sheets, (3) Selected Acquisition Report (SAR), and (4) Procurement Program and Financing Schedules of the President's Budget.

B. Applicability. The provisions of this section apply to the Office of the Secretary of Defense (OSD), the Military Departments, and the Defense Agencies (hereafter referred to as "DOD Components") that contribute data to the Procurement Annex.

C. Reporting Requirements. The initial automated database was established consistent with the procurement data submitted to the Congress in support of the FY 1974 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program Objective Memoranda, (2) Budget Estimates, and (3) President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

D. General Instructions - Preparing the Procurement Annex. The Procurement Annex complements the Summary and Program Element Detail Future Years Defense Program by providing resources in a line item level of detail with appropriation identification. A detailed description of line item entries is listed in Chapter 4, Section 0402 of the Budget FMR. The minimum information required in the Procurement Annex is as follows:

1. A summary by appropriation account with subtotals for DOD Components.

010502 Automated Procurement Annex Database

2. A summary of each appropriation account by budget activity with an appropriation total.

3. A detailed line item listing in budget activity / subactivity sequence.

4. Entries for the individual line items should be on the same basis as that used for budget submissions. Multiyear procurements (MYP) are identified for P-1 line items with *MYP as defined in Section 010203*. Advance procurement entries should be used as specified in *Section 040502*. Initial spares listed with the procurement item (post delivery and outfitting costs for Shipbuilding and Conversion, Navy) should be shown immediately following the line as a memorandum entry--non-add to the budget activity total.

5. Costs of prior year programs will be adjusted annually to reflect actual obligations, including deobligations, recoveries of prior year obligations and upward obligation adjustments as appropriate after the appropriation expires but before it is canceled.

6. Cost to complete column provides the data necessary to obtain the total procurement cost for acquisition of weapon items. It is necessary to estimate the cost of completing the approved program for major weapon systems included in the Selected Acquisition Report (SAR) reporting system and for multiyear contracts utilizing economic order quantity advance procurement. Such costs will be entered in the "cost to complete" column of the Future Years Defense Program Procurement Annex. Entries in the "cost to complete" column are not required for other procurement line entries. The "cost to complete" estimate will include: (1) the portion of the "approved quantity" to be procured beyond the FYDP, and (2) costs to complete acquisition of units procured in prior years such as outfitting and post delivery requirements for ships which will not deliver during the FYDP.

7. Security classification of line items is determined by the submitting component subject to OSD Security review. Except for information published in the unclassified version of the P-1 Report, data contained in the Procurement Annex may not be released outside

the DoD without the expressed written consent of the Under Secretary of Defense (Comptroller). (In the case of the Procurement Annex update for the Program Objectives Memorandum, this consent must come from the Director of Program Analysis and Evaluation.)

E. General Instructions - Preparing the Procurement Programs (P-1). The P-1 document is derived from and consistent with the Future Years Defense Program Procurement Annex database. The P-1 is provided annually to the DOD Oversight Committees of the Congress coincident with the transmission by the President of the Budget of the United States Government. An unclassified version is provided to OATSD(PA) under the provisions established by the Freedom of Information Act. The unclassified P-1 is the only document from the annex data base available for public distribution. The minimum information required in the P-1 is as follows:

1. Identification codes and a detailed description of line item entries are explained in *paragraph F* below.

2. The line item data provided is PY, CY, BY1 and BY2 with an entry for unit cost data, calculated by the computer, for each line item with BY1 or BY2 data. *Ensure quantities are coded in accordance with paragraph F.8.c to ensure that a correct unit cost is calculated.*

3. The security classification will be in accordance with the criteria set forth in Section 010108.

F. Procurement Data Elements and Record Formats

1. Codes - Appropriation Code Component Code, and Budget Activity Code are as specified in Section 010506. Budget Subactivity Code will be assigned by the responsible Military Department or Agency.

2. Item Control Number - This control number will be assigned by the responsible Military Department or Agency. Since this control number will serve to identify the item and relate it to its respective nomenclature, it will be assigned in such a way as to serve for the life of the line item in the data base. It is not to be confused with

the numeric, sequential, line item number printed in the first column of the procurement exhibit P-1. Care should be exercised by each Department that the Item Control Number be assigned to provide for additions, deletions, and generic and/or logical sequencing of line items within the budget subactivity. Uniformity among the Military Departments or Agencies will not be necessary but the code will not exceed ten (10) alphanumeric characters. The code will be entered in the data field left justified.

3. Cost Type Codes.

Authorized for use are:

Code Cost Type:

- A Weapon System Cost
- B Advance Procurement (PY)
- C Advance Procurement (CY)
- D Contract design - Historical SCN only
- E Contract Cancellation - SCN only
- F PY Unfunded Deficiencies*
- G Over Target*
- I *Future Cost/Growth Escalation* - SCN only
- J Initial Spares* (Outfitting for SCN)
(Memo non- add)
- K Post Delivery - SCN only
- L Cost Growth - SCN only
- M Shipping Escalation - SCN only
- N Completion of PY Programs*
- P Unfunded NSSN (Memo)*
- S Anticipated Escalation (Memo for historical updates)*

*Initial Spares must be identified by weapon system. The Item Control Number for each

initial spare entry must be identical to its parent weapons system.

4. Fiscal Year - The four digits of the applicable fiscal year.

5. Advance Procurement Fiscal Year - Enter the future fiscal year to which the advance procurement cost is associated.

6. Action Code -To ensure proper action against each Nomenclature Record and/or procurement data record, the following action codes are to be used:

Code 1 - Use only for nomenclature record.

Code 9 - Use only for changes to procurement program resources - Identifies all data changes either added to the file or net changes to an existing data record.

7. Program Budget Decision (PBD) Number - During the Program Budget Decision cycle only, enter PBD number (to include any revised PBDs).

8. Nomenclature Record - Enter only the proper English language title of the item to be procured which is most commonly used. Abbreviations, acronyms and codes will be avoided where possible. The item nomenclature will not exceed 45 alphanumeric characters:

a. SAR Item Designator - The single character "X" in the appropriate data field will indicate a SAR item.

b. Security Classification - Secret will be indicated as "S"; Confidential will be indicated as "C"; Unclassified will be indicated as "U."

c. Program Quantity - The quantity for a line item which has a quantity designator of "U" will be expressed in units; for a quantity designator of "T" enter the units quantity divided by 1,000; and for a quantity of "M" enter the units quantity divided by 1,000,000.

d. Identification Record -

Entries will be limited to "A" or "B" as specified and defined in Section 0401.

9. Formats are provided in Section 010704.

G. Instructions for Response to Procurement Appendix

1. General. Budget decision documents for procurement appropriations will contain a Procurement Appendix as an attachment. The Appendix requires DoD Components to record line item net changes to both quantity and TOA on SD Form 463 consistent with the expressed intent of the Program Budget Decisions (PBDs).

2. Instructions Pertaining to SD Form 463. Instructions for preparation of SD Form 463 appear on the reverse of the form. Floppy disk submissions should be made in accordance with SD Form 463 and meet the following criteria:

Floppy Disk Format:

- ASCII file.
- Character record length -- (length of record on code sheet -- i.e. 56 for the Procurement Annex data transactions).
- Formatted PC DOS - releases 2.0 or higher.
- 5¼ floppy disk or 3 1/2" diskette and
Double Sided and Double Density.
or
Double Sided and High Density.
- Attach a printed label showing the file name and the number of transactions it contains to the front of the disk.

3. All submissions will be in accordance with Procurement Data Elements and Record Formats printed in this chapter.

010503 Automated RDT&E Annex Database

A. Purpose and Objectives. This

Section provides for the maintenance of the Future Years Defense Program (FYDP) RDT&E Annex as an automated database which will be the primary structure for program element detail in a number of related RDT&E program documents. Included are the (1) RDT&E Programs (R-1) and all supporting budget backup exhibits, (2) FYDP Summary and Program Element Detail, (3) Selected Acquisition Reports, and (4) RDT&E Program and Financing Schedules of the President's Budget. The RDT&E Annex database also will be used to reconcile differences with the automated update of the Future Years Defense Program Summary and Program Element Detail for RDT&E accounts.

B. Applicability. The provisions of this Section apply to the Office of the Secretary of Defense (CSD), the Military Departments and the Defense Agencies (hereafter referred to as "DoD Components") that contribute data to the RDT&E Annex.

C. Reporting Requirements. The initial automated database was established consistent with the RDT&E data submitted to the Congress in support of the FY1976/1977 Budget. Since that time subsequent updates have been required coincident with submission of the (1) Program Objective Memoranda, (2) Budget Estimates, and (3) President's Budget. Specific guidance relative to approved changes, due dates and special requirements is provided in a memorandum from the Office of the Under Secretary of Defense (Comptroller) announcing each update.

D. General Instructions - Preparing the RDT&E Annex. The RDT&E Annex is consistent with the program element identification of resources contained in the Future Years Defense Program Summary and Program Element Detail. Data in the RDT&E Annex is summarized by appropriation account with recaps by budget activity, FYDP programs, and research category. Security classification of line items is determined by the submitting component *subject to OSD Security review*. Except for information published in the unclassified version of the RDT&E Programs (R-1) report, data contained in the RDT&E Annex may not be released outside the DoD without the written consent of the Under Secretary of Defense

(Comptroller). (In the case of the RDT&E Annex update for the Program Objectives Memorandum, this consent must come from the Director of Program Analysis and Evaluation.)

E. General Instructions - Preparing the RDT&E Programs (R-1). The R-1 document is derived from and consistent with the FYDP RDT&E Annex. The R-1 is provided annually to the DoD Oversight Committees of the Congress coincident with the transmission by the President of the Budget of the United States Government. An unclassified version is provided to OATSD (PA) under the provisions established by the Freedom of Information Act. The unclassified R-1 is the only document from the annex database available for public distribution. The minimum information required in the R-1 is as follows:

1. The program element line item data provided is PY, CY, BY1 and BY2.
2. The security classification shall be in accordance with the criteria set forth in Section 010108.
3. A detailed program element listing in budget activity sequence.

F. RDT&E Data Elements and Record Formats

1. Codes - Treasury Code, Component Code, and Budget Activity Code are as specified in Section 010506.
2. Program Element - These program element (PE) codes are published in the DoD 7045.7-H (FYDP Program Structure Handbook).
3. SAR Item Designator - The single character "X" in card column 31 in the Nomenclature Format, SD Form 463-1N, (Section 010704) will indicate a SAR item.
4. Action Code - To ensure proper action against each nomenclature record and/or RDT&E data record, the following action codes will indicate the desired action against the data base:

Code 1 - Use only for Nomenclature Record

Code 9 - Use Only for Changes to RDT&E Program Resources

5. Cost Type - Use cost type code A for program value.
6. Formats are provided in section 010704.

G. Instructions for Response to RDT&E Appendix

1. General. Budget decision documents for RDT&E appropriation will contain an RDT&E appendix as an attachment. The appendix requires the DoD components to record program element net changes to TOA on SD Form 463-1 consistent with the expressed intent of the Program Budget Decisions (PBDs).

2. Instructions Pertaining to SD Form 463-1. Instructions for preparation of SD Form 463-1 appear on the reverse side of the form. Floppy disk submissions should be made in accordance with SD Form 463-1 and meet the following criteria:

Floppy Disk Format:

- ASCII file.
- Character record length --
(length of record on code sheet -- i.e. 40 for the RDT&E Annex data transactions).
- Formatted PC DOS -- releases 2.0 or higher.
- 5¼ Floppy disk or 3 1/2" diskette
and
Double Sided and Double Density.
or
Double Sided and High Density.
- Attach a printed label showing the file name and the number of transactions it contains to the front of the disk.

3. All submissions, regardless of media will be in accordance with RDT&E data

elements and record formats printed in this chapter.

010504 Automated Construction Program Database

A. Purpose and Objectives. This section provides for the establishment of an Automated Construction Program Database to supplement the Defense components' military construction justification materials. The Construction Program also will be used to track Program Budget Decisions at the project level, track congressional action on the President's budget submissions, and provide the baseline data required for special analysis.

B. Applicability. The provisions of this section apply to all requirements financed by the Military Construction, NATO *Security Investment* Program, Base Realignment and Closure, Family Housing, *DoD Family Housing Improvement Fund* and Homeowners Assistance appropriations of the Departments of Army, Navy, Air Force and Defense-Wide as applicable.

C. Responsibilities. The DoD components will submit Construction Program data for their Active, Guard and Reserve forces construction projects, their portions of the Family Housing, *DoD Family Housing Improvement Fund* and Homeowners Assistance programs, and multi-service or national level projects for which they are executive agent as described in DoD Directive 7150.5, "Responsibilities for Programming and Financing Facilities at DoD Installations Utilized by Two or More DoD Components."

D. Reporting Requirements. Update submissions will coincide with the September budget submissions and the January budget presentation. Detailed requirements not contained herein will be specified by memorandum for all update submissions.

E. Construction Data Elements and Record Formats. The data elements authorized for entry into the Automated Construction Program Database are as follows:

1. Appropriation Code - As specified in Section 010506.

2. Component / Suffix Code - Same as above.

3. Budget Activity Code - Same as above.

4. Major Command Code - Any two digit numeric code (01 through 99) that will uniquely identify a major command for that component.

5. Location Code

a. State/Country Code - Use the applicable code given at Tables II and III at the end of Section 010504, Exigent minor construction and all other lump-sum amounts should use the worldwide unspecified state/country code "ZU."

b. Installation Code - Use any three digit numeric code, right justified zero filled, that will uniquely identify the installation within the state or country. The installation code for exigent minor construction and all other lump-sum amounts should be 9's filled.

6. Project Identification Code - Use any six digit numeric code, right justified zero filled, that will uniquely identify the project for this location. Code lump-sum values as described in Table I at the end of Section 010504. Classified projects should have a valid project identification code, but the title associated with the code should be "classified project."

7. Facility Category Code - Use the three digit code as specified in DoD Instruction 4165.14. This field will be 9's filled for "Exigent Minor Construction" and all Lump-Sum Records. Family Housing new construction projects (budget activity 01) must have a valid facility category code.

8. Fiscal Year Program - The two digits of the applicable fiscal year.

9. Action Code - To ensure proper action against each Nomenclature Record and/or Decision Record, the following action code (not to be confused with Action Document Code) will indicate the desired action against the database.

Code 1 - Use only for nomenclature record - Identifies the addition of major command.

Code 2 - Use only for nomenclature record - Identifies a change to a major command title already on file.

Code 3 - Use only for nomenclature record - Identifies the addition of an installation title record.

Code 4 - Use only for nomenclature record - Identifies a change to an installation title already on file.

Code 5 - Use only for nomenclature record - Identifies the addition of a project to the database.

Code 6 - Use only for nomenclature record - Identifies changes to a project record already on the file.

Code 9 - Use only for changes to construction program resources - Identifies all data changes either added to the file or net changes to an existing data record.

10. Cost Type - Cost type codes authorized for use are:

<u>Code</u>	<u>Cost Type</u>
A	Project Value
M	Memo non-add projects

Use the "M" code for projects proposed for authorization under the Military Construction Act but for which funding under the Military Construction Act is not proposed. (For instance, a project to be funded with prior year military construction savings or to be funded in another appropriation, such as procurement.)

11. Action Document Code - Each change, introduction of new data, or deletion of existing data to the database must be substantiated by an approved decision document. These documents are the only approved sources to reflect Secretary of Defense decisions and thereby authorize changes to the base file. The following codes are assigned to identify the appropriate documents.

- 01 Program Change Decision
- 02 Program Budget Decision
- 04 Program Decision Memorandum
- 16 Congressional Action

12. Document Decision Number - All transactions necessary to reflect the decision document directing the change will be coded consistently in this six character alphanumeric data element. Examples include, but are not restricted to the following:

<u>Type of Decision</u>	<u>Document Decision Number</u>					
	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>
PBD	3	0	1			
PBD,Revision (1st)	3	0	1	C		
PBD,Revision (2nd)	3	0	1	C	2	
PBD,Reclama (1st)	3	0	1	R		
PBD,Reclama (2nd)	3	0	1	R	2	
PBD, Rev to 2nd Reclama	3	0	1	R	2	C

13. Approval Date - The date of the decision document which approved the changes in six digits representing year, month, and day in that order.

14. Program Cost - The TOA amount will be expressed in thousands of dollars. Negative values should be represented by a minus sign to the immediate left of the dollar amount (e.g., -4328).

15. Title - This will be the Command, Installation or Project title, depending on the action code.

16. Authorization Indicator - Code "X" in this field if the project is subject to authorization. Code "P" in this field if the project, was authorized for appropriation in a prior year or code Y if the project was authorized in a prior year.

17. Major FYDP Program - Use the two digits of the applicable major Defense Program the project supports.

18. Special Interest Indicator - Use this code to indicate if the project falls into one of the special categories given below:

- 1 = Energy Conservation
- 2 = Air Pollution Abatement
- 3 = Water Pollution Abatement
- 4 = Noise Pollution Abatement

19. Formats are provided in section 019704.

F. Level of Detail

1. Data will be reported at the level specified for the justification material (DD Form 1391) in Chapters 6 and 7. A summary of the levels required follows:

2. Military Construction 1/

- Major Construction - project detail
- Minor Construction - lump-sum for exigent minor construction
- Planning and Design - lump-sum
- Supporting Activities - project detail

3. NATO Security Investment Program - lump-sum 1/

4. Base Realignment and Closure - lump-sum 1/

5. Family Housing Construction 1/

- Construction of new housing - project detail. Under normal conditions the project title should indicate the number of units to be constructed, e.g. "NEW CONSTRUCTION (265)"

- Construction Improvements - lump-sum
- Planning - lump-sum

6. Family Housing Debt, Operation & Maintenance 1/ Lump-sum for each budget activity except Operating Expenses, which will be reported by account as shown below:

- Operating Expense

- Management Account
- Services Account
- Utilities Account
- Furnishings Account
- Miscellaneous Account

- Leasing
- Maintenance of Real Property
- Interest Payments
- Mortgage Insurance Premiums

7. Homeowners Assistance

Fund 1/

- Payment to Homeowners
- Other Operating Costs
- Acquisition of Real Property
- Mortgages Assumed

8. DoD Family Housing Improvement Fund -lump sum 1/

1/ Nomenclature records for all lump-sum values will be generated by the OSD computer system; DoD Components should not submit nomenclature records for lump-sum values.

G. General Instructions - Updating the Construction Program Database.

1. General

a. Nomenclature Records - Nomenclature or title records are used to assign names to major commands, installations and projects, and are submitted by the components on Construction System Database Nomenclature Recording Form, SD Form 463-2N. The system will determine what is being assigned a name by examining the action code.

(1.) Major Commands - To assign a major command title, specify the treasury code, component/suffix code, two digit command code, action code 1 and title. Defense-Wide, Guard and Reserve accounts should have a command of "99" and a title of the account name. To change an existing command title, specify the same data as above, but use action code 2.

(2.) Installation - To assign an installation title, specify the Treasury code, component/suffix code, location code, action

code 3, command code and title. The title should not contain the state, e.g., "Fort Bragg, North Carolina." If an installation houses elements of several commands, there should be an installation transaction for each command having a project at that installation. To change an installation title, specify the same data as above, but use action code 4. (Note - the command code cannot be changed with a "4" record.)

(3.) Project - To assign a project title specify the treasury code, component/suffix code, budget activity, location code, project identification code, action code 5, major command, major FYDP Program, facility category code, special interest indicator, authorization indicator and title. An explanation of the data elements is given in paragraph E. of this section. The following items in a project nomenclature record may be changed by using action code 6: command code, major FYDP Program, facility category, special interest and authorization indicator codes, and project title. To change any or all of these data items, specify (from the record to be changed) the Treasury code, component/suffix code, budget activity, location code, project code, action code 6, fiscal year, and one or more of the items to be changed.

b. Decision Data Records -

The data records are used to assign values or adjust values for specific projects identified by the location and project identification and are submitted by the Components on Construction System Database Decision Reading Form, SD Form 463-2. An explanation of the data elements is given in paragraph E. of this section.

2. Classification. A project may be classified due to the nature of the project, the location of the project, or both. Since the Construction Programs (C-1) is an unclassified document generated from an unclassified database, use the conventions given below to desensitize the data:

a. If the location is classified, use the applicable special State/Country code given in Tables II and III at the end of this section.

b. If the project is classified, assign the project a title of "Classified Project."

c. If both location and project are classified, use both conventions given above.

d. The various DoD Components are responsible for ensuring that the database describing their projects does not contain classified information.

3. Initial Budget Submission. The initial September budget submission of Construction Program data will be consistent with data submitted for the budget. The document serial number (positions 29-31 of SD Form 463-2) will be the PBD wherein the resources for this project will be addressed, and position 32 of the record will contain an S. (Note - Additional requirements may be specified by the Memorandum calling for the update submissions.)

4. Decisions

a. PBDs for Military Construction, *NATO Security Investment Program*, Base Realignment and Closure, Family Housing, *DoD Family Housing Improvement Fund*, and Homeowners Assistance Fund will contain a Construction Appendix sheet as an attachment. The DoD components will record net changes to TOA by project on SD Form 463-2 consistent with the intent of the PBD. The SD Form 463-2 will be submitted to OUSD(C) (P/B) within five working days after the date of the PBD. This response will be shortened toward the end of the budget review.

b. If the Construction decision is reclamaed, it must be definitized to the level of detail contained in the PBD Construction Appendix. Reclama decisions will be processed in the same manner as the original decision document; however, SD Form 463-2 must be submitted by the DoD components to OUSD(C) (P/B) within 24 hours after receipt of the reclama decision.

5. Instructions Relating to SD Form 463-2 and SD Form 463-2N. Instructions for the preparation of SD Form 463-2 and SD Form 463-2N appear on the reverse side of the forms. Floppy disks are preferred in lieu of the forms. Floppy disk format: **MUST BE** ASCII; Character record length will be the same as the length of the record on the code sheet; formatted PC DOS -

release 2.0 or higher; 5 1/4" floppy disk or 3 1/2" diskette, (double sided and double density or double sided and high density - attach an outside printed label showing the file name, Component and number of transactions). All submissions, regardless of media, will be in accordance with Construction data elements and record formats outlined in paragraph E. of this section.

6. Status Reporting. Periodic status reports in the form of an updated C-1 and audit trail reports reflecting these decision adjustments will be provided. It is essential that these status reports be reviewed by the components on a recurring basis during the Budget Review to assure all concerned that PBDs and related decisions are accurately reflected in the Construction database.

TABLE I

<u>P.L.</u>	<u>Treasury Code</u>	<u>BA</u>	<u>Valid State/Country</u>	<u>Valid Installation</u>	<u>Valid Project ID</u>

*		04	"ZU"	"999"	"999904"
*	0834	01	"ZU"	"999"	"999901"

* Denote Budget Activities that are represented as Lump-Sum Amounts.

Note 1 - If State/Country Code is any of the special codes, installation maybe "999."

Note 2 - Must be a valid project number assigned via a nomenclature record.

Note 3 - Must be one of the following:
888805 Management Account
88810 Services Account
888815 Utilities Account
88820 Furnishings Account
88825 Miscellaneous Account

Note 4 - For 0702A - Use 7020A
For 0703N - Use 7030N
For 0704F - Use 7040F
For 0706D - Use 7060D

Note 5 - For 0702A - Use 7025A
For 0703N - Use 7035N
For 0704F - Use 7045F
For 0706D - Use 7065D

010505 Automation Requirements for the Biennial Budget Estimates Submission

A. Purpose. The budget estimates submissions are entered in the Budget Review System from machine-readable magnetic media provided by the Military Departments and Defense Agencies. This chapter prescribes the specifications for submission of machine-readable data.

B. Submission Requirements

1. Exhibits PB-2, PB-2A, and PB-4 (on-board yearend strength only), as prescribed in Section 010305, will be supported by automated records in the record layouts specified in Section 010704 and in the detail prescribed by the Budget Account Title File Listing. All data will be listed.

2. Machine-readable data must follow the record layouts shown in Section 010704. Negative numeric values will be preceded by a minus sign. A hard copy listing of each data type must accompany the machine-readable data which will be one of the following magnetic media:

- a. 5¼ inch floppy or
3½ inch microdiskette:

Must be IBM PC/AT/386/486/*Pentium* compatible in PC DOS releases 2.0 or higher, double sided, double density, or high density format. Data will be in one or more DOS ASCII files with up to 70 characters per record. Unused portions of the record will be blank filled.

b. Data submitted must have each record followed by a carriage return and tabs between appropriated fields. *Templates with fill-in capability are available on floppy disks for use with MS Word.*

3. In addition to the hard copy exhibits specified in Section 010305, a single hard copy, listing each record, will be provided. Separate listings will be prepared for financial data, *civilian full-time equivalent (FTE)* data, and military end strength data. The format for the hard copy printout will show data in the same order as that prescribed for the record layouts. Control totals will not be included in the machine-readable data.

4. Machine-readable data conforming to paragraph B.2. of this section for all accounts, the corresponding hard copy printout, two copies of Exhibit PB-1, *two copies* each of Exhibits PB-2 and PB-2A, and two copies of Exhibits PB-4 and PB-8 will be submitted concurrently with the budget estimates and delivered to Room 3B872, Pentagon. The delivery should be made by the component designated principal or alternate coordinator for budget submissions.

5. Components unable to provide machine-readable input as specified in paragraph B.2. of this section should make prior arrangements with the Directorate for Program and Financial Control, Room 3B872, Pentagon.

C. Record Layouts

1. The following transcript sheets provide the record layout required for input on machine-readable media. Examples of these transcript sheets and their coding instructions are provided in Section 010704.

DD Form 2232	Budget Estimates Recording Form (\$), PY, CY, BY1, and BY2.
DD Form 2233	Decision Recording Form (\$), PY, CY, BY1, and BY2.
DD Form 2234	Outyear Recording Form (\$), BY+1, BY+2, BY+3, and BY+4.
DD Form 2235	Budget Estimates Recording Form (End Strength), PY, CY, BY1, and BY2.
DD Form 2236	Decision Recording Form (End Strength), CY, BY1, and BY2.
DD Form 2236-1	Outyear Recording Form (End Strength), BY+1, BY+2, BY+3, and BY+4.

2. Coding Instructions.

Coding instructions for preparation of the transcript sheets are included on the reverse of

each form. These codes are precise and must be coded as shown in the “Budget Account Title File Listing,” which lists the valid budget activity/budget subactivity codes for each appropriation as well as all valid financing and object classification codes. This listing will be distributed by the Directorate for Program and Financial Control prior to the September budget submission. In addition, Section 010506 provides a sample budget activity/budget subactivity structure as well as a listing of all valid financing and object classification codes.

D. Technical Instructions

1. Submission of Budget Estimates

a. Budget Submission

(Dollars): Coincident and consistent with the hard copy submission of the budget estimates, Military Departments and Defense Agencies, as applicable, will submit machine-readable data entries for all schedules and for all applicable budget accounts for all years. Detailed data entries only will be submitted since subtotals and summary totals are computer generated. Input data will be formatted in accordance with DD Form 2232 on a media type specified in paragraph B.2. of this section. All TOA values for PY, CY, BY1, and BY2 will be submitted on DD Form 2232 in accordance with the detail prescribed by the Budget Account Title File Listing. Amounts will be in agreement with the PB-2 and PB-2A exhibits.

b. Budget Submission

(Personnel Data): Budget estimates submission of on-board year end personnel data entries for military end strength and *civilian full-time equivalents (FTEs)* will be formatted in accordance with DD Form 2235 and will be in exact agreement with the PB-4 exhibit. Personnel data will be submitted for all years in accordance with the detail prescribed by the Budget Account Title File Listing.

2. Submission of Outyear Estimates

a. Budget Submission

(Dollars): The submission for By+1 through BY+4 TOA will be made coincident with the budget submission. Input to the database will be formatted in accordance with DD Form 2234 at the

PDM level, by appropriation account and budget subactivity.

b. Budget Submission

(Personnel Data): Budget estimates for BY+1 through BY+4 military end strength and *civilian full-time equivalents (FTEs)* will be made coincident with the budget submission. Input to the database will be formatted in accordance with DD Form 2236-1 and agree with the PB-4 exhibit.

3. Decision Recording

a. DD Form 2233 and DD Form 2236 will not be used for budget estimates submissions. These forms are used to record decisions documented by Program Budget Decisions (PBDs).

b. DD Form 2234 and DD Form 2236-1 are used for budget estimates submissions and for recording PBD decisions.

010506 Name Edit System (NES) Structure and Description

A. Purpose The NES File reflects the official Department of Defense budget account structure for submission of the budget estimates in machine-readable form (as described in Section 010505, paragraph B.2.). The structure is documented in the Budget Accounts Title File Listing, a sample of which is provided in Section 010506. The complete Budget Accounts Title File Listing will be distributed by the Directorate for Program and Financial Control to the Services and Defense Agencies prior to the September budget submission.

B. Organization of the NES File The NES File is structured to validate Budget Plan, Obligation Plan, Financing, Budget Authority, Expenditure Tail, and Object Classification input. Valid Budget Plan and Obligation plan entries are present for each appropriation account and are established at the budget activity level (in some cases, budget subactivity). These entries comprise the “Program by Activities” section for each account and must be identical to the entries shown in the hard copy Program and Financing Schedule submission. Financing, Budget Authority, Expenditure Tail, and Object Classification entries are valid for use in any applicable appropriation account. Where specific Financing, Budget

Authority and Expenditure Tail entries are restricted for use, the appropriate accounts and/or fund types against which these entries may be used are identified in the "comments" section of the Budget Accounts Title File Listing.

C. Responsibility. Responsibility for the accuracy of the NES File rests with the OUSD(C)(P/B). Components should notify the Directorate for Program and Financial Control, OUSD(C)(P/B), of any changes considered to be necessary to properly reflect budget estimates through budget subactivity level prior to transmission to OSD.

D. Input Requirements

1. Input coding for all budget estimates will be entered precisely as listed in the Budget Accounts Title File Listing. Features which should be considered in the preparation of data are:

a. The presence of a "P" and/or a "\$" in the "PER/\$\$ Inputs" column indicates those budget activities/ subactivities (program budget decision) against which resources (\$ or personnel data) maybe entered. Requests to add a "P" or a "\$" to an existing line may be made to the Directorate for Program and Financial Control, OUSD(C)(P/B), through the respective Program/Budget Directorate responsible for that appropriation.

b. Military Personnel Accounts:

(1) The Military Departments will prepare and submit the military personnel account data on a total obligation basis, not on an operations basis (see Budget Accounts Title File Listing). Machine-readable input for military personnel dollars should not be submitted by Defense Agencies.

(2) In addition, military personnel costs associated with intelligence programs will be entered under budget activity 20 (see Budget Accounts Title File Listing). An offsetting entry must be made against the "NFIP Offset" budget subactivity such that the sum of these intelligence program entries net to zero.

(3) The Military Departments. will prepare and submit end strength

data on a component basis; i.e., Army submits data on personnel assigned to Army as well as Army personnel assigned to each Defense Agency (see Budget Accounts Title File Listing). The Defense Agencies must coordinate their end strength requirements with the Military Departments prior to the Military Departments' data submissions.

c. Input coding for the Defense Business Operations Fund must include the appropriate three position budget subactivity code assigned to each business area for operating and capital expenses, *civilian full-time equivalents (FTEs)*, and military end strengths.

d. Obligation Plan data will be coded with a "2" over the preprinted "1" in column 1 for all accounts listed below and for any other "multiyear" account

0107D	Office of the Inspector General
0116D	<i>Summer Olympics</i>
0130D	Defense Health Program
0131D	Real Property Maintenance
0132D	Disaster Relief
0819D	Humanitarian Assistance
0828D	Reinvestment for Economic Growth
2031A	Aircraft Procurement, Army
2032A	Missile Procurement, Army
2033A	Procurement of Weapons and Tracked Combat Vehicles, Army
2034A	Procurement of Ammunition, Army
2035A	Other, Procurement, Army
1506N	Aircraft Procurement, Navy
1507N	Weapons Procurement, Navy
1508N	<i>Procurement of Ammunition, Navy and Marine Corps</i>
1611N	Shipbuilding and Conversion, Navy
1810N	Other Procurement, Navy
0380N	Coastal Defense Augmentation
1109N	Procurement, Marine Corps
3010F	Aircraft Procurement, Air Force
3020F	<i>Missile Procurement, Air Force</i>
3011F	<i>Procurement of Ammunition, Air Force</i>
3080F	Other Procurement, Air Force
0300D	Procurement, Defense-Wide
0350D	National Guard and Reserve Equipment, Defense
0360D	Defense Production Act

	Purchases
0390D	Chemical Agents and Munitions Destruction, Defense
2040A	RDT&E, Army
1319N	RDT&E, Navy
3600F	RDT&E, Air Force
0400D	RDT&E, Defense-Wide
0450D	Developmental Test and Evaluation, Defense
0460D	Operational Test and Evaluation, Defense
2050A	Military Construction, Army
1205N	Military Construction, Navy
3300F	Military Construction, Air Force
0500D	Military Construction, Defense- Wide
2085A	Military Construction, Army National Guard
3830F	Military Construction, Air National Guard
2086A	Military Construction, Army Reserve
1235N	Military Construction, Navy Reserve
3730F	Military Construction, Air Force Reserve
0103D	Base Realignment and Closure Account, Part I
0510A	<i>Base Realignment and Closure, Army</i>
0510N	<i>Base Realignment and Closure, Navy</i>
0510F	<i>Base Realignment and Closure, Air Force</i>
0510D	<i>Base Realignment and Closure, Defense</i>
7020A	Family Housing, Construction, Army
7030N	Family Housing, Construction, Navy
7040F	Family Housing, Construction, Air Force
7060D	Family Housing, Construction, Defense-Wide

Budget activities/subactivities F11020, F13020, F14020, F17020, F21020, and F24020 may be used only in the obligation plan for these accounts. Conversely, F17010 and F21910 may be used only in the Budget Plan. Where budget activity Rxx, Reimbursable Program, applies to both Budget Plan and Obligation Plan, separate data entries must be coded with a "1" in column 1 for Budget

Plan, and a "2" coded over the preprinted "1" in column 1 for Obligation Plan. All other financing budget activities not listed above apply to both budget plan and obligation, and therefore will be coded only once.

e. Concept Obligations will be coded budget activity C1x for Direct, C2x for Reimbursable, or C3x for the Special Fund accounts as follows:

Direct - BA C1x

8008N	Office of Naval Records& History
8063A	Ainsworth Library Trust Fund
8064A	Fisher Houses Trust Fund
8165D	Foreign National Employee Separation Pay Trust Fund
8168D	National Security Education Trust Fund
8174A	National Science Center Gift Fund
8335D	Voluntary Separation Trust Fund
8361D	<i>Reserve Mobilization Income Insurance Fund</i>
8716N	Navy General Gift Fund
8723N	Ships Stores Profits, Navy
8730N	USN Academy Museum Fund
8733N	USN Academy General Gift Fund
8927A	Army General Gift Fund
8928F	Air Force General Gift Fund
9082N	Interfund Transactions, Navy
9086D	Interfund Transactions, Defense
9088D	Interfund Transactions Foreign National Employee Separation Fund
9089D	Interfund Transactions for Voluntary Separation Trust Fund
0001A	Offsetting Receipts, Army
0002N	Offsetting Receipts, Navy
0003F	Offsetting Receipts, Air Force
0004D	Offsetting Receipts, Defense Agencies
0006A	Receipts Civil, Army
0007N	Receipts Civil, Navy
0008F	Receipts Civil, Air Force
0021A	Rocky Mountain Arsenal Receipts
0024D	Defense Cooperation Receipts
0025D	Interest on Defense Cooperation Receipts
0085N	Offsetting Receipts Kaho' Olawe

	Island Fund
0086A	Fees collected for use of National Science Center
0088D	Offsetting Receipts Disposal of Real Property, Def
0089D	Offsetting Receipts Lease of Real Property, Def
0093D	Offsetting Receipts DoD Overseas Military Facility Recovery, Def
0094A	Royalties for use of DoD Military Insignia and Trademark
0095D	Proceeds from Transfer or Disposal of Commissary Facilities

Reimbursable - BA C2X

8146D	Surcharge Collections, Sales of Commissary Stores, Defense
8418F	Air Force Cadet Fund
8423N	Midshipmen's Store, USN Academy

Special Fund (Direct) - BA C3X

5098A	Restoration of the Rocky Mountain Arsenal, Army
5185N	Kaho 'Olawe Island Fund, Navy
5188D	Disposal of Real Property
5189D	Lease of Real Property
5193D	DoD Overseas Military Facility Investment Recovery
5194A	DoD 50th Anniversary of WWII Commemoration Account, Army
5195D	Transfer/Disposal Commissary Facilities, Defense
5286A	National Science Center, Army
5441D	<i>Burdesharing and Other Cooperative Activities, Defense</i>
0041D	<i>Contributions for Burdensharing and Other Cooperative Activities, Defense (Special Fund Receipts)</i>

E. Object Classification Schedules

1. The traditional object classification numbers which are specified in OMB Circular A-11 and identify the specific object classes are augmented in the automated budget review record by a prefix code which identifies Direct Obligations (Prefix T1x), Reimbursable Obligations (Prefix T2x), Allocation Accounts (Prefix T3x), and Distribution by Component or Agency (Prefix T5x).

2. Object classification schedules with Allocation Accounts will be coded so that the sum of object classes T1xxxx, T2xxxx, and T3xxxx equals the sum of T5xxxx.

3. All revolving and management accounts will be coded in the reimbursable (Prefix T2xxxx) object class series followed by the appropriate object class number.

4. Object class data will be submitted for all accounts listed in the NES File which reflect obligations (including concept obligations) in the Program and Financing data in the PY, CY, BY1 or BY2.

F. Expenditure Tail.

1. The Expenditure Tail section of the Program and Financing Schedule (Exhibits PB-2 and 2a as shown in Section 010702) will be supported by automated records in the detail specified in Section 010506, paragraph H. The amount of this detail has been minimized to the extent possible by computer processing certain basic data. These basic data are identified as "DIRECT INPUT." All other entries are identified as "COMPUTER SUM . . ." and need not be coded by submitting components.

2. Care will be exercised in the handling and coding of arithmetic signs.

3. For revolving funds with TOA, payments in all years which are attributable to appropriations will be entered against the current year (F90110). With this exception, all remaining revolving and management fund data entries for both payments and collections will be made against the prior year and not the current year, and will be entered against F90111.

4. Expenditure tail data is required to be submitted for the following Defense Accounts:

0390D	Chemical Agents& Munitions Destruction, Defense
0804D	NATO Security Investment Program
4090D	Homeowners Assistance Fund

Components should not submit expenditure tail data for remaining Defense accounts with a

component code of D; this data will be prepared by the Directorate for Program and Financial Control, OUSD(C)(P/B).

G. Stub entries for OMB Circular A-11, Exhibit 32A, Program and Financing (excluding Expenditure Tail)

H. P&F Schedule Computational Checks Diagnostic Report Entries

1. Three BRS reports have been developed to provide diagnostic and balancing checks for appropriation accounts. A description of these checks and corresponding diagnostic messages follows for each report.

2. Report 22 performs a series of balancing checks between types/groups of data within an account and, in certain cases, within a Defense Agency. There are currently 20 checks:

Number

- | | |
|---|---|
| <ol style="list-style-type: none"> 1. Budget plan budget authority vs. obligation plan budget authority. 2. Obligation plan budget authority vs. financing budget authority. 3. Budget plan budget authority vs. financing budget authority. 4. Total direct program vs. total direct object classification. 5. Total reimbursable program vs. total reimbursable object classification. 6. Line 10.00, total program vs. line 99, total object classification. 7. Line 10.00, total program plus total orders vs. obligations incurred, net. 8. Recovery of prior year obligations (-) vs. adjustments in unexpired accounts (-). 9. Current year budget authority vs. current year outlays. 10. Budget plan total reimbursable program vs. budget plan offsetting collections (orders) (-). 11. Unobligated balance, end of year vs. unobligated balance, start of year one year forward. 12. Obligated balance, end of year vs. obligated balance, start of year one year forward. | <ol style="list-style-type: none"> 13. Contract authority obligated balance, end of year vs. contract authority obligated balance, start of year one year forward. 14. Contract authority obligated balance, end of year vs. contract authority obligated balance, start of year plus adjustments. 15. Obligated balances, end of year (net) vs. obligated balances, start of year (net) plus adjustments minus outlays. 16. Revolving fund TOA vs. financing budget authority, excluding contract authority and unob. bal. BA transfers. 17. Revolving fund TOA vs. TOA offset (R00). 18. Receipt budget authority vs. receipt current year outlays. 19. Deficiency balance, start of year vs. deficiency balance, end of year in the previous year. 20. Deficiency balance, end of year vs. deficiency balance, start of year plus adjustments. <p>3. The number of checks actually performed for an account will vary depending on the type of account:</p> <p>Annual (single year)
Multi-year
Revolving fund with TOA
Other revolving & management fund
Trust fund
Civil trust fund
Trust revolving fund
Offsetting receipts, military
Offsetting receipts, civil</p> <p>For example, diagnostic 6 compares Program& Financing line 10.00, total program to Object Classification line 99, total object classification. For an annual account, total program is the sum of budget plan direct (TOA) and reimbursable budget activities; for a multi-year account, the sum of obligation plan direct and reimbursable budget</p> |
|---|---|

activities; and for a trust fund, the sum of budget plan concept obligations budget activities.

4. Each diagnostic will display at a minimum a message detailing the data used, the diagnostic error message, the amounts accumulated for the check and the difference(s) found.

5. The tables that follow list the diagnostics performed for each type of account. For each diagnostic, the data used and error message(s) are displayed. The data used will be specified as budget activity (BA) or budget activity/subactivity (BASA). Error messages will describe the data type/group being tested and the test condition that fails.

I. Report 23 performs three basic types of obligation plan tests for multi-year accounts.

1. The first test checks the prior year (PY), current year (CY), and the two biennial year (BY1, BY2) columns for each obligation plan budget activity (BA) within an account, searching for negative amounts. If one or more negative amounts are found within a BA, a diagnostic message is generated. This test is performed at the agency level for Defense Agency accounts.

2. The second test checks the spendout rate for the PY, CY, BY1, and BY2 fiscal year programs (FYP) for each budget activity and in total. The formulas used for this test are as follows:

Two year accounts:

Budget Plan PY = Obligation Plan
PY + CY

CY = CY + BY1

BY1 = BY1 + BY2

BY2 ≥ BY2

Three year accounts:

Budget Plan PY = Obligation Plan
PY + CY + BY1

CY = CY + BY1 + BY2

BY1 ≥ BY1 + BY2

BY2 ≥ BY2

Five year accounts:

Budget Plan PY = Obligation Plan
PY + CY + BY1 + BY2

CY ≥ CY + BY1 + BY2

BY1 ≥ BY1 + BY2

BY2 ≥ BY2

3. These checks are performed at the agency and account level for Defense Agency accounts.

4. A final check is made to ensure that an obligation plan exists when budget plan amounts are present in a multi-year account. For each fiscal year program from the prior year thru the second biennial year, if budget plan program is present (a non-zero amount), then obligation plan program must also be present. This check is made at the account total level.

I. Report 24 performs the following series of miscellaneous diagnostic tests:

Number

1. For most accounts, unobligated balance, end of year entries (F24xxx) must be positive. Entries for the exceptions must be negative.

2. For most accounts, unobligated balance, start of year entries (F21xxx) must be negative. Entries for the exceptions must be positive.

3. Undistributed object classification entries (T19201, T29201, T39201) must not be present.

4. For most accounts, object classification entries must not be negative. Entries for the exceptions must be negative.

5. For multi-year accounts, the F17020 entry (Recovery of prior year obligations) cannot have a Fiscal Year Program (FYP) value greater than that of the prior year FYP value.

6. The F32490 and F69100 entries in an account must be positive.

7. Appropriation rescission proposal, enacted rescission, and GRH reduction entries (currently F40350, F40355, F40360, F40365, F40800, and F40850) must be negative.

8. Except for revolving funds with TOA and Military Personnel NFIP and NFIP offset entries, undistributed budget activity (020) entries must not be present.

9. For most accounts, Direct Program (TOA), Reimbursable Program, and Concept Obligations must be positive at the budget activity level. In most cases the exceptions must be negative.

10. Except for revolving and management fund and trust revolving fund accounts, obligated balance, start of year (F72xxx) and obligated balance, end of year (F74xxx) entries must be positive.

11. The TOA offset entry (R00000) for revolving funds with TOA must be negative.

12. With certain exceptions, the Fiscal Year Program (FYP) value for current appropriation entries (F40xxx) in multi-year accounts cannot be less than that of the prior year FYP value.

Execution Reports (DD 1176/1002/725 reports). The P&F Schedule for each DoD account is printed annually in the Appendix of the US. Government as part of the President's Budget.

13. In the obligation plan for multi-year accounts, an unobligated balance, end of year, should not be present in the last year of availability.

If one or more of the above tests fail for an account, an appropriate diagnostic message will be generated. Except for the obligated balance test (number 10), all tests are performed at the agency level for Defense Agency accounts.

J. Financial Accounting Record Reconciliation to the President's Budget Submission Data

1. Primary checkpoints as defined in the following tables will be accomplished to insure internal consistency between the financial accounting position and the submission of Prior Year (PY) actuals that will be shown in the President's Budget submission.

2. Section 32.9 of OMB Circular A-11 requires actual data for past periods. A special update of the PY column, providing the PY actual values consistent with the official departmental accounting reports (DD Form 1176, DD Comp 1002, and DD Comp 725), will be made. The date of submission to OUSD(C) via machine-readable input of these changes will be determined and provided by OUSD(C). The data will be input to the OUSD(C) Budget Review System (BRS). Verification will be performed by OUSD(C)(P/B) using BRS and accounting reports. The impact of these prior year changes on the current and biennial year 1 and 2 columns shall relate to financing. Therefore, application to these columns will be limited to the financing section of the program and financing schedules containing the budget estimates. In the event that a change to any budget plan is indicated, it will be made by PBDs issued subsequent to this PY update.

3. *The following table displays the relationship between the restructure Program and Financing (P&F) Schedule in OMB Circular No. A-11 dated June 1995 and DoD's Budget Review System database. The table also displays the source of the actual data reconciled with yearend DoD Budget*

F74105	74.95	Orders on hand from Federal sources	Line 13B *p		
F74000	74.99	Total unpaid obligations, end of year	Line 13A *p		
		Outlays (gross):			
F87000	87.00	Total outlays (gross)	Line 14A *q		
		Offsets:			
		Against gross budget authority and gross outlays:			
F88000	88.00	Offsetting collections (cash) from Federal sources			Col H *t
F88400	88.40	Offsetting collections (cash) from non-Federal sources			Col H *t
F88900	88.90	Total offsetting collections (cash)	Line 14B *l		
		Against budget authority only:			
F88950	88.95	Change in orders on hand from Federal sources	*m		
F88960	88.96	Adjustment to expired accounts orders (-)	-Line 3 *n		
		Net budget authority and outlays:			
F89000	89.00	Budget authority (net)	*w		
F90000	90.00	Outlays (net)	Line 14 *u		

Note: This table pertains to budgetary data which DoD must submit to OMB. Separate instructions are provided annually to the Services and Defense Agencies for updating prior year actuals in DoD's Budget Review System (BRS) database. Below footnotes pertain to FY 1996 actuals as of 30 Sep 96 in the FY 1998/1999 Budget.

Footnotes:

- *a Unexpired accounts
- *b Direct program obligations of unexpired accounts plus recoveries
- *c Equals F70000 (A-11 code 70.00), for computation see new budget authority gross, detail
- *d Unobligated bal transfers from (+) or to (-) other accounts, use FY 1996 Transfer Status Report (FAD 743-96-1), see Budget Account Title (NES) listing for F22XXX codes for Unob bal transfers
- *e Refers to those accounts whose obligation life ends 30 Sep 96
- *f Based on G-R-H sequestration of unobligated balances

Footnotes (Continued)

- *g Sum of F21000 to F23900 (A-11 codes 21.99 to 23.85)
- *h Equals net of F23900 and F23950 (A-11 codes 23.90 and 23.95), must equal Lines 8&9 of accounts not expiring on 30 Sep 96
- *i Appropriated amount, less general congressional reductions, less rescissions should net to Line 1A, and amounts on Line 5 applicable to general reductions, see OMB Circular A-11, Sec 32.3, for 40.xx codes for general fund accts and 60.xx for special fund and trust fund accts
- *j Transfers F41000 & F42000 (A-11 codes 41.00 & 42.00) use FY 1996 Transfer Status Report (FAD 743-96-1)
- *k Equals sum of F40000 to F42000 (A-11 codes 40.00 to 42.00)
- *l Applies to all years as shown on Line 14B, Total Column, DD 1176
- *m Change in orders from start of year to end of year, equals Line 13B, DD 1176, Total Column (exclude canceled accounts) less Line 11B, DD 1176, Total Column
- *n Equals minus (Line 3 for expired accounts minus canceled account amount(s) on Line 13B, DD 1176)
- *o Must equal Line 3, DD 1176, unexpired accounts
- *p Unpaid obligation balances at start of year apply to Total Column, DD 1176, and at end of year to Total Column less canceled account amounts, on DD 1176. Orders are negative (-) in BRS.
- *q Total gross outlays equal Line 14A, Total Column, DD 1176
- *r Equals Line 7 less Line 4, DD 1176, of expired accounts less Line 13A, DD 1176, of canceled accounts
- *s Minus (Line 4, DD 1176, unexpired accounts) (equals recoveries for multi-year and revolving fund accts)
- *t Non-Federal collections result from orders received from outside the Government that are accompanied by cash advances and are included as part of Line 1, Column H, DD 725, all years; Federal collections equal total of Column H for all years less non-Federal amounts
- *u Net outlays equal Line 14, DD 1176, Total Column and must agree with Treasury's Annual Report
- *v Gross budget authority equals sum of A-11 codes 43.00 for general fund accts (63.00 for trust and special fund accts) plus A-11 code 68.90
- *w Net budget authority equals A-11 codes 70.00 minus amounts for codes (88.90 to 88.96)
- *x BRS codes used above are not all inclusive. See Budget Account Title Listing (NES File) for latest codes

DF	AF Budgeted by DoD

M. Object Classification Balancing. The Budget Review System (BRS) balances direct obligations (prefix "T1"), reimbursable obligations (prefix "T2"), and, in special cases, prefix "T3" and prefix "T4" in the Object Classification schedule to direct program and reimbursable program, respectively, in the budget plan for single year accounts, and in the obligation plan for multi-year accounts. Differences between "plan" and object classification direct program and reimbursable program are added to/subtracted from default direct obligation and reimbursable obligation object classification lines, respectively. The following table lists these default lines for each account. When no default is specified for direct obligations for an account, that account will have no object classification direct obligations. Similarly, when no default is specified for reimbursable obligations for an account, that account will have no object classification reimbursable obligations.

Object Classification Default Lines Table

BRS Default Object Class Code	BRS Account by Component							
	Army		Navy		Air Force		Defense	
Tx1111 - Personnel compensation: Full-time permanent	1705a 1805a	2065a 2080a			3740f 3840f	5095f	0104d	
Tx1171 - Personnel compensation: Military personnel	2010a 2060a	2070a	1105n 1108n	1405n 1453n	3500f 3700f	3850f		
Tx1301 - Benefits for former personnel							0040d 8098d	
Tx2201 - Transportation of things			3980n					
Tx2321 - Rental payments to others					7045f		7065d	
Tx2541 - Contract O&M of facilities							5188d	5189d
Tx2601 - Supplies and material	2032a 2034a 4528a 8064a		1107n 1507n 1806n 5095n	8008n 8423n 8716n			0360d 4555d 4930d 4931d	4950d 4965d 8164d 8311d
Tx3101 - Equipment	2030a 2031a 2033a 2035a		0380n 1109n 1505n 1506n	1508n 1611n 1810n 4557n	3010f 3011f 3020f 3080f	8928f	0107d 0300d 0350d 0390d	3910d
Tx3201 - Land and structures	2050a 2085a 2086a 7020a		1205n 1235n 1236n 7030n		3300f 3730f 3830f 7040f		0500d 0803d 0804d 7060d	
Tx4101 - Grants, subsidies and contributions	8174a 8927a		8723n				0826d 8168d 8335d	
Tx4201 - Insurance claims and indemnities							8097d	
Tx4401 - Refunds					8418f			
Tx9201 - Undistributed	8063a						0100d 4093d 8165d	
T49701 - Offsetting receipts	0001a 0006a 0021a 0086a	0094a	0002n 0007n 0085n 9082n		0003f 0008f		0004d 0024d 0025d 0036d 0044d 0088d	0089d 0093d 0095d 9086d 9088d 9089d
Tx2521 - Other services with the private sector	Default for all other BRS accounts							

Notes:

- (1) 'x' value of 1 = Direct obligations, 2 = Reimbursable obligations, 3 = Allocation obligations, 4 = Offsetting receipts, and 5 = Distributed obligations
- (2) Exceptions to above table for reimbursable default object class codes: (a) for accounts 2065a and 2080a the reimbursable default code is T22601, and (b) for accounts 1806n and 3840f the reimbursable default code is T22321

N. Budget Accounts Title File Listing

The “Budget Accounts Title File Listing” documents the official Defense budget account structure for submission of budget estimates in machine-readable form. An extract of this listing is included on the following pages. The extract contains the following listings: (1) *a partial list* of current appropriation accounts, (2) a sampling of Budget Plan Obligation Plan Name/Codes, (3) listing of valid Financing, Budget Authority, Expenditure Tail codes, and (4) Object Classification entries. The complete “Budget Accounts Title File Listing” will be distributed separately to the Military Departments and Defense Agencies prior to the September budget submission by OUSD(C) (P/B) Program and Financial Control Directorate.

0106 UNIFORM BUDGET AND FISCAL
ACCOUNTING CLASSIFICATIONS

010601 General

A. This Section establishes the functional title classifications and subdivisions thereof by which appropriation and fund accounts of the Department of Defense are required to be arranged, grouped, or classified in budgetary and fiscal presentations. These classifications are designed to permit consolidation of budget and fiscal data for the several components of the Department of Defense into over-all Departmental summaries. This Section also delineates the Defense-Wide/Defense Agencies related account structures.

B. These instructions cover all appropriation and fund accounts for military functions of the Department of Defense.

010602 Functional Titles and Subdivisions

The following functional titles and subdivisions thereof are prescribed for use in appropriate budgetary and fiscal presentations:

Military Personnel

- Active Forces
- Reserve Forces

Operation and Maintenance

- Operating Forces
- Mobilization
- Training and Recruiting
- Administration and Service-Wide
- Activities

Procurement

- Aircraft
- Missiles
- Weapons and Tracked Combat Vehicles
- Procurement of Ammunition
- Other Procurement
- Chemical Agents Munitions Destruction
- Weapons
- Shipbuilding & Conversion
- Procurement, Marine Corps
- Procurement, Defense-Wide
- National Guard & Reserve Equipment

Research, Development, Test, and Evaluation

- Basic Research
- *Applied Research*
- Advanced Technology Development
- Demonstration/Validation
- Engineering and Manufacturing Development
- *RDT&E* Management Support
- Operational System Development

Military Construction

Family Housing

Special Foreign Currency Program

Revolving and Management Funds

Defense-Wide Contingencies

Offsetting Receipts

Trust Funds

Interfund Transactions

010603 Definitions of Functional Titles and Subdivisions

This Section provides definitions of functional titles and subdivisions thereof by enumerating the appropriations, budget activities, programs and projects which are classified thereunder. These definitions are provided on the following pages.

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS

FUNCTIONAL TITLE - MILITARY PERSONNEL

1. The functional title "Military Personnel" for military functions is defined as comprising the appropriations listed below. Since each appropriation, in its entirety, is classified within a single first level subdivision of the functional title, the appropriations are grouped by the subdivisions.

Active Forces

21_2010	Military Personnel, Army
17_1453	Military Personnel, Navy
17_1105	Military Personnel, Marine Corps
57_3500	Military Personnel, Air Force

Reserve Forces

21_2070	Reserve Personnel, Army
17_1405	Reserve Personnel, Navy
17_1108	Reserve Personnel, Marine Corps
57_3700	Reserve Personnel, Air Force
21_2060	National Guard Personnel, Army
57_3850	National Guard Personnel, Air Force

2. Lower level subdivisions susceptible to consolidation are available under the uniform budget and accounting structure prescribed for these appropriations in Chapter 2.

FUNCTIONAL TITLE - OPERATION AND MAINTENANCE

1. The functional title "Operation and Maintenance" for military functions is defined as comprising the appropriations listed below:

21_2020	Operation and Maintenance, Army
17_1804	Operation and Maintenance, Navy
17_1106	Operation and Maintenance, Marine Corps
57_3400	Operation and Maintenance, Air Force
97_0100	Operation and Maintenance, Defense-Wide
97/_0107	Office of the Inspector General
21_2080	Operation and Maintenance, Army Reserve
17_1806	Operation and Maintenance, Navy Reserve
17_1107	Operation and Maintenance, Marine Corps Reserve
57_3740	Operation and Maintenance, Air Force Reserve
21_2065	Operation and Maintenance, Army National Guard
57_3840	Operation and Maintenance, Air National Guard
21_1705	National Board for the Promotion of Rifle Practice, Army
97_0104	<i>U.S. Court of Appeals for the Armed Forces</i>
97_0105	Drug Interdiction, Defense
97_0106	Goodwill Games
97/_0116	Summer Olympics
97/_0130	Defense Health Program
97/_0131	Real Property Maintenance, Defense
97/_0132	Disaster Relief
97_0133	Payment to Coast Guard

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS
FUNCTIONAL TITLE - OPERATION AND MAINTENANCE (CONTINUED)

97_0134	Former Soviet Union Threat Reduction
97X0801	Foreign Currency Fluctuations, Defense
17X0810	<i>Environmental Restoration Fund, Navy</i>
21X0810	<i>Environmental Restoration Fund, Army</i>
57X0810	<i>Environmental Restoration Fund, Air Force</i>
97X0810	Environmental Restoration Fund, Defense
97/_0819	<i>Overseas Humanitarian, Disaster and Civil Aid</i>
97_0827	World University Games
97/_0828	Defense Reinvestment for Economic Growth
97_0829	World Cup USA 1994
97_0832	<i>1995 Special Olympics World Games</i>
21X5098	Restoration of the Rocky Mountain Arsenal
97X5187	Defense Cooperation Account
97X5188	Disposal of DoD Real Property
97X5189	Lease of DoD Real Property
97X5193	Overseas Military Facility Investment Recovery
21X5194	DoD 50th Anniversary of WW II Commemoration
21X5286	National Science Center, Army
17X5185	Kaho' Olowe Island Conveyance Remed Env Rest Fd
97X5195	Transfer/Disposal Commissary Fac Fd.
97X5441	<i>Burdensharing and Other Cooperative Activities, Defense</i>

FUNCTIONAL TITLE - PROCUREMENT

1. The functional title "Procurement" for military functions is defined as comprising the following appropriations:

21/_2031	Aircraft Procurement, Army -Aircraft -Modification of Aircraft -Spares and Repair Parts -Support Equipment and Facilities
21/_2032	Missile Procurement, Army -Other Missiles -Modification of Missiles -Spares and Repair Parts -Support Equipment and Facilities
21/_2033	Procurement of Weapons and Tracked Combat Vehicles, Army -Tracked Combat Vehicles -Weapons and Other Combat Vehicles - <i>Spares and Repair Parts</i>
21/_2034	Procurement of Ammunition, Army -Ammunition -Ammunition Production Base Support

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS

21/_/2035	Other Procurement, Army -Tactical and Support Vehicles -Communications and Electronics Equipment -Other Support Equipment <i>-Spares and Repair Parts</i>
17/_/1506	Aircraft Procurement, Navy -Combat Aircraft -Trainer Aircraft -Other Aircraft -Modification of Aircraft -Aircraft Spares and Repair Parts -Aircraft Support Equipment and Facilities
17/_/1507	Weapons Procurement, Navy -Ballistic Missiles -Other Missiles -Torpedoes and Related Equipment -Other Weapons -Other Ordnance -Spares and Repair Parts
17/_/1508	<i>Procurement of Ammunition, Navy and Marine Corps</i> <i>-Ammunition, Navy</i> <i>-Ammunition, Marine Corps</i>
17/_/1611	Shipbuilding and Conversion, Navy -Other Warships -Amphibious Ships -Auxiliaries, Craft and Prior-Year Program Costs
17/_/1810	Other Procurement, Navy -Ships Support Equipment -Communications and Electronics Equipment -Aviation Support Equipment -Ordnance Support Equipment -Civil Engineering Support Equipment -Supply Support Equipment -Personnel and Command Support Equipment -Spares and Repair Parts
17/_/0380	Coastal Defense Augmentation
17/_/1109	Procurement, Marine Corps -Ammunition -Weapons and Combat Vehicles -Guided Missiles and Equipment -Communications and Electronics Equipment -Support Vehicles

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS

	-Engineer and Other Equipment
	-Spares and Repair Parts
57_/_3010	Aircraft Procurement, Air Force
	-Combat Aircraft
	-Airlift Aircraft
	-Trainer Aircraft
	-Other Aircraft
	-Modification of In-Service Aircraft
	-Aircraft Spares and Repair Parts
	-Aircraft Support Equipment and Facilities
57_/_3011	<i>Procurement of Ammunition, Air Force</i>
	<i>-Ammunition, Air Force</i>
57_/_3020	<i>Missile Procurement, Air Force</i>
	-Ballistic Missiles
	-Other Missiles
	-Modification of In-Service Missiles
	-Spares and Repair Parts
	-Other Support
	-Munitions and Munitions-Related Equipment
57_/_3080	Other Procurement, Air Force
	-Vehicular Equipment
	-Electronics and Telecommunications Equipment
	Other Base Maintenance and Support Equipment
	<i>-Spares and Repair Parts</i>
97_/_0300	Procurement, Defense-Wide
	Major Equipment
	-Special Operations Command
	<i>-Chemical/Biological Defense</i>
97_/_0350	National Guard and Reserve Equipment
	-Reserve Equipment
	-National Guard Equipment
97_/_0360	Defense Production Act Purchases
97_/_0390	Chemical Agents and Munitions Destruction, Defense
	Chemical Agents & Munitions Destruction,
	RDT&E
	Chemical Agents & Munitions Destruction, Proc
	Chemical Agents & Munitions Destruction,
	O&M
97X0117	<i>Defense Modernization Account</i>

FUNCTIONAL TITLE - RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The functional title "Research, Development, Test, and Evaluation" for military functions is defined as comprising the following appropriations and budget activities:

21/_/2040	Research, Development, Test, and Evaluation, Army
17/_/1319	Research, Development, Test, and Evaluation, Navy
57/_/3600	Research, Development, Test, and Evaluation, Air Force
97/_/0400	Research, Development, Test, and Evaluation, Defense-Wide
97/_/0450	Developmental Test and Evaluation, Defense
97/_/0460	Operational Test and Evaluation, Defense

Budget Activity

Basic Research

Applied Research

Advanced Technology Development

Demonstration/ Validation

Engineering and Manufacturing Development

RDT&E Management Support

Operational System Development

FUNCTIONAL TITLE - MILITARY CONSTRUCTION

1. The functional title "Military Construction" for military functions is defined as comprising the appropriations listed below. Since each appropriation, in its entirety, is classified within a single first level subdivision of the functional title, the appropriations are grouped by the subdivisions.

Active Forces

21/_/2050	Military Construction, Army
17/_/1205	Military Construction, Navy
57/_/3300	Military Construction, Air Force
97/_/0500	Military Construction, Defense-Wide
97/_/0103	Base Realignment and Closure Account I
97X0510	Base Realignment and Closure Account, <i>Army, Navy, Air Force, and Defense</i>
97X0803	Foreign Currency Fluctuations, Construction, Defense
97X0804	North Atlantic Treaty Organization <i>Security Investment Program</i>

Reserve Forces

21/_/2085	Military Construction, Army National Guard
57/_/3830	Military Construction, Air National Guard
21/_/2086	Military Construction, Army Reserve
17/_/1235	Military Construction, Naval Reserve
57/_/3730	Military Construction, Air Force Reserve

2. Lower level subdivisions susceptible to consolidation are available under the uniform accounting classifications prescribed for these appropriations in Chapter 6, Section 0602, and Chapter 7, Section 0702.

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS

FUNCTIONAL TITLE - FAMILY HOUSING

The functional title "Family Housing" for military functions is defined as comprising the appropriations listed below:

97X0834	<i>DoD Family Housing Improvement Fund</i>
21_/_7020	Family Housing, Construction, Army
21_7025	Family Housing, Operations and Debt, Army
17_/_7030	Family Housing, Construction, Navy
17_7035	Family Housing, Operations and Debt, Navy
57_/_7040	Family Housing, Construction, Air Force
57_7045	Family Housing, Operations and Debt, Air Force
97_/_7060	Family Housing, Construction, Defense-Wide
97_7065	Family Housing, Operations and Debt, Defense-Wide
97X4090	Homeowners' Assistance Fund, Defense
97X4166	<i>DoD Family Housing Improvement Fund, Direct Loan Financing Account</i>
97X4167	<i>DoD Family Housing Improvement Fund, Guaranteed Loan Financing Account</i>

FUNCTIONAL TITLE - SPECIAL FOREIGN CURRENCY PROGRAM

The functional title "Special Foreign Currency Program" for military functions is defined as comprising the appropriation listed below:

97_/_0800	Special Foreign Currency Program
-----------	----------------------------------

FUNCTIONAL TITLE - REVOLVING AND MANAGEMENT FUNDS

The functional title "Revolving and Management Funds" for military functions is defined as comprising the accounts listed below. Since each account, in its entirety, is classified within a single first level subdivision of the functional title, the accounts are grouped by the subdivisions.

Public Enterprise Funds

97X4555	National Defense Stockpile Transaction Fund
97X4093	William Langer Jewel Bearing Plant Fund
97X4950	Pentagon Reservation Maintenance Fund
17X4557	National Defense Sealift Fund

Intragovernmental Funds

97X4930	Defense Business Operations Fund
97_3910	ADP Equipment Management Fund
97X4965	Emergency Response Fund, Defense
17X3980	Navy Management Fund
21X4528	Army Conventional Ammunition Working Capital Fund
97X4931	<i>Buildings Maintenance Fund</i>

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS
FUNCTIONAL TITLE - DEFENSE-WIDE CONTINGENCIES

The functional title “Defense-Wide Contingencies” for military functions is defined as comprising the accounts listed below:

97 9912	Other Legislation (including Management Improvements)
97 9918	<i>General Transfer Authority Outlay Allowance</i>
97 9925	<i>DoD-wide Savings Proposals</i>

FUNCTIONAL TITLE - OFFSETTING RECEIPTS

The functional title “Offsetting Receipts” for military functions is defined as comprising the accounts listed below:

21 0001	Offsetting Receipts, Army
17 0002	Offsetting Receipts, Navy
57 0003	Offsetting Receipts, Air Force
97 0004	Offsetting Receipts, Defense Agencies
21 0021	Rocky Mountain Arsenal Offsetting Receipts
97 0024	Defense Cooperation Receipts
97 0025	Interest on Defense Cooperation Receipts
97 0041	<i>Contributions for Burdensharing and Other Cooperative Activities, Defense</i>
17 0085	Offsetting Receipts, Kaho’ Olawe Island Fund
21 0086	National Science Center Receipts, Army
97 0088	Offsetting Receipts, Disposal of DoD Real Property
97 0089	Offsetting Receipts, Lease of DoD Real Property
97 0093	Offsetting Receipts, DoD Overseas Military Facility Investment Recovery
21 0094	Offsetting Receipts, WWII Anniversary, Army
97 0095	Proceeds from Transfer/Disposal Commissary Facilities

NOTE: Offsetting receipt accounts 002x, 004x, 008x and 009x listed above are for Special Fund accounts. The account numbering for these Special Fund receipt accounts are bogus and are unique to the Budget Review System *because the database will not accept a Treasury code with a decimal suffix.*

FUNCTIONAL TITLE - TRUST FUNDS

The functional title “Trust Funds” for military functions is defined as comprising the accounts listed below:

21X8063	Ainsworth Library (Trust)
97X8335	Voluntary Separation Incentive Fund
21X8927	Army General Gift Fund
17X8733	USN Academy General Gift Fund
17X8730	USN Academy Museum Fund
17X8716	Navy General Gift Fund
17X8723	Ships Stores Profit, Navy
17X8008	Office of Naval Records and History Fund
57X8928	Air Force General Gift Fund
17X8423	Midshipmen’s Store, USN Academy (Trust Revolving)
57X8418	Air Force Cadet Fund (Trust Revolving)
97X8361	<i>Reserve Mobilization Income Insurance Fund</i>

FUNCTIONAL TITLE AND SUBDIVISION DEFINITIONS

97X8164	Surcharge Collections, Sales of Commissary Stores, Defense (Trust Revolving)
97X8165	Foreign National Employees Separation Pay, Defense
97X8168	National Security Education Trust Fund, Defense
21X8064	Fisher Houses Trust Fund, Army
21X8174	National Science Center Gift Fund, Army

FUNCTIONAL TITLE - INTERFUND TRANSACTIONS

The functional title "Interfund Transactions" for military functions is defined as comprising the accounts listed below:

17 9082	Interfund Transactions, Navy
97 9086	Interfund Transactions, Defense
97 9088	Interfund Transactions, For Nat Empl Sep Pay
97 9089	Interfund Transactions, Vol Sep Incentive

NOTE: Interfund Transaction receipt accounts listed above are for Trust Fund accounts. The account numbering for these Interfund Transactions are bogus and are unique to the Budget Review System *because the database will not accept a Treasury code with a decimal suffix.*

The accounts listed below are delineated between Defense-Wide coverage and Defense Agencies related accounts:

Defense-wide

U. S. Court of Appeals for the Armed Forces
 Foreign Currency Fluctuations, Defense
 Summer Olympics
 Environmental Restoration, Defense
 Goodwill Games
 World University Games
 Defense Health Program
 Disaster Relief
 Emergency Expenses
